The Public Library dates its existence from the year 1868. Much of the credit for its inception belongs to the late David Mack, who circulated the original subscription papers for a "Free Public Library," was one of the Library Committee and the first librarian. With him, by vote of the town, were associated upon the committee the chairman of the Board of Selectmen, the chairman of the School Committee, and Rev. Amos Smith and Rev. J. W. Turner, "the two settled clergymen of the town, *ex-officio*." Rev. Mr. Smith declined to serve and the chairman of the School Committee resigned his position upon that board and so ceased to be a member of the Library Committee. The first report of the committee, made by Mr. Mack, showed the number of volumes in the library to be 817, of which 667 were acquired by purchase and 118 were received from the library of the Farmers' Club. A room in the new High School building, adjacent to the hall occupied by the town for its meetings, was assigned to the library, and the town appropriated \$500 towards its organization and maintenance. The room was open for the delivery of books one hour each week. In 1872 the librarian made his second report, showing an increase to 1650 volumes, and including an earnest appeal for enlarged accommodations, which was renewed in the following year. At the annual meeting in 1873 the town voted to place the

library in the charge of trustees, and one of the first steps taken by the new officers was to remove the library to a larger room in the basement of the Unitarian Church. Two members of the board have served upon it from its organization to the present time, and the term of office has from the beginning been, by election, for three years. Mr. Mack resigned the position of librarian in 1876 and was succeeded by Walter H. Stone. The catalogue of 1877 contains the names of 2849 volumes. The purposes of the management were concisely stated in the report for that year. "Believing that a few good books thoroughly read, are more beneficial than any course of reading more extended in surface, but lacking in depth, the trustees commend, to younger readers especially, that they learn to draw deep from 'the wells of English undefiled' of our standard writers, while at the same time provision is made for gratifying the taste of those who read for recreation, and derive profit therefrom incidentally." In the report for the year 1881 the trustees congratulated the citizens upon the approaching completion of the new Town Hall and Library Building, and acknowledged a donation of \$1000 from an anonymous "well-wisher of the Public Library." The town increased two-fold in the following year its annual appropriation for the library. This appropriation has, since that time, averaged nearly \$1000, including the amount returned to the town from the "Dog Tax," after the damages done by these animals in the county have been settled. The removal of the library to its present quarters was made in the summer of 1882, at which time a reading-room was also instituted and open to the public two afternoons and evenings each week and for about three hours every Sunday. Mr. Stone resigned his position in 1883, and Mr. Edward W. Brown, the present librarian, was appointed in his stead. In 1886 the privilege was granted to the High School of the use of the library, by allowing the principal to draw from it twenty-five volumes at any one time, to be used in the school at his discretion. The library now contains 6700 volumes, a large proportion being works of standard value, and in the reading-room are to be found the leading popular periodicals of the day.

The hall in the High School building not being conveniently located, and being totally inadequate to the needs of the town, preliminary steps were taken in March, 1881, looking to the erection of a Town Hall and Public Library building. In April of that year an appropriation was made by unanimous vote of the town and a Building Committee appointed, consisting of W. J. Underwood, J. V. Fletcher, J. S. Kendall, D. F. Learned, Varnum Frost, S. S. C. Russell and W. E. Stowe.

A lot, eligibly located and containing upwards of 40,000 square feet, was presented to the town by Elisha Atkins. The structure erected upon this site is so complete in all its appointments that it has been

the model for similar buildings in thriving towns of the Commonwealth. It is of Queen Anne architecture, built of brick and terra cotta, situated at the junction of Pleasant Street and Concord Avenue. In a basement, wholly above the natural surface of the ground, which slopes toward the south, are the rooms of the officers of the town, with an apartment for chemical engine and hose-carriage at the rear. Upon the main floor above, lighted from the north, is the Town Hall, with its gallery, lobby and ante-rooms, stage and dressing-rooms, the latter being in a half-story under the stage and above the engine-room. The chief entrance to the building is under a broad, deeply-recessed arch, in the southwestern front, the place of honor being given to a bronze tablet bearing the names of the Belmont heroes who fell in the War of the Rebellion.

A side entrance upon the same wall of the building admits to a corridor between the main hall and the rooms above the town offices which are occupied by the Public Library. These rooms consist of a waiting-room, in which is the desk of the librarian, separated by a wooden screen from the reading-room at the front of the building, with fire-place and alcove in the circular tower, and a book-room which is reached by a passage-way behind the librarian's desk, and which has space for about 15,000 volumes. The architect was Henry W. Hartwell, of Boston, and the cost of the building was nearly \$50,000. It was dedicated June 22, 1882, on one of those perfect days which nature provides in the loveliest month of the year. The formal exercises of dedication consisted of prayer by Rev. W. H. Teel; presentation of the keys of the building by W. J. Underwood of the Building Committee; their reception by Josiah S. Kendall, of the Board of Selectmen, and T. W. Davis, of the Trustees of the Library; the "patriarchal blessing" of the Commonwealth, by His Excellency, John D. Long; and short addresses by President Robert R. Bishop, of the State Senate; Henry W. Muzzey, of Cambridge, and Dr. J. C. Harris, of Arlington, representing at the time those places in the General Court; W. H. Ingraham, of Watertown; Mansur W. Marsh and Rev. Daniel Butler, of Belmont. The exercises were interspersed with music by the Belmont Choral Society. An extract from the remarks of one of the speakers, as printed in an account of the proceedings, sets forth so clearly what may be called the motive of the building, that it is reproduced here:

"It has been said that, at the creation, Eve was taken, not from man's head to be his ruler, nor from his feet to be his slave, but from his side as his equal, his companion and his friend. So, upon the same level, have you placed the Public Library, representative of the education to be derived from books, and this hall, in which the lessons are to be taught by living men. Here we are to be developed by intercourse with the minds of our fellows; there we may hold communion with the spirits of those long passed away.

There we can learn the history of the past; here we ourselves are to be makers of history, while we exercise the highest powers of human government in the meetings of a pure democracy regulating its own internal affairs. In both places we are to instruct and train our children in the duties and responsibilities of citizenship. But the fitness does not end thus. On yonder tablet, without the doors of this building, are the names of those who, in the discharge of such responsibilities, gave their lives for their country, and we honor their memory to-day. Long be it ere the land is called upon to undergo another baptism of blood. But in the peaceful walks of daily life, where, nevertheless, hard battles may be fought and victories gained, or on the field of death, if God so wills, may one and all who gather here to stand beside us or follow in our foot-steps, so live and act and so die as to prove how faithfully and thoroughly the great lessons of duty and patriotism have been taught within these walls."

A promenade concert in the evening closed the pleasures of the day, during which the whole town had kept "open house," and all seemed to rejoice in the final removal of the stigma affixed by a speaker in the Legislature a quarter of a century before, when he reproached the people for asking for incorporation as a town before they had within their limits "a church, a public-hall, or even a blacksmith-shop."

The Park south of the railroad tracks, at the junction of Common Street and Concord Avenue, was laid out in the year 1881. Part of the funds needed for its purchase were raised by subscription, and the balance was furnished by the town, which has assumed its maintenance. The Park Commissioners are W. J. Underwood, J. Willard Hill and Edwin F. Atkins, who have served continuously since the creation of the Board in 1882.

The grounds around the railroad stations adjoining are also parks in themselves, and show the results to be obtained by intelligent care.

The Fire Department of the town of Belmont may be said to date from about the year 1826, when an engine was located near Meeting-house Hill. The engine and company connected with it bore the name of "Protector, No. 3," while in the town of Watertown. In Belmont the name became "Protector, No. 1."

In 1833 the town of West Cambridge purchased an engine for the South District. The engine and company stationed in this locality is "Howard, No. 2." In 1873 a Babcock Extinguisher, to be manned by a company of ten men, was purchased, and located on Pleasant Street near Concord Avenue. On the completion of the Town Hall, this machine was placed in a suitable room in the basement. In 1887, after the introduction of a system of water supply, two hose companies were organized and provided with wagons carrying 600 feet each of hose. The wagons were built by a Belmont manufacturer, Mr. Eden Price,

and are stationed, one at Waverley, in the village hall building, and the other at the Town Hall. The companies are named respectively Waverley Hose, No. 1, and Belmont Hose, No. 2. In addition to this organization the town is the owner of nearly forty Johnson hand-pumps, distributed among householders. The various organizations have a fair record of service. It may be noted as an historical fact that they do not go so far afield at the present time as they were once inclined to do, in the days when steam fire-engines were less common, and the aid of a body of enthusiastic workers was welcomed by the adjoining towns as a valuable auxiliary in conquering the devouring element, and of late years no attempt has been made to reach and extinguish the rising moon. In June, 1890, a fire-alarm telegraph was put in operation, with signal-boxes at a few points, and alarms struck on the bell of the Congregational Church at Waverley, on a large gong at the Town Hall and on small bells at the houses of the engineers. The engineers of the department are David Chenery, chief; Herbert H. Russell, George A. Prentiss and David S. McCabe.

The post-office at Belmont was established in 1856. Dr. J. L. Alexander was the first postmaster. He was succeeded a few years later by the present incumbent of the office, Aaron A. Adams.

The post-office at Waverley was established in 1858. The first postmaster was Seromus Gates, who held the office about fifteen years, and served in the mean time a term of enlistment in the Forty-second Massachusetts Regiment in 1864. He was succeeded by Larra W. Munroe. The present postmaster is Herbert H. Russell.

The unanimity with which the town, in 1881, proceeded to the erection of the Town Hall has already been spoken of. The most serious difference in opinion among the voters was of earlier date and is worthy of passing notice. In May, 1871, a petition was presented to the selectmen for the laying out a road from North Street in Waverley, over the Highlands and Wellington Hill to the southerly line of Arlington, there to connect with a similar road from the principal street in Arlington, the whole to bear the name of Highland Avenue. The selectmen viewed the premises and laid out the road substantially as asked for. It was to be nearly two miles in length, and to be built at an expense of perhaps \$30,000, but probably more money would have been needed to complete it in a satisfactory manner. At the annual meeting in 1872 the action of the selectmen came before the town for acceptance. It was at once evident that there was strong opposition to the project, many of the voters feeling that the town would receive a benefit from the road entirely disproportionate to the outlay incurred. Consideration of the article in the warrant was at once proposed to the adjourned meeting to be held a month later, and at that time the town voted to again postpone all consideration of the subject to the next annual meeting, and also refused

to pay for the surveying and plans which had been made. March 4, 1873 the town voted not to accept the road. April 7th a motion was made to reconsider this vote. The motion to reconsider was lost, and, as it was known that the county commissioners had been applied to to lay out the road as a county way, parts of the proposed avenue lying in two towns, a committee was appointed to appear before that Board and oppose any action. It was, however, voted to pay the expenses incurred by the selectmen in procuring a survey. July 28th, upon an order from the commissioners to build the road, action was postponed for a month to obtain further information as to expense, etc., and to allow bids to be made for building. August 25th the town voted not to build. The matter was again brought up in a meeting held September 22d, upon a proposition to construct the road without sidewalks, and with a narrow road-bed for the time being. By a vote of more than two to one it was then voted that the town "refuse to build Highland Avenue, so-called, as ordered by the county commissioners, either thirty or fifty feet wide, or with or without sidewalks, or in any manner." As the commissioners did not endeavor to carry their order into effect, the subject ceased for the time to be an issue in local politics. The bids for construction showed a great difference in opinion among contractors as to the cost, the lowest bid being \$26,500, the highest in the neighborhood of \$90,000.

In 1877 a proposition was made that the commissioners be asked to lay out the road "in an economical manner," not to cost over \$18,000, certain modifications having been made in the plans. Consideration of the subject was indefinitely postponed, the vote standing 120 to eighty-six, and the effort to construct the road was never renewed.

The petition of the Watertown Water Supply Company to the Legislature of 1885, for authority to lay mains and supply water to inhabitants of Belmont, led the town to take action looking to a system of works under its own control. A committee was appointed to appear before the legislative committee and act as might best protect the interests of the town. The result of their labors appeared in the passage of a bill empowering the town to provide an independent supply, or to contract with the Watertown Co. or the city of Cambridge, on such terms as might be agreed upon. The act was at once accepted by the town. In the following winter a movement was inaugurated in the village of Waverley, having for its object the commencement of operations under the act. This movement was soon merged in a more extended action on the part of citizens throughout the town, a citizens' committee of twenty was organized, and at the following annual town-meeting, after a sharp parliamentary contest, the town voted to proceed with the work. The decided majority obtained by the friends of the measure disarmed its opponents, and the necessary appropriations were made

by a unanimous vote. The Water Commissioners elected at a subsequent meeting were W. J. Underwood, T. D. Blake and Gustavus C. Holt, who still continue in office. The town has about ten miles of street mains, with sixty-nine hydrants, (the system is being extended from year to year), which are connected with the pipes of the Watertown Water Supply Co., and carry the water obtained by that company from basins dug near the Charles River near Bemis Station in Watertown. The town divides with the company the receipts from private services. At the expiration of its contract with the Supply Company, the town is at liberty to make a new contract, or to provide an independent supply if it so desires. The system gives general satisfaction.

GAS INTRODUCED.—Gas for public lighting was introduced into the town in 1867. The expense was so great in proportion to the benefit received, and the Arlington Gas Light Co., which holds the right to lay pipes in the streets, not doing that work except in a small section of the town, the lighting of the streets was performed mainly by gasoline, from 1874 to 1889. Dissatisfaction with the results opened the way for the introduction of the electric light. Early in the year 1889 the Somerville Electric Light Co. introduced an experimental service, and found little difficulty in obtaining a vote of the town favorable to a contract for a short term of years. The system is of incandescent lamps, with arc lights at a few central points. The system has not yet come into use for domestic lighting, nor, with a single exception, for business purposes.

THE CIVIL WAR.—The record of the town in the Civil War is a highly honorable one. With a total population of less than 1250, it furnished, under the twelve calls of the President of the United States, one hundred and forty-seven men, and paid out as a town and by subscription of citizens, upwards of \$26,000 for bounties and other direct expenses of the town in filling its quota. Those who went into the service could not do so accompanied by their neighbors and friends, but were obliged to serve with strangers. Half a dozen men in any one regiment was as large a group as went together into the service. The bronze tablet at the entrance of the Town Hall records the names of those who made the supreme sacrifice—the gift of their lives—for the sake of the nation. The inscription is as follows:

In Memoriam

JOHN LOCKE, Sept. 22, 1862.	JAMES MCGINNIS, June 24, 1868.
CHARLES V. MARSH, Missing.	ALBERT C. FROST, Sept. 17, 1863.
WILLIAM H. BENSON, Oct. 10, 1862.	LEWIS H. MARSH, May 13, 1864.

The surviving veterans are associated in the Grand Army of the Republic, with Francis Gould Post, No. 36, of Arlington, under whose direction the annual ceremonies in the town on Memorial Day are conducted.

A NEW HALL.—Until the year 1871, Waverley Hall was the name given to the hall in the second story of the store building erected by the Waverley (Land) Co., near the railroad station at Waverley. The building in that year became private property, and alterations were made by which the hall ceased to exist. A substitute was provided by the town in the second story of the new school-house, erected in 1874. When it became necessary to use this for school purposes, the initiatory steps were taken at a meeting of residents of the village, at the house of George H. Stearns, looking to the erection of a building in which provision could be made for meetings for religious and social purposes. After careful deliberation a stock company was formed in 1881, called the Waverley Hall Company, which proceeded to erect a suitable building on the south side of Church Street. The structure is of the Swiss style of architecture, two and one-half stories in height, forty by sixty feet in size, and has a tower in which is a bell, contributed by citizens, and a clock, voted by the town. The building was provided with furniture from the proceeds of a fair, supplementing private subscription. The lower story contains a store, and the room of the Waverley Hose Company. The main hall, with its stage and convenient dressing-rooms, occupies the second story, and the half-story above is devoted to a kitchen and small hall which can be used for society purposes, and for a supper-room. The present board of directors are John Fenderson, president; F. E. Whitcomb, vice-president; G. C. Holt, clerk and treasurer; Isaac Watts, J. L. Ellis, G. H. Stearns and H. M. Ellison.

PHYSICIANS.—It is a testimony to the healthfulness of Belmont that for many years it had no resident physician. Those who needed medical assistance called upon the doctors in the towns around, and the same practice is largely followed to-day. Dr. George H. Caldwell was located in Waverley in 1876 and 1877, but was engaged in other business, while attending to such calls as were made upon him. Dr. George W. Jones commenced practice in Belmont in 1879, and removed to Cambridgeport in 1881. The present physicians are Dr. H. A. Yenetchi, from 1885, and Dr. L. B. Clark, who established himself at Waverley early in the present year.

SECRET SOCIETIES.—*Belmont Lodge of Free and Accepted Masons* was erected in March, 1864, under a dispensation from William Parkman, Grand Master, and a charter was granted in March, 1865, to eleven Master Masons, viz.: William B. Bothamly, William W. Mead, William J. Underwood, Jonas B. Chenery, George W. Ware, Jr., Orlando M. Homer, Charles L. Heywood, Horace H. Homer, John Alexander, John G. Smith and Albert Higgins. Messrs. Bothamly, Underwood and H. H. Homer are still members of the lodge, the membership of nearly all the others having been terminated by death. The Worshipful Masters have been William B. Bothamly, William

W. Mead, Alvin L. Fisher, George H. Porter, Henry M. Haines, John H. Lakin, Charles E. Chenery, George H. Chenery, William M. Nassau, William Munroe, John H. Pettinger, J. Lucius Ellis, Frank Chandler, James D. Evans and William H. Pierce.

The lodge met in the (old) Waverley Hall until 1870, in the Town Hall in the High School building until 1880. The lodge-room in the station of the Fitchburg Railroad, at Belmont, was dedicated by Charles A. Welch, Grand Master, and officers of the Grand Lodge, February 26, 1880. The lodge has a membership of 75. William W. Mead, the second Master, died August 14, 1883, while holding the office of secretary. He had been devoted to the interests of the lodge from its formation, and no mention of the body would be complete which did not include a tribute to his memory. He was prominent also in the affairs of the town, having been a member of the School Committee from 1872 to 1881, and town clerk from 1871 until his death. He was the son of Samuel O. Mead, who was one of the leading spirits in the movement for the incorporation of the town and in the formation of the Belmont Congregational Society.

Waverley Council, No. 313, Royal Arcanum, was instituted April 30, 1879, at the hall in the school building at the corner of North and Waverley Streets. Its meetings were held at different places until 1882, when a lease was taken of the upper rooms in the new Waverley Hall building. The Past Regents of the Council are William Munroe, H. W. Ball, T. W. Davis, J. H. Pettinger, John Fenderson, G. H. Stearns, Isaac Watts, F. E. Whitcomb, J. L. Ellis, J. D. Evans, G. C. Holt and W. H. Benjamin. The present officers are W. G. Roberts, Regent; H. S. Harris, Vice-Regent; J. B. Perault, Orator; W. H. Benjamin, Past Regent; C. W. Benjamin, Secretary; Edward Haskins, Collector; H. H. Russell, Treasurer; J. R. Mackessy, Jr., Chaplain; Benjamin Hamman, Guide; B. A. Harris, Warden; W. J. Reed, Sentry. The Council is in a flourishing condition.

BELMONT SAVINGS BANK.—In 1885 a charter was obtained from the Legislature for the Belmont Savings Bank largely through the instrumentality of Hon. J. V. Fletcher, who was a member of the Committee on Banks and Banking. The use of a room in the Town Hall was granted gratuitously to the bank, which was organized in the latter part of that year, and commenced business in January following. About a year after, the bank suffered from the depredations of burglars, who carried away bonds and other securities of several thousand dollars in value and a small sum of money. In spite of the interruption and delay in realizing income occasioned by the robbery, the bank has paid dividends regularly and is upon a substantial footing. Its officers remain as when first organized, and are as follows: President, J. V. Fletcher; Vice Presidents, J. S. Kendall, G. F. Blake, Frederic Dodge and J. O. Wellington; clerk,

T. W. Davis. The above, with J. H. Fletcher, Jacob Hittinger, T. D. Blake, J. L. Ellis, Henry Frost, G. C. Holt, J. E. Locke, Chandler Robbins, A. E. Hill, J. W. Hill and D. F. Learned, constitute the Board of Trustees. The treasurer is W. L. Chenery.

The deposits in April, 1890, amounted to \$42,442.41.

INDUSTRIES.—Until the annexation of the Mount Auburn District to Cambridge, the cutting and storing of ice was a leading industry during the winter months, the first ice exported from this to warmer countries having been taken from Fresh Pond by Frederick Tudor, who sent a cargo to Martinique in 1805. The War of 1812 put an end to the traffic for a time, but with concessions from the Cuban government it was resumed a few years later. The amount exported by Mr. Tudor in 1832 was forty-two hundred tons, all of which was taken from Fresh Pond. In 1833 the first shipment was made to the East Indies. Belmont's representative in the ice trade was Jacob Hittinger, a sketch of whose life is appended to this article.

The manufacture of brick in the town was begun in 1873 by the Cambridge Brick Company, on the territory afterwards annexed to Cambridge. The company was not successful, and the works were abandoned. In 1888 Parry Brothers & Company bought twenty acres of land on Concord Avenue, three-fourths of a mile from the Belmont station, and have a plant in successful operation. Near this are the sausage works of W. H. Burke, established in 1886. Wagons are manufactured by Eden Price, at the corner of Pleasant and Brighton Streets. Belmont has always been, however, pre-eminently an agricultural community. Special attention has been paid for many years to the cultivation of small fruits, to say nothing of the days when the strawberries from Belmont were always the first in the Boston markets, long before railroad transportation was reduced to the science which enables us to enjoy "the best berry that God ever made" before the snows of winter have ceased to fall upon our hillsides; passing without mention the festivals of the years gone by, when from far and near guests came to taste the fruit in the atmosphere that had brought it to perfection. The census returns of 1885 show that the town is first in the county in the value of its fruit products, and at the same time second in the value of vegetables raised for the market. The acreage devoted to these purposes is limited, lying mainly in the eastern portion of the town. It was said with truth at the time of its incorporation that Belmont took from both West Cambridge and Watertown much of their richest land, some of it being, in the opinion of good judges, the best farming land in the State. In the northern and western sections the soil is generally good, but not so deep or fertile.

The dairy products are very small. The town is notable in stock-raising for having been the first place in the country in which a purely-bred herd of Hol-

stein cattle was maintained. This was at the "Highland Stock Farm" owned and carried on for many years by Winthrop W. Chenery, and until recently in the possession of a member of his family. Importations were made by Mr. Chenery in 1852, '54, '59 and '61. "The considerations which in the first instance led to these importations were a confident belief in the superiority of the dairy cows of North Holland . . . and also in their adaptation to the climate of New England, which in its variableness is strikingly similar to that of Holland." The animals imported in 1861 formed the ground-work of the present Holstein stock of this country. In 1872, Mr. Chenery prepared the Holstein Herd-Book, which was published by authority of the Association of Breeders of Thoroughbred Holstein Cattle, of which he was then president.

Following the usual course of places convenient to our large cities, and possessing marked natural attractions, the population of the town is becoming "residential." An increasing proportion of the inhabitants have no direct interest in the soil, except as it furnishes an agreeable and healthful location for the homes which are taking possession of the hill-sides and confining the husbandmen to even narrower limits. In 1881 the Massachusetts Central Railroad was constructed and opened to travel as far as Hudson, twenty-nine miles from Boston. The original laying-out of this road in Belmont was south of its present road-bed, and crossing the Fitchburg Railroad by an overhead bridge near Hill's Crossing. On account of the large number of grade-crossings made necessary by this route, it was opposed by many citizens. The road was finally located parallel and adjacent to the Fitchburg road upon its north side from Hill's Crossing to Clematis Station, in Waltham. Failing to pay its expenses, the road experienced financial difficulties and a change of name, and now, as the Central Massachusetts Railroad, is leased and operated by the Boston and Maine Railroad, as a part of its southern division, and over it trains are sent out to the west and south, by way of the bridge across the Hudson River at Poughkeepsie. Together, the two roads give good accommodation to travel and at reasonable rates. Few towns can boast of finer views than are to be had from the slopes of the swelling hills that emborder the villages of Belmont. It merits its name, which was derived from the residence of John P. Cushing, later known as the Payson estate, upon the street separating Belmont from Watertown. This street was formerly known as the Back Road, but after Mr. Cushing called his estate Belmont, the name was given to the street, and later it was considered the most appropriate that could be chosen for the new town. Until invaded by the Payson Park Land Co., in 1886, the hundred acres or more surrounding the mansion-house furnished the best example of an American residence upon English models to be found in this part of the country. John P. Cushing,

who had in early life amassed a fortune in China, returned to the United States and acquired from different owners the land upon which, about the year 1830, he erected his mansion-house at a cost of more than \$115,000. At the left and in front of the house was the undulating lawn containing thirty acres, and surrounded by trees, the main driveway at its side being shaded by long, irregular rows of lofty elms. Behind the house was the great flower garden, flanked by high walls and green-houses, with a grand conservatory at the rear. Along the east side of the vegetable garden, which lay behind the conservatory, past the great deer park, a winding walk among the trees led to a rustic summer-house upon the highland anciently called Pequossette Hill, from which a varied and extended view of Boston and its suburbs was revealed to the observer. Broad and fertile fields extended to the westward. Mr. Cushing's later years were marked by active participation in public affairs and by generous, unpretentious charities. He expended large sums to beautify the grounds, which were liberally thrown open to the public. After his death, which occurred April 12, 1862, the estate came into the possession of Samuel R. Payson, who occupied it for a quarter of a century. He continued the policy which had marked its management while Mr. Cushing was its owner, and when it was purchased by the trustees of the Land Company it was estimated that more than half a million dollars had been expended to adorn a spot already made beautiful by nature.

The mansion-house and land immediately adjoining are now owned by Mr. B. F. Harding, and under his charge has been founded the Belmont School, the management of which is in conformity to the principles of the Episcopal Church, and whose object is "to give not only a thorough preparation for the University and the Technical School, but also a liberal training in branches not now required for entrance to college." The school was opened September 25, 1889, and is, like its appointments of building and grounds, to rank with the best in every particular. Its location is in itself a continual inspiration.

A short distance to the westward of the Payson estate, after passing the "Haunted House of Watertown" upon the left, we come to the residence of Samuel Barnard, of the family of Major Barnard, who commanded a company at "Lexington alarm." A little further, on the side of the hill sloping to the lowland known in olden times as Pequossette Meadow, was the house built by Nathaniel Bright in the latter part of the seventeenth century. Previous to the incorporation of Belmont this was the oldest house in Watertown, and one of its owners, in 1876, was Nathaniel T. Bright. It has since been torn down. The land continues in the possession of the family. Aside from this house there were, in 1820, only four houses on that part of Watertown which now comprises the village of Waverley, and all of these had yielded to the ravages of time before the new town

was formed. The old cellar of one of them is still to be distinguished at the foot of the hill on Belmont Street, but no one knows or inquires as to those who once dwelt upon the spot.

At "Commodore's Corner," Belmont Street enters Watertown. Opposite this corner (in Watertown) was the meeting-house of the Middle Precinct, erected in 1695. Its location was a compromise between contending factions. It was an unsuccessful one. The building was a cause of continued bitterness during the few years it was suffered to stand, for it was only 1722 when it was voted in town-meeting to sell "What was left of the old meeting-house." Lexington Street turns from Belmont Street northward at this point. This was the "Old Concord Road." Its first well-defined change of level marks the summit of "Elbow Hill." The new road goes through the top of the hill, the old one went around it, and only a little unevenness in the turf shows the bounds of the original thoroughfare. In the valley below, the street crosses the railroad. The first station of the Fitchburg Railroad here was called Plympton's Crossing. The street continues past the entrance to the grounds belonging to the Massachusetts General Hospital to the foot of Mill Street, near Beaver Brook, which is the line of division between Belmont and Waltham. All the land east of Lexington Street to the line of the Bright estate on Belmont Street and across the valley nearly to the summit of the hill north of the railroads, comprising about three hundred acres, was included in the plots of the Waverley Company, which was incorporated in 1855, after its affairs had been managed for some months by J. C. Dunn, G. G. Hubbard and Estes Howe as trustees. A considerable part of the ancient Pequossette, or King's Common, was among the holdings of this company. The village of Waverley was the outgrowth of their enterprise. The company was not upon good terms with the railroad management, and the result has been shown in the slow development of what was, in its inception, one of the most promising settlements in the vicinity of Boston. The sales of land were, for many years, few and far between, until in 1875 the company disposed of one hundred acres upon the so-called Waverley Highlands to the Massachusetts General Hospital. It is expected that at some future time buildings will be erected here for a retreat for insane persons, when the removal of the McLean Asylum from Somerville becomes definitely necessary, and the grounds are being skillfully improved and developed with a view to such occupancy. In the mean time nearly \$75,000 has been expended in the construction of a "Convalescents' Home" upon the southwest slope of the hill, to which patients from the General Hospital on Blossom Street, in Boston, are brought where pure air seems to be all that is needed to secure their recovery. The view from the Home covers the villages of Watertown, of Newton and Waltham, and is bounded by the hills of Norfolk and

Worcester Counties. The grounds of the hospital are bordered on the west by Mill Street. This is one of the original streets of Watertown, running parallel to Beaver Brook, upon which, in 1662 or 1663, Thomas Agar, of Roxbury, built a mill for fulling cloth. This was the second mill erected within the old boundaries of Watertown. Its precise location cannot now be determined. In 1663 it was sold "to Thomas Loveman, late of Dedham, County Essex, Old England, cloth-worker." In 1669 or 1670 Love-eran sold it to Timothy Hawkins (from whom Agar bought the privilege) and Benjamin Garfield. Near, possibly at the site of this mill was Plympton's satin-net factory, which was destroyed by fire in 1848. The great water-wheel was set in motion during the fire and so resisted the flames. Its last fragments disappeared in 1876, and the ruins of the wall into which it was built still remain at the foot of what is now called the cascade. An illustration of the wheel forms the frontispiece of *Country Life*, published in 1866 by R. M. Copeland, who then owned the property, and it has been reproduced in popular magazines. Richard M. Staigg, the artist, afterward resided upon the estate. Beaver Brook was a favorite resort of James Russell Lowell, and the mill formerly standing at the upper pond is the scene of one of his most charming poems, of which a contemporary says, "there is no finer specimen of an ideal landscape in modern verse."

"Flushed with broad sunlight lies the hill,
And, musing the long-day's loss,
The cedar's shadow, slow and still,
Creeps o'er its dial of gray moss.

Warm noon brims full the valley's cup,
The aspen's leaves are scarce astir,
Only the little mill sends up
Its busy, never-ceasing burr.

Climbing the loose-piled wall that hems
The road along the mill-pond's brink,
From 'neath the arching barberry-stems,
My footstep scares the shy chowink.

Beneath a bony buttonwood
The mill's red door lets forth the din;
The whitened miller, dust imbued,
Flits past the square of dark within.

No mountain torrent's strength is here;
Sweet Beaver, child of forest still,
Heaps its small pitcher to the ear,
And gently waits the miller's will.

Swift slips Undine along the race
Unheard, and then, with flashing bound,
Floods the dull wheel with light and grace,
And, laughing, hurls the loath drudge round."

A few rods below, on the other side of Lexington Street, on the Waltham side of the brook, are the far-famed Waverley Oaks, the most remarkable group of aboriginal trees in New England. Here Lowell's poem, "The Oak," was conceived. There are in all twenty-six of these trees. Of the principal group, which stands upon a long mound, supposed to have been produced in remote ages by glacial action, Underwood writes: "The oaks are seven or eight in

number, as like as so many stout brothers, planted on sloping drives west of the brook. They have a human, resolute air. Their great arms look as if ready to 'hit out from the shoulder.' Elms have their graceful ways, willows their pensive attitudes, firs their loneliness, but the aboriginal oaks express the strength and the rugged endurance of nature." It was the opinion of Agassiz that no trees on the Western Continent have greater age, and an examination of one which fell some years since, indicated that it had withstood the tempests of more than eight hundred years.

Mill Street now ends at the Concord Turnpike. Beyond and leading to Lexington is its continuation, Winter Street, near which, upon the estate of Geo. H. Cotton, is the well-known Belmont Natural Spring, whose waters are largely sold in Boston, to those who demand something purer than Cochituate or the Mystic can supply.

Eastward from the junction of Mill and Winter Streets, Concord Turnpike (in modern speech—avenue), leads over Wellington Hill to the central village of Belmont. Upon the summit of the hill is the Highland Stock Farm, where were bred the Dutch cattle, to which reference has been made in another place. Descending the slope, the panorama spread before the observer is unsurpassed, unless, possibly, we except the view from Arlington Heights, a mile to the northward, and embraces the metropolis and its suburbs in every direction. The handsome estate upon the north of the avenue was at one time owned by Henry M. Clarke, a wealthy paper manufacturer, and upon it he built the costliest barn of its time in New England. After the place became the property of Charles Fairchild, a residence was built upon it for the occupancy of William D. Howells, and the frieze in the study bore the Shakespearean inscription, "From Venice to Belmont." Elisha Atkins, of the Union Pacific Railroad, lived in the house on the brow of the hill, his son and successor, Edwin F. Atkins, being domiciled in the Ware homestead on the south side of the avenue. Near his house is still to be seen the weather-beaten stone which, until 1859, marked the junction of the three towns from which Belmont was taken. This part of the hill, with the Town Hall and church at its foot, furnishes the landscape which, displayed upon a trefoil to symbolize the three towns, forms the background of the seal of the town, adopted in 1882, while far to the front the seal displays an ideal figure, a colossal statue of Pomona, the goddess of fruits and gardens. Back of the E. F. Atkins estate runs a section of the old turnpike, abandoned because of its steepness, and now grass-grown. W. Sloane Kennedy, the biographer of Longfellow and Whittier, has pitched his tent beside the old road, and looks out upon a view the beauty of which he must himself describe. The grounds around the home of the writer include a disused portion of this very turnpike along

which Emerson often trudged as he went to and fro between Concord and Harvard College.

"It is now in part a wild and lovely grass-grown lane, commanding an inspiring view of Cambridge, Medford, Roxbury and the sea. At night, the myriad lights of the vast *entourage* glitter below and far away; on the distant horizon the steady electric lights at the Point of Pines gleam out, and always the red light of the revolving lamp down the harbor waxes, wanes and disappears, to again appear, linger a moment and then be again snuffed out in the black void around it."

Just below, upon the old road, Mrs. Abby Morton Diaz, another biographer—for did she not write the "William Henry Letters"?—has found a home. At the left of her enclosure are the grounds on Pleasant Street surrounding the house of the late David Mack, specially remembered in Belmont for his connection with its library, but of more extended reputation because of his membership in the phalanx which gathered at Brook Farm nearly fifty years ago. For a number of years he conducted a school for young ladies here, and was for a time a teacher in the public schools. He died July 24, 1878, at the age of seventy-four years. Here also lived for a few months the artist, George Fuller.

At the corner of Pleasant Street and Concord Avenue is the Town Hall and Public Library Building, on a corner of the homestead of Eleazer Homer, whose house, with its old-fashioned combination of brick and wood walls, is still standing. Before it, for many years, was to be seen a fine specimen of the *Kalmia latifolia*, or mountain laurel, remarkable for its beauty, and thriving in a region in which the shrub had never been indigenous. Across the railroad tracks is the Belmont Park, beyond which are the handsome dwellings upon the old "plantation," now occupied by the Underwood family. The mansion-house of James Brown (now the property of his son), with its charming lawn and dense woodland at the north, looks out upon the park and plantation and the new Unitarian Church beyond.

In the quaint old house south of the Brown estate, among other relics of the past, is the arm-chair of Henry Price, the first Grand Master of Freemasons in America, who, at the age of eighty-four years, met an accidental death a hundred years ago. On the other side of the way, beyond the buildings of the Underwood estate, is the octagonal building now used as a summer-house, which, at the time of the incorporation of the town, was the station of Wellington Hill, standing at the junction of Common Street and Concord Avenue.

Passing along Common Street, and leaving the little Catholic Church of St. Joseph's on the left, we reach the Winthrop W. Cheney estate, now the property of W. L. Lockhart. So gradual is the ascent to the top of the hill above that with a sense of surprise we look back at the view which includes the spires of Arlington and Medford. A few steps farther and

we gaze to the westward upon the village of Waverley, lying almost at our feet, with the hills of Waltham forming a background. Continuing upon Common Street we may come again to the Payson Park; but Washington Street—one of the oldest streets in the town—anciently called Hill Street, from Pequossette Hill, near whose summit it passes, turns here to the east. Descending its slope toward the valley of Fresh Pond, past the homes of the Stone family, we enter School Street, on the right. At the very foot of Pequossette Hill is the Hittinger residence, where Jacob Hittinger lived at the time when, for five successive years, he headed the list of those who sought for recognition as an independent town. From the green-houses which his sons have erected on this farm 14,000 cucumbers have been sent to the Boston market in a single day. Trespassing, by courteous permission, upon the private way leading through the farm to Grove Street, we stand upon the confines of the town and look upon the little village of the dead, set apart thirty years ago for the final resting-place of those who, one by one, would cease to be reckoned among the world's living, as they went forward to a longer and better life among the great majority. Until 1880 the larger part of the village of Mount Auburn, located on (the modern) Strawberry Hill, between Belmont and Mount Auburn Cemeteries, belonged to the town of Belmont. In April of that year, after a prolonged hearing before a legislative committee, all this territory, with other land adjacent to Fresh Pond, comprising in all 570 acres, was annexed to the city of Cambridge. The city had for several years endeavored to secure control of the entire shore of the pond for the purpose of maintaining, under her own regulations, the purity of her water supply. Defeated in successive Legislatures, her efforts at this time were successful, and in spite of the unanimous protest of the townspeople, Belmont lost one-tenth of its taxable property, one-third of its school-children and one-sixth of its area, being left with a territory of about 3075 acres. On the new boundary line between Belmont and Cambridge, not far from the old Bird tavern, on Belmont Street, is a singular depression, called the Amphitheatre upon the maps which Professor Hosford has prepared in illustrating his theory of the location of the ancient city of Norumbega, only a few miles away.

The eastern boundary of the town coincides with that part of Brighton Street to which Cambridge has given the name of Adams Street on one side of Concord Avenue and Wellington Street upon the other. Near the junction of these streets lived Richard Richardson, selectman in Cambridge from 1791-95, who built that part of the Concord Turnpike which lay near the line between West Cambridge and Watertown. Not far from the toll-gate at this point he built a tavern, anticipating that the turnpike would become a great thoroughfare, and he had large holdings in the stock of the company. The investments were not

profitable and he lost heavily. A number of his descendants reside in this town.

Wellington Street is Brighton Street again before we reach Hill's Crossing and the stations of the railroads, which are built on land formerly belonging to the Hill family. The name has been associated with the locality for nearly two hundred years. Its most noted member was Isaac Hill, editor and statesman, who was born April 6, 1789, in that part of the West Precinct of Cambridge which became a part of Belmont. He was the owner and editor of the *New Hampshire Patriot*, published at Concord for more than twenty years, beginning in 1809. Failing of an election to the United States Senate in 1828, he was Second Comptroller of the Treasury under Jackson in 1829, and was chosen to the Senate in 1830. At the close of his six years' term he was elected Governor of New Hampshire and held that office from 1836 to 1839. In 1840 he became Sub-Treasurer of the United States at Boston. After his retirement from public life he continued his editorial labors until his death at Washington, D. C., in 1851.

This part of West Cambridge was known as the South District, and was disrespectfully spoken of as "Flob-end." From it came many trusted and respected officials of the town. The names of Hill, Frost, Russell and Locke, of Wellington and Prentiss, are to be found on page after page of the old records. From this section, too, was Mansur W. Marsh, first chairman of the selectmen of Belmont, who had previously served West Cambridge in the same capacity, having been a selectman of that town eleven years, represented it in the Legislature and held the positions of assessor and School Committee. His service as selectman in the two towns was in all twenty-two years, at intervals from 1841 to 1876. It is gratifying to record that he still lives, the oldest citizen of the town, enjoying in the evening of life the satisfaction that attends the consciousness of long and faithful labor for the public good. His residence on Prospect Street, was, in 1775, the "house on the hill," to which the women and children fled for refuge on the 19th of April, when the British, passing through Menotomy to destroy the rebel stores at Concord, made the homes of the valley unsafe. While Belmont justly claims a share in the associations and glory of the battle of "Concord, Lexington and Cambridge,"—for all this part of her territory was included in the West Precinct of Cambridge,—it is not known that any English soldiers came that day within the present limits of the town. Tradition speaks of one poor fellow, wounded and separated from his command, wandering down Spring Valley, and doubtless wishing for the night to come and hide him from unfriendly eyes while he made an expiring effort to reach the barracks from which he set out in high spirits a few hours before; but whether he lived or died, or indeed was more than a creature of the imagination, history refuses to tell.

The tornado of 1851 passed through the present town of Belmont. Beginning near Prospect Hill in Waltham, and extending across the Mystic River in Medford, its destructive force was put forth with the greatest energy as it passed across the northern point of Watertown into West Cambridge. Rev. Charles Brooks, of Medford, in describing it, says, "It exhibited a power in the elements never witnessed by the oldest inhabitants of this region. Houses strongly built were demolished as if they had been made of paper; oak and walnut and cedar trees of the largest growth were entirely uprooted, some of them snatched out of the ground and carried through long distances; roofs of buildings taken up as if by sudden suction, and carried into the embrace of the cloud and transported for miles." The damage to estates now in Belmont was reckoned at about \$10,000.

Returning along Pleasant Street from our jaunt about the town, the Wellington homestead recalls the name of Jeduthun Wellington, whose enterprise and public spirit gave the first distinctive name to this locality. He was, in fact, a leading citizen of his day; he had been sergeant and lieutenant in the Revolutionary Army, afterwards colonel of militia, and had received the honors of his towns-folk as selectman for eighteen years, precinct assessor, treasurer and collector, and Representative in the General Court for nine years. To encourage travel over the turnpike passing near his house, his yoke of stout oxen was at the service of the teamster, who otherwise might not be able to climb the old road which a later generation has ceased to use. It was little wonder that the friend in need should be regarded with favor, and that the steep bit should become known as Wellington's, and then, Wellington, Hill. The elevation is three hundred feet above the sea level, midway in height between Prospect Hill on the west, and Meeting-house Hill on the south. The rain falling upon its eastern slope finds its way through Wellington Brook and Alewife Brook, or Menotomy River, into the Mystic; that which drops upon its western front reaches the ocean by a longer route through Beaver Brook and the Charles.

Various attempts have been made to establish a local newspaper which should represent the interests and give the weekly history of the town. These publications have had a brief existence. The *Middlesex Townsman*, published at Arlington, but with a branch office in Belmont, was discontinued for lack of support, after being issued weekly for about eighteen months. During the year 1889, the *Belmont Courier* appeared regularly under the management of Harry W. Poor. This paper depended for its circulation upon the town of Belmont alone. It paid expenses, and it was proposed to continue its publication for another year, but upon the acceptance by its proprietor of a position upon the *Boston Globe*, he decided to discontinue it. The local news is now gathered by the *Belmont Bulletin*, a special edition of the *Water-*

town Enterprise, prepared for circulation in the town of Belmont.

"The History of Guildhall, Vt.," a volume of 275 pages, bears the imprint of Waverley, Mass., 1886, and its author, E. C. Benton, was his own compositor, pressman, and publisher, the printing being done upon a private press at his own residence.

In addition to the private school of David Mack, and the Belmont school of B. F. Harding, which have already been alluded to, an effort was made to establish in Belmont the Wayside School, which had had a successful experience in Concord under the supervision of Miss M. C. Pratt. Miss Pratt was at the head of the school when it was moved to Belmont, but her connection with it soon ceased, and, largely because of the lack of proper accommodations at the outset, the school was discontinued, after occupying in succession houses on Pleasant Street, Clark Street, and the Thayer mansion at Waverley. In these days, when physical training goes hand in hand with mental culture, it is perhaps not out of place to refer to the riding-school of J. Howard Stone, as one of the educational institutions domiciled in the town; and to pass from this to the organizations engaged in fostering a taste for athletic sports, the Belmont Base Ball Association, which is in the third year of its existence, the Belmont Tennis Club, whose grounds on Thomas Street are newly laid out, and were formally opened by a reception to friends, given July 4, 1890. A similar organization has convenient grounds at Waverley.

Belmont is notable for the number of its old families, those whose ancestors have resided upon the territory from the time when the division of lands was made among the proprietors. The final division was made by Watertown in 1636, and by Cambridge in 1685. Representatives of the Watertown families of Chenery, Clarke, Livermore, Bright, Barnard and Stone, are occupying lands which were in the possession of their ancestors two hundred and fifty years ago, and the names of Wellington, Locke, Hill, Frost, Richardson and Prentiss, perpetuate the remembrance of those who assisted in 1685 in the settlement of Menotomy, or the West Precinct of Cambridge. The ability and reputation of these families is indicated by the public positions which have been so often and so acceptably filled by their members. In independence of thought, sound judgment, and loyalty to right, the citizens of Belmont stand second to none of their sister communities, and in exemplifying these traits, they only portray the character of those who occupied these hillsides and these valleys many years ago.

A list of the leading officials of the town since its incorporation is appended:

SELECTMEN:—Mansur W. Marsh, 1859-63, 1877-81, 1876; Jacob Hittmeger, 1859-61; J. Varnum Fletcher, 1859-61, 1867; Jonas B. Chenery, 1859; Joseph Hill, 1859; Thos. Livermore, 1862-63, 1869-70; Wm. Henry Locke, 1862-64, 1866; Amos Hill, 1864-66; Chas. L. Heywood, 1864; George W. Ware, 1865; Daniel L. Talnter, 1865-66; Fred. W. Bright, 1867-68; Josiah S. Kendall, 1868-70, 1873-79, 1881-; Isaac Watts, 1871-72; J. Willard Hill, 1871-72; Henry Richardson, 1872-74; George W. Ware,

Jr., 1873-75, 1880; Thomas S. Hittinger, 1875; Convers F. Livermore, 1876-80; Henry Frost, Jr., 1877-82; J. Henry Fletcher, 1881-89; Jacob Hittinger, Jr., 1883—; Frank Chandler, 1890—.

ASSESSORS.—J. Oliver Wellington, 1859-76; Josiah Bright, 1859-60; Edwin Locke, 1859; William J. Underwood, 1859-64, 1867-75; H. R. Filibrown, 1859; Thomas Livermore, 1861-64; Josiah S. Kendall, 1865-79, 1881—; George S. Teale, 1866-69; Winthrop L. Cheney, 1870-75; Leonard S. King, 1877; Henry Richardson, 1878-80; Joseph O. Wellington, 1880—; William Munroe, 1880-82; Thomas W. Davis, 1883—.

TOWN CLERKS.—Samuel P. Hammett, 1859-60; Francis E. Yates, 1861-70; William W. Mead, 1871-83; Winthrop L. Cheney, 1883—.

TOWN TREASURER AND COLLECTOR.—George S. Adams, 1859-60; Edwin Locke, 1867-75; Winthrop L. Cheney, 1876—.

SCHOOL COMMITTEE.—Rev. Amos Smith, 1859-64; Edwin Locke, 1859-64; Isaac Watts, 1859-60; Dan'l F. Learned, 1859-69, 1872-80; Adolphus Brown, 1859; Amos Hill, 1860-65; William J. Underwood, 1860-61, 1865-69; Rev. James Thurston, 1861; Josiah S. Kendall, 1862-65; George L. Underwood, M.D., 1862; William A. Blodgett, 1863-68; Warren S. Frost, 1866, 1868-73, 1879-81; Rev. Josiah W. Turner, 1868-71; Edward Whitney, 1868; Samuel P. Hammett, 1868-69; Henry Richardson, 1869-85; Mansur W. Marsh, 1870; Horace Bird, 1870-72; George W. Ware, Jr., 1870-71; Rev. Daniel Butler, 1871, 1876-80; William W. Mead, 1872-81; Winthrop L. Cheney, 1872-75; Solymon W. Grant, 1873-76, 1878-79; Luther W. Hough, 1874-75, 1882-87; J. Henry Fletcher, 1876-78; George H. Caldwell, M.D., 1877; George W. Jones, M.D., 1880; Rev. William H. Teal, 1881-82; Harry O. Underwood, 1881-84; Frederic Dodge, 1882—; William Munroe, 1882; Horace W. Ball, 1883—; Edward Haskins, 1883-86, 1890—; Harry H. Baldwin, 1885—; Edward F. Otis, 1886; Mrs. Caroline A. B. Whitney, 1887-89; Mrs. Mary F. W. Homer, 1889—; John H. Edwards, 1889; Mrs. Jennie C. Underwood, 1890—.

TRUSTEES OF PUBLIC LIBRARY.—William J. Underwood, 1873—; J. Varnum Fletcher, 1873—; Leonard S. King, 1873; Rev. Harvey C. Bates, 1874-76; Thomas W. Davis, 1877—; William E. Stowe, 1883—; John M. Brown, 1883—; Frederic Dodge, 1889—.

REPRESENTATIVES IN GENERAL COURT.—In 1863 Winthrop W. Cheney represented the district including Waltham and Watertown. The redistricting after the incorporation of the town did not take place till after the State census of 1865. Since 1866 Watertown and Belmont have formed a representative district. The Belmont representatives from this district have been:

Henry M. Clarke, 1867-68; George W. Ware, Jr., 1882; Edward Whitney, 1876-77; Rev. Daniel Butler, 1883; J. Varnum Fletcher, 1885-86; J. Henry Fletcher, 1890.

J. Varnum Fletcher was State Senator from the Second Middlesex District in 1887 and 1888.

BIOGRAPHICAL.

COL. THOMAS LIVERMORE.

Among the oldest families of the ancient town of Watertown is that of the subject of this sketch, Col. Thomas Livermore, a descendant in the sixth generation of John, who landed on these shores from England in 1634. The homestead of the family for many generations has been on what is now School Street in the northeastern part of the old town, in the vicinity of Fresh Pond. Here they appear to have planted themselves at an early day, and not unlikely cleared the primeval forest to found a home. Two Amos Livermores, son and father, together with Oliver,

Daniel and Samuel, reach back from Thomas to John, the original settler. They chose a fertile tract of country sloping gently from west to east, and terminating on the verge of the Pond. In this sheltered and sunny place five or six generations of Livermores have cultivated and improved the land until it has become rich in orchards and gardens, and is dotted here and there with pleasant, comfortable homes.

Thomas was born May 30, 1798, on that portion of the original tract now owned and occupied by his children, in an old house which was burned in his boyhood and replaced by his father with the present spacious dwelling.

His advantages of education were limited to the district school, then open but a few months in the year and often taught by young collegians in the winter term, more anxious to earn a few dollars than to properly instruct and guide the young. The work and responsibility of the farm, intercourse with men and acquaintance with practical affairs formed his chief means of education. Thus he grew up to manhood used to hardship, in habits of patient industry and careful economy. Early in life he united with the First Congregational (Unitarian) Church of the town, then under the ministrations of Rev. Converse Francis, afterwards professor in the Divinity School of Harvard University. It shows in what estimation he was held by his pastor and associates that he was chosen a deacon of the church in his twenty-fourth year, an office which he held for more than a half a century. Thomas Livermore and Sarah C. Grant were united in marriage April 20, 1824. She was the daughter of a neighboring farmer, like himself used to care and responsibility, and through the nearly fifty years of their married life a most faithful and devoted wife. Mr. Livermore early became a member of the Watertown and Waltham Artillery Company, of which he was chosen lieutenant in 1821 and rose to be captain, major, lieutenant-colonel and colonel during the following eight or ten years. His tall, erect, commanding form made him especially conspicuous as a military officer, and he always retained something of a military air and manner, due no doubt to his early training in the Artillery. To the Ancient and Honorable Company of Boston he was elected an honorary member. He seems never to have lost his interest in military parades, and long after he had withdrawn from the company used to attend the trainings and musters. Col. Livermore was deeply interested in politics. In early life an ardent Whig, he remained true to that party until the great struggle for freedom in Kansas, when he became identified with the Free-Soil party and afterwards with the Republican. In 1844 he was elected on the Whig ticket to the House of Representatives of the State Legislature. But when that party broke up on the slavery issue, he took his stand on the side of freedom and ever after gave his vote and influence to sustain the good cause. In the War of

Thomas L. ...

Jacob Hittiger

Geo. D. Blake

the Rebellion he was a staunch supporter of Lincoln and the army, and rejoiced heartily in the downfall of slavery and the triumph of the Union.

In municipal affairs he was active and faithful in securing efficient management. For several years he was elected on the Board of Selectmen in Watertown, and for two years a member of the School Committee.

In 1859, when Belmont was incorporated, that portion of Watertown where he resided was annexed to the new town, and his interests were transferred to its growth and prosperity. Here he became identified with a new church and a new community, and served them as willingly as he had served the old. He was soon chosen on the Board of Selectmen and on that of the assessors, and through the remainder of his life he gave his sympathy and influence to the welfare of Belmont.

From this sketch of the life of Col. Livermore, it is evident that he was a man in whose integrity his fellow-townsmen had entire confidence. They trusted in his judgment, they relied upon his honesty, they regarded him as one who was above all crooked and self-seeking ways in his management of public affairs. Plain, unpretending, straightforward, firm and faithful in what he believed was right, such is the record of his life and such the character which he sustained among his fellow-men. Col. Livermore was in feeble and failing health for some months before his death. Of his ten children, seven had passed on before him, and three remained in the old home to cheer his declining days. The end came on March 28, 1873, at the age of seventy-five years, and the stalwart form, that had borne so well the toil and burden of life, was laid at rest in the peaceful shades of Mount Auburn. Mrs. Livermore passed a serene and cheerful old age, surrounded by those who tenderly ministered to her needs, and in her eighty-seventh year rejoined him in the immortal world.

JACOB HITTINGER.

Jacob Hittinger was a descendant of an old French family and was born in Roxbury, March 10, 1811. His father died while abroad five years later, having previously removed to Charlestown, where young Hittinger received his education. In 1825 he entered the employment of George Pierce as a gardener, and five years later engaged in the produce business in Boston with William E. Otis & Co. Of this firm he was a member for several years, being actively interested at the same time in the firm of Hill & Hittinger, whose business was cutting and shipping ice from Spy and Fresh Ponds. The firm of Hill & Hittinger was dissolved in 1841, and was succeeded by the firm of Gage, Hittinger & Co., of which the only surviving partner is Hon. T. T. Sawyer, of Charlestown. It was to this firm conjointly with John Hill, Mr. Hittinger's former partner, that the merchants of Boston were indebted for the notable enterprise displayed, when, 1844, the harbor being frozen, a passage

was cut from the wharf at East Boston, through which the Cunard steamer could proceed to sea on the day appointed for her sailing. A failure to accomplish the work would have seriously affected the future of Boston as a commercial port. Mr. Hittinger's interest in the firm of Gage, Hittinger & Co. was disposed of a few years later, but he continued to furnish ice to its successor, Gage, Sawyer & Co., and was interested in the early shipments of ice to the Barbadoes by Lombard & Whitmore. In the closing years of his business life he carried on the trade in his own name.

Mr. Hittinger's first wife was Mary Wilson. At her death she left a daughter, who became the wife of Charles Davenport. He married again, April 30, 1846, Mary Elizabeth King, a younger sister of Rev. Thomas Starr King, whose name is borne by the oldest son of this union, Thomas S. Hittinger, superintendent of the Fresh Pond Ice Company, of which company Mrs. Davenport's son is the treasurer. Soon after his second marriage Mr. Hittinger bought a large tract of land adjoining the old Cushing Estate, within the limits of the present town of Belmont. With the exception of a few months spent in Charlestown, this place was his residence until the end of his life. His intelligent management redeemed from the marshes all that part of the estate which is now occupied by three of his sons as one of the largest market gardens in the vicinity of Boston. Of the seven sons of the second marriage six are living, the fourth in order of age, Daniel Webster Hittinger, having died at Belmont, October 28, 1875. Mrs. Hittinger continues to reside in the house standing on the estate at the time of its purchase.

Mr. Hittinger's interest in the town of Belmont was shown by his leadership for four successive years of the petitioners for the incorporation of the new town and his devotion of time, influence and money to their interests. For many of the necessary expenses incurred he neither asked nor received any recompense. He was a member of the first Board of Selectmen, chosen in 1859; was re-elected in 1860 and 1861, and was an influential citizen until the last years of his life. Pecuniary difficulties, arising in the critical business years of 1873 and 1874, left him a poor man. Though he never recovered his financial standing, he could look with pride upon the stalwart sons whose filial attention ministered to the comfort of his dying hours, and feel that they were ready to take up and bear successfully the burdens which old age removed from his shoulders. He died at Belmont, April 4, 1880, leaving behind him the record of a life of activity and integrity, and of an influence exerted for the permanent advantage of the community in which his lot had been cast.

GEORGE FORDYCE BLAKE.

The subject of this sketch is descended from one of our oldest New England families, and one that has an

honorable record. His ancestor, William Blake, came to this country from Little Baddow, Essex, England, in 1630, the year that Governor Winthrop and the Massachusetts Bay Colony came over, and settled at Dorchester, Mass. In 1636 he removed, with William Pynchon and others, to Springfield, Mass., but his descendants for three generations continued to reside at Dorchester and Boston, where they were highly esteemed, two of them having held the office of deacon of the church and selectmen of the town, and one was a member of the General Court. At the period of the outbreak of the War for Independence we find Increase Blake living in Boston, on King (now State) Street, near the scene of the Boston massacre, and engaged in the manufacture of tin-plate goods. His public-spirited refusal to supply the British with canteens, which he had furnished for the provincial troops, aroused the retaliatory spirit of the Tories; his shop and other property were destroyed, and after the Battle of Bunker Hill he found it expedient to remove to Worcester, Mass. His son, Thomas Dawes Blake, the father of the present representative of the family, was born in Boston in 1768, and was educated in the schools of Worcester. He was engaged for a few years in teaching, then studied medicine and later settled at Farmington, Me., where he continued in the practice of his profession until his death, in 1849.

George Fordyce Blake was born in Farmington, Me., May 20, 1819. At the early age of fourteen he was apprenticed to learn the trade of house-carpentry. In 1839 he left his native town to start in the world for himself. He first went to South Danvers (now Peabody), where he remained seven years, working at his trade. From that place he went to Cambridge to take the position of mechanical engineer at the brick-yards of Mr. Peter Hubbell, with the general charge of the works. There he manifested that fidelity, thoroughness, intelligence and inventive talent which have contributed so largely to his success. Naturally modest, never over-sanguine, that success seems to have surprised him more than those who knew him best. While thus employed, he devised a water-meter for which he received his first patent, in 1862. After the removal of the brick-yards to Medford, it was found that the clay obtained there could not be worked with the ordinary machinery, and Mr. Blake planned and constructed a new machine for pulverizing the clay, which was patented in 1861. In order more efficiently to free the clays from water, he invented what is perhaps his greatest achievement—the Blake Steam-Pump—and thus laid the foundation of his fortune. The practical testing of his pump, at the yards, proving its great capacity, he, in company with Mr. Job A. Turner and his former employer, Mr. Peter Hubbell, commenced in 1864 the manufacture of steam-pumps and water-meters in a building on Province Street, Boston. The business grew so rapidly that several suc-

cessive removals to better quarters were necessary, and in 1873 the firm purchased and occupied the large building on the corner of Causeway and Friend Streets. Their foundry for large castings was at East Cambridge. In 1874 a joint stock company was incorporated under the title,—"The George F. Blake Manufacturing Company," with Mr. George F. Blake as president. In 1879 the company purchased the large plant of the Knowles Steam-Pump Company, at Warren, Mass., thus greatly extending their facilities. But even with this increase of capacity it was found necessary, in 1890, to remove the Boston manufactory to East Cambridge, where extensive works were erected, covering four acres, with a main building 400 feet long by 100 feet broad, with every convenience for the successful prosecution of the work. The business has been recently sold to an English syndicate for the sum of \$3,000,000, though Mr. Blake still retains an interest.

In the course of his successful career Mr. Blake has given unremitting attention to his business and has brought his intelligent judgment to bear upon all its various details. For a long time, until the growth of the business made that an impossibility, all the plans and drawings for the special adaptation of machinery were made under his personal supervision. The result is seen in the vast business that has grown up. The Blake pumps have gone to all parts of the world and have been adapted to every conceivable use, some of them, constructed for supplying cities with water, having a capacity of 20,000,000 gallons in 24 hours.

In 1869, Mr. Blake removed to Belmont. His beautiful home stands on a breezy hill overlooking a wide stretch of country to the northward and westward of Boston, and is surrounded by fine trees and well-kept lawns. While his busy life has kept him from much direct participation in public affairs, he has always taken a deep interest in all public questions, especially such as pertain to the moral well-being of the community, and, when free from the exacting cares of his business, has found true delight and recreation in his library among his favorite books.

HON. J. V. FLETCHER.

A sketch of the town of Belmont would be incomplete which did not contain extended mention of a family so thoroughly identified with its inception, birth and growth as that of Hon. J. V. Fletcher. He was one of the active workers in securing the act of incorporation, became a member of the first Board of Selectmen, and scarcely any matter of public interest and benefit has appealed to the citizens for support that has not received from him material encouragement. The people have endorsed his actions by assigning him the duty of representing their interests in the General Court, and a wider constituency has ratified the local verdict by electing him to a seat in the Senate Chamber.

J. Hermann Hübner

RESIDENCE OF WM. L. LOCKHART,
BELMONT, MASSACHUSETTS

Wm L. Lockhart.

Jonathan Farnum Fletcher is a descendant in the seventh generation of the Robert Fletcher who came from England to Concord, Mass., in 1630, and became prominent in the affairs of that town, which was incorporated five years later. His son William removed to Chelmsford. Joseph, the grandson of William, settled in Westford upon his marriage in 1715, and here, a hundred years later, February 28, 1812, the subject of this sketch was born. Of his early years Mr. Fletcher says little, but the fact that he is the owner of the ancestral home at Westford, delighting to steal a day now and again from business cares to visit it, and that it has become under his hands a Mecca of pilgrimage for members of a large and widely-scattered family, sufficiently indicates the pleasant associations clustering about the spot in which he spent his boyhood. He is a trustee of the Westford Academy. Before attaining his majority he engaged in the provision business in Medford, at the age of twenty-four he took to himself a wife, and in the following year, 1837, he established the business in Boston with which his name has been associated for more than half a century, and in which he is still actively engaged. During most of this time he has been the occupant of two stalls at the very centre of Quincy, better known as Faneuil Hall market, and he is now the senior tenant of the building. Two additional stalls have recently been added, to accommodate an increasing business.

In 1851, when the Faneuil Hall Bank was chartered by the Legislature, Mr. Fletcher was one of the three parties named in the act of incorporation. After being a director of the bank for nearly forty years, he became its president upon the death, in 1888, of Mr. Nathan Robbins, who was also one of the original incorporators. He is also vice-president of the newly-established Hammond Packing Company.

In the town of Belmont Mr. Fletcher held the office of selectman in 1859, '60 and '61, and was again elected in 1867. Since that time he has held no town office, except the position of trustee of the Public Library, which he has filled continuously since 1873, the year in which the board was created. He was one of the building committee of the town-hall, and two marble clocks in the main audience-room, and in the reading-room, are the souvenirs of his connection with the building. In 1885 and 1886 he was representative from the district comprising the towns of Belmont and Watertown, and in November, 1886, was chosen Senator from the Second Middlesex District. During his service in the Senate, in 1887 and 1888, he was chairman of the Committee on Banks and Banking, and discharged other important committee work. His son, J. Henry Fletcher, is the present representative (1890) of the Sixteenth Middlesex District.

Upon a charter being obtained, largely through his instrumentality, for the Belmont Savings Bank, Mr. Fletcher resigned his trusteeship in the Charlestown

Five Cent Savings Bank, to become president of the new institution, and his closest supervision is given to its affairs.

Mr. Fletcher married, in 1836, Marcy Ann Hill, of West Cambridge. Their golden wedding was pleasantly observed by a large gathering of personal friends and business associates of Mr. Fletcher.

They resided in Charlestown for about twenty years, during which time Mr. Fletcher was for two years a member of the Common Council, and four years alderman of that city. The residence in Belmont was built shortly before the incorporation of the town, upon the estate which had been for many years occupied by Mrs. Fletcher's father. Mrs. Fletcher died October 31, 1888. "Her children rise up and call her blessed." A beautiful window in the new Unitarian Church at Belmont is her husband's tribute to her memory.

Mr. Fletcher's duties as the head of the Faneuil Hall Bank tend to draw him away from the active life of the market, in which he has so long been a central figure, and are a preparation for the rest from physical exertion which he has earned by so many years of well-directed, successful toil.

In his home at Belmont, and elsewhere, as occasion offers, he enjoys exercising the privileges of hospitality. His first dinner to his associates in the Faneuil Hall and Belmont Banks, after becoming president of the two institutions, was marked by a feature worthy of the highest commendation and repetition, the presence at the tables of the clerks and other employees as well as the directors and trustees. It is a pleasure to see wealth bestowed upon those who can use it aright. In business enterprise, in hospitality and in charity, Mr. Fletcher has shown himself worthy, and when he chooses to resign the helm of his vessel, he has the satisfaction of knowing that the sons and daughters whom he has trained will be his fit successors as trustees of the goods which the Lord has bestowed.

WILLIAM L. LOCKHART.

William L. Lockhart, whose portrait accompanies this sketch, is easily at the head of the manufacturing undertakers of this section of the county. His life is a striking illustration of what can be accomplished by a strong, resolute will, joined to business tact and devoted to the development of a special line of trade. As his name indicates, Mr. Lockhart is of Scotch ancestry, belonging to a family which came to Nova Scotia in the early years of its occupation by English-speaking people. He was born July 20, 1827. In boyhood he assisted his father, who followed the occupation of a ship-carpenter, and acquired a love for the sea, which he has never lost. At the age of eighteen he shipped as cook for a voyage along the coast. Evidently the duties were not as agreeable as he had anticipated, for he left the vessel at Eastport, walked to Machias, and thence

continued his journey to Boston, where he endeavored to find a place to learn a trade. Not being successful, he returned home, but in a few months came to Boston again and engaged as an apprentice at fifty dollars a year and his board. Having learned the carpenter's trade, he pursued it for a while, but, with a foresight that indicated his business sagacity, decided to devote himself to a specialty, and with this in view entered the employ of John Peak, a leading coffin-maker, and spent four years in learning every detail of the business. At the age of twenty-seven, with a capital of \$300, which represented the industry and patient economy of years, he began for himself at Cambridge, not far from the Court-house. In 1860 nearly all that he had made was swept away by fire, but, undaunted, he at once proceeded to re-establish himself, and to erect a building near the railroad station at East Cambridge, which, with its additions and extensions, he has occupied to the present time, although his offices and sales-rooms are in a fine building constructed from his own plans, at the corner of Staniford and Causeway Streets, in Boston. His establishment is, in all its appointments, the most complete in New England, if not in America, and all those to whom the need common to humanity comes, "to bury their dead out of their sight," have reason to appreciate the provisions made to remove all responsibility from the mourner and place in professional hands the cares incident to such occasions. Every detail of the business is conducted under his direct and personal supervision. During the earlier years of his business life Mr. Lockhart's residence was in Cambridge. He has lived in Belmont about twelve years, having purchased, in 1878, the estate of the late Winthrop W. Cheney on Common Street. A view of the mansion has appeared in these pages. Its exterior is unchanged from the days of its earlier owner. The apartments within conform to the critical tastes of the present occupant, who is assisted by his estimable wife in dispensing hospitality to the friends who meet beneath his roof-tree. Mr. Lockhart's delight in the beauties of nature is shown by the enjoyment he finds in the surroundings of his residence, in the care with which he has maintained and developed his forest, garden and field. His early bent for the sea is gratified by his ownership of the well-known yacht "Alice," and the months he spends from season to season upon the coast of the Southern States. He has never been an aspirant for public office, though taking a deep interest in matters relating to the public welfare, feeling that one's best service to the world can be rendered in faithful attention to the work which has been set for his hands to accomplish.

CHAPTER XLV.

WALTHAM.

BY NATHAN WARREN.

THE history of a New England town is full of interest and is an object-lesson in the fundamental principles and practice of our government. The rise and progress of such an institution for self-government is that of a little Commonwealth conducted by its own citizens under the purest and simplest form of democracy. The town in New England is a miniature Commonwealth. Its Legislature is the town-meeting; its legislators are the voters in their individual capacity. The development of such a government in its political and material affairs, in all matters pertaining to its social and educational welfare and in its religious character, so far as religion was in former times more intimately connected with the body politic, is a study of more importance than the mere recital of events and the growth of wealth and population. Whether the town remains practically at a standstill for a hundred or more years, like some of our towns—yet prosperous in all that makes happy homes, a well-ordered community—and insures a fair competence to its people in their walks of life, or whether under the impetus of manufactures or trade, or from a fortunate position for enterprise or residence, it shows great progress in business and population and all that belongs to municipal importance, its course is governed by the same elements of republican characteristics and the same principles of popular jurisprudence.

To trace the beginnings and locality of early settlement—the circumstances which dictated the direction of progress and development; the causes which gave a turn to local political affairs and led to divisions and the creation of new towns; the names and qualities of the "forefathers of the hamlet," and of those of their descendants who have guided public sentiment and have fostered and encouraged private and public enterprise; the incidents of local history, important in their results rather than in the nature of their occurrence—is a subject worthy of the historian in the bearing it has upon the institutions under which we, as a people, have sought peace and prosperity. The town is the unit of our system of government. It is the primitive source of popular sovereignty. It is the child as well as parent of our institutions, and in New England attains a power and individuality not known and recognized to so full an extent in the rest of the country. The details of its history are pregnant with the fate which has wrought great events on the continent.

Waltham was incorporated January 4, 1737-38, old style—by the modern calendar January 15, 1738. Its history for the first century of settlement is so blended with that of the parent town of Watertown that it is

difficult to separate the incidents of its existence for that period or to fix upon what was distinctive to its territory and inhabitants. With no defined village or local parish interests until shortly before its incorporation, the early records give us but vague information as to what portions of the annals of Watertown particularly apply to the early history of the part subsequently set off as Waltham. Until the last of the seventeenth century its territory was practically a wilderness. A fringe of farms occupied the hills in its northern limits. The Great or Sudbury Road traversed the plain on its southern limits by Charles River, but no collection of houses, church or school-house marked any locality to give prominence in traditions or data to anything distinctively belonging to the locality.

Watertown, within the limits of which, as above stated, Waltham was included for the first century of its settlement, was one of the first settled places in the Massachusetts Bay Colony, ranking as fourth in the order of incorporation. It has well been called the "mother of towns," for out of her territory have been formed the towns of Weston and Waltham and parts of Lincoln, Cambridge and Belmont. Besides these contributions from her area she sent forth colonists to the Connecticut River settlements, to Weathersfield, Connecticut, Martha's Vineyard and the neighboring new settlements in Eastern and Central Massachusetts, so that hardly a town in Middlesex County but has families which trace their origin to this prolific and enterprising mother. In 1636 it was the most populous town in the Colony, and fears were entertained that the population was getting too crowded for the general welfare. This feeling was doubtless one of the reasons which prompted the healthy exodus to other localities.

Within its original limits is the location of the newly-discovered city of Norumbega. This illusory town of the early voyagers, half-mythical, half-authentic, has recently given rise to considerable speculation. The discoveries made have not been accepted as establishing an ante-colonial settlement, but at least have given a touch of romance to the beautiful and historical Charles River, and the localities along its banks, where enterprising traders from other lands may have given the primitive wilderness a display of thrift and busy civilization. The imagination may fondly picture the waters of the river along the borders of Waltham and Watertown freighted with strange and picturesque craft, bearing to unknown countries the products of the forests, the results of the long and patient toil of the trapper and of the barter with the aborigines. Here, by the researches of the eminent man who has zealously followed his investigations, are the evidences of a busy, intelligent population who have left their record in various places within the ancient borders of Watertown. But the early colonists make no note of their observations of any evidences of previous occupation by civilized

men, and it is only after the lapse of two centuries and a half that additional renown and pre-historic information have been given to the region.

In the cursory review of the history of Watertown in its general relation with that of Waltham, and so far as it has special reference to the latter, we find much of sterling and absorbing interest that cannot be omitted and yet must be touched upon but lightly. The first authoritative record of discovery or of a visit by European settlers was May 30, 1630, when a party of ten from Dorchester went up Charles River in a boat and landed at a spot supposed to be where the United States Arsenal now stands. They were hospitably received by the Indians, who were quite numerous in the vicinity, and were supposed to have planted some crops, but they made no permanent settlement. Later, in June of the same year, Sir Richard Saltonstall moved from Charlestown up the Charles River, and established a settlement, to which the name of Watertown was given. Rev. Mr. Phillips accompanied him as the pastor of the church, and thus on its religious and municipal basis the nucleus of the original town and prosperous offspring was securely and permanently located. The new settlers were of the best class of immigrants, hardy, industrious, familiar with husbandry or some trade, and imbued with those staying qualities necessary to successful colonization. Many of them were from the west of England, but the greater number doubtless came from London and vicinity. They were Puritan non-conformists who came to worship God in their own way and to bear heroically the consequences of their acts. Physically and morally they were well equipped to wrestle with the wilderness and to lay the foundations of a State where the nobility of man should be above that of rank.

On July 30, 1630, the church estate was formally established as the first work for permanent organization, the covenant was subscribed by about forty men and civil and ecclesiastical government authoritatively commenced. At the Court of Assistants, September 7th, it was ordered that the town be called Watertown.

The character and qualities of the early settlers are conspicuous for an occurrence which had an important bearing upon the future policy of the Colony, and reflects honor upon those who manifested the spirit of the occasion. It was the resistance to taxation without representation. When the Court of Assistants, in 1632, ordered Watertown to pay its proportion of a levy towards making a palisade about Newton, the assembly of the people voted "that it was not safe to pay moneys after that sort," as they were not represented in the Court of Assistants. The agitation of this subject gave origin to the committee of two from each town and to the representative body composed of these committees to manage the affairs of the Colony and to become what is now known as the House of Representatives. Thus to the people of

Watertown is due the historic credit of originating this popular representative body, and of establishing its power over taxation. With a prophetic instinct its primitive law-makers composed of the freemen in their collective wisdom seemed to have foreshadowed the contest that was to occur between their descendants and the mother country nearly a century and a half later on the same great principle of taxation without representation.

The first recorded adventure and exploration of the part of the country now comprised within the limits of Waltham was on the 27th of January, 1632, when Governor Winthrop and "some company with him went up by Charles River about eight miles above Watertown." This journey was doubtless on foot and for the purpose of laying out a public road. The account of this visit is a valuable contribution to local history and description, and the names applied by the explorers to the prominent features of the landscape are retained to the present day. Winthrop's journal says they "named the first brook, on the north side of the river (being a fair stream and coming from a pond a mile from the river), Beaver Brook, because the beavers had shorn down divers great trees there, and made divers dams across the brook. Thence they went to a great rock, upon which stood a high stone, cleft in sunder, that four men might go through, which they called Adam's Chair, because the youngest of their company was Adam Winthrop. Thence they came to another brook, greater than the former, which they called Masters' Brook, because the eldest of their company was one John Masters. Thence they came to another high pointed rock, having a fair aspect on the west side, which they called by the name of Mount Feake, from one Robert Feake, who had married the Governor's daughter-in-law. On the west side of Mount Feake they went up a very high rock, from whence they might see all over Neipnett, and a very high hill due west, about forty miles off, and to the N. W. the high hills by Merrimack, above sixty miles off." Beaver Brook is still quite a large stream, emptying into Charles River on the north, and forming the natural eastern border to what has been known as Waltham Plain. The pond described was what is now a meadow between Lexington Street and the Lyman estate. This pond was on the western branch of the brook, a half-mile or more above the confluence with the eastern branch. It would seem from Winthrop's own record that he regarded the western branch as the main stream and so applied the name. The pond, or its present site, is the only one that can be identified with his record. But within the past generation a heated and quite amusing controversy has arisen over the appellation of this and the eastern branch. It is claimed that the latter is the only original and duly accepted Beaver Brook of history and tradition, and that the western branch is Chester Brook. To the eastern branch has been

given the appropriate and euphonious name of Clematis Brook. This application was considered almost a sacrilegious innovation upon the sanctity of old names, but it remains in popular use. The wordy contest over the subject was conducted zealously in the local paper of the day, almost to the personal estrangement of the principal advocates of the respective names, but still the brooks run on as men may come and go and dispute over what was the proper name to be applied to carry out the original designation of the Puritan Governor.

The next local object, Masters Brook, emptying into the river on the north, forming the western boundary of the plain, retains its designation, while Mount Feake is the site of the cemetery of the same name. The high rock may be what is called Boston Rock Hill, near where the reservoir of the water-works is located; while Adam's Chair is supposed to have been destroyed by the Fitchburg Railroad. But historical lore is doubtless at fault or Winthrop's journal was inaccurate. He speaks of Masters Brook as larger than Beaver Brook. This could never have been. That description fully meets the case of Stony Brook, a mile up the river, and flowing into it likewise on the north. This journey and the facts adduced therefrom have been amply treated by local historians, but with evident inability to reconcile the account with objects visited. The conflict of names and descriptions doubtless arose from Winthrop's inadvertence in writing his journal or to the confusion of localities in making up his record after his return from his tour of exploration.

The Indian name of Charles River in Waltham was Quinobin, and the designation has been preserved in the name of some local organizations.

The query has often arisen as to what was the face of the country in the early settlements. Was it continuous and uninterrupted forest and wilderness? Were the settlers obliged to make a clearing in the primitive forest for every tract of land to be cultivated, for every house to be erected?

Reference is seldom made to the fact by historians, either because it has not been deemed of sufficient importance, or because the settlers made little record on the subject. But "Wood's Prospect," that quaint and highly-instructive volume of experience in New England in 1633, states that the country was not all forests. There was much clear land, not only naturally, but from the work of Indians, who had made and preserved such tracts for their planting.

The first grant of land within the limits of Waltham was that of five hundred acres to John Oldham. This grant was in the southwestern part of the town, and included Mount Feake and in the vicinity of Roberts Station. No reason is assigned for this especial favor to one individual. Oldham was a prominent man of those days, and had figured quite conspicuously in the Plymouth Colony and among the wayward and convivial settlers at Merry Mount, and established a

reputation not quite consistent with Puritan simplicity and rectitude. He had led an eventful life, and his leading qualities were quickly recognized by the community with which fortune or his own inclinations united him. He was one of those men who naturally and by force of circumstances come to the front when occasion requires a leading mind. When the General Court was established he was chosen one of the first representatives from Watertown, and in the original town he continued to reside, never occupying the grant allowed him. He met his death tragically by Indians when trading off Block Island. His death was followed by even more tragic and war-like results, for it gave origin to the famous Pequot War. Thus the first and largest grantee of Waltham, the enterprising trader, the energetic magistrate, unconsciously brought about the first serious and disastrous Indian war in New England.

As the necessities for land increased with a growing population, more territory was divided into large areas, to which local designations were given. These divisions relate almost exclusively to the territory of Waltham. The earliest general grant after the original small lots was that of the Great Dividends, made in July, 1636. The land was divided into four divisions, each one hundred and sixty rods in width, running parallel along the northern limits of the town. These divisions were sometimes called squadrons, and the lines dividing them the squadron lines. It is conjectured that they commenced near the present boundary lines between Watertown and Waltham, and ran in a northwesterly direction. The next general grant of land was the Beaver Brook Plow Lands, extending from the Driftway (now Gore Street), near the eastern line of Waltham, south of the great dividends to the Oldham grant in the west. The part of this grant situated east of Beaver Brook was called the "Hither" or "Little Plain," while the section west of Beaver Brook was known as the Farther or Great Plain. These designations are now all obsolete, save that, perhaps, of the Great, or Waltham plain, on which the city is now principally located.

In addition, in 1638, was the Lieu of Township lots apportioned to those freemen who had no lots at the township. They were situated west of the Plain south of the great dividends and extended westward beyond Stony Brook. This completed the general division or allotment of lands in Waltham.

The course of settlement was not towards the level lands of the plains, but for some reason it followed only the hills skirting the northern part of the town. As the population was quite exclusively of farmers it doubtless chose the stronger and more fertile land of the hills rather than the sandy soil of the plain. Besides that, it was moving in the direction of the general trend of migration from the original settlement at Mount Auburn. In this section of the town for nearly two centuries was located the numerical and

intellectual strength of the town. The region is now devoted to farming and still retains the local appellations of Pond End and Trapelo, applied to different sections. The former derives its name from the large pond in the northwest of Waltham, called at different times Mead's, Sherman's or Hardy's as the chance of the possessor of adjacent lands or the caprices of the day may determine. Trapelo traces its name from no reliable origin, though it is supposed or imagined that the word may be a corruption of the words "trap below," used to localize a place of trapping. It is to be regretted that this historical and expressive name is not officially recognized in any local designation. The well-known Trapelo road, still an important thoroughfare, named often in ancient records and famous in tradition, is modernized into North Street. But in popular parlance the name is still applied to the district.

Another locality in that part of the town still retains its ancient cognomen of "Piety Corner," a name derived from the fact that some of the deacons and leading men of the church formerly resided in that vicinity.

Sudbury road, now Main Street, early laid out as a principal thoroughfare to the western settlements, extended through the comparatively uninhabited plain, important only as a means of communication to distant regions. The fact that the territory was unsettled doubtless accounts for its generous width and straight direction, as otherwise it might have followed a course to lead past the scattered farm-houses situated at the caprice and convenience of their owners.

The first bridge over Beaver Brook was built in 1673, and the records state that a gallon of "liccur" was provided on the occasion, doubtless as a necessary element in its construction.

The growth of Waltham as an outlying part of Watertown was slow and without annals of note. Its areas were used mainly as pasturage grounds, into which it was divided by local and natural bounds. Large ranges were established extending from Beaver Brook to Stony Brook, and doubtless for a half-century that land was held in common, unfenced, though allotted in small sections to different owners. The principal hills received early in the settlement the names they now bear, and Mackerel Hill, Prospect (at first, for some reason never explained, called Knop's Garden), Bear Hill, are recorded as landmarks to bound and designate tracts of land and the progress of settlement.

With the increase of population dissensions naturally arose in regard to church and educational affairs. The people thought it a hardship to go to the east end of Watertown to church. The school also was situated at the same place. These two pillars upon which New England progress and advancement rested were desired for local convenience. Military necessity also prompted a more convenient policy of assembling the able-bodied men. In 1691 the town

was divided into three precincts, Eastern, Middle and Western, practically now the municipalities of Watertown, Waltham and Weston respectively. Lieut. Garfield's company was the train-band of the Middle Precinct, and thus on a semi-military basis Waltham commenced its territorial identity.

In 1692 a town-meeting was held to decide upon the location of a new meeting-house nearer the centre of population, but the irreconcilable division of sentiment prevented any agreement. An appeal was made to Governor Phipps and Council to settle the dispute through a committee. The committee made a recommendation that a new meeting-house be erected at Commodore's Corner, in the westerly part of the present limits of Watertown, and about one-half mile east of the Waltham line. This meeting-house was to take the place of the original church and be the "place of meeting to worship God, for the whole town." After much controversy and under protest of many of the freeholders, the request of the committee was accepted and the meeting-house built in 1696. Rev. Henry Gibbs, the pastor of the old church, refused to accept the charge of the new church. With the disappointed portion of the residents, he remained with the old church, and Rev. Samuel Angier was chosen as pastor of the new church. The town supported from its treasury both churches, and constant difficulties arose from the expense of repairing the houses, and otherwise maintaining two antagonistic societies. Mr. Angier's church subsequently became the First Church of Waltham, and its establishment foreshadowed the inevitable division of the town. The dissensions were maintained in an embittered struggle of several years, and all efforts for adjustment only confirmed the contending parties in adhesion to their course. The General Court was brought into the controversy, and in 1712 ordered that the church be moved at the expense of both precincts to such a spot in the Middle Precinct as the latter should select. This order was treated with contemptuous disobedience, and affairs continued to work out their solution by the ordinary development of local interests and prejudices.

In 1713 Weston was set off and incorporated as a town, and the territorial division of Waltham, comprising the Middle Precinct, became thenceforth known as the Western Precinct. The reduction of the area and population of the town, by giving municipal independence to the part which had been most strenuous in its demands and complaints, in regard to facilities for attending church, proved to be no solution of the difficulties between the remaining sections. Permanent reconciliation seemed as far off as ever, and the two churches divided the counsels of the town on all matters pertaining to local government in religious, political and educational matters. Efforts were made for the location of a church edifice in the Western Precinct, and in 1715 the town voted "to build a meeting-house for the accommodation of

the inhabitants of the most westerly part of the town," but naught came of the decision. Before this, in 1703, a grave-yard at present called Grove Hill Cemetery, in Waltham, had been laid out in the westerly precinct. This sacred abode of the dead, around which in our New England towns the affections of the people are centred, added an increased local attachment to the precinct, apart from the parent town. The spiritual consolation of the church within their limits seemed as essential to the inhabitants as the holy and mournful associations of the last resting-place, to which, from the administrations of the pastor and the simple and pathetic solemnity of the funeral, the dead were borne. At the death of Mr. Angier in 1719, and his interment in this grave-yard, the determination for a meeting-house in the precinct gathered new force. The town relented in its opposition, and in April, 1721, approved the recommendations of a committee, that "the west meeting-house be removed within two years to a spot about twenty rods west of Nathaniel Livermore's house."

In 1720 the line separating the Eastern and Western Precincts was determined and laid out conforming to the present boundary line, and the Western Precinct began to exercise the powers approaching those of separate municipal government.

Precinct-meetings were held, records kept, local committees for public affairs chosen, and the farmers began to realize the privileges of a primitive kind of popular sovereignty in their governmental affairs.

As the church was not considered worth moving, an edifice of the kind was purchased in Newton and removed and set up on the new location. This location was at the junction of the present Lyman and Beaver Streets, in the triangular lot west of the beautiful mansion and grounds of the Lyman estate. The site is at some distance from the circle of the settled limits of the town, in the midst of sylvan beauty of the most grand and picturesque character on one hand and on the other the expanse of highly cultivated fields and lawns. The repose of its early life is scarcely changed by the progress and activity of a busy town whose growth has proceeded in an opposite direction. Here for upwards of a century it stood in its solitary simplicity, the spiritual home of the community, the monitor of events most marked and important in local history. From its pulpit came the inspired teachings of the successors of the beloved Angier, many of them men of eminent ability and honored reputation, whose names have a veneration belonging to a life passed in sincere service for the welfare of their followers, leaving its impression of good done for no love of favor or earthly reward. Rev. Wareham Williams was chosen pastor in 1723, and was the first settled minister of Waltham, serving in the pastorate until his death, in 1751.

With the settlement of the ecclesiastical question another remained of almost equal magnitude to dis-

turb the harmony of the two precincts. This was the educational question in the establishment of a local school. It is to the credit of our ancestors that they considered the school interests of so vital importance as to justify the division of the town and public resentment over the manner in which their requests for years for the creation of schools had been ignored. The regular article in the town warrant for the granting of "money for the encouragement of learning in the West Precinct" would come up only to be meagerly acted upon. Finally two of the assessors, William Brown and Nathaniel Harris, refused to levy the usual school tax upon the inhabitants of the West Precinct. This was another instance of the spirit of resistance to taxation without representation, which from the first animated the people and cast its beacon light for the future. Upon a petition to the General Court that body ordered "that the town have two school-houses and two masters, of which each precinct to have one."

At a precinct-meeting in 1729, Allen Flagg offered a part of his orchard as a site for a school-house. After some opposition on the part of the town the order was passed to fix upon a piece of ground between old Deacon Sanderson's and Mr. Allen Flagg's, near Harris' Corner, to be the place to build a school-house on for the West Precinct. This place is what has since been known as "Piety Corner."

The final cause of controversy and ultimate division was the refusal of the town to grant the precinct the care and extension of highways required by its growth and increase of population. Both precincts had by this time come to the wise conclusion that a house divided against itself cannot stand, and the East Precinct reconciled itself to the fact that a permanent separation was better than an inharmonious union. For some years the Western Precinct had repeatedly petitioned for a separation and for their incorporation into a town, but the Eastern Precinct had strenuously and successfully opposed the action. Now it generously consented to a division and took formal action to that end.

A petition was presented to the House of Representatives on December 14, 1737, by William Brown, Daniel Benjamin and Samuel Livermore in behalf of the inhabitants of the West Precinct of Watertown, "praying the said precinct may be created into a separate and distinct township, which is also agreeable to the East Precinct in said Town, as appears by their note accompanying the petition." A bill to that effect was passed and was signed by His Excellency, Governor Belcher, January 4, 1737-38, and the name of Waltham given to the new town.

The name given in the act is the first intimation of what it was proposed to call the town. It is not known by whom or why it was suggested. But it is supposed to have been given because some of the residents came from one of the towns of that name in England. Waltham Abbey, a town near London, is

generally accepted as the place from which the name was derived. The name is beautiful and appropriate in its signification, being a compound of two Anglo-Saxon words meaning a forest home. The wild and extensive forests still extant in Waltham and those which are preserved and cared for on some well-known estates, with the shaded roads winding amidst their borders of native trees, give even at this day a pleasing suggestion of the appropriateness of the name.

At the time of the act of incorporation it was ordered that William Brown be informed to assemble the legal voters to elect the town clerk and other officers, to stand until the anniversary meeting in March. At a meeting held January 18th, pursuant to the notification given by Deacon Brown, the following officers were chosen:

Moderator: Deacon Thomas Livermore.

Selectmen: Deacon William Brown, Deacon Thomas Livermore, Mr. Daniel Benjamin, Mr. Joseph Pierce, Lieutenant Thomas Biglow.

Town Clerk and Treasurer: Samuel Livermore.

Constable: Mr. Joseph Hastings.

Assessors: George Lawrence, John Cutting, John Chadwick.

Sealer of Leather: Mr. Joseph Stratton.

Fence Viewers: John Ball, Jr., Joseph Hagar.

Surveyors of Highways: John Ball ye 3d, John Viels.

Tything-Men: Isaac Peirce, Theophilus Mansfield.

Hogreves: Josiah Harrington, Elnathan Whitney.

Thus the new town was fully inaugurated in its municipal character and started on its career to work out its destiny.

The number of inhabitants at that time was probably about five hundred and fifty. The boundaries of the town were the same as those of the precinct, and the area comprised about eight thousand eight hundred and ninety-one acres. Since the incorporation but two changes of any moment have been made in the boundaries and area. In 1849 it received an accession of territory from Newton, on the south side of Charles River, and in 1859 it lost a part of its territory in the northeast part of the town to form a part of the new town of Belmont.

The situation of Waltham is most eligible and its natural scenery is varied and beautiful. It combines the rugged and picturesque outlines of eminences which skirt the northern and western limits of the city, wild forest growth, the cultivated areas of thrifty farms and estates under a high state of tillage, walks and drives amid sylvan beauty, stretches of water in ponds and brooks and rivers to diversify the scene and give to the landscapes the effect so pleasing to mind and eye, and withal the busy and thrifty appearance of a typical American manufacturing town where a great proportion of the laborers and artisans live in houses of which they hold the title. The thickly-settled part of the city is on an undulating

plain, while the surrounding hills form with it a kind of natural amphitheatre. This is intersected by Charles River, giving rise to the designations of "North Side" and "South Side" respectively of those parts of the city. The river is spanned by numerous bridges of substantial structure, which afford ample communication to bind the people together in the bonds of common local interest. Charles River, besides being the primal element of Waltham's prosperity in the facilities it furnishes for manufacturing purposes, is one of the chief elements of the natural attractiveness. Its course above the factories, where its waters are devoted to the utility of man, is one of great beauty and charming effect. Winding amid picturesque banks densely wooded, with the foliage extending to the water's edge, broadening into a miniature lake with a beautiful island in its midst, like a gem upon its bosom, furnishing in the intricacies of its shores the delightful vistas where the eye loves to lose itself, occasionally varying its natural features with the outlines of some residence, it suggests, with its irregular expanse and wild romantic banks for many miles of its course, a theme worthy of the artist's pencil or poet's imagination.

On the other hand, Prospect Hill, one of the highest eminences in the vicinity, rising four hundred and eighty-two feet above the sea-level, an elevation perhaps insignificant in its comparative height, affords a remarkable view, combining in its range of vision every variety of landscape and giving at a glance so much that may be said to be representative of New England in its traditions and history, its learning and culture, its arts and manufactures, its commerce and agriculture. In this connection no more faithful sketch of the scenery here unfolded can be given than that presented by the most prominent and distinguished son of Waltham in a local address:

"From the crest of the lesser Prospect Hill is presented a panorama of beauty, embracing an entire sweep of the horizon, except when broken by the summit of the adjoining eminence. The unaided vision follows the vessels of our own or of distant lands, entering and departing the harbor of Boston. On the west, the many mountain ranges of New England rise up before us, mountain on mountain, until summit and cloud are united. You can here watch the heavy, varying shadows of Wachusett and Monadnock, and follow range upon range, until the mountains disappear in the cloud-caps of the azure sky. On the south, in the river valley, clusters the line of picturesque and prosperous New England villages that hill the plateau of the river to the sea. In what part of the world can we find a cluster of thrifty towns and cities that, in beauty or prosperity, equal those that lie at the foot of the Tri-mountain city?—river, lake, and ocean, hill and vale, copse, dell and forest, plain cottage and the stately mansion, diversifying the prospect. Every line of railway that creeps upon the plain is marked upon this busy and beautiful map of New England life by an unbroken succession of the habitations of men and the houses of God. Nature and art thus combined, the evidences of happiness and prosperity multiplying on every side, present a scene that surfeits every sense with pleasant emotions."

The soil of Waltham and the natural features otherwise are well adapted to agriculture and the purposes of more thickly populated residence. The soil in the northern part, which, as has heretofore been stated, was the locality first settled, is strong

and fertile; that of the plain on the north side of the river is a lighter, sandy loam, with a substratum of sand, while that of the south side is of the same general character, but with a substratum of almost impervious clay. There are no sterile tracts or ir reclaimable swamps of any great extent to impede the successful progress of the husbandman or present obstacles to the resident. The rocky summits and sides of the hills are covered with a thrifty growth of forest when allowed to grow without the impediment of axe or forest fires. Oak, in its several varieties, white pine, elm, the common maple, birch and hemlock are the principal indigenous trees, while nearly all kinds of this latitude are found scattered through its forests.

Such are some of the natural features of Waltham at its incorporation, which exist to a greater or less extent to-day, and are appropriately connected with its history. Their utility has entered into its development. The physical characteristics of a place have their political significance in the broad sense of the term.

It may be interesting also, both for casual and historical purposes, to note the general appearance, characteristics and environment of the town in other than its natural aspects at the time of its incorporation, when it entered upon its history as a separate municipality, and took the cares and responsibilities of an individual township. Waltham was then little more than a community living in scattered farm-houses, with no well-defined village or centre of population. Between Beaver Brook and Pleasant Street was an inn and a few houses, presenting the nearest semblance to a village. The single church was quite isolated, standing at some distance from this locality. The territory to the west, where is now located the busy and thickly populated limits of the city, then extended as vacant land, devoted to pasturage, a little agriculture and forest growth. Waltham Plain, a familiar appellation in all the surrounding country, was only a broad tract of unoccupied land, intersected by a wide and straight country road—the Sudbury Road, then a great thoroughfare of traffic and communication, and one of the main arteries of travel in the Colony from Boston to the interior and western towns.

Consequently, the number of taverns for the entertainment of man and beast was out of proportion to the population. There were two or three in the eastern section of the town and as many in the western section. In this connection it is said that towards the close of the century the Sudbury Road was the greatest highway leading from Boston, and the travel of stages to New York and the interior of heavy teams and lighter vehicles of use and pleasure was important and incessant. There were at one time nine inns within the limits of the town. As in those days, next to the meeting-house on Sunday, the inn was the centre of news and local gossip, as well

as a place of hilarity and hospitality, the imagination may picture along the old road many characteristic scenes of life and excitement incidental to the olden time and to the traditions of the country inn as celebrated in prose and poetry.

There were few other streets in the town. Beaver Street, as at present named, and the Trapelo Road, were the principal thoroughfares leading in the direction of Boston. Traverse roads, like Skunk or Mixer's Lane, sometimes recorded as the way to the school-house, now called Bacon Street, leading to Piety Corner; Prospect Lane, running over the hill as at present; South Street, extending to the Poor Farm, a lane where now is Harvard Street, running to the fields adjacent to Mt. Feake; Grove Street, known as the back road to Watertown; a road leading from Piety Corner to the hills towards Lincoln, Pigeon Lane, running northward to Trapelo, were about all the highways which broke the solitude of the little town and opened the intervening land to cultivation and settlement.

In the northern part lay the social, political and financial strength of the town. The farmers of Trapelo, Pond End and Piety Corner came over to the town-meetings in the church and managed public affairs both by intellectual and numerical force. At this period they furnished the most prominent town officers and representatives and administered the government with firmness and good judgment. The abilities of the early residents are displayed by their acts and results; and the names of Wellington, Bright, Smith, Livermore, Lawrence, Stearns, Niles, Clark, Childs, Sanderson, Fiske are represented among the citizens of the present day.

At this period the Province was in a quiet state in its political affairs and in its relations with the mother country. The contest between the New England Colonies and the French, which was to test so severely the spirit and valor of the people in the successful attack upon Louisbourg, had not commenced, but the cloud was rising upon the horizon. The Provinces still regarded England as their old home. No subjects were more loyal. There was no thought of aught but devotion to the mother country. Jonathan Belcher was Governor. He was appointed by the Crown, and although he was born in the Colonies, was an ardent advocate of the royal prerogative. George the Second was King and Walpole was at the head of the ministry, hastening to his fall, which was to close a remarkable career in office. While the Provincials felt a deep interest in everything pertaining to the welfare of the kingdom, they were jealous of any infringement of their rights of local government, and already controversies were arising between the Governor and the General Court on questions of local issue, which were eventually to be settled only by war and final separation. Already had Montesquieu, with his far-reaching prescience in political affairs and keen penetration of coming events, noted the

fact that in the forests of America was arising a people who would ultimately become a nation and shake off the trammels which bound them to another government.

Religion had lost much of its austerity and intolerant character among the people through the lapse of time and change of mind and character since the early settlement. But still the church ruled in secular as well as in spiritual affairs. Its potent influence was felt in all the walks of life. It was the nucleus of the body politic as well as the soul of the spiritual body. On every Sabbath-day the greater part of the population congregated at the meeting-house. The men, and women, and boys sat apart, the latter often on the pulpit or gallery-stairs. The deacons sat in front, facing the congregation, while the sexton turned the hour-glass as the hours were exhausted in the discussion of the heads of the long sermon.

The choir, made up of the graduates of the winter singing-school, rendered the plaintive and vigorous hymns of the ancient psalmody with native harmony and sonorous effect. The gathering of the people at church, especially those who came from a distance, and brought their dinners, gave to the community an opportunity for neighborhood greetings and for the interchange of the current news of the day and the gossip which gave a savor to the uneventful routine of life. The sacred and secular associations which cluster around the meeting houses of that day are an effective part of the unwritten yet not less important and interesting history of the land.

It was about this period that the great awakening in religious matters took place in the Colonies. Edwards, the great philosopher and theologian, represented the Calvinistic doctrines and expounded them with a vigor and effect, earnestness and erudition hitherto unknown in the country. Whitefield, recently arrived from England, was making a tour of the Colonies and quickening religious zeal by his fervid eloquence, his charm of manner, sincerity of views and marvelous versatility as a pulpit orator. A lively interest was created throughout the Colonies by the controversies over opposing principles of faith, and acrimonious and sometimes bitter discussions arose through a more liberal interpretation of the Scriptures and progressive independence among the people on sectarian matters.

Newspapers were hardly known in the country towns, and not of general circulation. There were but a very few throughout the broad extent of the Colonies, and those gave but the most meagre synopsis of what may be called the news of the day.

In general literature we find our times in the days of Pope, Swift and Fielding in England, and of Franklin and Edwards in our own land, who may be considered the pioneers in American literature. There was little variety to select from throughout the households, and that pertained mainly to a religious character. In private libraries, as shown in the enumeration of

books bequeathed or administered upon, it is curious to note the religious commentaries and works upon divinity, without one ray of the light of poetry, or fiction, or descriptive writing, though such works were then extant, and to-day are regarded as of standard character. The constant reading and re-reading of these works gave a fund of limited knowledge on those subjects, but above all inculcated a purity of style and diction and a vocabulary of excellent English which marked the writings and utterances even of those whose ways of life led them from the domain of letters. Subsequently when our towns sent forth their little manifestoes against the tyranny of the British Crown, and the farmers gave expressions to their sentiments in words full of meaning, their written protests called forth admiration in British Parliament for their incisive English, purity of style and elevation of thought and expression.

In financial matters an irregular and debased paper currency was afflicting the people and causing embarrassments and losses in trade. There were different issues of paper, and the early and latest were called respectively old and new tenor and passed in a ratio of three or four to one. In nearly all transactions and payments recorded at this time, the stipulation is made that the terms shall be of old or new tenor.

Slavery existed to a limited extent, and we may occasionally note the sale of a servant or quaint observation upon the disposition of such a chattel in a will.

Local amusements were few and simple. They were confined mainly to the neighborhood gathering or perhaps a dance at the tavern. Stern realities took the place of the social amenities of life and taught the dependence of all upon the pursuit of a livelihood amid the severe scenes of nature and the primitive hardships and inconveniences of a country still new and unredeemed from the wilderness.

But in Boston the colonial life shone resplendent, and the town, with its closer connection with England and its centres of wealth and trade, reflected in ambitious imitation the customs prevailing in the old countries. And I cannot close this sketch of the times at the period when Waltham was enrolled among the towns of the Bay Colony better than by introducing, from the interesting book of W. R. Bliss on "Colonial Times," a vivid picture of Boston as it appeared to the denizen from the outlying country in this very year, 1738: "From the elevated site of St. George's Tavern on Roxbury Neck the traveler saw the steeples of Boston, its harbor lively with vessels, the King's ships riding before the town. As he rode along the narrow way leading into the quiet town the most prominent object attracting his attention was a gallows standing at the gate. When he rode within he found in everything around him a wonderful contrast to the quiet and monotonous views which had always surrounded his life at his country home. The

streets were paved with cobble-stone and were thronged with hackney coaches, sedan chairs, four-horse shays, and calashes in some of which gayly-dressed people were riding, the horse being driven by their negro slaves. Gentlemen on handsome saddle-horses paced by him. He noticed with amazement the stately brick houses and their pleasant gardens in which pear-trees and peach-trees were blooming. In the Mall gentlemen dressed in embroidered coats, satin waistcoats, silken hose and full wigs were taking an after-dinner stroll with ladies who were attired with bright silks and furbelowed scarfs, and adorned with artificial flowers and patches on their cheeks. Boston was an active, thrifty, trading town; its shops, distilleries, wind-mills and rope-walks were all agoing, and as he turned into King St. and pulled up to the Bunch of Grapes tavern, he was near the Town House and conveniently situated for all purposes of business or pleasure."

Such is an imperfect view of the aspect of the country and of affairs at the time Waltham entered the sisterhood of towns of the Massachusetts Colony. And as every town, as an integral part of the Colony, had its direct influence in the policy that was to decide the destiny of the country, we can trace the humble yet important sphere of such a community, the relations which it bore in the pending era of history. It was the character and sentiment of the towns banded together by a common feeling and independently asserting their rights and publishing to the world their principles of government which prepared the whole people for concerted action, as though by common impulse, and precipitated the Revolution that was to startle the world and work changes in governments and peoples far beyond the limits of the American Continent.

In the first annual election after the incorporation, in March, 1738, an entire change was made in all the officers from the highest to the lowest, with the exception of the clerk. Thomas Hammond, John Bemis, John Smith, Ensign Thomas Harrington and Deacon Jonathan Sanderson were chosen selectmen. Samuel Livermore was chosen clerk and treasurer, an office he was to continue to hold for many years in succession. Lt. Thomas Biglow was chosen Representative. A pound was built, as we are informed by the appropriations, and the "town Stockes were fitted up." Thus we are impressed with the facts that unruly cattle and men were to be cared for and restrained in the very inception of government. Action was also taken in July of the same year towards the permanent establishment of a school, and a committee was appointed "to treat with Mr. Thomas Harrington and agree with him if they can to keep the school for one-quarter of a year as cheap as they can." The agreement was made, and annually thereafter for some years £80 were appropriated for the ensuing year. Subsequently, the same year the school was made a moving school. For this purpose, the

territory was divided into three squadrons or districts, and the school was to be kept a proportionate part of the year in each squadron. Each squadron was to furnish a place for the school and board for the teacher. The First Squadron included that portion of the town east of the church and north of Beaver Street; the Second that west of the church and north of Beaver Street; and the Third all south of Beaver Street, including the plains from the Watertown line to Stony Brook. This division gives an adequate idea of the sparse population within the limits of the present thickly populated portion of the city, and of the disproportionate number of inhabitants in the farming area of the north and east. The regular school-house remained at "Piety Corner" where it was first located.

The records also throw light upon the customs of the time in the ample provision made for the funeral of a widow buried at public expense. Four pairs of men's and two pairs of women's gloves were provided, and also "such a quantity of rum as should be found necessary." Also in another case, gloves were furnished at public expense for the minister and selectmen and for the bearers, who, according to the custom of the day, literally bore the corpse on their shoulders to the grave-yard, and cider for all who attended the funeral services.

In January 1739, a joint committee was appointed by Watertown and Waltham to arrange for the apportionment of the outstanding debt of the town of Watertown at the time of the division. The debt was satisfactorily divided with the arrangement that Watertown should assume £95 5s. 3d. and Waltham £80 8s. 11d. In March of the same year a committee of the three towns originally comprised in the territory of Watertown, Weston and Waltham was appointed to renew the boundaries of the grant at Wachusett Hills. This tract of land was granted to Watertown by the General Court in compensation for land taken from the town when Concord was laid out. The boundaries of Concord by its grant of six miles square encroached upon Watertown, and after repeated grants, which were never located, the General Court, after the lapse of a century, apportioned a tract of two thousand acres at Wachusett. This land was held jointly by the three towns until Waltham and Weston sold their share in 1756 for £267 6s. 8d., or two thousand pounds, old tenor.

Another joint ownership of the three towns was that of the Great Bridge which crossed Charles River at Watertown. It was built at the head of tide-water and was undoubtedly the first bridge over the river, and for many years the only one. It furnished the only access by land for the towns north of the river to Boston by way of Boston Neck. The building and maintenance of the bridge was always a subject of much controversy until the present century. Watertown maintained that as it was for the use and convenience of so many towns, it should be sup-

ported by the county, but its claims in this respect were not allowed. When Weston and Waltham were set off, it was one of the stipulations that those towns should bear their proportion of its support. In 1742, on the adjustment of the accounts by the selectmen of the three towns, the share of Waltham was £59 6s. 7d. Waltham continued to contribute to the support of this bridge until the beginning of the present century, when, in relinquishing its share of proprietorship of the weirs located near the same place on the river which were originally owned by Watertown, its obligations for further contributions were canceled.

About this time, on voting to re-apportion the pews in the meeting-house for the ensuing five years, the first choice was given to the largest tax-payer and so on in order through the house, with the provision that where the claims were equal, age should determine the choice. Samuel Livermore, in consideration of the use of his land for the meeting-house to stand upon, was granted a pew on the east side of the pulpit for himself and heirs during such occupation.

The ammunition of the town was kept in the belfry. The stock required by law amounted to 150 pounds of powder, 300 pounds bullets and 450 flints. In 1744 the number of men reported by Captain Samuel Livermore, as under his command, was 90. Capt. Livermore was a man of much prominence and many offices—captain of the militia company, deacon of the church, sexton, town clerk, town treasurer, representative repeatedly to the General Court.

As the cause of education was one of the primary causes of the separation from Watertown and the establishment of the town, the records show that the subject of the schools was ever an important one in the town-meeting. The moving schools were for a time abandoned and then re-established. Finally, district schools were organized permanently in different quarters of the town and maintained with regularity. Waltham has ever kept up its traditional interest in the schools, supported them generously, and maintained their high character in accordance with the standard of the day. No town has with more careful vigilance guarded the public welfare in this respect. In all that regards public education, it has stood in the front rank and been true to the history and memories of its origin.

Also from the beginning of its corporate existence another subject of contention which precipitated the division has ever received especial care and support. The highways were an early and fruitful theme of local consideration. In the belief that they were not what they should be when the former municipal relations were maintained, the town from the first made ample provision for their care and extension, and displayed the sincerity of its views by its action. Among the most liberal appropriations were those for the highways. These appropriations, expended with care and system, have been maintained to the present time. Waltham roads in the past have stood the test

of criticism, and have been cited in official reports without its borders for their construction and care of maintenance. It is only since larger increase of wealth in other suburban communities, allowing greater expenditures per mile and per capita, that her roads have not held the first place in comparative excellence.

In the French and Indian Wars, which drew all New England into active and bloody participation, Waltham furnished its due proportion of soldiers. Though the records do not show that separate companies for such service were organized, there are the names of its citizens borne on the rolls of companies organized in the vicinity. Louisbourg, Lake George and Ticonderoga drew from every New England hamlet the youth who sought to defend the Colonies and maintain the military renown of their ancestors.

The growth of the town was slight during these years, as nothing occurred to stimulate the coming of many new residents. The community depended on its natural increase. Early marriages and large families marked provincial life. The yeomanry of Waltham; like that of all its sister towns, was developing into vigorous hardihood with the strong physical and intellectual qualities that in due time, under a destiny which they could not foresee, were to startle the world with a revolution in the form and principle of government, and give a new turn to human affairs. They were unconsciously forming a character and husbanding resources to stand them in the days of trial. The school-house and the town-meeting were inculcating the principles and powers of self-government, and the spirit of freedom was abroad in the land.

The files of the probate records give us interesting details of the inner life of families and estates, and of the customs and legal forms affecting social and business matters.

The inventory of the personal effects of Isaac Brown, who died at this time, is recorded. He was evidently a yeoman and shopkeeper. Besides the firelock and sword, which were usually included in the list of valuables transmitted by will or inheritance, was one negro girl, "Vilet," whose value was placed by appraisal at £26 13s. 4d. Among his shop-goods were "garlix," "osnabrig," "Dowlas" and "Tammy," articles then undoubtedly recognized by the fashion of the day. John Ball in his will directs that if his negro man "prove Cross or Disobedient to the commands of his wife that he be sold by his Executor." Capt. John Cutting's estate furnishes an inventory of literature, including the "Great Bible" and two small Bibles, some of Mather's works, "Christ dying a sacrifice," "the Blessed Hope," "Sundry Pamphlets," besides five slaves, with their appraised value as follows: Slave Lucy, £20; Bartholomew, £20; Dinah, £20; Ishmael, £15, and Thomas, £1. In some inventories the list of books left or bequeathed inclu-

ded what is now regarded as the standard literature of the day; in others, Latin and Greek classics in the original; but generally the books were of a solemn and deeply religious character.

In 1757, when the Acadians or French Neutrals were exiled from their homes and distributed among the different provinces, some of the unfortunates were sent to Waltham. They became a burden of public support and were not the objects of that hospitality and charity to which their misfortunes would seem to have entitled them. Every town would relieve itself of them when occasion would allow, and if one of them strayed from another place he was quite peremptorily ordered away. At one time as many as thirty were residents in the town. Different in race and religion, speaking a foreign tongue, accustomed to another mode of life, friendless and homeless, they undoubtedly suffered a physical and mental pain which in these days would appeal to our warmest sympathies. But the bitterness of the contest along the Canadian border waged between the English and French, and their descendants, with the cruel participation of the Indians and the fierce animosity of religion, steeled the hearts of the provincials against the humane feelings which otherwise would have marked their conduct.

Much of the local legislation is on the subject of schools, their assignment to different parts of the town, the hiring of teachers and appropriations for their pay. After several suggestions which were not, at first, favorably received, the town in 1760 voted to hire a school-mistress. Mrs. Geo. Lawrence was appointed and may be assumed to be the first female teacher in the town.

In 1761 a work-house was ordered to be built and a committee appointed for the purpose. It was probably located near the corner of Weston and South Streets. In the same year action was taken, in co-operation with Newton, to build a bridge over Charles River near the mouth of Beaver Brook. This was at the location of the present Newton Street bridge, and was the first bridge over the river within the limits of Waltham.

The close of the French War, in 1763, while it brought peace to the Colonies, and dispelled the fears of the savage invasions, to which the northern borders had been subject, drew in its train the results which soon alienated the people from England and precipitated the final separation. England began to devise new means to pay for the war and keep up its military establishment in America. The Stamp Act, in 1765, was among these resources. Instantly the people were aroused. Every little hamlet felt that a question of principle was at stake, more than that of the mere amount of the tax. Waltham was in touch with its sister communities on the questions of popular colonial rights, which agitated the public mind for the next ten years, and its records give ample evidence of the patriotic spirit which animated its peo-

ple and sought expression in the resolutions and action of its town-meetings. It was the town-meetings which kept public opinion aroused and made their influence felt, even across the sea, so that the British Parliament passed an order forbidding that they should be held, except for the choice of officers and the appropriations for ordinary expenses.

In 1764 Joseph Dix was chosen representative and commenced a service of fifteen consecutive years, thus representing the town through the critical period of American history. He succeeded Samuel Livermore, who had served seventeen years, fourteen of which were of consecutive service. At this time the population of the town was 663, including fourteen slaves. There were ninety-four houses and 107 families.

Boston was the commercial and political centre of the Colonies, and as the seat of provincial government gave inspiration to all the lesser towns within the circle of its influence. Its resolutions and actions were endorsed so as to give greater force to its leadership and to its greater interest in all that appertained to public welfare. In 1767 the town endorsed Boston's approval of the measures to "promote industry, economy and manufacturing," and later, by other acts, showed its disposition to keep in step with the prevailing and growing sentiment of liberty.

Late in the year 1772 the famous Committee of Correspondence of Boston was formed and commenced that work which was great because great results followed. The object of the committee was to open a correspondence with all the towns in the Colony and with other Colonies, and to publish to the world the sense of wrong inflicted upon the people by the home government. It was a plan to create a unity of sentiment and action, and encourage an interchange of opinion on the great question of the hour. It has been aptly termed the foundation of the American Union. The time had come when the feelings of every little community were brought to a tension that could not stand mere inaction. Submission was degradation and ultimate loss of liberty, and the spirit of loyalty, ever so manifest, must yield to higher principles.

January 23, 1773, the letter from the committee was read in town-meeting. It asked for an explicit declaration of the sense of the people, and solicited full communication of their sentiments. It also set forth in spirited words the grievances of the Colonies and the invasion of their civil and religious rights. The town appointed a committee, consisting of Samuel Livermore, Esq., Jonas Dix, Esq., Captain Abijah Brown, Leonard Williams, Esq., and Deacon Isaac Stearns, "to take the same into consideration, draw up a vote in answer to said Letter, and report." But there is no record that such a report was ever made. Another letter, setting forth the barbarous and unchristian practices of African slavery, was read at a town-meeting in May, and referred to the representa-

tive, to act upon according to his discretion. In July, 1774, the selectmen voted to lay in a stock of ammunition, consisting of four half-barrels of powder, four and one-half hundred-weight of bullets, and 300 flints. In September, in response to a recommendation of an assembly of delegates from Middlesex County, held at Concord, that the town appoint local Committees of Correspondence, the following vote was passed at a town meeting:

"Voted and chose Captain William Coolidge, Dea. Elijah Livermore, Captain Abijah Brown, Lieutenant Abijah Child and Ensign Abraham Pierce a committee for other towns to send to in any emergency, and they to send to other towns on any emergency." This committee was a local Committee of Safety. When the question came up among the several towns of resolving the General Court into a Provincial Congress, the town appointed Captain Abijah Brown, Leonard Williams and Jonathan Brewer a committee to adopt instructions to the representative on the subject.

Subsequently Jacob Bigelow was chosen delegate. Waltham had two delegates, Jacob Bigelow and Eleazer Brooks. Watertown, three; Newton, three; Weston, three.

December 12, 1774, a town-meeting was held to take into serious consideration the Association of the Grand American Continental Congress, and according to their resolves, to choose a committee to attentively observe that such association be punctually and strictly carried into execution. Jonas Dix, Cornet Nathaniel Bridge and Dea. Elijah Livermore were chosen committee.

At a town-meeting held Jan. 9, 1775, the question was put "to know the mind of the Town, whether they will all be prepared and stand ready-equipped as minute-men, and it passed in the affirmative." Jonas Dix was chosen delegate to the Second Congress at the same meeting.

The selectmen for the eventful year, 1775, were Jonas Dix, Cornet Nathaniel Bridge, Lieut. Daniel Child, Josiah Brown and John Clark. One or two merit more than passing notice for their personal qualities and worth, and deserved prominence, as all do, for the important era in the history of the country in which they served and guided the affairs of the little town. "Squire" Dix, as he was called, was a man of great ability, as recognized by the important committees on which he served in Congress, and by the frequent suffrages of his fellow-citizens for positions of responsibility and honor. No man seems to have served the town with more activity, and have done more for the cause of liberty in those historic days. Nathaniel Bridge was intimate with Washington, and entertained him at his house while in command at Cambridge. Thus in the men whom she chose to represent her, at home and in Congress, by the acts of her town-meetings, and by the patriotic fervor and devotion of her inhabitants, Waltham was fully in accord with the neighboring towns when the

impending struggle for resistance and finally for independence was to commence.

When the first act of the Revolution transpired at Lexington, April 19, 1775, it would be expected that Waltham, a contiguous town, would be prominently conspicuous through her militia company with the events of the day. But the records are singularly obscure in regard to any part taken by the towns people in that memorable affair. There are a few individual instances of citizens who joined in the pursuit of the regulars, but there is no other authority, either by record or tradition, that the military force was near the scene of action. It has been a source of wonder and conjecture among local historians and orators, why the town did not unite with the neighboring towns in sending its company to the scene of duty. It has even been surmised that Waltham was a Tory town, with a majority of its citizens in sympathy with the royal cause. But recent researches in the archives of the State fully disprove such intimations. There is ample evidence that the citizens were fully aroused with the spirit of patriotism and the militia company was in active service, though not present at the contest along the line of march of the British troops. The record of the Committee of Liberty shows that during the winter preceding the battle, cannon, ammunition and military stores were stored at Waltham. Doubtless in contemplation of a raid by British troops, and from the danger through the proximity to Boston, of their sudden seizure, the committee had the cannon, mortars, powder, balls, shells, etc., transported to Worcester and Concord. Previous to the Concord expedition, spies had been over the road between Boston and Worcester, and had been apprehended at Weston. When it was known that the troops were preparing for a march into the country, it was a matter of doubt whether their destination was Concord or Worcester, and on the day of the battle when Percy's troops marched out over Boston Neck, it was even then a matter of conjecture as to whether they were intended as reinforcements to the troops returning from Concord, or as a diversion in the direction of Worcester. As Waltham was on the direct road to Worcester, it was but natural that alarm should spread through its borders and the local company should be ready for work near at home. Many families left their homes with their valuables in anticipation of attack, and the greatest anxiety pervaded the little community. But the muster-roll of the Waltham Company, in the State archives, tells its own story. It gives the list of 12 officers and 109 privates who were on duty for three days at this time, marched 28 miles and drew pay for the service according to the following certificate:

"Company in Waltham, called out by Colonel Thomas Gardner on station in defence of the Liberties of America under the command of Abraham Pierce, Capt. to Concord, and Lexington file and the number of miles traveled and how our Expenses and these Tins may certify that my Company was kept upon guard till Saturday the 1 day after the file at Concord.

"ABRAHAM PIERCE, Captain."

The list is remarkable in the fact that it shows that more than one-half of the male population of Waltham above sixteen years was under arms that day and did their country service. But what route they marched and what were the incidents of their service cannot be ascertained.

Immediately after the battle troops began to gather from the country and march towards Boston; some of the regiments were encamped at Waltham, but were removed with the main army to Cambridge. Waltham raised a company for the service. This company was commanded by Captain Abijah Child, and was attached to the Thirty-seventh Foot, commanded by Captain Thomas Gardner. Besides this company there were men from the town scattered through other regiments of the army. Captain Childs' company was undoubtedly in the battle of Bunker Hill, as the regiment was in the battle and Colonel Gardner was there mortally wounded and six men were killed, though no names are given in any of the accounts. In the subsequent records of the town votes are passed for reimbursing some of the citizens for accoutrements lost at Bunker Hill.

The most prominent military man of the town was Colonel Jonathan Brewer, who commanded a regiment in the Continental Army, and was at Bunker Hill, where he was wounded. He made an offer to Congress to raise troops for the invasion of Canada. When this expedition was organized and marched to the capture of Quebec, under Arnold, through the wilds of Maine under great privations, Waltham men were with it, and afterwards were awarded additional pay for their sufferings. As Colonel Brewer, Captain Childs and other officers were with Washington in the Jerseys in 1776, it is supposed that the Waltham Company shared the fortunes of the army out of New England. To all the requisitions of men during the remainder of the war, the town responded with patriotic devotion and the soldiers were rewarded with liberal pay and bounties by their fellow-citizens.

In March, 1776, Captain William Coolidge, Thomas Wellington and Lieutenant Samuel Stearns were chosen a Committee of Correspondence. As they are also referred to as the Committee of "Inspection" and "Safety," doubtless they had general supervision of the local military and the share of Waltham in conducting the war during their term of service. In May, 1776, the town voted to engage their fortunes and lives in support of a declaration of independence should Congress for the safety of the Colonies so declare them. When the declaration was proclaimed it was read and spread at length on the town records.

After opposing in one year the formation of a State Constitution, the town instructed the representative in 1777 to join with others in the formation of such Constitution as shall best promote the happiness of the nation. In 1778, at a meeting, it was voted to instruct the representative to vote in favor of ratifying the Articles of Confederation.

RESIDENCE OF THE LATE THEOPHILUS W. WALKER,
WALTHAM, MASSACHUSETTS.

In August, 1779, Jonas Dix, Esq., and Capt. Jonas Clark were elected delegates to the Constitutional Convention.

During the remainder of the war the struggle bore hard upon all the towns. Constant calls came for men, some to serve with the Continental Army, and others to perform special service where the exigencies of war and the possibilities of attack might require. As orders were issued respectively at different times to the first and second companies of militia, it is inferred that there were two companies in town at that period. The currency had become so depreciated that fabulous sums were paid for bounties, and also for wages and salaries of those in civil stations and for the necessities of life. A convention was held at Concord for the regulation of prices of merchandise and labor, and in obedience to the recommendation of that convention the following schedule of prices was fixed: Hay, 36s. per hundred-weight; oats, 36s. per bushel; labor for haying and wall-laying, 42s. per day; mechanics with tools and found, 60s.; blacksmiths for shoeing a horse, £4; meal of butchers' meat and vegetables, 12s.; same with tea, 15s.; mug of flip, 12s.; bowl of toddy, 12s.; making a coat, £6; breeches, £3, etc. A committee of eleven was elected and directed by the town to carry out the provisions of the order. Persons who should charge more than these rates were to be dealt with by the Committee of Inspection, Safety and Correspondence, and have their names published in the newspapers. In the demand for soldiers, the bounties in many cases were specified to be in silver.

In 1780, the first election under the new State Constitution was held, and the vote of the town was: for Governor, John Hancock, 54; James Bowdoin, 3.

The natural increase of population, probably owing to the demands of war, had not been sustained, and in 1783 the population numbered but 683. When the new Constitution of the United States was referred to the people of the State for ratification, Leonard Williams was chosen delegate to the Convention. In the vote for ratification in 1788, though the majority of the delegates from Middlesex County opposed the new Constitution, the delegate from Waltham voted for it, thus showing that he forecast the future correctly in relation to that great instrument of civil government. When, in the first year of the administration, Washington visited Massachusetts, he passed through Waltham. He was received at Weston by a horse company and escorted through the town with every demonstration of the respect to which he was entitled.

It was not uncommon for people in identifying themselves as new citizens of a town, to have the fact publicly known and to be formally accepted as such. In 1793, Christopher Gore was received as a citizen, in accordance with his own request, expressed in writing. He was a distinguished lawyer of Boston, and afterwards rose to high political prominence as

diplomatist, Governor and United States Senator. He bought large tracts of land, and built an elegant home. His residence and surrounding estate are to-day among the most attractive of the State. The grand imposing mansion, not ornate but substantial, the spacious grounds and beautiful old trees, and the extensive fields under high cultivation, show the accumulated taste and care of nearly a century. A place of the same character, which has been celebrated for about as long a time, is the Lyman estate, with its mansion-house, lawns and gardens, its farm-houses and fields. Both of these places have been quite historical as examples of American estates preserved for some generations in their original and ideal grandeur and proportions.

Until 1796 the finances of the town were conducted in the tables of pounds, shillings and pence, but after that time dollars and cents came into universal use.

In the War of 1812 Waltham manifested a spirit of generosity to her soldiers, paying them liberally, in addition to the stipend allowed by the government. The military company was called into service, but the service was of the bloodless character which appertained to guard duty, or the watching against the attack of an enemy which never came. Party spirit ran high, and opposition to the war and criticism of its management were carried into town-meetings and elections, social gatherings, and even into the church. Rev. Mr. Ripley in one of his sermons gave vehement and independent expressions to his views, which raised a great feeling. Some of his congregation left the church, and the town took up the matter in a town-meeting, but after much discussion and a close vote, the meeting decided to take no further action.

About this time the character of the town for the future took a decided change. Hitherto Waltham had been quite exclusively an agricultural community, and had followed the uneventful and tranquil life of such a condition. Two or three mills had been established on its streams. A small woolen-mill had been operated on the east bank of Beaver Brook, or Clematis Brook as now called, and a paper-mill stood near where the mills of the Boston Manufacturing Company now stand, but they were too insignificant to establish for the town any reputation for manufacturing industries, or to give employment to many people. In 1813 the Boston Manufacturing Company was organized by Francis C. Lowell, Nathan Appleton, Patrick T. Jackson and others, for the manufacture of cotton cloth by the newly-invented power-loom, and Waltham was selected as a site for the operation. Boyce's paper-mill was bought with its water privilege, and additional privileges were purchased of some mills in Watertown. The new enterprise was started originally for the purpose of weaving cloth, the spinning to be done elsewhere, as was common in England and other countries at that day. Some mills in Rhode Island were at that time making cloth by the same process. But the plan of

the Waltham Mills was changed before completion, so as to embrace spinning as well as weaving, and thus the Waltham factories were the first in America where cotton was taken in its raw state and made into cloth in one establishment and under one roof. The sketch of the manufacturing industries elsewhere precludes the necessity of giving but a mere cursory and briefly historical review of this enterprise; but even the most general description of Waltham would be incomplete without special reference to this manufactory, which has been so closely identified with the history of the town, with its growth and progress, and the material welfare of the people. Leaving out its industrial feature, it has been a potent element in the development of the town and of the country, far-reaching beyond the mere operation of mechanical appliances for material interests. There is a moral and intellectual as well as mechanical side to the origin and successful inception of this adventure in American manufacturing which brings it within the domain of history in its highest sense.

Lowell was the soul of the new undertaking, the inventive genius and inspired projector. On a visit to England, just before the War of 1812, he observed and studied the source of her greatness on sea and land. He saw that it lay in her commerce and manufactures. He burned with patriotic devotion to transfer some of that power to his native land. He gave his mind and hand to the work, and studied practically and theoretically on forms of machinery to improve those he had seen abroad. With prophetic eye he saw that our streams, running idly to the sea, the cotton and wool grown upon our soil, the faculties of the American race could all be utilized and combined in a system of manufacturing industries to give the country wealth and prosperity and greater independence and importance among the nations of the world. Of his associates, Appleton was the man of means, the capitalist, the broad-minded, far-seeing man of affairs; Jackson was the executive manager, the treasurer and agent, who looked after the details of management. With them there was afterwards associated Paul Moody, a skillful, practical mechanic, whose knowledge and experience could adapt the ingenious devices of Lowell. To these men is due the credit and honor for transcending that of starting and successfully developing a new work of industry. They seemed actuated by the highest moral and patriotic impulses. Lowell and Appleton had observed in England the ignorance, poverty and degradation of the factory operatives. They determined that their operatives should be kept on a higher plane and have the advantages of the better influence of life. With the factories, a church was established and a school-house was built, and the treasurer consented to be the local committee-man of the school. Good boarding-houses were erected and maintained with due regard to the purposes for which they were built. A library was purchased and a lyceum was fostered. Thus

every opportunity was given for the employed to feel the dignified and ennobling influence of labor.

These high principles on the part of the originators of the mills, and the policy pursued for a long series of years, gave evidence of the firm basis on which American cotton factories were established. They are bright lights in the history of manufactures, and the lapse of time gives them even greater lustre and importance. It is an interesting fact that for three-quarters of a century, during which the factory has been continuously in operation, no strike or estrangement between employers and employees has ever occurred.

In 1819 the company purchased the mills of the Waltham Cotton and Wool Factory Company, an establishment erected in 1812 on the banks of the river in the southeast part of the town, and proceeded to build additional mills and a bleachery, where cloth could be bleached by chemical process. This location has since been known as the Lower Place, and its interests have been principally identified with those of the main corporation. The street which connected them by the banks of the river was long one of the most beautiful in town, extending amid groves of forest-trees surrounding some beautiful estates; but these groves have lately disappeared, and the mansions are turned into tenement-houses under the onward march of progress, and the shaded seclusion of road and adjacent lands have necessarily been sacrificed to the requirements of business advancement.

Before this time the town had somewhat outgrown the spirit of unity, and the local feelings and jealousies of a scattered community had begun to manifest themselves to a degree. A sectional division in church matters had created and developed a schism which followed local rather than religious lines. The origin of this difficulty is said to have been a sleigh-ride, which was gotten up in the parish, and to which several were not invited who thought they were entitled to such recognition. Explanations were given, apologies were made, but all to no purpose. The social compact which bound the different parts of the town together was hopelessly broken. The agitation extended to the utmost borders, and discordance took the place of harmony, and faction of unity. The residents of the hills entertained a hostile feeling to those of the plains. The only semblance of a village was still near Beaver Brook. The coming of the factories would increase the power and population in the southern section of the town, by the river and on the broad area of the plain, still but sparsely settled, and move the populous part of the village in that direction. The farmers of the north part did not regard the advent of manufactures, their artisans and operatives, with any considerable degree of satisfaction. They opposed the factory people in town-meetings and in church, and with a natural conservatism looked upon the new-comers as temporary sojourners not permanently interested in the affairs of the town.

But a few years changed these feelings. Those engaged in the mills actively participated in the affairs of the town for the general good; the spirit of good citizenship prevailed, and the American rule of obedience to the will of the majority reconciled any differences on the score of occupation or locality. The manufacturing corporations provided church services in the school-house for a number of years, until the congregation was large enough and able to erect an edifice. With the growth of population, and the varying shades of religious belief, other churches have arisen from time to time, so that one or two places of worship of each of the prevailing denominations of New England are well sustained in the city.

Another institution which the manufacturing company fostered and encouraged by financial assistance, as well as by moral recognition, was the library and lyceum. The Rumford Institute of Mutual Instruction, founded in 1826, was largely composed of those working in the factory. It was one of the earliest and most useful institutions of its kind in this part of the country, and its history has been honorably and notably connected with that of the town. It originally started as a debating club, with evening studies on subjects of the day, generally of a scientific nature.

Public lectures were given, often by its own members and distinguished persons from abroad. A library was a special feature from the inception, and the company generously donated a collection of books it purchased for its operatives, called the Manufacturers' Library, and contributed for many years funds for the purchase of new books. It erected a building with a hall for lectures and rooms for a library, which it rented to the institute free, on condition that it devoted sixty dollars a year to the purchase of books. This building, called the Rumford Building, was sold to the town in 1854, and, with alterations and enlargements, is the present City Hall. The library was given to the town by the institute in 1865, and was the nucleus of the present.

Another illustration of a minor character of the encouraging care for education is the fact that the factory bell rang every morning at quarter of nine o'clock to call the children to school. For upwards of half a century, as regularly as it summoned operatives to and from their daily toil, its peals summoned children to their lessons.

The schools of Waltham have always been kept up to a high standard of excellence, and have ranked with the best in the State. It has been noted already that one of the causes of the separation of the town from Watertown was the insufficiency of school accommodations, and hence the principle and practice so strongly contended for have ever been sustained by the descendants of the seceding fathers. Appropriations have always been made with no niggardly hand, and the people have generously taxed themselves to

provide for the education of the youth. In the year 1833 the first town or high school was established. This was located in the first story of the new town-hall erected at that time. Previous to that time all public schools had been in the common single grade district school, and the town had held its meetings in the church. The town-house, which stood on the site of the present North Grammar School, at the corner of Lexington and School Streets, was devoted exclusively to school purposes in 1849, for both the high and grammar schools, and in 1869 was abandoned for the purpose and sold for removal.

Near it stood the armory of the artillery company, and the public flag-staff, and the vacant land around on both sides of the adjacent street was the only public common then owned by the town. In 1854 the town purchased a larger part of the present beautiful common of the Boston Manufacturing Company, which had reserved it from their land for public purposes, and, with a commendable spirit, parted with it only on condition that it should be forever used as a park. Addition and extension on the southern side, made by the city in 1886, have completed its area to just proportions, and furnished the people with a most attractive public square, adorned with trees, in the midst of its busiest life. The original preservation and maintenance of such a park in a place where land has enhanced in value every year and is in demand for the local growth and material prosperity show obviously the character of the people and their sentiment in regard to objects of public use, adornment and recreation. For it is with a strong opposition of a minority when the expense is to be borne from the public treasury, that such a reservation can be made.

During the first half of the present century Waltham was a popular resort for military gatherings of the day. Its broad plains and ample hotels furnished facilities for the mustering of the militia forces and their entertainment, without the necessity of camping on the tented field. War and all its associations were more of a tradition than a reality to nearly all but the few surviving Revolutionary soldiers, and the annual muster and May training had something of a picturesque and grotesque character, compared with the military encampments of to-day. Few even of the officers had ever seen any service, and the semblance of actual warfare maintained for a day or two of duty seems to have partaken of the mock-heroic. The gaudy trappings, the variegated uniforms, the indifferent discipline, made of a militia training a picture rivaling the combinations of a kaleidoscope. With the hilarity and lively scenes of such an occasion, all the country round about took an active interest. In the days of compulsory service, the un-uniformed forces presented a contrast to the uniformed and organized companies. The latter, from different towns, often entered into a spirit of rivalry, in the colors and elaborate details of uniforms and equipments. The shrill

fife and rattling drum, with the more pretentious martial music of a country band, added materially to the pomp and circumstance of the muster-field and the annual training.

A semi-military celebration was the "Cornwallis," held on the 19th of October, the anniversary of the eventful day at Yorktown, and commemorative of the surrender of Lord Cornwallis to Washington. There was a strange blending of the sublime and ridiculous on these occasions, with the marshaling of the opposing forces, the mock battle and surrender, and the travesty upon the reality of war. It was one of these autumnal gatherings at Waltham which prompted some descriptive lines of Lowell in his *Biglow* papers.

But the preservation of the patriotic and military spirit in this way served its purpose when the days of trial came and the spirit and patriotism of the young who witnessed these scenes of imaginary warfare was to be tested in the actual conflict of arms for the salvation of the country.

With the establishment of the cotton manufacturing industry and its gradual and successful growth, the town had a healthy and steady increase of population and general prosperity. There were few other important industries for many years. "The corporation," as it was called, and its leading men were the principal features of the town in its municipal and material development. The village extended up the main highway in the direction of the factories, and the centre was permanently located where to-day may be considered the heart of the city, with its principal buildings and offices. With all that was incidental to its progress, there was a well-ordered public sentiment that all was well for future prosperity. The streets were generally laid out wide and straight, and were kept in excellent repair—in fact, the town was one of the first to adopt the McAdam system in the construction of the principal thoroughfares. And in nearly all town matters, with the exception of some minor affairs which are always exceptional, a liberal policy was pursued to the ultimate welfare of the whole community.

In 1843 the Fitchburg Railroad was built to Waltham, and in 1845 it was extended beyond to Fitchburg. This naturally gave something of an impetus to growth for some years, but the policy of that corporation from about 1850 to 1860 was such an anomaly in railroad management as to check much progress from that source, and to turn the tide of suburban travel in other directions. The action of this railroad, in regard to transportation and public accommodation, has been considered a great detriment to the town in the past, and has in that regard affected the record of its history. The progressive policy for the past twenty-five years can hardly make amends for former mistakes.

In 1853 the Watertown Branch of the Fitchburg Railroad was extended to Waltham, thus giving the

people the facilities of a separate line of communication with Boston. The low fares and frequent trains on the different roads now furnish the citizens unusual advantages in the way of railway passenger traffic.

In 1849 the town received an addition of territory which ultimately had a great effect upon its growth and prosperity, and widened the area of its industrial facilities. This gain of territory was from the annexation of a part of Newton, adjacent to Charles River, and contiguous to the populous part of Waltham. At that time there was on one portion the works of the Chemical Company, and a few dwellings, but the remainder was largely wild land, with some parts given to agriculture. It has developed with almost the phenomenal rapidity of a western town, and has grown into a thrifty and populous part of the city. This smart growth is mainly the result of the establishment of the American Waltham Watch Company's works. Previous to this time some new manufacturing enterprises had sprung up—an iron foundry; a manufactory or laboratory where some of the first experiments were made with petroleum in the manufacture of oil, paraffine, etc.; a crayon factory, the original and still quite exclusively the principal manufactory of black-board crayons in the country, the product of the inventive genius of one of the citizens. But the inception of watch-making by perfected machinery, in a manufactory at first organized under Mr. A. L. Dennison, has more than other enterprises advanced the progress of Waltham, given it a character as a manufacturing centre and extended its name for its fine products over the civilized world.

The ill success of the first enterprise, its restoration and successful development under the executive ability of Mr. Royal E. Robbins, are an interesting and essential feature of the history of local manufactures. But this great establishment, with the liberal and intelligent spirit of its projectors, the skill and high character of its mechanics and operatives, male and female, the inventive genius displayed in machinery that by delicate and intricate movements performs the part of handiwork, with greatest rapidity and precision, is an important element in the history of the city, apart from its industrial character. In the highest degree it is representative of American skill and management, and of the moral and intellectual standard of artisans. No better evidence of thrift and social culture is needed than the beautiful and attractive homes, with ample grounds, owned and built by those whose livelihood is derived from this well-organized and successful manufactory.

At an agricultural and industrial fair in 1857, the first of the kind ever held in the town, the local products of the field, the home and the workshop were gathered in an exhibition which showed the extent and diversity of the industries of a town of 6000 inhabitants. This fair was held under the auspices of the "Agricultural Library Association," an organization which, with a change of name after a few years

to the "Farmers' Club," has done much to foster the interests of the town. Composed not exclusively of farmers, but more generally of those of other occupations, it has, through its weekly meetings in the winter and other gatherings, done much for the common welfare in cultivating among those whose business leads in different directions, that social and friendly intercourse upon which a general community of interests depends.

In 1859 Waltham sacrificed a portion of its territory, about 429 acres, for the incorporation of the town of Belmont. The part taken was all that east of Clematis Brook, which is now the northeastern boundary of the city. Little opposition was made to the surrender of this area, as in a liberal spirit the people were not averse to contributing to the formation of the beautiful rural town which is now one of its attractive neighboring communities. With what was gained from Newton and lost to Belmont the area of the city is about the same as when first incorporated.

In 1861, when the Civil War burst upon the land, the citizens of the town displayed the loyalty and patriotic ardor, manifested throughout New England and the North, and by public and private demonstration entered into the spirit of devotion to the Union. Immediately on the firing upon Fort Sumter, a mass-meeting of the citizens was called, patriotic speeches were made and enthusiastic and determined action was taken to support the cause of the Government.

Captain Gardner Banks announced his purpose to raise a company for service and the enlistment rolls were opened and well filled at the meeting.

Flags were displayed on the factories, school-houses, public and private buildings, the common was lively with squads of recruits drilling, and the usual aspect of the village instantly underwent a change.

A town-meeting was held and official action taken to carry out the will of the people, without distinction of party, in vindication of national honor and the integrity of the Union. Money was appropriated for extra pay to soldiers for a specified time, and for support of their families. The women of the town, emulating the example of the men, held sewing meetings, and worked upon uniforms and other articles of necessity for the comfort and welfare of the soldier. The uniforms of the first company were made almost exclusively by their skillful and patriotic efforts. Few then supposed that the war would last more than a few months, but the impressive and serious earnestness with which the first, as well as subsequent steps were taken showed the existence of the old spirit of the fathers and of the staying qualities of people who reluctantly, dutifully, and with firm determination took up the gage of battle.

Many enlisted in other companies in and out of the State, and the number offering for service was greater than the demand.

The first company was attached to the Sixteenth Massachusetts Volunteers. Later in the same year, when a call for more troops was issued, the militia company of Light Dragons formed the nucleus of two cavalry companies which were attached to the First Massachusetts Cavalry. These companies served with distinction throughout their term of service.

In 1862, when the reverses of the Union arms and the power of the rebellion compelled the government to call for still more troops, the town, with equal enthusiasm and liberality, responded to the demands upon it for more soldiers. And when the draft was made, all quotas were filled without a conscription of but a few men. Private subscriptions, besides the town appropriations, provided liberal bounties and every duty of patriotism was loyally fulfilled.

The women of the town were loyally active during the whole period of the war in providing for the soldiers in the field, and doing everything in their power to alleviate their sufferings and enhance their comfort, through the medium of Soldiers' Aid and Relief Societies. In 1864 a large fair was held in aid of the Sanitary Commission, which was very successful and through which a generous sum was raised for the great cause.

The town furnished about 400 soldiers and sailors, and nearly every Massachusetts regiment was represented by some of its citizens. Fifty-three of the number, as nearly as can be ascertained, never returned, but nobly sacrificed their lives in battle or in the hospital for the cause of their country. Soon after the war, Waltham was among the first towns to erect a soldiers' monument. This monument, an ornamental granite shaft, inscribed with the names of those who gave their lives, is located upon the Common. It also organized one of the First Grand Army Posts in the State, which to-day is active in perpetuating the memory of those who served their country in the time of its peril.

The only regular military organization is the Waltham Rifles, organized in 1874, and attached to the Fifth Regiment Massachusetts Volunteer Militia.

Waltham has always in due time responded to the demands upon it called for by its advancement in population and prosperity. In 1829 the first fire-engine was purchased, and in 1844 a Fire Department was organized under a perfect system, with engineers and subordinates. Previous to the purchasing of an engine there had been an independent organization of citizens called the Fire Club, each member of which was equipped with two buckets and other implements for extinguishing fires and saving property. This club now keeps up an informal organization by an annual supper. The first steam fire-engine was added to the department in 1871, and the fire-alarm telegraph introduced in 1881. The present Fire Department is a finely-organized and well-managed institution in the city. Its adequate equipment, and the harmonious feeling between the different com-

panies, and between the men and officers and engineers, render it one of special efficiency and character. The force now consists of one steam fire-engine, one chemical engine, four hose carriages, one hook-and-ladder truck, supply wagon, etc.

The Waltham Bank was established in 1836. Luke Fiske was the first president, and Nathaniel Maynard the first cashier. The capital originally was \$100,000, and was subsequently increased to \$150,000. The Savings Bank was established in 1853.

The streets were first lighted in 1852. The Gas Light Company was formed and gas introduced in 1853. The same company added an electric plant to its works and introduced electric lights in 1886. A horse railroad was built and opened between Waltham and West Newton in 1868, and in 1872 was extended up Main to Weston Street. It was changed to an electric road in 1890.

The people had been agitating the question of the introduction of water for some years, and different sources of supply had been suggested. After considerable deliberation and a careful examination of different places and methods, the town decided, in 1873, to take water from a filtering basin near Charles River above the factories by pumping into a reservoir on Boston Rock Hill. In excavating for the filtering basin, springs were struck on the land side of the basin, giving a supply of pure water ample for all present necessities, besides the facilities for direct draught from the river.

July 4, 1876, the centennial celebration of National Independence was carried out with much public spirit and parade. A military and civic procession marched through the principal streets, and an historical oration was delivered by Josiah Rutter, Esq., in a large tent on the Common. Concerts and children's entertainments were given at Rumford Hall, while boat-races and games furnished recreation for others. A fine display of fire-works on the Common ended the successful and patriotic celebration of the day.

Mention has already been made of the date and location of the first bridge over Charles River on the site of the present Newton Street Bridge. This bridge, within a few years, has been rebuilt into an arched bridge of stone. Moody Street Bridge was built in 1847, originally of wood; it has since been rebuilt of iron. Farwell Street Bridge, below the bleachery, is a structure of iron. In 1889 a massive new arch bridge of stone was completed from Prospect to Maple Streets, near the watch factory. This is the most expensive and imposing bridge across the river, and furnishes one of the most attractive thoroughfares, whether for business or pleasure. It supplanted a wooden foot-bridge erected in 1885, mainly for the convenience of the watch factory operatives living on the north side of the river.

The Massachusetts Central Railroad constructed its road through Waltham in 1881, and thus gave additional facilities for communication with Boston,

and westward into the interior of the State and beyond.

Where the citizens as a whole have been backward in supplying the necessary improvements, private citizens have by public spirit and enterprise in some cases supplied the deficiency. With the growth in population, places of public gathering for meetings, entertainments, and the ordinary purposes of a large community become inadequate in size and number. The town had outgrown Rumford Hall, which, with its historical associations as the assembly room of Rumford Institute, was also used as the Town Hall. Propositions were made for erection of a new and spacious Town Hall. Town-meetings were held with warm discussion. It was voted to build a hall on the Common; subsequently, that vote was reconsidered and another location chosen. One meeting would negative the act of another, and the attempt to have a new Town Hall came finally to naught. In 1881 under the spirited management of a few gentlemen, a stock company of citizens was formed and Music Hall was erected. This structure, with its frontage of stores and offices and spacious vestibule and auditorium in the rear, is a useful and ornamental institution of the city. In 1890 alterations were made by which it was more especially adapted for theatrical entertainments, and it is now largely used for the drama, as well as for the general purposes of a large assembly room. The name was changed to Park Theatre. Under the judicious management of the present lessee, Mr. W. D. Bradstreet, as a local theatre it furnishes the people two or three times a week in the season with a good variety of literary, dramatic and musical entertainments.

By the census of 1880 the population was very nearly 12,000, the requisite number for a city. As the town-meetings were oftentimes too large for the proper transaction of business, and the rate of increase of population was such as to render a change to a city form of government inevitable within a short time, the subject of application for a city charter began to be advocated. The proposition naturally met with much opposition at first from the more conservative people, and the first vote of the town was against the measure. But renewed interest was at once manifested, and on a second vote, November 30, 1883, the town voted seven hundred and twenty-four to six hundred and sixty-five to apply for a city charter, and appointed a committee of fifteen to prepare a charter. The Legislature granted the charter June 2, 1884, and it was accepted by the people July, 1884, by a vote of nine hundred and seventeen to six hundred and thirty-nine. In date of organization Waltham was the twenty-third city of Massachusetts.

Public sentiment in the town had been quite freely expressed in favor of a one board city government, the council or legislative branch to consist of but one body, instead of a Board of Aldermen and Common Council, as customary in other cities of Massachusetts,

THE RESIDENCE OF MR. FRANCIS BUTTRICK,
WALTHAM, MASSACHUSETTS

A charter with this provision was granted. This novel feature was regarded as an innovation, and the first experiment in Waltham has been watched with considerable interest by those interested in municipal government. A board of twenty-one aldermen, with three from each of seven wards, was instituted, and has been found to work satisfactorily. The only change from that system deemed desirable was one to break up the local character of the representation from each ward. In 1889 an amendment was adopted to the effect that one of the aldermen from each ward be elected by the people at large.

The change from a town to a city form of government was made January, 1885, when the inauguration exercises took place in Music Hall before a large assemblage of the people. The chairman of the Board of Selectmen, Mr. Timothy Leary, in transferring the affairs of the town to the new custodians, impressively commented upon the past history and record of the town, the honor and honesty of its officials and the sacred character of the trust for the people which had been maintained inviolate since the date of incorporation. There had been no record of the malfeasance of any officer or of the loss of a dollar of public money through the dishonesty of any official. The last Board of Selectmen was Timothy Leary, F. Buttrick, T. P. Smith, Charles H. Emerson, Lebbeus S. Foster.

Hon. B. B. Johnson had been elected the first mayor, and he assumed the duties of the office with recognition of the fact that the new system of the Aldermanic Board was, in a measure, experimental, and would be regarded for its successful and practical operation beyond the limits of the municipality. Henry N. Fisher was elected the president of the Board of Aldermen. The city has been conducted so as to commend itself to the citizens, even the most conservative, who strongly opposed such organization.

Hon. Charles F. Stone served as mayor in 1886, and Hon. H. N. Fisher from 1887-90.

Henry N. Fisher was president of the Board of Aldermen from 1885-86, Charles P. Bond from 1887-88, '90, and Thomas B. Eaton in 1889.

The City Treasurers have been J. C. Thorpe, 1885-86; E. A. Harrington, 1887-90.

The City Clerk.—L. N. Hall, 1885-90.

The City Auditors.—E. A. Harrington, 1885-86; E. J. Sanderson, 1887-90.

City Solicitors.—Thomas H. Armstrong, 1885-88; George L. Mayberry, 1889-90.

The one hundred and fiftieth anniversary of the incorporation of Waltham was celebrated January 16, 1888, under the auspices of the city government and a committee of citizens. The exercises were held in Music Hall, and consisted of an introductory address by His Honor, Mayor Fisher, an historical address, an original poem by Rev. E. N. Hayward, a hymn by W. M. Fullerton, music and singing, and a short address by His Excellency, Governor Ames. In the even-

ing there was a banquet, at which General Banks presided, and at which speeches were made by prominent gentlemen. This banquet was followed by dancing. As the celebration was arranged in a limited time, the preparation of the historical address was referred to a committee of three, each of whom prepared a portion. This rather novel plan of joint authorship worked admirably, and was successfully carried out to a complete composition adapted to the occasion. The committee on historical address were Charles F. Stone, Nathan Warren and Thomas H. Armstrong. It was impressively read by the Hon. F. M. Stone.

The history of Waltham, thus briefly and imperfectly sketched to the present day, is a part of the history of the Commonwealth and of the progress and development of the country. It is what a free, intelligent people have made it, under the blessings of our form of government and the foundations laid by the early fathers. There is no glamour of war, of royal endowments or special privileges in its simple annals. It is no exception to hundreds of other thrifty places throughout the land—in its general prosperity, its industrial progress and its representative character of American enterprise. Besides its sons and daughters who have remained and contributed to the city's growth many have gone out from its farms and factories, its schools and homes, to the uttermost parts of the earth, have helped build up other States and earned an enviable name for their enterprise and genius. Their fortunes may be linked with other destinies, but their fondest memories go back to the place they once called home.

Waltham has furnished two Governors of Massachusetts, Christopher Gore and Nathaniel P. Banks; one United States Senator, Christopher Gore; a member of Congress for several terms, a Speaker of the National House of Representatives and a Major-General of Volunteers, in the person of N. P. Banks; five Senators in the Massachusetts Legislature,—Luke Fiske, Gideon Haynes, F. M. Stone, N. P. Banks and David Randall. Its Representatives to the General Court since 1800 have been as follows:

1802, Jonathan Cowdige; 1804, Jonathan Cowdige; 1806-08, Abner Sanderson; 1809-17, David Townsend; 1829, David Townsend; 1829-34, Luke Fiske; 1823, Luke Fiske and Chas. Lyman; 1824, Isaac Bemis, Jr.; and David Townsend; 1825, Luke Fiske; 1826, David Townsend; 1827, David Townsend and Isaac Bemis, Jr.; 1828-30, Jonas Clark; 1824, Amos Harrington and David Townsend; 1832, Jonas Clark and John Viles; 1837, David Kendall and Robert Anderson; 1838, Luke Fiske; 1839-40, Elisha Crehore; 1841, Jonas Clarke; 1842, John Abbott; 1843-44, John M. Peck; 1849-52, N. P. Banks, Jr.; 1853-54, Horatio Moore; 1855, Samuel O. Upham; 1856, William P. Childs; 1857, Horatio Moore; 1858, James G. Moore; 1859, Josiah Rutter; 1860, F. M. Stone; 1861, Daniel French; 1862, F. M. Stone and Josiah Beard; 1863, James G. Moore; 1864-65, F. M. Stone; 1866-67, Emory W. Lane; 1868-69, Royal S. Warren; 1870, Horatio Moore; 1871, Thomas Hill; 1872, W. A. Adams; 1873, William Roberts; 1874, W. A. Adams; 1875, Wm. E. Bright; 1876, F. M. Stone; 1877, David Randall; 1880-81, Nathan Warren; 1882, Elisha Warren; 1883, John S. Williams; 1884, Robt. Treat Paine, Jr.; 1885-86, Erskine Warden; 1887-88, Erskine Warden and Samuel O. Upham; 1889, Henry S. Milton; 1890, Henry S. Milton and Chas. Moore.

In the years omitted the town sent no representative.

The population of Waltham at different periods has been as follows :

1765, 663; 1783, 689; 1790, 882; 1800, 903; 1810, 1014; 1820, 1677; 1830, 1857; 1840, 2504; 1850, 4464; 1860, 6397; 1865, 6898; 1870, 9065; 1875, 9967; 1880, 11,712; 1885, 14,609; 1890, 18,533.

A sketch of Waltham would not be complete without special reference to its most eminent citizen, the product of its soil and its thrifty manufacturing life. General Nathaniel Prentice Banks is a loyal son of this, his native town, where he now resides. Born of humble and respectable parentage, connected with the factory life, growing up amidst the busy scenes of the early manufacturing industries of America, obtaining limited education at the village school, he exemplifies in the highest degree the possibilities of the American youth. Commencing work in the factories when a mere boy, he availed himself of the facilities for self-education, proving himself an apt pupil under adverse circumstances, and early evinced remarkable oratorical powers. In the village lyceum, and in town-meeting, he was able to cope in debate with the strongest opponents. He has always been true to his early instincts, and by his fine personal presence, and his fervid eloquence, he has maintained the dignity of labor. From the time when he was first elected to represent the town in the Legislature, after many unsuccessful trials, to the present day, he has been prominent in public affairs of the State and nation. In the changing fortunes of political life, in peace and in war, he has maintained the high character of personal and public honor and integrity. Honored with age and universal respect, he is again serving the people of his district in the National House of Representatives. At home he is the unpretentious citizen, deeply interested in whatever appertains to the welfare of the community.

The growth of Waltham has been steady and conservative, without spasmodic successes and reverses, and speculative attempts at progress, to be followed by reaction. Improvements are made as suggested by the necessities of the time and by prudent preparation for the future. Taxes are kept within reasonable limit, and the public enterprises are generally carried out with proper consideration of cost and need. A system of drainage has been inaugurated and extended with due regard to the growing requirements of such work. An improved system of sewerage to connect with the metropolitan system of Boston and vicinity, under an act of the Legislature, will soon be commenced. With its eligible location, the firm basis of its present manufacturing enterprises, and the inheritance of the past, Waltham may well look forward for a prosperous future as one of the leading manufacturing cities of the Commonwealth.

CHAPTER XLVI.

WALTHAM—(Continued).

MILITARY HISTORY.

BY NATHAN WARREN.

THE original territorial division of Waltham as a part of Watertown was on a military basis and for the purpose of a public defence by arms. The necessity of promptly summoning men together in view of Indian troubles occasioned the division of Watertown into three precincts, each with a military company or train-band. What is now Waltham, as elsewhere stated, was the Middle Precinct, and was assigned to Lieutenant Benjamin Garfield's command. As all the male inhabitants capable of bearing arms were required to be ready for military service at any time, the early history of the town is seen to have been of a semi-military character. The formation of the precinct was in 1691.

It is not a matter of record what part the men of Waltham took as soldiers in the early wars, but doubtless in Queen Anne's War, which raged from 1702 to 1713, between the colonists on one hand and the French and Indians of Canada on the other, the precinct furnished its share of men. Military titles were very common, and generally used in reference to those who bore them in civil affairs. Probably few were acquired in actual service, but were won in peaceful duty of the annual trainings. Their bestowal and use show, however, the natural military spirit of the people. In March, 1744, Captain Samuel Livermore reported ninety men under his command.

Of enlistments of Waltham men in the Colonial service we find that of Ebenezer Bigelow, in Captain Stephen Richard's company in 1740, and that of Captain John Cutting in 1744, while in 1748 Nathan Morse and John Barnard were serving at Fort Shirley. In the old French and Indian War, from 1755 to 1763, in which New England was engaged, from Lake George to Louisbourg, until the final victory of Quebec, the town furnished many men. Ensign Robert Smith, Lieutenant Ebenezer Brown, Sergeant William Cox, Cornet Jonathan Pierce, Jonas Cutter, John Bean, Phineas Stearns, Joseph Wellington, Thomas Wellington, William Benjamin, Daniel Fisk, Abram Hill, Abijah Brown, Thomas Harrington, Isaac Gleason, Josiah Whitney, David Fisk, William Cummings were in the service. In the Crown Point expedition were Abram Gregory and Abijah Gregory. Benjamin Lawrence and Thomas Hammond were also in the service, and in 1737 Corporal Jonathan Pierce and Ensign William Livermore. In Captain Jonathan Brown's company served Josiah Barnard, Isaac Corey, John Whitehead, Nicholas Lucas, William Cox, David Standly, Timothy Flagg, Abram Sanderson, Lowden Priest, Jonas Steward, William Graves, John Wellington, John

Wellington, Jr., Phineas Stearns, Trueworthy Smith, and Jedediah White.

This war was the school of the Revolution and gave to the returning soldiers of every town and hamlet a knowledge and experience in the art of war, and a military prestige which served well when resistance to the mother country became necessary.

When the eventful 19th of April, 1775, came, Waltham's company of minute-men was on duty, though not at Lexington. There is no record of the place of service, but the muster-roll tells a story of duty performed by twelve officers and one hundred and nine men, who marched twenty-eight miles and were on duty for three days as follows:

"Company in Waltham called out by Colonel Thomas Gardner on Alarm in defence of the Liberties of America under the Command of Abraham Peirce, Capt., to Concord and Lexington site and the number of miles traveled and boor our Expenses and these Lines may certify that my Company was kept upon guard till Saturday the 4 day after the site at Concord.

"Abraham Peirce, Capt., 28 mile, 3 days, 15s.; Samuel Stearns, Lieut., 28 mile, 3 days, 10s. 10d.; John Clark, 2 Lieut., 28 mile, 3 days, 10s. 10d.; Isaac Hager, Ensign, 28 mile, 3 days, 9s. 10d.; Jadidiah thair, Serg., 28 mile, 3 days, 7s. 04d.; Elisha Cox, Serg., 7s. 04d.; Josiah mizer, Serg., 7s. 4d.; Samuel harrington, Serg., 7s. 4d.; Joshua Swan, Corp., 7s.; John Gleason, Corp., 7s.; William Cooledge, Corp., 7s.; Josiah Barnard, Corp.; Joseph hager, guns, Jonas Stearns, Samuel Bigelow, Beselah flagg, William Stager, Josiah Biglow, Benjamin harrington, Joshua Garfield, Elijah Livermore, Josiah Hastings, 1 day; Josiah Brown, 1 day; Ephrim hammond, timothy flagg, Nathael Bridg, William Brig, Benjamin Stratton, Stephen Welman, Samuel Lovet, William Brown, Josiah Brown, Elieser Bradshaw, Jonas Smith, Nathan vila, Jonas vila, Lenard Williams, Elisha Stearns, Jonathan Stearns, Jonathan warren, Edward Garfield, Elisha harrington, Benjamin White, Samuel Gall, guns (Gale), Asra Dench, Andrew Benjamin, Samuel Gall (Gale), Abijah Fisk, Zack Weson, Amos fisk, Jose harrington, William hager, guns, Jonathan hager, Matthias Collins, Benjamin hager, Jonathan dix, John Sius, Cuttin Clark, Ephraim Peirce, Jech B-ill, Josiah Connors, micah Bumpo, Isaac Gleason, amos harrington, oliver hagset, Seth Pond, daniel Cutting, Isaac Parkhurst, Joseph Corey, Jonathan Cox, Phinehas Warren, Eliphit Hastings, Peetr Warren, William warren, John Cooledge, Eliphit warren, Samuel Guddin, Samuel fuller, Jorgd Larrance, Jonas Larrance, Elijah Cutting, Benja Gallop, Elijah toman, Isaac Child, Abijah Child, Jonas Child, Abran, Becamis, Abram Bemis, guner, Jonas Smith, gunr, Josiah Bemis, Ruben Bemis, Isaac Bemis, Abram Child, Elisha Child, Elisha Cuttler, Phinehas warrin, Job Priest, James Priest, John vila, 2 days; Isaac Peirce, 2 days; Samuel Robards, Phinehas Larrance, Jonas Dix, Esquir, Jonas Dix, Juner, Josiah Whitney, William willington, Jorgd willington, thaddeus willington, 1 day; Joseph willington, 1 day; Elijah Larrance, Daniel Stearns, Josiah Sanderson, Abnar Sanderson, John Sanderson, Josiah Smith, Abijah Livermore, Joddiah white, Elisha Livermore, Ely Jones, Amos Brown, Joseph Brown, 1 day; John Larrance, 1 day; William Cooledge."

May 13, 1775, the selectmen delivered to the following soldiers each a blanket, "they being enlisted in the service of Massachusetts for the Defense of the liberty of America:"

Eliphalet Hastings, Jonas Lawrence, Elijah Cutting, Elisha Cox, William Lock, Samuel Roberts, John Glynn, Josiah Converse, Cutting Clark, Abraham Parkhurst, Matthew Peirce, Josiah Bemis, Jr., Daniel Warren, Elijah Mead, Samuel Mullikin, Amos Fiske, Zechariah Weston, Job Priest, David Smith, Benjamin Gallop, Amos Harrington, George Wellington, Micah Bumpo, Jonas Smith, Jr., John Vila, Josiah Lovett, Elisha Harrington, Habakkuk Stearns, Jesse Goodell, Nathan Wright, Asa Gould, Bezaleel Wright, Abijah Fiske, Rufus Stacey, Isaac Bemis, Elisha Stearns, Reuben Bemis, Timothy Flagg, Eliphalet Warren, Moses Warren, William Sprague, Thaddeus Child, Andrew Benjamin, John Symms, Edmund Lock.

A company was formed under Captain Abijah

Child and attached to the Thirty-seventh Regiment of Foot, commanded by Colonel Thomas Gardner. This regiment was at the battle of Bunker Hill, where Colonel Gardner was mortally wounded. The other casualties as a regiment are not given in any records of the battle, but it is quite authoritatively known that the Waltham Company was engaged. The muster roll of the company, October 6, 1775, gives the return of Captain Abijah Child's company in the Thirty-seventh Regiment of Foot of the Continental Army, commanded by Lieutenant-Colonel William Bond:

"CAMPE AT PROSPECT HILL, [SOMERVILLE], OCTOBER 6, 1775.

"Captain, Abijah Child, Waltham; Lieutenant Joshua Swan, Waltham; Ensign, Jedekiah Thayer, Waltham; Sergeants, Elisha Cox, Josiah Converse, Jonas Smith, Elisha Harrington, Waltham; Corporals, Isaac Bemis, David Smith, Waltham; Drummer, Benjamin Gallop, Waltham; Privates, Reuben Bemis, Josiah Bemis, Andrew Benjamin, Elijah Cutting, Thaddeus Child, Abijah Child, Jr., Amos Fiske, Abijah Fisk, Tanothy Flagg, George Wellington, John Glynn, Jonas Lawrence, William Lock, Josiah Lovett (discharged September 30, 1774), Edmund Lock, Eli-h Child, Samuel Mullikin, Matthew Pierce, John Peck, Abram Parkhurst (discharged), Samuel Roberts, William Sprague, Elisha Stearns, Josiah Smith, Habakkuk Stearns, John Viles, Daniel Warren, Micah Bumpo."

In June, 1776, the town voted £6 6s. 8d. to be paid to each non-commissioned officer and soldier who shall engage in the expedition to Canada. The money was appropriated to the following men:

Jno. Cooledge, Josiah Wyer, Ezra Peirce, David Stearns, Jno. Gleason, Jona. Stearns, Elisha Livermore, Edward Brown, Stephen Wellman, Elias Hastings, Eliphalet Hastings, Isiah Edes, "for my negro," Abijah Fisk, Wm. Hager, Jno. Lawrence, Jno. Hager, Saml. Gale, Jr., Josiah Sanderson, Eli Jones, Nathaniel Sanderson, Abijah Brown, Jr., Benj. Ellis.

In December, 1776, the following persons enlisted for three months in Colonel Samuel Thatcher's regiment, equipping themselves with guns, blankets and all implements:

Saml. Lufkin, Sol. Keyes, Jno. Glode, Jas. Davis, Wm. Chambers, Wm. Chambers, Tim. Brown, Saml. Lufkin, Jr., Tim. Farrar, Tre. Davidson, Jerh. Williams, Leml. Wheeler, Abel Parker.

In 1778 the town sent into the Eight Months' Campaign, so-called, thirty men, viz.:

Col. Jona. Brewer, Col. Abijah Brown, Capt. Abijah Child, Capt. Abm. Child, Lt. Oliver Hagget, Capt. Jedediah Thayer, Josiah Converse, Elisha Harrington, Lt. Isaac Bemis, David Smith, Elisha Stearns, Thads. Wellington, Eliphalet Warren, Chs. Warren, Moses Mead, Jr., Geo. Wellington, Ruben Bemis, Josiah Bemis, Jr., Amos Fisk, Abijah Fisk, Timothy Flagg, Jonas Lawrence, Wm. Lock, Josiah Leventist, Edmund Lock, Danl. Warren, Zack. Weston, Moses Warren, Amos Harrington, Frans. Brewer.

And to the Cambridge lines, for the two months' men:

Lieut. Isaac Bemis, Phineas Warren, Jr., Joseph Wier, John Kidden, Samuel Gale, Jr., Joel Harrington, Samuel Goodin, Thads. Goodin, Ebenr. Phillips.

As the war progressed, increasing sums were paid as bounties and for substitutes, and there were many enlistments and re-enlistments of those whose names appeared early in the service. In the depreciated currency of the time, upwards of two thousand pounds were paid for a single recruit for a few

months. The calls for men were often for a small number for the town for special service, or in different localities. Evidently these requisitions bore hard upon the town, but the quotas were filled through the sacrifices which the patriotism of our fathers was always ready to make. The last Revolutionary soldier of Waltham was Nathan Lock, who died in 1851, at the age of ninety years.

In the War of 1812 Waltham responded to the call for troops with its military company. The services of the company were required for but a brief period, and were devoted to garrison duty at Boston Harbor. The following is the roll of the company in service:

Joseph Hoar, Jones Lawrence, Elijah Lawrence, Nathaniel Stearns, Richard Wellington, Jacob Lawrence, Amasa Harrington, John Sanderson, (2d), Alexander H. Piper, Henry Fisk, Richard Cutter, Isaac Farwell, William Goss, Darius Wellington, Jacob Ryan, Timothy Morris, Daniel Emerson, William Trask, Thomas Barnes, Abel Hubbard, William Clark, James Jones, Noah Hardy, John Cole, William D. Winch, Otis Puffer.

David Stearns, of Waltham, was purser in the United States Navy in this war, and was on board the "Frolic" in the memorable sea-fight with the "Wasp."

Different uniformed military companies from time to time have been conspicuous in the history of the town, and formed part of its annals in this respect. One of the earliest and most famous of these organizations during the present century was the Waltham Light Infantry. It was composed of many of the leading citizens of the town, and was considered a leading corps on training-days and at the annual muster. Its uniform of gray coat, with bell buttons, white trousers, and heavy leather cap with plume, was calculated to enhance the martial appearance of those who trained in its ranks. It was succeeded in time by the Waltham Artillery. This company was formed in 1841, and its guns, two brass six-pounders, were transferred from Watertown, where they had been used by a company which had passed out of existence. It was disbanded in 1857. Its last captain was Captain Gardner Banks, who commanded the first company of volunteers from Waltham in the Rebellion.

The Waltham Light Dragoons was organized in 1853, and during its existence was a prominent organization in military circles. At musters, in its tour of duties, it was frequently called into requisition as an escort to the commander-in-chief, and attracted especial attention for its soldierly bearing, and also from the fact that cavalry companies were even more rare in the militia than at present. Its uniform was similar to the cavalry uniform of the regular army at that time. When the Rebellion broke out, it formed a nucleus of two companies in the First Massachusetts Cavalry, one commanded by its past commander, Captain William Gibbs, and the other by its captain, M. A. Moore. The organization was kept up until near the close of the war, when it disbanded.

When the Rebellion broke out Waltham evinced a patriotic spirit common to all the loyal States, and, as

related elsewhere in the general history of the town, immediately took steps to afford the necessary assistance in maintaining the Union. The first company of troops raised was attached to the Sixteenth Regiment of Massachusetts Volunteers as Company H, and was officered by Captain Gardner Banks, First Lieutenant William A. Smith and Second Lieutenant F. P. H. Rogers. This company, with its regiment, saw severe service, gallantly sharing in nearly all the battles of the Army of the Potomac for three years, until the expiration of the term of enlistment. Lieutenant Smith died after a short service, and Lieutenant Rogers was killed in the first action in which the regiment was engaged. Besides this company and the two cavalry companies above-mentioned, Waltham furnished many men for other companies and regiments. Among these may be named the Thirty-fifth, Fortieth and Fifty-sixth Regiments of the three years' troops, and the Fifth, Forty-fourth and Forty-fifth of nine months' troops.

The record of all these men in the war was most honorable, and it would be invidious to select many for commendation where all are deserving. The highest officer from the town was Major-General N. P. Banks, whose name and services were conspicuous during the entire period of the war. Captain (afterwards Colonel) Gardner Banks, of the Sixteenth Massachusetts Volunteers, was his brother, and another brother, Lieutenant Hiram B. Banks, of the same regiment, was killed in the second battle of Bull Run. Two brothers, Lieutenant George F. Brown, and First Sergeant Charles L. Brown, of the Sixteenth Regiment, both killed at Gettysburg; and Commissary Sergeant Frank Miles, of the First Cavalry, who died in the service, besides those named, are marked examples of the young men of the town who sacrificed their lives for their country.

The town officially, in its town-meetings, and privately, by the public spirit and generosity of its citizens, provided liberally for the soldiers and the cause of the country. In a patriotic manner it answered all the calls for men, and gave liberally from its store for bounties to those who entered the service. Its military record is not the least of an honorable heritage which it leaves to the future.

LIST OF SOLDIERS OF WALTHAM IN THE REBELLION.

- Arnold, Charles L., enlisted July 31, '62, 35th Reg. Co. D; discharged June 9, '65, cause, expiration of service.
 Arnold, Marshall N., 35th D, from the camp.
 Abbott, Wm. H., Dec. 16, '61, 30th I; Oct. 26, '63, disability.
 Adams, John S., Aug. 15, '62, 38th K; Dec. 22, '64, expiration of service.
 Adams, John, July 25, '62, 35th D; June 9, '65, expiration of service.
 Alden, Albert, Sept. 21, '61, 24th I; Jan. 20, '66, expiration of service.
 Arnold, Thomas M., Aug. '62, 49th A; June 9, '65, expiration of service.
 Atkins, John Jr., 2nd Lieut., Sept. 23, '61, 4th cav., M; April 16, '64, to re-enlist in 4th cav.
 Brown, George F. Lieut., June 29, '61, 16th H; killed at Gettysburg July 2, '63.
 Brown, Charles L., June 29, '61, 16th H; died July 16, '63, of wounds received at Gettysburg.
 Blagge, George F., Oct. 16, '61, 24th C; May 28, '63, disability.

- Brackett, Edward J., July 25, '62, 35th D; Jan. 4, '65, amputation of foot.
- Barnett, William, Aug. 6, '62, 35th D; June 9, '65, expiration of service.
- Boardman, Frederick, Aug. 6, '62, 35th D; June 9, '65, expiration of service.
- Boardman, Leonard, Aug. 6, '62, 35th D; June 9, '65, expiration of service.
- Brady, Patrick, Sept. 23, '61, 1st cav. L; Sept. 24, '64, expiration of service.
- Banks, Gardner, promoted to capt., major, lieutenant-col. June 29, '61, 16th H; Sept. 2, '63, disability.
- Baxter, Orson A., lieutenant, Sept. 20, '61, 1st cav. M; died of fever Oct. 4, '64, at Williamsburg, Va.
- Brannon, Martin, Sept. 25, '61, 1st cav. L; Sept. 24, '64, expiration of service.
- Banks, Hiram B., lieutenant, April, '62, 16th K; killed at Manassas, Va., Aug. 29, '62.
- Bryant, John, June 29, '61; Mch. 30, '63, disability.
- Bodge, Charles M., Aug. 6, '62, 35th D; March 30, '65, wound in right arm.
- Babcock, Rufus L., June 29, '61, 16th H; March 20, '63, died of disease.
- Burgess, Henry F., June 29, '61, 16th H; died at Andersonville July 21, '64.
- Buxton, John H., Sept. 4, '61, 22d G; Feb. 21, '63, disability.
- Briggs, Benjamin F., July 26, '62, 35th D; June 9, '65, expiration of service.
- Boulton, William, June 29, '61, 16th H; July 27, '67, expiration of service.
- Burrows, James jr., June 29, '61, 16th H; July 27, '64, expiration of service.
- Burbeck, John F., July 2, '61, 16th B; Dec. 26, '63, to re-enlist.
- Ballard, George F., Jan. 16, '62, 99th; Jan. 16, '65, expiration of service.
- Brown, Nathan, Jan. 18, '62, navy; March, '65, expiration of service.
- Benis, A. Percy, 13th B., deserted.
- Barnes, Otis H., Nov. 28, '61, 32d B; Feb. 9, '63, disability.
- Barnes, George L., Oct. 28, '61, 32d B; Nov. 28, '62, sickness. Promoted 2d lieutenant.
- Baldwin, William F., Nov. 11, '61, 32d B; died July 28, '63, of wounds received at Gettysburg.
- Blanchard, William L., Aug. 29, '62, 44th E; June 18, '63, expiration of service.
- Brogan, Michael, Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Blanchard, Edward R., Aug. 29, '62, 44th E; June 18, '63, expiration of service.
- Baldwin, Frank, Sept. 12, '62, 44th E; June 18, '63, expiration of service.
- Barnes, Theodore L., Sept. 12, '62, 44th E; June 18, '63, expiration of service. Died at home April 4, '64.
- Brady, James W., Jan. 4, '64, 4th cav.
- Blake, John D., Feb. 4, '64, 56th I; died Sept. 16, '64, a prisoner at Richmond.
- Coppenger, John, June 29, '61, 16th H; Nov. 10, '62, disability.
- Cousens, Ivory L., Aug. 18, '62, 32d K; June 29, '65, expiration of service.
- Cousens, Samuel, Aug. 13, '62, 32d K; Dec. 20, '64, expiration of service.
- Crosby, Charles C., Aug. 21, '61, 21st D; Sept. 24, '64, expiration of service.
- Connelly, Patrick, June 29, '61, 16th H; June 29, '64, expiration of service.
- Coollidge, James E., July 28, '62, 35th D; June 9, '65, expiration of service.
- Corrigan, Joseph, July 2, '61, 16th K; killed June 18, '62, at Fair Oaks.
- Cox, Michael, July 2, '61, 16th C.
- Caughy, George H., Sept. 17, '61, 1st cav. M; Dec., '64.
- Cunningham, William, Oct. 28, '61, 1st cav. H; Feb. 11, '63, disability. Re-enlisted '64.
- Connolly, Michael, June 13, '61, 11th D.
- Cullen, Michael, Jan. 13, '61, 28th I; Jan. 1, '64, to re-enlist.
- Cloudman, William H., June 29, '61, 16th H; July 27, '64. Promoted sergeant major.
- Corey, George H., Sept. 5, '61, 3d battery, Sept. 16, '64, expiration of service.
- Carey, John, May 1, '61, 28th C; Nov. 21, '62.
- Chapin, Ezra, June 29, '61, 16th H; July 27, '64, expiration of service.
- Clasby, Daniel J., June 29, '61, 16th H; Aug. 28, '63, wounds received at Chancellorsville.
- Conlan, J., Sept. 23, '61, 1st cav. L; April 20, '64, to re-enlist. Final discharge, Nov. 14, '65.
- Carney, John, Sept. 23, '61, 1st cav. L; Aug. 19, '64, disability.
- Clarke, Charles E., July 2, '61, 16th K; July 27, '64, expiration of service.
- Cousens, George B., Aug. 17, '61, 18th H; '65, expiration of service.
- Carson, F. D., Aug. 29, '62, 5th K; July 2, '63, expiration of service.
- Carson, E. C., Aug. 29, '62, 5th K; July 2, '63, expiration of service.
- Collins, John, Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Crowley, William, Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Collins, John, Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Crowley, F. C., lieutenant, Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Curtis, John D., Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Curtis, J. H., Sept. 12, '62, 44th F; June 18, '63, expiration of service.
- Connors, Timothy, 4th excelsior brigade. No further record.
- Cousens, Charles W., Feb. 4, '64, 56th I.
- Carr, Henry C., June 29, '61, 16th H; killed May 3, '63, at Chancellorsville.
- Darling, Gardner H., June 29, '61, 16th H; July 24, '64, expiration of service, severely wounded.
- Donahoe, John H., Dec. 26, '61, 99th N. Y.
- Darling, Charles H., Sept. 20, '61, 1st cav. U; '65, expiration of service. Re-enlisted '64. Final discharge Nov. 14, '65.
- Dillon, John, June 29, '61, 1st cav. H; died Oct. 7, '62, of wounds received at Bull Run.
- Dennett, E., Sept. 23, '61, 1st cav. M; Sept. 24, '64, expiration of service.
- Durivage, Henry A., Dec. 6, '61, 30th cav.; drowned, April 22, '62, near the mouth of Miss. river.
- Dwelle, George B., Aug. 6, '62, 35th D; June 9, '65, expiration of service.
- Doherty, Edward, killed at Chancellorsville.
- Daily, John, Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Dean, William, Sept. 12, '62, 44th E; June 18, '63, expiration of service.
- Dannigan, John, Jan. 6, '64, 56th F; died June 3, '64, in the service at Philadelphia.
- Emerson, Warren A., June 29, '61, 16th H; June 8, '62, arm amputated.
- Edson, Henry, Aug. 16, '61, 16th G; July 27, '64, expiration of service.
- Emerson, George N., July 29, '61, 13th B.
- Emerson, Warren F., Aug. 29, '62, 44th E; June 18, '63, expiration of service.
- Egan, Thomas, Dec. 13, '61, 28th E; died at Belle Isle prison, Jan. '64.
- Fogg, William, Oct. 7, '61, 23d K; May 7, '63, disability.
- Frost, Charles L., Sept. 23, '61, 1st cav. M; Sept. 24, '64, expiration of service.
- Frost, Leslie D., July, '62, naval; served on the vessels Sonoma and Savannah.
- Fairbanks, Luman F., June 27, '61, 6th H; killed July 2, '63, at Gettysburg.
- Flannery, Lawrence, July 31, '62, 35th D; June 9, '65, expiration of service.
- Field, George F., July 25, '62, 35th D; June 9, '65, expiration of service.
- Fisher, Henry N., Aug. 10, '62, 35th D; March 4, '63, wound received at Antietam.
- Forsyth, John Jr., June 29, '61, 16th H; killed July 3, '63, at Gettysburg.
- Fisher, James H., April 21, '61, 16th H; July 27, '64, expiration of service, wounded.
- Fillebrown, Oliver, Sept. 23, '61, 1st cav. M; Sept. 24, '64, expiration of service.
- Fillebrown, Henry A., 5th battery; expiration of service.

- Guinan, Michael, Dec. '61, 17th D.; Feb. 10, '65, expiration of service.
- Goodnow, A. W., June 29, '61, 16th H.; July 27, '64, expiration of service.
- Goodnow, A. R., Sept. 2, '61, 22d A.; Oct. 17, '64, expiration of service.
- Gay, C. S., Sept. 23, '61, 1st cav. M.; Sept. 24, '64, expiration of service.
- Gallagher, John, Oct. 28, '61, 1st cav. H.
- Gilson, Lemuel, September 19, '61, 1st cav. L.; Dec. 11, '62, disability.
- Grinnell, Amos, June 29, '61, 16th H.; July 27, '64, expiration of service.
- Grant, Daniel G., June 29, '61, 16th H.; July 27, '64, expiration of service.
- Galloway, Charles, June 29, '61, 16th H.; Nov. 16, '62, disability.
- Goodnow, E. W., Sept. 23, '61, 1st cav. L.; resigned '65, promoted to 1st lieutenant.
- Gray, George, Dec. 21, '63, 20th I.; Jan. 1, '64, hospital steward.
- Green, George M., June 29, '61, 16th H.; Aug. 12, '63, wounded at Chancellorsville in the hip.
- Garrity, John, July 25, '62, 35th D.
- Gibbs, John M., Sept. 12, '62, 44th F.; June 18, '63, expiration of service.
- Gillespie, John, Sept. 16, '62, 5th K.; died June 23, '64, near Petersburg.
- Grant, Samuel, Sept. 1, '62, 5th K.; July 2, '63, expiration of service.
- Gibbs, Frank F., Sept. 12, '62, 44th A.; June 18, '63, expiration of service.
- Gibbs, Capt. William, Sept. 6, '61, 1st cav. L.; Feb. 3, '62, by personal request.
- Holbrook, Charles, served in the navy.
- Hutchins, H. E., served in the navy.
- Howard, Henry W., Aug. 14, '62, 38th K.; '65, expiration of service; promoted to captain.
- Hastings, Charles E., July 31, '62, 35th D.; March 13, '63, disability.
- Holland, Henry, 17th H.
- Hickey, Edward, June 29, '61, 16th H.; killed July 3, '63, at Gettysburg.
- Hovey H. L., Sept. 23, '61, 1st cav. M.; May 22, '63, disability.
- Harlow, S. R., Aug. 24, '61, 20th I.; Nov. 21, '62, disability.
- Hoyt, William R., Sept. 23, '61, 1st cav. L.; Sept. 24, '64, expiration of service.
- Hoyt, Charles N., June 29, '61, 16th H.; July 27, '65, expiration of service.
- Howard, Andrew F., Sept. 20, '61, 16th H.; July 27, '64, expiration of service.
- Holbrook, Maynard, Aug. 14, '62, 40th C.; killed at Cold Harbor, 1864.
- Hall, Frank C., July 31, '62, 35th D.; June 9, '65, expiration of service.
- Hatch, Edward, June 29, '61, 16th H.; killed May 3, '63, at Chancellorsville, Va.
- Hatch, David G., June 29, '61, 16th H.; killed at Gettysburg, Pa., July 2, '63.
- Harrington, Herman P., July 2, '61, 16th K.; July, '64, expiration of service.
- Hayes, William, Oct. 5, '61, 1st cav. M.; died '63, at hospital Hilton Head.
- Hickey, Thomas, Sept. 23, '61, 1st cav. M.; '65, expiration of service; re-enlisted in '64.
- Harned, David, July 2, '61, 16th K.; Dec. 22, '62, disability.
- Holbrook, Joseph, June 29, '61, 16th H.; died at Falmouth, Va., disease.
- Henson, A. P., June 29, '61, 16th H.; July 27, '64, expiration of service.
- Havy, Patrick, Oct. 4, '61, 1st cav. M.; '64, expiration of service, re-enlisted.
- Hildreth, James O., 40th A.
- Harnden, Nathaniel A., Aug. 11, '62, 40th A.
- Harnden, Wilson, Aug. 11, '62, 40th A.
- Hoyt, Otis, promoted capt. June 29, '61, 16th H.; July 27, '64, expiration of service, wounded at Bull Run.
- Hodgden, Sewell L., June 29, '61, 16th H.; June 29, '64, expiration of service.
- Holbrook, Bradford, June 29, '61, 16th H.; March 23, '63, disability.
- Huntress, George E., June 29, '61, 16th H.; June 29, '64, expiration of service.
- Hall, Henry C., June 29, '61, 16th H.; July 27, '64, expiration of service.
- How, Henry W., June 29, '61, 16th H.; killed June 30, '62, at Glendale, Va.
- Hunt, C. R., Aug. 19, '61, 1st cav. M.; October, '64, expiration of service.
- Howe, Hiram F., Oct. 31, '61, 1st cav. I.; Sept. 24, '64, expiration of service.
- Healy, John, June 29, '61, 16th H.; Aug. 12, '63, disability, wounded at Chancellorsville, Va.
- Hartwell, A. H., Sept. 12, '62, 44th A.; June 18, '63, expiration of service.
- Hartwell, Henry W., Sept. 12, '62, 44th A.; June 18, '63, expiration of service.
- Hill, Edward L., Sept. 12, '62, 44th A.; June 18, '63, expiration of service.
- Houghton, B. S., Sept. 16, '62, 5th K.; died at Newbern, N. C., Jan., 1863.
- Howe, Charles A., Sept. 16, '62, 5th K.; July 2, '63, expiration of service.
- Hutchinson, John A., July 1, '61, 16th E.; Jan. 25, '66, expiration of service; re-enlisted in '64.
- Harrington, Charles F., Oct. 20, '62, Andrew's sharpshooters, Oct., '64, expiration of service.
- Johnson, George E., Sept. 23, '61, 1st cav. M.; Sept. 23, '64, expiration of service.

- Joyce, Patrick, Sept. 16, '62, 5th K.; July 2, '63, expiration of service.
- Jackson, A. M., May 5, '61, 74th N. Y. D.; Sept. 27, '62, disability.
- Kane, Rogers, Jan. 1, '62, died Aug. 4, '62, at the hospital.
- Keyes, Samuel A., June 29, '61, 16th H.; Dec. 19, '62, disability, wounded at Bull Run.
- Kirk, Thomas, June 28, '61, 16th H.; Jan. 23, '63, wound in the head.
- Kiff, Orlando S., Oct. 9, '61, 1st cav. M.; Nov. 14, '65, expiration of service, as absent sick.
- Kidder, Charles L., Aug. 25, '62, 35th D.; Feb. 6, '63, disability, wounded at Antietam.
- Kimball, Lafayette, June 29, '61, 16th H.; Jan. 6, '63, disability.
- Kimball, Geo. H., Apr. 16, '61, 13th B.; Jan. 31, '62, com. 4th La., N. A.
- Kenney, Patrick, July 2, '61, 16th K.; Jan. 26, '63, disability.
- Kelley, Jeremiah, Aug. 24, '61, 19th I.; spring '66, expiration of service.
- Kendall, Charles D., Sept. 23, '61, 1st cav. M.; Sept. 24, '64, expiration of service.
- Kalauer, Daniel, Dec. 13, '61, 28th I.; Nov. 17, '65, expiration of service.
- Kendall, Amory H., Aug. 29, '62, 44th E.; June 18, '63, expiration of service.
- Kennedy, Martin, Apr. '62, navy; Oct., '64, expiration of service, vessel Maratonsa.
- Keith, Theodore S., acting as assistant surgeon.
- Lane Leonard C., July 1, 1863, 16th E.; wounded Mine Run, '63, disability, Dec. 15, 1864.
- Luce, Charles, June 29, '61, 16th H.; Nov. 23, '62, disability.
- Luce, Henry B., June 29, '61, 16th H.; July 14, '65, expiration of service, re-enlisted July 11, '64.
- Lombard, R. T., June 29, '61, 16th H.; lieutenant, promoted captain of Co. F, 11th Reg., '64, afterward major 11th Reg.
- Locke, William M., April 26, '61, 16th H.; July 27, '64, expiration of service.
- Lawton, George, June 29, '61, 16th H.; killed July 3, '63, at Gettysburg, Pa.
- Lawless, John, navy; was present at the taking of Mobile.
- Loyd, John, navy, assistant engineer.

Livermore, William B., Sept. 12, '62, 44th E; June 18, '63, expiration of service.

Lane, Cornelius C., Sept. 12, '62.

Lawrence, Nathan N., Dec. 6, '61, cav. attached to 30th Reg., June 16, '62, disability.

Moore, M. A., Capt. Sept., '61, 1st cav. M; '63, disability, died at Waltham, '64.

Mann, Elias, Aug. 8, '62, 38th; Oct. 10, '65, expiration of service, died Oct. 13, '65, of lung fever caused by exposure in the service.

Miller, Leonard H., Aug. 14, '62, 38th K; died in New Orleans, July 13, '63, of disease.

McAdams, Thomas, July 25, '62, 35th D; May 28, '63, disability, wounded, died at Waltham, March 28, '65.

Miles, Francis, Sept. 23, '61, 1st cav. M; died Oct. 10, '62, of fever, at Port Royal.

Marron, James, Sept. 23, '61, 1st cav. M; March 29, '63, disability. Re-enlisted, taken prisoner and confined at Libby Prison, Va.

McNamee, James, June 29, '61, 16th H; July 27, '64, expiration of service.

McGuire, Patrick, '62, 28th G; died in New York in consequence of wounds received in battle.

Murray, William, Sept. 23, '61, 1st cav. M; Sept. 24, '64, expiration of service.

McLearing, Barnard, 99th N. Y.

McMullen, Patrick, Sept. 17, '61, 24th D; Sept. 17, '64, expiration of service.

Manson, Frederick, Aug. 14, '62, 40th A; May 23, '63, expiration of service.

McLellan, F., 28th G.

Miles, Thomas, Sept. 23, '61, 1st cav. M; Jan. 19, '65, resigned, first lieutenant.

Mullaney, Matthew J., Apr. 30, '61, 16th K; Oct. 29, '62, wounds received at Glendale, June 30, '62.

May, George T., May 5, '61, 11th D; June 20, '64, expiration of service.

McDonigal, Barney, July 12, '61, 16th K; died at Andersonville Prison, July 29, '64.

McGuinness, Francis, July 22, '61, 17th H; Aug., '64, expiration of service.

Mock, Thomas F., July 24, '61, 20th H; March 5, '62, disability.

McAvo, Andrew, Dec. 16, '61, 30th I; Jan. 1, '64, to re-enlist.

Murphy, Thomas, July, '62, 80th; July 6, '65, expiration of service.

Moore, Charles F., April, '61, 16th H; July 27, '64, expiration of service.

Manton, Patrick, Sept. 23, '61, 1st cav. L; Sept. 24, '64, expiration of service.

McMahan, John, Aug. 29, '61, 13th B; Aug. 1, '64, expiration of service.

McVey, Patrick, Sept. 23, '61, 24th I; Oct. 3, '63, disability.

Manning, John, navy.

Murray, James, Dec. 11, '61, 6th Mass. battery; died in New Orleans, Dec. 10, '62.

Maynard, George H., Feb. 22, '61, 13th D; Feb. 17, '63, for promotion.

Millar, William K., Sept. 12, '62, 44th D; July 2, '63, expiration of service.

Millar, Leslie, Sept. 12, '62, 44th E; June 18, '63, expiration of service.

Millar, Thomas, Aug. 19, '62, 5th K; July 2, '63, expiration of service.

McBride, Michael, Sept. 16, '62, 44th K; died on passage home from Newbern, N. C., '62.

Morse, Lowellyn, Sept. 26, '62, 45th G; May 7, '63, expiration of service.

Moore, John F., Aug. 29, '62, 44th E; June 18, '63, expiration of service.

Matthews, William H., June 29, '61, 16th H; July 27, '64, expiration of service.

Murray, Henry, July, '64, 60th G; '65, expiration of service, re-enlisted Dec. 24, '64.

Moore, Darius B., July 13, '63, 32d D; killed at Laurel Hill, Va., May 12, '64.

Noonan, Edward J., Sept. 23, '61, 1st cav. L; re-enlisted.

Nelson, Samuel, Sept. 16, '62, 5th K; July 3, '63, expiration of service.

Newcomb, John S., Dec. 7, '63, 2d H. artillery G; died Aug., '61, at Andersonville prison.

O'Brien, Patrick, Sept. 23, '61, 1st cav. M; discharged, re-enlisted.

O'Hern, Patrick, Jan. 16, '62, 39th N. Y.; July, '65, expiration of service, re-enlisted Feb. 16, '64.

Parker, Anderson E., June 29, '61, 16th H; Dec. 27, '63, disability.

Powers, Edwards, Oct. 5, '61, 1st cav. L; Oct. 5, '64, expiration of service.

Peabody, Henry W., July 25, '62, 35th D; Jan. 9, '65, expiration of service.

Beck, John M., Sept. 16, '61, 14th Band; Aug. 15, '62, Law discharging military bands of music.

Perry, John, June 29, '61, 16th H; June 29, '64, expiration of service.

Polechio, Joseph, June 29, '61, 16th H; June 29, '64, expiration of service, transferred to Co. D.

Piper, Nahum, June 29, '61, 16th H; July 27, '64, expiration of service.

Parke, J. L., Sept. 23, '61, 1st cav. M; Feb., '63, disability.

Powers, John E., June 29, '61, 16th H; '63, disability.

Parke, George E., Sept. 14, '61, 1st cav. M; Sept. 24, '64, expiration of service.

Parks, Charles H., June 29, '61, 16th H; July 25, '63, disability.

Peterson, Joseph, Aug. 22, '62, 40th B; June 16, '65, expiration of service.

Palmer, Mason M., June 29, '61, 16th H; Dec. 24, '62, disability.

Parmenter, Henry W., June 29, '61, 16th H; June 29, '64, expiration of service, messenger at Washington, D. C., '65.

Potter, James M., June 20, '61, 16th H; Sept. 15, '63, disability.

Peck, William R., Sept. 17, '61, 1st cav. L; Jan. 4, '64, hospital steward.

Pope, George B., Sept. 12, '62, 44th E; June 18, '63, expiration of service.

Parsons, Charles G., Aug. 6, '62, 11th Mass. battery; L. A. July 7, '63, expiration of service.

Parsons, William H., Sept. 16, '62, 5th K; July 2, '63, expiration of service.

Perkins, Joseph S., Aug. 19, '62, 5th K; July 2, '63, expiration of service.

Priest, Francis H., Sept. 16, '62, 5th K; died in the service at Newbern. Priest had been with the company from Newbern to Gouldsboro', N. C.; had marched 160 miles; was returning sick and exhausted; in sight of Newbern he exclaimed, "Thank God, we are near home," and soon after died.

Qualters, John, July 2, '61, 16th K; Jan. 14, '63, disability.

Quinn, James, Jan., '62, 90th N. Y.

Qualters, Lawrence, July 29, '62, 35th D; June 9, '65, expiration of service.

Qualters, M. J., Oct. 12, '61, 1st cav. L; Nov. 15, '65, expiration of service, re-enlisted in '64 4th cav. L.

Roony, James, Sept. 23, '61, 1st cav. M; April 15, '64, to re-enlist; re-enlisted. Died at Waltham from exposure in Libby prison.

Ryan, George W., Nov. 21, '61, 32d B; Jan. 22, '63, disability.

Ryan, Samuel, Dec. 13, '61, 30th I; Jan. 6, '66, promotion to U. S. C. T. 1st lieut. of Inf. Corps D'Afrique.

Reed, Lewis A., June 29, '61, 16th H; July 2, '64, expiration of service.

Rogers, John S., Sept. 23, '61, 1st cav. M; '65, expiration of service, re-enlisted '64.

Riddle, H. W., Sept. 23, '61, 1st cav. M; Sept. 24, '64, expiration of service, as absent, sick.

Rupert, Charles, June 29, '61, 16th H; July 27, '64, expiration of service, 1st lieut. Feb. 14, '64.

Russell, John H., June 29, '61, 16th H; May 6, '63, disability, wounded Nov., '61.

Rodman, John, July 2, '61, 16th K.

Rogers, Francis P. H., lieut., June 29, '61, 16th H; killed at Fair Oaks, Va., June 19, '62, promoted to 1st lieut.

Robinson, N. S., June 29, '61, 16th H; Oct. 17, '63, disability.

Robinson, William H., June 29, '61, 16th H; Feb. 16, '63, disability.

Robinson, George F., June 29, '61, 16th H; Dec. 31, '62, wound received June 18, '62, near Fair Oaks.

Robinson, Hiram A., Nov. 28, '61, 32d B; June 29, '65, expiration of service, re-enlisted Jan. 6, '64.

Rogers, Patrick, Nov. 2, '61, navy, served on the vessel "Sagamore."

Roberts, William, chief engineer, Aug. 16, '65, navy resigned Sept., '69.

- reentered '61; served on vessels "Michigan," "Roanoke," "Fulton," "Memphis," "Niagara," "Housatonic."
- Rand, Nahum, Sept. 16, '62, 5th K; July 2, '63, to re-enlist, re-enlisted and died in Andersonville, Aug. 13, '64.
- Scott, Edward S., June 29, '61, 16th H; Feb. 9, '63, for disability.
- Stelmey, George A., July 22, '62, 35th D; June 9, '65, expiration of service.
- Smith, Simeon, June 29, '61, 16th H; Oct. 2, '62, disability, died on his way home.
- Spring, George W., July 31, '62, 35th D; June 9, '65, expiration of service.
- Stearns, William A., June 29, '61, 16th H; Oct. 29, '62, disability.
- Smith, John F., June 29, '61, 16th H; July 14, '65, expiration of service, re-enlisted in the 11th Inf.
- Sanderson, John L., Sept. 23, '61, 1st cav. M; Sept. 24, '64, expiration of service.
- Sanderson, Henry B., July 2, '61, 16th K; July 27, '64, expiration of service.
- Sullivan, Daniel, Sept. 13, '61, 29th A; died Feb. 15, '63, at New Orleans.
- Sherman, Hiram G., July 31, '62, 35th D; Nov. 29, '64, expiration of service, promoted to 2d Lieut.
- Sanderson, Geo. O., Oct. 5, '61, 1st cav. L; Oct. 5, '64, expiration of service.
- Stearns, William H., July 12, '61, 16th H; July 27, '64, expiration of service.
- Stedman, John, April 20, '61, 16th H; July 27, '64, expiration of service.
- Sawin, John C., Sept. 23, '61, 1st cav. M; Sept. 24, '64, expiration of service.
- St. John, George B., June 29, '61, 16th H; Feb. 14, '63, disability.
- Smith, John J., July 2, '61, 16th K; Feb. 11, '63, disability.
- Sanderson, Converse S., Oct. 5, '61, 1st cav. L; Oct. 5, '64, expiration of service, transferred to Co. L, 4th cav.
- Sawyer, Charles H., Oct. 23, '61, 1st cav. M; Oct. 23, '64, expiration of service, transferred to Co. M, 4th cav.
- Savage, Samuel G., June 29, '61, 16th H; 2d Lieut. May 6, '63, disability, died at Washington of wounds received at Chancellorsville.
- Soule, John W., June 29, '61, 16th H; July 27, '64, expiration of service, wounded at Gettysburg.
- Stone, George G., June 29, '61, 16th H; died at Waltham, Feb. 24, '65, transferred to V. R. C. Mar. 15, '64, surgeon's clerk, '65.
- Sherman, Robert O., Aug. '61, 16th K; killed July 2, '62, at Fair Oaks, Va.
- Sanderson, Horace, July 2, '61, 16th K; killed May 3, '63, at Chancellorsville, Va.
- Sullivan, Dennis, Sept. 16, '62, 5th K; July 3, '63, expiration of service.
- Smith, Thomas G., Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Smith, Edward P., Sept. 12, '62, 44th E; June 18, '63, expiration of service.
- Sherman, John M., Sept. 12, '62, 44th E; June 18, '63, expiration of service.
- Stearns, Ephraim, Sept. 26, '62, 45th G; July 7, '63, expiration of service.
- Smith, Thomas P., Sept. 26, '62, 45th G; July 7, '63, expiration of service.
- Smith, John S., May 5, '61, 5th Excelsior Brigade, N. Y.; '64, disability.
- Sullivan, James, 35th D.
- Stickney, Warren, June 29, '61, 16th H; July 27, '64, expiration of service.
- Smith, William A., June 29, '61, 16th H; Nov. 4, '61, disability, 1st Lieut., died at home from exposure in the army.
- Stickney, Thomas E., Feb. 4, '64, 58th I; May 29, '64, killed at North Anna River, Va.
- Thompson, Samuel, Sept. 23, '61, 1st cav. M; Sept., '64, expiration of service.
- Townsend, Jacob G., June 29, '61, 16th H; Nov. 21, '62, disability.
- Trayner, Charles, May 5, '62, 2d I; July 3, '63, he was killed at Gettysburg.
- Toadley, Daniel, 19th I.
- Thompson, Thomas W., Aug. 6, '62, 35th D; June 13, '65, expiration of service.
- Thompson, M. M., Aug. 16, '62, 36th D; Aug. 9, '65, arm shot off at Trenton, N. J., July 4, '65.
- Thomas, Hiram, Aug. 10, '62, 35th D, May 11, '65, disability.
- Thompson, Levi, June 29, '61, 16th H; Dec. 20, '63, to re-enlist.
- Thompson, C. H., July, '61, 16th K; July 27, '64, expiration of service.
- Thayer, John G., Dec. 10, '61, 1st cav. M; '64, disability, died in California from exposure in service.
- Taylor, James C., Sept. '61, 32d K; Feb. '63, disability.
- Tower, Herman C., Sept. 12, '62, 44th E; June 18, '63, expiration of service.
- Thompson, Henry R., Sept. 26, '62, 45th A; July 7, '63, expiration of service.
- Townsend, James A., 42d.
- Viles, John, July 16, '61, 13th; Sept. 1, '62, by act of Congress.
- Viles, John E., July 1, '61, 16th H; July 27, '64, expiration of service.
- Viles, Walter S., June 20, '61, 5th D, Sickles' Brig.; July 23, '63, leg amputated.
- Whitney, John H., July 29, '62, 35th D; June 9, '65, expiration of service.
- Wynman, John M., July 25, '62, 35th D; April 23, '63, disability.
- Whitney, William G., July 29, '61, 16th H; July 27, '64, expiration of service.
- Whiting, Charles A., June 29, '61, 16th H; July 27, '64, expiration of service.
- Wormwood, A. F., Oct. 5, '61, 1st cav. M; Sept. 24, '64, expiration of service.
- Wheeler, George E., June 29, '61, 16th H; Jan. 19, '63, disability.
- Wheeler, Charles M., July 25, '62, 35th D; April, '63, wound in arm, transferred to V. R. C.
- Wheeler, Edward B., Aug. 16, '62, 35th D; '62, disability, re-enlisted and discharged Feb. 27, '63.
- Wills, William R., June 29, '61, 16th H; Oct. 18, '62, white swelling on the knee.
- Wright, Henry E., June 29, '61, 16th H; Dec. 4, '62, wound in left hip.
- Wright, Almon, June 29, '61, 16th H; July 27, '64, expiration of service.
- Wright, Jason B., June 29, '61, 16th H; July 22, '63, disability, leg amputated.
- Wright, Lyman, June 29, '61, 16th H; Jan. 29, '63, disability.
- Whitcomb, Horace G., Oct. 5, '61, 1st cav. M; '65, expiration of service.
- Waters, Michael, Oct. 5, '61, 1st cav. M; June 2, '63, disability.
- Weeks, Albert, Jan. 1, '64, 26th E; Aug. 26, '65, expiration of service.
- Waters, William, Dec. 13, '61, 28th D.
- Vilkins, Ira D., Jr., July 12, '61, 16th G; Jan. 4, '64, to re-enlist.
- Wood, William, Aug. 14, '62, 38th E; July 23, '63, disability.
- Wellington, Nathan, July 25, '62, 35th D; June 9, '65, expiration of service.
- Wellington, F. D., June 29, '61, 16th H; May 13, '63, disability, injured severely by the falling of a tree.
- Whitney, George A., Feb. 9, '62, 32d F; April 19, '65, expiration of service.
- Wellington, John M., Sept. 12, '62, 44th A; June 18, '63, expiration of service.
- Wellington, George F. S., Sept. 12, '62, 44th A; June 18, '63, expiration of service.
- Wellington, Wm. S., Sept. 12, '62, 44th A; June 18, '63, expiration of service.
- Warren, Nathan, Sept. 26, '62, 45th G; July 7, '63, expiration of service.
- Whitney, Henry L., Sept. 26, '62, 45th A; July 7, '63, expiration of service.
- Whitcomb, Otis A., Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Whalen, John H., Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Wormwood, James G., Sept. 19, '62, 5th K; July 2, '63, expiration of service.
- Winslow, Zenas, Sept. 16, '62, 5th K; July 2, '63, expiration of service.
- Wellington, James L., March 3, '62, 32d F; '65, expiration of service.

CHAPTER XLVII.

WALTHAM—(Continued).

BY JOHN W. WILLIS, M.D.

AMONG the earlier doctors of Waltham was Uriah Hagar, M.D., who studied with Dr. Spring and Dr. Hunnewell, of Watertown. He probably took his medical degree at Harvard.

He was born in 1776, and began practice in Walt-

ham about 1800. For nearly twenty years he was the only doctor in Waltham. He died in 1841.

Ebenezer Hobbs, A.M., M.D., was born in Weston in 1794. Graduated from Harvard in 1814; received his medical degree there in 1817, and settled in Waltham. He continued in practice but a few years, when he was appointed to the responsible position of superintendent of the Boston Manufacturing Company of this town, which office he held for more than forty years, till failing health, which immediately preceded his death, compelled his resignation. A part of this time he was also the treasurer of this large corporation. He left its affairs in a highly prosperous condition.

This formal record falls short of showing the great influence which for many years he exerted upon the affairs of Waltham. A gentleman dignified, yet kindly, in manner; one to whom leadership is naturally accorded. He belonged to a school which seems to be passing from among us. He died in 1863. His successor seems to have been Samuel Luther Dana, A.M., M.D., LL.D., who was born at Amherst, N. H., July 11, 1795. He was prepared for college at Phillips Academy, Exeter, N. H., and with his brother, the late Prof. James Freeman Dana, entered Harvard in 1809.

The brothers were endowed with a love for the Natural Sciences, and entered upon the study of certain branches of it with great enthusiasm. They often made excursions through the country lying thirty miles around Boston for the purpose of examining its geological structure and collecting mineralogical specimens.

The result of these researches was a volume published by the brothers in 1818, entitled the "Mineralogy and Geology of Boston and its Vicinity."

Immediately after graduating, in 1813, young Dana commenced reading law with his uncle, Judge Samuel Dana, then residing in Charlestown.

Having, however, a military inclination, stimulated, perhaps, by the times, he received, March 12, 1814, an appointment as third lieutenant in the United States First Regiment of Artillery. May 1st following he was promoted to second lieutenant, and served through the war with Great Britain, in New York and Virginia.

At the close of the war, in 1815, the army was reduced, but Lieutenant Dana was offered retention in the artillery arm, which he declined, and resigned his commission May 31, 1815.

Shortly afterward he commenced the study of medicine with Dr. Amos Bancroft, of Groton, Massachusetts. He received his medical degree and commenced the practice of his profession in Gloucester, Massachusetts, in 1818.

From 1819 to 1826 he practiced in Waltham, relinquishing which, he established there a chemical laboratory for the manufacture of oil of vitriol and bleaching salts.

He subsequently founded the Newton Chemical Company, occupying grounds which were then a part of Newton, but since annexed to Waltham.

He was manager and chemist for this company until 1834.

He then received the appointment of resident and consulting chemist to the Merrimac Manufacturing Company, Lowell, Massachusetts, whither he moved, and performed the duties of that office until his death, which occurred March 11, 1868.

Dr. Dana was an original investigator, especially in chemistry as applied to the industrial arts, and made many original observations and discoveries, notably in the manufacture of sulphuric acid. His investigations into the more obscure points of the art of printing on cotton-cloth shed much light upon the subject, and led to many improvements in the process. His discoveries with respect to bleaching cotton were first published in the "Bulletin de la Société Industrielle de Mulhouse."

The principles there established have led to the American methods of bleaching, of which Persez, in his "Traité de l'Impression des Tissus," says, "It realized the perfection of chemical operations." While in England in 1833 he published a clear exposition of the changes which occur in the manufacture of sulphuric acid.

When the discussion of the dangers arising from the use of lead pipes for conveying water for drinking purposes came up in this country he took part in it, writing several pamphlets and making a report to the City Government of Lowell upon the subject.

His translation and systematic arrangement of the treatise of "Tanguerel on Lead Diseases" was an important contribution to medical knowledge.

Dr. Dana gave much time to agricultural experiments, especially with reference to manures, and his "Farmers' Muck Manual" was a very valuable discussion and exposition of an important subject. His "Essay on Manures" received the prize offered by the Massachusetts Agricultural Society in 1843.

Dr. Dana enjoyed the friendship and acquaintance of the leading scientific men of this country and Europe. He was twice married, his wives being sisters, daughters of Rev. Joseph Willard, president of Harvard University from 1781 to 1804.

Dr. Dana received the degree of LL.D. from Amherst College in 1847.

Horatio Adams, M.D. was born in 1801. He took his medical degree from Harvard in 1826, and in 1857 the honorary degree of A.M. was conferred upon him also by Harvard.

His whole professional life was spent in Waltham. Very early in his residence here he took a prominent and leading position in his profession. In 1858 he gave the annual address before the Massachusetts Medical Society, and all through his life, by voice and pen, joined prominently in discussions of the medical questions of the day. A paper on the action

of water on lead pipe, written by him, was published by the Massachusetts Medical Society. He was prominent in town affairs, and was on the first Board of Directors of the Fitchburg Railroad.

He was also president of the American Waltham Watch Company. He died in 1861.

Benjamin Faneuil D. Adams, son of Horatio Adams, M.D., was born in Waltham in 1839. He took the degree of A.B. in 1860 and M.D. in 1864, from Harvard. After several months in Europe, he commenced the practice of medicine in Waltham. A large and responsible practice, in virtue of his own merits as well as in remembrance of his recently deceased and honored father, was at once accorded him. He was chairman of the first Board of Health formed in Waltham. He was obliged by ill health to relinquish practice in 1882, and has since lived in Colorado Springs, Colorado.

Theodore Kittredge, M.D., was one in the long line of physicians of this name. The family line both in the number of generations and individuals seems of sufficient interest to be in part recorded here. It will be easier to follow the genealogy by numbering the generations.

1st. John Kittredge, born in England, was one of the founders of Billerica, where he received a land grant in 1660. He died there in 1676.

2d. Dr. John Kittredge, the first in the line of physicians, was born in Billerica in 1666. He appears to have passed his life there and died in 1714.

3d. Dr. John Kittredge of Billerica, born 1685, died 1756.

4th. John Kittredge, born in 1709, appears not to have been a physician, but the hereditary tendency asserts itself directly with increased force for his son.

5th. Dr. Benjamin Kittredge, born 1741, died 1776, leaving eight sons, every one of whom became physicians. They were named and located as follows:

6th. Benjamin, Exeter, N. H.; Henry, Tewksbury, Mass.; John, Framingham, Mass.; Jacob, Billerica, Mass., removed to Gallipolis, Ohio, in 1815, and died there in 1824; Rufus, Portsmouth, N. H.

7th. George, Epping, N. H.; Theodore, Kittery, Maine; Charles, Watertown, Mass.

8th. Dr. Theodore Kittredge, son of George, was born in Epping, N. H., in 1801. He graduated from the Harvard Medical School in 1823. He seems to have practiced medicine in his native town till 1832, when he removed to Waltham. He married Harriet Winslow, daughter of the distinguished Rev. George Pickering, one of the founders of Methodism in this country, and among the first to preach it in Massachusetts. Dr. Kittredge was a man of much energy of character. He had a large practice in Waltham, and, from his prominence and extended acquaintance in the Methodist denomination, was often called to surrounding towns. He was a devoted member of the then new sect, a class leader for many years. With the exception of one year spent in Bath, Maine, the

remainder of his life from 1832 to 1879 was passed in Waltham, making, with his Epping labors fifty-six years of continuous and active practice. He died in Waltham in 1879. He had two brothers, one of whom, Dr. George Kittredge settled at Newmarket, N. H. He was at one time a member of Congress from New Hampshire. The other brother, Charles, was a druggist.

9th. Dr. Frank Rufus Caleb Kittredge was born in Epping, N. H., in 1828. He graduated from Harvard Medical School in 1853. Most of his life was passed in Waltham. He was a man of much natural ability, well educated in his profession and otherwise. His pecuniary necessities never compelled labor, and he failed to take so prominent position in his profession as under other circumstances, his abilities natural and acquired, would have commanded. He died in 1888. It will be noticed that only the direct line—although two hundred and twenty-five years in length—has been followed from the first Dr. Kittredge to the Waltham branch. There has been and are many other doctors in and from other branches. It may well be doubted if any other name in this or any other country has furnished so many generations or so large a number of physicians as has that of Kittredge.

Royal S. Warren, M.D., was born in Alstead, N. H., in 1822, and received his degree from Harvard in 1846. He settled in Waltham in 1847, and commanded a large practice, till, in 1865, he met with a railroad accident from no fault of his. While crossing the Fitchburg Railroad at Moody Street he was run into and terribly injured. He was confined to his house for about a year, and barely escaped with his life. He was permanently disabled. In 1868 and 1869 he represented Waltham in the Legislature. He also served on the School Committee. He removed to Colorado Springs, Colorado, in 1880, where he has since resided.

Charles Dowse, M.D., was born in Brighton, Mass., in 1813. He was educated at Wesleyan University and Harvard Medical School, where he took his degree. For the last six years of his life he practiced in Waltham, where he died in 1860. His widow, a sister of Hon. Wm. Baldwin, of Boston, survives him.

The physicians, members of the Massachusetts Medical Society, now resident in Waltham are:

Theron Temple, Berkshire Medical College, 1856. Practiced in Waltham since 1882.

John Q. A. McColleston, Jefferson Medical College, 1856. Practiced in Waltham since 1888.

John W. Willis, Harvard, 1861. Practiced in Waltham since 1861.

Edward R. Cutler, Harvard, 1863. Practiced in Waltham since 1870.

Cornelius J. McCormick, Harvard, 1876. Practiced in Waltham since 1876.

William F. Jarvis, Harvard, 1880. Practiced in Waltham since 1882.

Alfred Worcester, Harvard, 1883. Practiced in Waltham since 1883.

Henry A. Wood, Harvard, 1883. Practiced in Waltham since 1887.

Claribel M. Hutchinson, Woman's Medical College of the New York Infirmary, 1887. Practiced in Waltham since 1889.

Walter S. Hays, Bellevue Medical College, 1885. Practiced in Waltham since 1889.

WAYLAND.—Among the older physicians of Wayland, or East Sudbury, as it was then called, was Ebenezer Roby, born in Boston in 1701, graduated at Harvard in 1719. He settled in Wayland about 1720, visited England, from whence his father came, in 1723, and traveled on the Continent. In 1730 he married Sarah, daughter of Rev. John Swift, of Framingham.

One of the wedding presents from the father to his daughter was a negro slave. The house in which he lived was burned quite recently. He continued in the practice of medicine to the time of his death, which occurred in 1772. His tombstone, now standing, testifies to the high esteem in which he was held as a man and physician.

His successor was his son, Dr. Ebenezer Roby, Jr., who was born 1732, and died in 1786.

Dr. Joseph Roby, son of Ebenezer, Jr., succeeded to the practice of his father; making the third in line. He died in 1801.

Dr. Nathan Rice appears to have been next in the order of succession. He was born in Framingham in 1769, commenced the practice of medicine in Wayland in 1796, and died there in 1814. His father, David, and grandfather, Bezaleel Rice, M.D., were of Framingham.

A grandson is the present Watson E. Rice, M.D., of North Grafton, and two of his granddaughters are the wives respectively of Alvah Hovey, D.D., president of Newton (Baptist) Theological Institution, and John W. Willis, M.D., of Waltham. A third granddaughter is the widow of Rev. — Carpenter, and is a missionary in Japan.

Dr. Ebenezer Ames succeeded Dr. Rice in 1814. He was born in Marlboro', 1788, graduated in medicine from Harvard, and spent the whole of his professional life in Wayland, where he died in 1861. Dr. Ames through his long career was much respected as a citizen and for his professional ability.

WALTHAM HOSPITAL.—The "Waltham Hospital" was chartered in 1886. No definite steps towards active organization were taken till 1888, when the promoters of a small private hospital, which was now becoming able to serve the purpose for which the Waltham Hospital was incorporated, were elected to membership in the latter, thus giving to the hospital *de facto* the advantage of being *de legis* a corporation capable of receiving gifts large or small.

The president of the trustees is Hon. F. M. Stone; the attending physicians are J. W. Willis, M.D., E.

R. Cutler, M.D., C. J. McCormick, M.D., W. F. Jarvis, M.D., A. Worcester, M.D., H. A. Wood, M.D.

Consulting physicians and surgeons, M. H. Richardson, M.D., Boston; J. W. Elliot, M.D., Boston; Addie S. Whitney, M.D., Boston; J. A. Mead, M.D., pathologist, Watertown; matron, Miss May Hackett.

The nursing service is furnished by the Waltham Training-School for Nurses, although the two corporations are entirely distinct.

WALTHAM TRAINING-SCHOOL FOR NURSES.—The physicians of Waltham, like many others of their professional brethren, had long felt the need of better nursing service. The great majority of the old-time nurses—although with many notable and honorable exceptions—had taken up their business simply because they did not know what else to do with themselves. Considerations of fitness or preparation for their work had small place.

Up to this time training-schools for nurses only existed in connection with hospitals, and the service of a trained graduate nurse was difficult and expensive to obtain. Consequently only the wealthy outside of hospitals could command it. Considerations like these impelled the members of the Massachusetts Medical Society, resident in Waltham, and working harmoniously together, to attempt the establishment of such a school without the aid of a hospital.

Such a thing had not before been done, but that had little deterring influence. Had not Waltham been the first to take cotton in its natural state from the field, and, under one roof, by machinery, produce cotton cloth? Had not the American Waltham Watch Company produced the first watch ever made by machinery? The foundation ideas were that nurses could be trained in private practice, that in many respects would be better prepared for their subsequent work than those who had merely hospital training, and while receiving such training could render excellent nursing service under their instructors.

The plan was acted upon in February, 1885. Public interest was easily aroused, for the public as well as the doctors had felt the need. A small guaranty fund was readily subscribed. A committee of three ladies, in connection with the doctors, undertook the business management. A class of seven young women was formed, for a pupilage of two years, who were to receive their board, a portion of their wardrobe, about one hundred dollars for the first, and one hundred and fifty for their second year, instruction by lectures and at the bedside from their medical teachers, and at the end of two years a certificate or diploma of graduation. The scheme was a success from the start. It almost immediately became self-sustaining; the guarantors were called on for very little. Constantly larger classes have been formed each succeeding year, and the demand for service of graduates of the school is greater than the supply.¹

¹ For further information see "A New Way of Training Nurses," by A. Worcester, M.D., published by Cupples & Hurd, Boston.

HOMŒOPATHIC PHYSICIANS.—George Russell, M.D., Harvard Medical College, commenced to practice here about 1840. In 1848 removed to Boston, but still retained a good share of his business here. He was succeeded by Thomas Wales, M.D., Harvard Medical College, who remained here but about a year; and was followed in 1853 by Charles F. Adams, M.D. (place of graduation unknown). He continued here until 1858, and was succeeded by Charles F. Saunders, M.D. (place of graduation unknown). He remained until 1860, and was succeeded by Edward Worcester, M.D., University of New York, who is still in practice.

Irving S. Hall, M.D., Homœopathic Medical College of Pennsylvania, came here in 1874; is still in practice.

J. F. Hadley, M.D., Boston University Medical College, located here in 1885; is still in practice.

A. C. Reed, M.D., Boston University Medical College, came in 1889, and still remains.

CHAPTER XLVIII.

WALTHAM—(Continued).

ECCLESIASTICAL HISTORY—BANKS.

BY ALEXANDER STARBUCK.

CHURCHES.—A by no means to be overlooked cause of Waltham's secession from the parent town was the location of the meeting-house. In olden times, when the meeting-house might be an extra three or four miles off and attendance at service a not to be deferred duty, the location was a matter of serious importance. The first site was selected with a view to accommodate those by whom it was to be used. In a large township, such as Watertown originally was, the centre of population was liable to change to a very marked degree, and the meeting-house, which once was centrally located, prove on the outskirts of population. A readjustment was sought, and if satisfaction was not obtained a new meeting-house would often be authorized with a new centre of population, which often proved the nucleus of another town. So it was with the Farmers' Precinct, or Weston, and so it was with the Middle, afterwards the West Precinct, or Waltham.

In 1692 the old meeting-house was located opposite the old graveyard, just southwest of Mount Auburn. An effort was made to remove it where it would be more convenient for the people. After much ill-feeling a new building was put considerably farther west, at a locality known as Commodore's Corner. The pastor, Rev. Henry Gibbs, refused to recognize the new order of things and continued to preach in the old building, and Rev. Samuel Angier was called to the pastorate of the new society. Mr. Angier's church, being the

one recognized by the authorities, was, therefore, the original church.

November 4, 1712, the General Court ordered that as the ministers of the Middle Precinct had been supported by voluntary subscription it was voted that each congregation bear the charges for its minister and repairs of its meeting-house. Furthermore, that both precincts bear the expense of removing the middle meeting-house to such a site as that precinct should determine. The majority of the town treated this order with contempt.

May 13, 1715, the town voted to "build a meeting-house for the accommodation of the inhabitants of the most westerly part of the town." This was the present Waltham, Weston or the Farmers' Precinct having been previously set off. This vote was never carried out. In 1719 Rev. Mr. Angier died and was buried in the burial-ground set off to the precinct, now Grove Hill Cemetery.

In November, 1720, inhabitants of both precincts prayed for a division line in order that assessments might be properly apportioned in accordance with the order of the Court of November 4, 1712. The line was laid out starting from the Charles River, running "on a north course forty-nine degrees east," and ending at the southwestern bounds of what is now Arlington. The report of the committee of the General Court further recommended the removal of the West Meeting-house within two years to a spot about twenty rods west of Nathaniel Livermore's house, and that the old meeting-house be removed or a new one built on School-house Hill, the West Precinct to bear its part of the expense of the removal or rebuilding of the east house. This report was concurred in by the Court, and April 24, 1721, the town voted to comply with the recommendations. This practically settled the ecclesiastical differences, but gave nuclei around which could cluster the inhabitants, who were ultimately to form two townships.

After the death of Mr. Angier no pastor was regularly settled for quite a period. Rev. Hezekiah Gold, Rev. Timothy Minuet and Rev. Mr. Gibson were among those who preached to the people. Mr. Francis names Robert Sturgeon also as one of the pastors, but this must be an error, since the General Court, in November, 1722, accuses him of having been privately ordained to a "pretended middle church." The report says he had been rebuked by two councils and recommends that he be prosecuted by the Attorney-General if he persists in his course. This report, which also recommends the demolition of the Middle meeting-house when the new West one was built, was agreed to. Rev. Warham Williams was finally ordained pastor June 11, 1723.

At the time of Waltham's incorporation the people were worshipping in a meeting-house which stood near the present entrance to the Lyman estate. Rev. Warham Williams died in 1751, and in 1752 Rev. Jacob Cushing, of Shrewsbury, was ordained as pastor. In

1767 the old church was abandoned and a new church built on the triangular lot nearly opposite the entrance to the Lyman estate. This building stood until it was torn down in 1741. Mr. Cushing died in 1809, and was succeeded by Rev. Samuel Ripley. During the War of 1812 some of the society not approving the anti-war stand adopted by Mr. Ripley, engaged Rev. Elisha Williams to preach for them in a school-house then situated east of the old burying-ground, and afterwards in the hall of the Kimball tavern. The society reunited again after the war, but in 1820 fresh trouble arose and the Second Religious Society was formed.

The first society continued under Mr. Ripley's charge 'till 1841, and then became extinct. The other societies receive attention under their respective heads.

Christ Church, Episcopal.—This church was organized A. D. 1848, under the ministry of the Rev. A. C. Patterson, who was then officiating in the vicinity of Boston, for the purpose of planting the Episcopal Church in places where it had not been established. Services were first held in Rumford Hall, which continued to be used by the parish as their place of worship for about one year. In the mean time the present church, on Central Street, was erected. The Rev. Thomas F. Fales was called to be the first rector, and entered upon his duties in November, 1849. In 1890 Mr. Fales retired, and was made pastor *Emeritus*. Rev. H. N. Cunningham, of Watertown, Conn., has accepted a call to the pastorate. The church has been once enlarged since its erection, adding about one-third to the number of its sittings.

Methodist Episcopal Church.—About the year 1820 the nucleus of the Methodist Episcopal Church began to form in the shape of class-meetings, a class of twenty-four being gathered, with Charles Barnes as leader. The class met regularly until 1825, when, a majority of the members removing to Lowell, it was discontinued. Circuit-preaching was occasionally had and small appropriations were allowed for its support.

Between 1828 and 1830 class-meetings were resumed, Marshall Livermore being leader, succeeded by Marshal Jones, and he (in 1833) by Dr. Theodore Kittredge. Services were occasionally held in the factory school-house on Elm Street, Smith's Academy on School Street and the Masonic Hall on Main Street. In March, 1837, regular services were commenced at Masonic Hall, Rev. Ziba B. Dunham, pastor. The next year the church then owned by the Second Society and standing on the Common was purchased, and in June, 1838, a regular organization was formed with about forty members. Between 1838 and 1843 Waltham and Watertown were united in one conference, the following pastors being resident here: 1838, Rev. T. Pickering; 1839, Rev. Edward A. Lyon; 1840, Rev. H. G. Barrus; 1841, Rev. G. W. Frost; 1842, Rev. B. K. Pierce. In 1843 Waltham

was separated from Watertown. Since then the following pastors have been assigned to this society: 1843, Rev. David Kilburn; 1845, Rev. John Paulson; 1846, Rev. Moses Webster; 1848, Rev. Jacob Sanborn, (under Mr. Sanborn the church was raised and a vestry put in); 1850, Rev. G. W. Bates (Mr. Bates died while in charge); 1851, Rev. N. J. Merrill; 1853, Rev. Luman Boyden; 1854, Rev. J. S. Barrows; 1856, Rev. T. W. Lewis; 1858, Rev. E. A. Manning (in the fall of 1859 the church was moved to the site of the present one, remodeled and dedicated January 25, 1860, the society in the mean time meeting in Rumford Hall. On Sunday night, May 27, 1860, the edifice was entirely destroyed by fire, and again Rumford Hall was called into requisition. The new church was completed and dedicated March 13, 1861). 1861, Rev. S. Kelley; 1863, Rev. D. K. Merrill; 1865, Rev. C. L. Eastman; 1868, Rev. D. E. Chapin; 1870, Rev. L. J. Hall; 1872, Rev. J. Wagner; 1875, Rev. W. A. Braman; 1876, Rev. W. W. Colburn; 1879, Rev. G. H. Mansfield; 1880, Rev. I. H. Packard; 1883, Rev. G. F. Eaton; 1886, Rev. J. M. Avann; 1889, Rev. Charles Tilton. During Mr. Avann's pastorate a branch organization was formed on the south side of the river and in 1888 a church building was erected. In 1890 a separate church organization was created for the South Side body, and it was incorporated as the Immanuel Church. Rev. W. A. Wood has been pastor of the new society since its organization.

Trinitarian Congregational Church.—Sixty-five years ago the only meeting-house in Waltham was located on the triangular lot of land formed by the three roads near the residence of the late Geo. W. Lyman, Esq. To meet the wants of the growing village, and particularly the operatives of the Boston Manufacturing Company, all of whom in that day were Protestants, the "Second Religious Society" was formed in 1820. It was agreed that the denominational relations of the church which should be formed should be determined by a majority of the subscribers to the new society. Accordingly it was voted that the church should be Congregational. It was organized in the Congregational way, September 28, 1820. Its original members were eighteen in number. The society built its meeting-house on Church Street, on the spot now used as the Catholic Cemetery, dedicating it January 16, 1821. Four years later there were found to be great differences in their views of doctrinal truth between "the Church and the Society." A separation took place. The church unanimously in April, 1825, adhering to their pastor, Rev. Mr. Harding, then took the name of the Trinitarian Congregational Church. A new "Society" was organized and a house of worship was built on Main Street, near Lyman Street. Here the church continued to worship till within twenty years. Their present edifice was dedicated in 1871. The pastors of this church have been:

From 1820 to 1837, Rev. Sewall Harding.

From 1837 to 1857, Rev. John Whitney.

From 1858 to 1864, Rev. R. B. Thurston.

From 1865 to 1878, Rev. E. E. Strong.

From 1878 to 1881, no settled pastor.

The present pastor, Rev. B. M. Fullerton, took charge of the society in the year 1881.

The Catholic Society.—The Catholic Society was instituted in Waltham in 1830. At the time the building occupied by the Second Society on Church Street was burned, the sheds belonging to it were saved. The Catholics purchased the lot and these sheds with it, and fitted up a section of the sheds for a church. They used this temporarily, however, and shortly after built a wooden building for this purpose. This was destroyed by fire in June, 1848. Up to 1839 there was no settled pastor, clergymen from Boston conducting the services from time to time. In 1839 Rev. T. Fitzsimmons was appointed pastor. He was succeeded by Rev. M. Lynch, and he in turn by Rev. Luther Strain. Mr. Strain continued pastor until 1847, at which time Rev. Patrick Flood was appointed to succeed him. During the pastorate of Mr. Flood, which continued until his death, in December, 1863, the large brick church on School Street was erected. The building was occupied in 1860 and dedicated in 1877. Upon the death of Rev. Patrick Flood, Rev. Bernard Flood, a nephew, was appointed. He also died, as it were, in the harness, in December, 1876, from sickness brought on by his labor and exposure in superintending the remodeling of the church. Rev. Timothy Brosnahan, his successor and the present pastor, was appointed early in 1877, and under his pastorate the church edifice has been completed and furnished, the grounds laid out and beautified, and the present parochial residence built (in 1884). So heavy were the labors in this parish, one of the largest in the vicinity of Boston, that it was necessary to have an assistant, and Rev. J. J. Murphy was given that position in 1876. On his appointment to a parish in Weymouth, Massachusetts, Rev. J. S. McKone was appointed to the place. He in turn was transferred to a church in East Boston, and was replaced by Rev. Frs. J. J. Mahoney and J. Lally. Fr. Lally died in 1888. Fr. Mahoney was promoted to his position and Rev. John A. Daily was appointed.

First Parish.—The church in which this society holds its services was dedicated February 9, 1839, and Rev. George F. Simmons was installed as pastor October 27, 1841, Rev. Samuel Ripley being "associate pastor." Mr. Simmons closed his ministry here, on account of ill health, in April, 1843. Mr. Ripley resigned his pastorate April 6, 1846, on his removal from town.

During the first thirty years which elapsed after the resignation of Mr. Simmons the parish had but four pastors. Of these the Rev. Thomas Hill was longest settled, having been fifteen years minister of the parish, returning here after eight years' absence and remaining until 1873. The dates of the beginning and

close of the pastorates which have filled these thirty years are as follows:

Ordination of Rev. Thomas Hill, December 24, 1845. Resignation January, 1860. Ordination of Rev. J. C. Parsons, June 6, 1860. Resignation, May, 1864. Installation of Rev. C. McCauley, December 29, 1869. Resignation, December, 1872.

The church edifice was thoroughly repaired and remodeled in the year 1867, under the superintendence of Mr. Henry W. Hartwell, to whose skill its present attractive appearance does great credit. Rev. Edward C. Guild was installed June 7, 1873, and resigning after about five years' service, was succeeded by the present pastor, Rev. Edward J. Young.

Baptist Society.—The First Baptist Church in Waltham was organized November 4, 1852, with a constituent membership of twenty-one—eleven females and ten males. During the first three years of its existence it sustained Sabbath services in Rumford Hall, holding its weekly prayer-meetings at the private residences of its members. At the expiration of three years its present house of worship was erected, and dedicated February 14, 1855; Rev. Baron Stow, of Boston, preaching the sermon, and Rev. M. B. Anderson, of Roxbury, offering the dedicatory prayer.

The first pastor was Rev. M. L. Bickford, whose pastorate extended from August, 1853, to June, 1863. The pastoral office was then filled successively by Rev. E. B. Eddy, Rev. A. M. Bacon, Rev. W. H. Shedd, Rev. W. H. Barrows, 1872, and Rev. F. D. Bland, 1875, who retired in 1879. Rev. J. V. Stratton was installed in 1880.

During his pastorate a division occurred in the church, and a new society, the Beth Eden, was organized on the south side of the river, in 1887. The meetings of the new society were begun in the building used for a skating rink, and were afterwards held in Endecott Hall. A new church edifice, begun in 1889, is in process of erection. Rev. George W. Gardner was installed pastor of the new society in November, 1888. On account of ill health he has been compelled to resign his pastorate, his resignation to take effect in November, 1890. Mr. Stratton's pastorate ended in 1887, and the following year he was succeeded by Rev. William M. Mick, the present pastor.

Universalist Society.—In the spring of 1837 the Universalists in Waltham set up a meeting in the hall of the Waltham Bank building, on Main Street, for regular public worship, and in August of that year Rev. William C. Hanscom, a young man of uncommon promise, became their preacher; but rapidly-failing health soon caused him to relinquish his work, and after struggling with that fatal disease, consumption, until May, 1838, he passed quietly away in the triumphs of the faith he had so fondly cherished. A humble marble monument marks the resting-place of his remains upon the summit of our Grove Hill Ceme-

tery. The late Rev. Sylvanus Cobb, D.D., in the spring of 1838, succeeded him as preacher to that people. Being straitened for room, they obtained permission from the town and removed from the Bank Hall into the Town Hall, in the old grammar-school building on Lexington Street. But the accommodations afforded them in this place, though somewhat better than those they had left, were found to be still insufficient. About this period the First Parish Society erected their present church edifice on Church Street, and it was by invitation of those members of that parish who declined to accompany the main body into their new place of worship, that the Universalists removed from the Town Hall into the old parish meeting-house, then standing near the residence of George W. Lyman, Esq. Up to this time the body had existed only as a voluntary association, but on the 6th of March, 1839, they organized in legal form into a religious society, and took measures to secure an act of incorporation, by the name of the "First Universalist Society in Waltham." Encouraged by the proffered assistance of the late Theodore Lyman, Esq., the society proceeded to erect a house of worship upon a lot presented to them by Mr. Lyman, on the corner of Lyman and Summer Streets.

In the spring of 1840, Rev. Mr. Cobb relinquished his charge, and in the autumn of the same year was succeeded by Rev. Edwin A. Eaton, who ministered to the society about three years; and in the spring of 1844 he was succeeded by Rev. T. G. Farnsworth. He retired from the pastorate in 1848, but continuing his residence in the town, he continued his membership also in the society during its existence. From 1848 to 1855 the society had no settled pastor, but by temporary supplies continued, with little interruption, to maintain regular public worship. In 1854 they sold their lot on Lyman Street, and removed their meeting-house to the corner of Main and Spring Streets. Rev. Massena Goodrich was their pastor from the spring of 1855 to 1857. He was succeeded in the fall of 1857 by Rev. Henry A. Eaton, whose ministry with them continued between one and two years, during which time a serious dissension arose in the society, the result of which was, the meeting-house passed out of their hands, and they ceased to exercise the functions of a religious organization. From an early period of its existence there was within the society a church organization and a flourishing Sunday-school.

A new society was organized in September, 1865, by the name of "The Universalist Society of Waltham," and established regular public worship in Rumford Hall. Rev. Benton Smith, through whose labors, as the missionary of the Massachusetts Universalist Convention, the body was gathered, ministered to the society some four years. Rev. Mrs. P. A. Hanaford supplied their desk for one year; and in September, 1871, Rev. M. R. Leonard entered upon the duties of his charge. Mr. Leonard was succeeded

in 1884 by Rev. L. P. Blackford, the present pastor. The present church edifice was erected in 1880.

Waltham Society of the New Jerusalem Church.—It is now more than sixty years since the Heavenly Doctrines, drawn from the Sacred Scriptures and revealed through the writings of Emanuel Swedenborg, found interested readers and receivers in Waltham.

Meetings were held at first at the residence of Captain John Clark, and were continued in private rooms until the need of more ample accommodations for the increasing numbers was sensibly felt. This want was fully supplied about thirty years ago by the building of a stone chapel on Lexington Street, in a section of the city known of old as "Piety Corner," and since that time Benj. Worcester has led in public worship. A part of the building was also used for the "Waltham New Church School," which was removed to the more commodious quarters it now occupies in the brick building near by, built in 1864, expressly for its accommodation.

In December, 1869, nearly everything perishable of the chapel was destroyed by fire, the walls alone standing to mark the spot hallowed by many pleasant and sacred associations. In one year from the time of the fire a larger and more beautiful church had arisen on the same site, in which religious service has since been regularly held.

On Sunday, July 4, 1869, a distinct society of the church was formally organized, the membership numbering twenty-four, to which there have since been some additions. The total number of church-members resident here, however, is considerably larger than the society represents, many retaining their connection with other societies.

In addition to his labors as leader of the society, Mr. Benjamin Worcester has charge of the New Church School.

Ascension Church.—The Episcopalians were the first society to erect a church edifice on the South Side of the river, and much of the honor of this work belongs to Rev. Thomas F. Fales, pastor of Christ Church. In 1822 the society was organized and in 1822 the present edifice was erected. Rev. H. S. Nash was installed its first pastor, a position he occupied until 1855, when he resigned and the place was supplied by Rev. Carlton P. Mills. Mr. Mills was succeeded in 1888 by Rev. Mylton Maury, and he in 1889 by Rev. A. B. Shields, the present rector.

Banks.—In the spring of 1836 a petition by Luke Fiske, George Miller and Nathaniel Maynard, for an act of incorporation under the title of the Waltham Bank, was granted by the General Court, and the company was incorporated with a capital of \$100,000. A meeting was held at the Massasoit House, then standing at the corner of Main and Linden Streets, to accept the act of incorporation. Ephraim Allen was elected moderator and Luke Fiske was chosen president of the corporation. The act was accepted and by-laws adopted. Luke Fiske, Ephraim Allen,

Willard Adams, Nathaniel Stearns, William Hobbs and Jonas Clark, of Waltham, and Benjamin Dana, of Watertown, were chosen directors. At a meeting held May 30th, it was voted to add five directors to the list, and James Draper, of Wayland, Marshall Jones, of Weston, William Porter and George Miller, of Waltham, and William Brigham, of Boston were elected to the board. June 2d a committee was appointed to consider the question of a banking-house. June 9th the committee recommended the erection of a brick building thirty-six feet by twenty-six feet and two stories high. July 5th it was determined to build on the lot where the bank building now stands. At the same meeting Nathaniel Maynard was elected cashier. The first meeting in the new building was held October 1, 1836, and the fact that stock had been paid for to the amount of \$50,000 in gold and silver was sworn to. October 24, 1836, the first emission of bills, amounting to \$64,500, was authorized, and November 7th a further emission of \$44,300 was directed. The capital was subsequently increased to \$200,000, but in 1864-65, in consequence of losses, it was reduced to \$150,000, at which point it now stands. In December, 1864, the bank was chartered as a national bank, and on April 1, 1865, commenced business under its new charter. The law passed by the Legislature, compelling the separation of deposit and savings banks, made it necessary to build a wing on the westerly side.

The Savings Bank was incorporated March 18, 1853, and the act was accepted April 15, 1853. On the acceptance of the act the following officers were elected: Horatio Moore, president; Eliphalet Pearson, vice-president; D. A. Kimball, secretary and treasurer; Horatio Moore, Ebenezer Hobbs, E. Pearson, J. H. Priest, R. P. Davis, Gillum Barnes, George Bigelow, Leonard P. Frost, Phineas Upham, Thomas Page, Samuel B. Whitney and D. A. Kimball, trustees. The other original members were: Nathan Hagar and Nathaniel L. Sibley, of Weston; Jonathan S. Parker, of Lexington; Asahel Wheeler and Galen Merriam, of West Newton; D. T. Huckins, T. Livermore, Seth Bemis and H. Cooper, of Watertown; Wm. F. Wheeler and Wm. Foster, of Lincoln; Wm. Mills and Thos. Rice, Jr., of Newton Lower Falls; Horace Heard, of Wayland; Thomas Barnes, George W. Frost, John Roberts, Amory Moore and Daniel C. Stratton, of Waltham.

The old building was demolished in 1888, the two banks occupying quarters temporarily in the J. W. Parmenter building on Moody Street. The new building was completed in September, 1889, at a cost of \$50,000, and on September 30th of the same year was first occupied for business.

CHAPTER XLIX.

WALTHAM—(Continued).

SCHOOLS AND NEWSPAPERS.

BY ALEXANDER STARBUCK.

SCHOOLS.—Waltham's separation from the parent town of Watertown appears to have been principally due to three causes: first, the early separation into military precincts; second, the location of the church; third, educational interests. As early as April 7, 1729, a meeting of the inhabitants of the West Precinct was held to consider, among other things, a location for a school-house. Allen Flagg agreed to donate to the precinct a suitable strip of land at the north end of his orchard for the purpose, and it was voted to accept the offer. February 4, 1729-30, Zachariah Smith, Allen Flagg, Thomas Harrington, Thomas Bigelow, Jonas Smith, John Childs and John Cutting were delegated to see the selectmen and have inserted in the warrant for the next town-meeting an article providing for an appropriation to build on the land of Mr. Flagg a school-house. The town declined the gift and refused to grant the money, greatly to the disappointment of the petitioners. That action was taken in March. In May a committee was appointed at a meeting of the people of the West Precinct to endeavor to have that district set off as a separate town, "and take Effectual care that the same may be Established that Learning may be Advanced among us or some other proper methods whereby to obtain the same." A petition representing the sentiment of the people of the precinct was forwarded to the General Court, which ordered the town served with a copy and cited it to show cause why the petition should not be granted. April 19, 1731, a committee was chosen by the town to oppose the division. Nevertheless the Court recommended, among other things, that the town provide two school-houses, with two duly qualified schoolmasters,—one for each precinct. The town (August 16, 1731) refused to accept the recommendations and the assessors of the West Precinct,—Nathaniel Harris and Deacon William Brown,—feeling that the East Precinct was unjust to them, refused to assess the grant made by the town for the support of schools. Again, in March, 1732-33, an attempt was made for separation and again it was unsuccessful.

June 28, 1736, Nathaniel Harris, William Brown and Daniel Benjamin, in behalf of the people of the West Precinct, and against the resolute opposition of the East Precinct people, obtained permission from the General Court to set off land from the common lands devoted to highways, sufficient to raise a sum of £1500, which was to be invested and the interest used for the support of schools. So bitter was the feeling growing out of this act that it culminated in a meeting of the inhabitants of the West

Precinct, December 7, 1737, at which a vote was passed to petition the General Court for separation. The prayer was granted, and January 4, 1737-38, the town of Waltham was incorporated.

In July, 1738, the selectmen appointed two of their number to secure a schoolmaster. In August they reported that they had agreed on Daniel Harrington, and he was employed. There were three school districts. The principal school at that time was in the location known as "Piety Corner." Salary of Mr. Harrington, £20 per quarter.

January, 1739-40, Adam Boardman was school-teacher. January 25, 1741-42, Joseph Roberts was engaged to teach at £5 per month, and on March 10th of the same year it was voted to have a "moving" school. In May John Carns agreed to keep the school for two months in the district where John Dix lived, at the north part of the town, at £5 per month, with an allowance of 19s. per week if he boarded himself. In September the "movable" school was discontinued; £10 was appropriated to repair the school-house, and £80 to support the school.

In November the selectmen agreed with William Lawrence to teach the school for eight months, dating from the previous July, the pay to be £6, old tenor, and his board. Mr. Lawrence was succeeded in 1745 by Elisha Harding. In March, 1746-47, a "moving" school was again established, and Deacon William Brown was chosen to teach the North District. March, 1747-48, Samuel Livermore, Jr., was appointed to teach the West, Centre and North Districts. January, 1748-49, Caleb Upham was appointed a school-teacher. In September, 1751, a discussion arose as to whether the teacher should be a male or a female. It was finally decided in favor of the former; and in November of the same year it was voted to spend the town's money to support the school in the school-house, and that the teacher should be "a grammar-school master."

1752, Jonas Clark and Samuel Livermore, school-masters. Mr. Livermore continued to teach until 1756. He was succeeded by Isaac Livermore, who taught until some time in 1758. Leonard Williams taught in the latter part of 1758 and the early part of 1759. In March, 1760, the town appropriated £2 to carry on a children's reading-school in the southwest part of the town. Deacon Isaac Stearns was appointed by the selectmen to engage a school-mistress for the northerly portion of the town, and it was agreed to have a grammar school-master teach one quarter in the school-house. Mrs. George Lawrence was selected by Deacon Stearns, and we may safely conclude that she was the first female teacher regularly engaged by the town. In 1761 Jonathan Livermore, Samuel Williams and John Wyeth were paid for teaching school. In 1762 Samuel Williams and a Mrs. Clark performed the same service; in 1763 Mrs. Lawrence, a daughter of William Coolidge, a daughter of Lois Fiske and Mr. Williams were selected. In

May, 1764, payment was ordered for the following-named school-teachers: Thomas Fisk's daughter, Joseph Hagar, Jr.'s wife, Joseph Bemis' wife, George Lawrence's wife, Hopedill Bent's daughter-in-law, Jonathan Sanderson, Jr.'s wife, John Dix's daughter, Ebenezer Brown's son and Samuel Williams. In March, 1765, it was voted that the grammar school should be a "moving" school during the remainder of the year. Leonard Williams and Elijah Brown were appointed to teach it. The town granted £41 for educational purposes in September, of which £12 were for the women's schools.

In 1769 Jonas Dix, Jr., was appointed teacher of the grammar school, and continued in the office until 1772, when he resigned on account of ill health. The town voted in the same year to build a new school-house near the old one, but took no further action towards carrying out its vote. In 1770, however, a committee was appointed to carry the vote into execution and to repair the old building.

In 1771 a son of Josiah Brown was one of the five teachers employed by the town. In 1772 William Fisk succeeded Jonas Dix, Jr. Miss Ruth Russell and a daughter of Jonathan Hammond were also teachers. In March, 1774, the town voted to build a new school-house near the meeting-house. By the report of the committee having the matter in charge, made in September, it appears that the work was done at an expense of £81 5s. 3d. In November of the same year the town voted to take down the old school-house and build one in the northwest section of the town.

In 1777 Jonas Dix, Jr., and William Fisk are recorded as teachers. In 1779 Samuel Kendall, Mr. Morse, Mr. Bridge and Eunice Mixer were paid for teaching. In June, 1780, the appropriation for schools was refused, probably because of the financial pressure of the Revolution. October 11th the town again refused an appropriation, but November 29th it granted £3360. The currency of the time was in a sad state, as may be inferred from the fact that £12,000 was appropriated for the purchase of 7200 pounds of beef. The teachers for that year were Eunice Mixer, Samuel Kendall, Mr. Boardman, Ruhamah Wellington and Mr. Bridge.

In 1781 Jonas Dix, Jr., and Mr. Bridge appear to be the instructors. The selectmen voted in December of that year to engage Ebenezer Bowman to keep the school "near the meeting-house." Mr. Bowman continued to teach the following year. In 1782 Nathaniel Bridge's name also appears on the list of teachers. In September, 1783, John Remington was hired to teach the school near the meeting-house, and Joseph Jackson that at the foot of the hill. In the following year Benjamin Green, Jr., was paid for teaching and he was again engaged to teach the grammar school in 1785. September 5, 1785, the town was divided into four school districts—Pond End, Trapelow, the southwest part of the town above Mixer's Lane (Bacon Street) and the Middle District, which included the balance,

In February, 1786, Jonas Dix was engaged to teach the grammar school for one year. In March John Remington was paid for teaching and Abijah Bigelow was engaged to teach at the new school-house at the west end of the plain, as long as the appropriation lasted, he to keep "two schools a day" after April 1st. Mr. Jackson, Nathan Underwood and John Child also appear to have been teachers during the year. Capt. Samuel Bigelow appears to be one of four teachers employed in 1787. In 1790 Messrs. Bridge, Dix and Mead were paid for teaching. The school grant of December, 1790, was thus apportioned to the several school-houses: Upper end of Plain, £25 6s. 8d.; Foot of Hills, £22 2s.; near the meeting-house, £30 5s. 3d.; Trapelow, £18 3s. 10d.; proprietors of new school-house (probably at the Lower Plain), £4 2s. 3d. In 1791 it was voted to buy the school-house at the Upper Plain and Trapelow, they having been pronounced suitable and the proprietors being willing to sell. An appropriation of £77 11s. was made for the one at the Upper Plain, the amount being divided among twenty-one proprietors, all residing on upper Main and on South Streets; £56 18s. 10d. were paid for the one at Trapelow. The house near the Widow Barnard's was not accepted. In the selectmen's records for 1791 appears an order appropriating 3s. 6d. to pay for a horse and chaise "to bring the school mistress from Framingham."

In April, 1792, a vote was passed to remove the school-house near the meeting-house to a point just below the present cemetery on Main Street. In September, 1795, the town appropriated £50 to purchase stoves and shutters for the schools and make some repairs, and chose a special committee of three from each school district to attend to the expenditure of school appropriations. They probably acted as a school committee, and the organization was continued from year to year, as we lose sight of special appropriations for teachers. In 1797 the schools taught by males are styled "men's" schools and those taught by females "women's" schools. In this year the town appropriated \$25 to establish a singing-school. In 1801 a School Committee of ten was elected, and this arrangement appeared to work so satisfactorily that it was continued voluntarily until the statute law made it mandatory. In 1803 the town appropriated \$120 for a teacher of music. In 1813 the Factory Village (Bleachery) was set off as a separate school district. In 1817 the town voted to set off the Boston Manufacturing Co.'s estates for a school district and to discontinue the one at the Bleachery. In this connection it is well to note that for many years the Boston Manufacturing Co. sustained schools of its own for the instruction of the children of its employees.

Rev. Mr. Ripley appears about 1819-20 to have caused considerable trouble in his flock by using a portion of his time in teaching school, and it was made a matter for town interference, an effort being made to appoint a committee to interview him and

induce him to quit teaching, but his friends were too numerous and the project was abandoned. In 1829 the town voted to exclude needle-work from the morning session of the summer schools, allowing it in the afternoon, and in 1830 a small sum was appropriated to procure medals to be given the most deserving scholars.

In spite of the law of 1789 in regard to the establishment of grammar schools, no effort was made to comply with it until 1820. In 1821 the town was sued for non-compliance with the act, but little heed was paid to the suit. The attempt to establish such a school was unsuccessfully repeated year after year. In 1832, however, the town appropriated \$1200 to build a grammar school-house and town-house on the old meeting-house common. Subsequently a vote was passed to erect the building on the "gore of land" owned by Mr. Lyman, that gentleman offering to give the land and \$200 to assist the work. This did not seem to suit, and after vote upon vote the town purchased of Mr. T. R. Plympton the land now occupied by the North Grammar School, increased the appropriation somewhat and erected the building there. When the present structure was put up, the old building was sold and removed to the corner of School and Exchange Streets, where it was remodeled into a tenement-house. In 1833 the town appropriated \$300 to enable the School Committee to hire a school-master and establish a High School, and directed the committee to commence such a school at the earliest possible day. The first principal of this school was Franklin Hardy. After him came Josiah Rutter (1835), William H. Ropes (1838), E. A. W. Harlow (1841), Charles F. Simmons (1842), Daniel French (1842), William H. Ropes (1844), Leonard P. Frost (1847). During Mr. Frost's term of service the town gave up the hall in the upper story, changed it to make it suitable for school uses and established a High School there distinct from the grammar school, Mr. Frost taking charge of the former and his brother, George W., of the latter. In 1859 L. P. Frost succeeded his brother George; after him came William E. Sheldon (1869), Alonzo Meserve (January, 1871), John I. Prince (September, 1871), John S. Hayes (1879), John I. Prince (1879), Bradford W. Drake (1879), who is now teaching. In 1868 the town established a grammar school on the south side of the river and Arthur P. Smith was elected principal, a position he still retains. In the High School the principals succeeding L. P. Frost are Timothy W. Bancroft (1859), Andrew J. Lathrop (1864), James C. Parsons (1865), Minton Warren (1874), William E. Buntin (1876), Ruel B. Clark (1877), Charles W. Parmenter (1878), Eugene D. Russell (1889). There are at present fourteen school buildings, about 2400 scholars and seventy teachers.

The present High and North Grammar School buildings were erected in 1867; the South Grammar building in 1876; the West, 1876; Heard Street,

1880; Prospect Street, Orange Street and Bacon Street, 1883; Grove Street, 1887; the High Street Primary remodeled 1890. The Newton Street building was erected in 1833, but bears no semblance to the original structure.

In 1864 the advocates of the New Church faith erected the school building used by them and have maintained a school there which receives pupils from all over the United States. In 1888 the St. Joseph Parochial (Roman Catholic) School was established and the building was completed for school purposes.

NEWSPAPERS.—The newspaper life of Waltham, so far as can be ascertained, commenced with the publication of *The Hive*, the first number of which appeared under date of March 2, 1833. It was an eight-page periodical, printed in magazine style with a page form eight and a half inches by five inches. It was edited and published by S. B. Emmons, who for many years kept an apothecary store on Main Street, in the building west of the Townsend Block. It was for many months printed at the office of James B. Dow, then located at No. 122 Washington Street, Boston. By its first editorial we learn that it was "devoted to the publication of Original and Select Tales, Essays, Music, Biography, Travels, Original and Select Poetry, Amusing Miscellany, Humorous Anecdotes, etc., etc." It was published on alternate Saturdays, at one dollar per year. For some reason, which does not appear through a perusal of its columns, publication was suspended from May 25, 1833, until February 14, 1835, the numbering both in issues and pages proceeding at the latter time as though there had been no interregnum. When its publication was revived it was printed by "Dill and Sanborn, Music, Book and Job Printers, 43 Washington Street, Boston." September 5, 1835, it was printed in Waltham for the first time by W. C. George, who had just established himself in Waltham as a book and job printer. January 16, 1836, the last number of *The Hive* appeared. In his valedictory editor Emmons said: "This number of the *Hive* completes the present volume. It will be succeeded shortly by a paper of a larger size, to be published every week."

On the 7th of May, 1836, the first number of the *Waltham Star*, the paper probably alluded to by Mr. Emmons, appeared. It was published by Willard C. George. The second number appeared under date of June 4, 1836, and the third June 11th. Its life was a brief one and its publication was soon suspended for want of patronage. The *Middlesex Reporter* was published in Waltham about one year commencing in 1841. Nathaniel P. Banks, Jr., was its editor. It appears that two other attempts were made to establish newspapers in Waltham between 1836 and 1848, but names and dates are not at hand. The *Waltham Mirror* made its opening bow on July 6th of the latter year. It was a quarto, with a page form twelve and one-half inches by nine and one-half inches. It was published semi-monthly by V. S. Williams, who kept

a periodical and general goods store in Wellington's building, just west of the bank, and was edited by H. B. Skinner, M.D., who had a Boston office at 60½ Cornhill. The *Mirror* lived about a year and then went the way of its predecessors.

Between 1849 and 1856 two more unsuccessful attempts were made to convince the people of Waltham that they needed a newspaper. May 18, 1850, D. Farnham commenced the publication of the *Rumford Journal*. Like its predecessors its life was brief. In April, 1852, appeared the first number of the *Massasoit Balance and Waltham Advocate*, published in Rumford Building by Kelley & Co. It also soon died.

Apparently undismayed by the failures of the preceding twenty-three years, Josiah Hastings, in 1856, launched the *Waltham Sentinel* on the sea of journalism. Mr. Hastings had previously published a two-page advertising sheet which was distributed free. On the 15th of February, 1856, he issued the first number of Waltham's first successful newspaper. The currents and the winds seemed propitious, and for twenty years the *Sentinel* paid its weekly visits to hundreds of Waltham firesides. It was edited by "an association of gentlemen." Its end was melancholy, even to the verge of the tragic. In 1876 the elder Mr. Hastings, his son William, who for many years had assisted his father in the conduct of the paper, and three grandchildren, the son and two daughters of William, died within the brief period of a few weeks. There was no one of the family left whose training was in the direction of newspaper work, and in 1877, the *Sentinel* was sold. It was purchased by George Phinney, proprietor of the *Waltham Free Press*, and became merged in that paper.

In February, 1863, George Phinney, who had had previous journalistic experience in Bridgewater, commenced the publication of the *Waltham Free Press*. At that time there was no distinctively Republican paper in Waltham. The *Free Press* early became the Waltham organ of that party, and has continued the exponent of Republican ideas to the present time. In the fall of 1884 Mr. Phinney disposed of the paper to Robert B. Somers, at that time a compositor in the office of the *Waltham Daily Tribune*. Alexander Starbuck was requested to take the position of editor, and did so. In the fall of 1885 Mr. Starbuck purchased a half-interest in the paper, and in November of that year the office, which up to that time had been located on the north side of the river, was removed to its present location, on the south side. March, 1888, Somers & Starbuck commenced the publication of a daily edition, which continues in successful operation at the present time. October 1, 1889, the newspaper and job-printing business, which, up to that time, had been run jointly, were divided, and the partnership dissolved, Mr. Somers assuming the job-print-

ing and Mr. Starbuck taking the newspapers. In its early life the *Free Press* passed through a varied experience. It was started in the second story of a building in the rear of Central (then Miller's) Block, which was previously used for sleeping apartments for the hotel in the upper stories of the block, but which has since been turned quarter round and moved to the line of Lexington Street. While located here it passed the ordeal of fire. It was then moved to a stone building back of Townsend's Block, and for a second time encountered fire. No serious accident, however, has since befallen it.

The next newspaper to be established in Waltham was the *Waltham Record*, which was started in 1876 by Barry & Berry. After a few months' experience Mr. Berry retired from the firm, and Mr. Barry carried on the business until 1885, when he disposed of the *Record* to Pratt Brothers, of Marlboro'. The paper was transferred to that town and merged with a large number of publications issued from the Marlboro' office. While in Mr. Barry's charge it was exceedingly well conducted. During the latter portion of its publication in Waltham it was issued semi-weekly.

The *Waltham Daily Tribune* was first published October 2, 1882, under the management of Eaton & Reed. It was first issued in Hovey's building on Moody Street, just south of the railroad. Mr. Reed subsequently disposed of his interest to Mr. Eaton. Mr. Eaton continued in possession and retained the position he held from the first as editor, until March, 1888. He then sold out to a company of gentlemen, who formed a corporation under the name of "The Waltham Tribune Company." For several months the paper was under the management of E. G. Bond. Late in the fall of 1888 he was succeeded by H. E. Browne, the present editor and manager. The company was incorporated in 1888 with a capital of \$14,000.

On May 5, 1886, E. G. Bond published the first number of the *Charles River Laborer*, a weekly newspaper issued, according to its prospectus, in the interest of the workmen particularly. It was printed by Rice & Drake, at their office, on Pine Street, near Moody. It lived a little more than a year.

October 16, 1886, the *Waltham Times*, a daily newspaper, published by Rice & Drake and edited by T. P. James, made its appearance. It lived about a year, and suspended publication.

Several amateur periodicals have appeared from time to time, lived a few months and then quietly died out, but as they were not designed to enter the professional field, no attempt is made to give them in detail.

A single attempt has been made in Waltham to establish a magazine. In March, 1836, Willard C. George published the first number of the *Repertory*, a monthly magazine of twenty-six pages, published at

\$1.00 a year. Mr. George must have received but little encouragement, as it is said that the second number of the periodical never appeared.

The *Christian Freeman and Family Visitor*, edited by Rev. Sylvanus Cobb, was printed by Josiah Hastings about two years, beginning in the spring of 1839. The office was then removed to Boston, the paper being some years after merged into *The Trumpet*, which in turn was merged in *The Christian Leader*.

CHAPTER L.

WALTHAM—(Continued).

THE AMERICAN WALTHAM WATCH COMPANY.

THE projector of the enterprise of systematic watch-making, which has become an industry of no small proportions in America, was Aaron L. Dennison.

He was a typical Yankee youth, born in Freeport, Maine, in the year 1812. As he early evinced a taste for mechanical pursuits he was apprenticed to a watchmaker. After serving in that capacity about three years, in Brunswick, Maine, he went to Boston, where he obtained a situation with Messrs. Currier & Trott, where he endeavored to perfect himself as a journeyman.

The varieties of style in the construction of Swiss and English watches, and the diversified jobs which naturally come into the hands of the watch repairer, would tend to stimulate ingenuity and develop thought in one who was interested in his work.

Mr. Dennison certainly seems to have been possessed of progressive tendencies, so that it very naturally occurred to him that there might possibly be some improvement in the methods of watch-making, especially in the direction of a greater uniformity in sizes of corresponding parts in watches of the same make. Visiting the United States Armory at Springfield, Massachusetts, he became greatly interested in the machinery used in the manufacture of muskets on the "interchangeable plan," and very naturally the idea of applying the same system to the manufacture of watches presented itself to him; and the more he contemplated it the more firmly was he convinced that the general system or method which was evidently such a success in the making of firearms, might, and without doubt would, in time be employed in the performance of the required operations on the smaller and more delicate parts of pocket time-pieces.

Having become possessed with this general idea, Mr. Dennison devoted many hours of his spare time to the study of the numerous details involved in the adaptation of such a scheme.

His continued contemplation of the subject only served to convince him that the mechanical difficul-

ties could be surmounted, and that therefore the scheme of machine-made matches was practicable, and, in time, was sure to be adopted.

With the earnest and very natural desire to see in tangible form some results from his long-continued study, Mr. Dennison endeavored to impart to capitalists some of the enthusiasm which his long contemplation of the scheme had aroused in himself.

It is quite probable, however, that capital at that time was even more conservative than it now is; so that it is not surprising that several years should elapse before any one was found bold enough to risk his money in an enterprise the success of which was at least problematical.

But in 1849 Mr. Dennison had an interview with Mr. Edward Howard, who seems to have been filled with an enthusiasm equal to his own, but with quite a different scheme for its object. At that time Mr. Howard was, in company with Mr. D. P. Davis, engaged in the manufacture of clocks and scales, and also standard weights and measures, for which they had a contract from the State of Massachusetts. They had also done something in the way of making fire-engines; and at that time Mr. Howard was greatly interested in a scheme for building locomotives on an extensive scale.

Mr. Dennison succeeded not only in dissuading Mr. Howard from any attempt to engage in the locomotive business, but made him a convert to his own project for watch-making. Having then obtained an ally, who soon became quite as enthusiastic as himself, Mr. Dennison's own courage and confidence increased, and the two men began their search for a capitalist, who would be able, by the aid of their prophetic vision, to discern a profitable return for an investment in their novel undertaking. This individual they found in the person of Mr. Samuel Curtis, of Boston, who consented to invest the sum of \$20,000 in the enterprise. The undertaking having been definitely decided upon, the next thing to be determined was as to the nature of the first practical action.

Without doubt Mr. Dennison had long before planned in his own mind very many details, and was prepared to submit a definite course of procedure. His suggestion was that a personal visit of inspection and investigation be made to the watch-making districts of England, and, at the same time, arrangements for the purchase of needful supplies which could not be readily procured in American markets, such as enamels, jewels, etc.

This recommendation of Mr. Dennison's was adopted; and accordingly he soon went to England, where he spent several months in gathering information as to the systems and methods in use by the English watch-makers; his observation only serving to confirm him in his belief that Americans could readily compete with them, especially in view of the fact of the extreme conservatism of the English, which prevented their ready adoption of new methods.

In a letter written by Mr. Dennison, while in Europe, he says, "I found that the party setting up as manufacturer of watches bought his Lancashire movements,—a conglomeration of rough materials,—and gave them out to A. B. C. and D. to have them finished; and how A. B. C. D. gave out the different jobs of pivoting certain wheels of the train to E. certain other parts to F., and the fusee cutting to G.—dial-making, jeweling, gilding, motioning, etc., to others, down almost the entire length of the alphabet. . . . Finding things in this condition, as a matter of course, my theory of Americans not finding any difficulty in competing with the English, especially if the interchangeable system and manufacturing in large quantities was adopted, may be accepted as reasonable."

During the absence of Mr. Dennison the other parties in the enterprise were not idle, so that after his return, work was commenced on a model watch, and some machinery and tools. Work was commenced on a factory building in October, 1850, and it was completed in the following January. It was located on Hamden Street, in Roxbury,—now a part of the city of Boston,—and designated as the Highland District. At that time the business was conducted under the name of "The American Horologe Company," and the capital invested consisted principally of the \$20,000 furnished by Mr. Curtis, together with the practical manufacturing experience of Messrs. Howard & Davis, and the enthusiasm and confidence of Mr. Dennison. Of this combination, the dollars gradually but surely and forever disappeared; the manufacturing experience was considerably enlarged; and the enthusiasm probably remained unchanged.

Of course, in commencing the business of watch-making, one of the primary matters to be decided was the form of watch to be adopted, which involved the construction of a model from which to work in the building of the tools and machines required. A small room was partitioned off in the Howard & Davis clock factory, and two men were detailed to begin this work. They were the brothers Oliver and David Marsh. They were soon joined by Mr. Charles S. Moseley, whose name is familiar in many of the watch factories of the country, and to whom is due the credit of designing many machines now in use in all American watch factories. Among others who were engaged on the original watches and machines, it is proper to mention here Mr. James Baker, who afterward became a foreman of one of the departments of the Waltham factory, which he left in 1874, to engage in mercantile business, returning, however, after a few years' absence, and is still industriously at work.

Mr. Nelson P. Stratton also soon became employed in the new enterprise; and very naturally, for he was a watchmaker by trade, having been engaged with the brothers James & Henry Pitkin, who in 1838 attempted to establish a watch factory at Hartford,

Conn., and did indeed make about 800 movements, but, as their cost was greater than imported watches, the enterprise was abandoned.

Believing that Mr. Stratton's experience in the Pitkins' factory would be of great value, Mr. Dennison persuaded him to give up his position with Messrs. McKay, Spear & Brown, jewelers, on Washington Street, Boston, and cast in his lot with the promoters of the new industry.

In taking this action no mistake was made, for Mr. Stratton soon became prominent in the management of the business; but of him more will be said hereafter. Of the other workmen who were employed at an early date, mention should be made of Mr. James T. Shepard, a brother-in-law of Mr. Stratton, who left the Springfield Armory to contribute his labor and skill to the new undertaking. He early became the head of one of the departments of the work, and still continues in the same position in the Waltham factory.

Among others who, early entering the service of the company, naturally came to occupy responsible positions, were Mr. John J. Lynch, who was foreman of the jewelry department, until his death in September, 1885, and Mr. Albert T. Bacon, who was for many years the general superintendent of the Waltham factory.

Mr. David Marsh was adjuster of high-grade watches, until he left the factory to enter mercantile business.

In the summer of the next year (1851) a model watch was completed. In size it corresponded with the 18 size movement as made at the present time by all American factories, but it is said to have been radically different, however, in that it was designed to run eight days with one winding, instead of about thirty-six hours, as does the ordinary watch. But it was soon found that such a form of watch was impracticable, and it was abandoned for the one-day watch.

Before any watches had been completed, the name of the company was changed to the Warren Manufacturing Company (probably in honor of Gen. Joseph Warren, whose birth-place was not far from the Roxbury factory), and the first hundred movements produced bore this name. These were completed and placed on the market in 1853. The next few hundred were named Samuel Curtis. But it was soon realized that the company name was not sufficiently suggestive of its business and it was changed to the Boston Watch Company.

The two or three years' experience at the Roxbury factory seems to have convinced the managers that the location was in many respects an unfavorable one, inasmuch as it was extremely dusty in the summer months, and it was also felt that in planning for the future growth of the business, no slight regard should be had for the requirements of the employees, and provisions be made for their happiness and comfort in the direction of homes.

Influenced by this feeling, Mr. Dennison began to search for a new and more favorable location. In his explorations among the suburban towns within a reasonable distance from Boston, he found a most charming spot which seemed to possess all the desired qualifications. This location was at Stony Brook, at the extreme eastern boundary of the town of Weston, and about eleven miles from Boston, on the line of the Fitchburg Railroad. But the owner of the desired land, Mr. N. L. Sibley, not having the enthusiastic faith in the future magnitude of the watch-making industry which possessed Mr. Dennison, could not be made to realize the very great pecuniary advantage which would accrue to him from the establishment of such a factory.

Failing to agree with Mr. Sibley on terms of purchase, that location was given up, and search was made for some available site, which was soon found in the "Bemis Farm," which was situated on the south side of the Charles River, about three-quarters of a mile from the centre of the village of Waltham, and only ten miles from Boston.

Having then found a satisfactory location for the factory, the next thing was to make it evident to the employees that country life was a thing to be very greatly desired. Accordingly, Mr. Dennison used to plan excursions into the country, the objective-point, of course, being a certain pasture on the south bank of the Charles River. And then he would endeavor to awaken in his companions a little of the enthusiasm which seems always to have possessed him, by pointing out to them some of the very charming locations on which to build houses. It is related that, on one of these outing days, Mr. Dennison mounted a stone wall, and waving his long arm toward the adjoining field, he exclaimed to his companions, "Somewhere about there, gentlemen, there is going to be a watch factory." The factory was subsequently built on the spot then designated; and moreover, some of the men actually located their homes on the very lots chosen for them.

The establishment of an industry so novel and, in the opinion of its projectors, so promising as watch-making, naturally set in motion other schemes for money-making, which should be more or less dependent upon or co-operative with the new factory.

The Waltham Improvement Company was incorporated in March, 1854, with a capital of \$100,000. They purchased most of the land in the vicinity of the watch factory site, amounting to several hundred acres, and laid it out into building lots, with main thoroughfares and intersecting streets.

Of the capital stock of this land corporation, the Boston Watch Company held thirty shares, at \$100 each.

Work was soon commenced on the new factory buildings, and prosecuted so vigorously that by October of that year they were ready for the reception of the machinery and tools. An engine and the

needful boilers were put in place, shafting put up, and the machinery moved from the Roxbury factory and put in operation.

This factory was built in the form of two parallel wings running towards the river, with a square building connecting the two in front, in which were located the various offices.

The material used in the construction of these original buildings was found on the spot, in the form of the gravel which constitutes the bulk of the soil of that region. This gravel was mixed with lime mortar, and the compound poured into a mould of plank, which was constructed in the form of a section of the building. After a section of this "concrete" had stood a sufficient time to become hardened, another section was built upon it in like manner, and so the process was continued, till the desired height was attained.

This method of construction was so successful that it was proposed to continue it, and one or two smaller buildings were made in the same manner; but when, after partly completing a building designed for use as a boarding-house, a rain-storm washed it nearly all down, confidence in that form of construction seems to have suffered a fatal shock; for it was not again attempted. Of these original buildings, the last one was demolished in 1879.

For some time after entering the new factory about fifty hands were employed, but few, if any, watches were produced. This necessitated a continual draft upon the very limited capital of the company, relieved by little, if any income, so that it was but a question of time when financial trouble would be inevitable. And in less than two years matters had become not only serious but desperate. All the money which could be obtained had been absorbed, the product was small, and, with a natural prejudice against a new watch, the sales were slow; and by the spring of 1857 the end of the second stage was reached, and the company made an assignment.

The property was offered for sale by the assignee, and, on one rainy day in May, there was a gathering in the open court between the buildings, and in a short time the factory, with all its equipments, together with what unfinished product it contained, passed from the ownership of the men who had toiled so hopefully for it.

Mr. Royal E. Robbins, of New York City, who had for some years been in the watch importing business, bid in the property, for himself and the firm of Tracy & Baker, who were to quite an amount creditors of the unfortunate watch company; the price being \$56,000.

The new firm-name was Tracy, Baker & Co.; but as this factory was so far distant from the watch-case business of Messrs. Tracy & Baker, which was located in Philadelphia, those men soon disposed of their interest to Mr. Robbins, who associated with him Mr. James Appleton and Mr. E. Tracy, and con-

ducted the business from September 1, 1857, under the firm-name of Appleton, Tracy & Co.

Almost immediately the great commercial and financial crisis of that year occurred, and for about a year it was necessary to carry on the works without returns from sales. With the aid of the New York firm of Robbins & Appleton, and of some friendly bankers in Boston, means were found to keep the factory running until, in the autumn of 1858, better times appeared, and a market for the product was gradually made. But it was a severe struggle, and a great trial to the faith and patience of Mr. Robbins. His capital being all involved, and his ability to carry through to success such a novel and risky enterprise being a good deal questioned, he was reduced to straits for money, which, in view of the subsequent history of the concern, presents a great contrast of conditions.

Many a time Mr. Robbins deposited with his own hands in Boston banks large boxes of watches, as collateral security for his notes, discounted at eighteen per cent. by capitalists to whom he had been introduced.

The co-operation of the workmen was secured, and many concessions on their part, of both time and wages, were considerably contributed to the maintenance of operations throughout this disastrous period. It was difficult enough, as many business men will remember, for the best and longest established concerns to borrow in that year, and it may well be believed that the effort to revive a bankrupted watch-making business found very little favor amongst the few who had money to lend.

However, in 1858 the clouds began to break. The factory had by hard experience learned how to make watches by machinery, and to make them well, at a comparatively low cost. The future began to look very promising, but more capital was needed. In these circumstances Mr. Robbins proposed to the Waltham Improvement Company, that, inasmuch as the prosperity of that company was in a great measure dependent upon the success of the watch firm, their mutual interests would be best promoted by a union of properties in one company, whose capital should be made large enough for their objects. This proposal was so evidently wise that it met with acceptance, and "The Waltham Improvement Company, at a shareholders' meeting, held August 26, 1858, voted to buy the watch factory property, real and personal, excepting the stock of finished goods then owned by Royal E. Robbins, for the sum of \$100,000 and a bonus of \$20,000; and therefore voted to increase the capital stock of the company to \$200,000." Mr. Robbins immediately subscribed the additional capital.

Dr. Horatio Adams was president of this company, Mr. W. H. Keith was clerk, and Mr. Robbins was elected treasurer and general business manager, which position he has continuously held during the thirty-two succeeding years.

With this consolidation the firm-name of Appleton, Tracy & Co. disappeared, and the business was owned and conducted by the Waltham Improvement Company; but on Feb. 8, 1859, the name was, by act of the Legislature, changed to the American Watch Company, and under that name its products achieved a world-wide reputation. On March 31, 1859, the officers of the Improvement Company were formally chosen to similar positions in the American Watch Company.

Dr. Adams continued to hold the office of president till February 16, 1861, when he resigned on account of ill health, and was succeeded on March 28th by Mr. W. H. Keith.

Mr. Dennison continued to hold the position of superintendent till 1861, at which time he severed his connection with the company.

Mr. Stratton also acted for a time as assistant superintendent.

Until 1860 nothing was realized from the business in the shape of dividends, but in that year a five per cent. dividend was declared—the first profitable return obtained from watch-making in America.

The productive capacity of the factory was gradually increased by the duplication of existing machines and also by the designing and constructing of new ones. Mention has already been made of Mr. Moseley, as having been somewhat prominent in this line. Another mechanic of special inventive ability was obtained in the person of Mr. Charles Vanderwoerd, of whom more will be said hereafter.

In further search for competent mechanics, Mr. Dennison seems to have had the United States Army still in his mind, and Mr. Ambrose Webster was brought on from Springfield, and installed in the machine-shop.

Mr. Webster was able to contribute to the factory quite an essential element. He possessed, either by nature or by virtue of the training and discipline of an apprenticeship in the United States Army [then under military superintendence], an appreciation of the value of thorough system, and his help in this direction was of very great service, especially at that time, when it seemed evident that the business was destined to live, and when it was important to so plan the methods of manufacturing that the product should be reliable, both as to quantity and quality. Mr. Webster continued at the head of the machinery department till 1872, when he took the position of assistant superintendent; but during the six or more years immediately preceding that time his sphere of duties had so enlarged as to require an assistant, who had direct charge of the machine-shop.

The first person who acted in that capacity was Mr. George Hunter, who later went to Elgin, Illinois, and aided in starting the watch-factory there. In that factory he took at first the position of machine-shop foreman, but is now, and for the past fifteen years has been the general superintendent.

On May 19, 1860, the capital of the American

Watch Company was increased to \$300,000. Hardly had the newly re-organized company caught a glimpse of daylight ahead, after the gloom of failure and struggle, when the Civil War broke out, and all business came to a stand-still.

With little or no hope of being able to find a market for their product, unless that product should be so small as to be made at an actual loss, it was decided to reduce the expenses to the lowest point, but at the same time to keep the factory in operation so as to hold the leading operatives.

To this end the machine-shop was provided with work at building a few small lathes, for which a market was found; the hours of work were reduced, and most of the workmen who did not enlist in the army were discharged. A few hands were kept at work making machinery and in the production of watch movements and cases.

But the very events from which so much was feared were directly the means of great prosperity to this young industry, for almost immediately a demand for watches for soldiers sprang up, which lasted throughout the war.

This sudden and unlooked-for demand for watches was, fortunately, not an exacting one, save for number. Had the demand been for watches of such a degree of excellence as is now required, for accuracy and finish, it could not have been met; for the simple reason that few trained and experienced workmen were then available. But, using such facilities as were obtainable, in the way of workmen, machines and tools, vigorous efforts were put forth to supply the welcome demand.

In common with everything else at that period, the prices of all watches were high—perhaps relatively higher than at any other time in the history of this company. So that it is not a matter of surprise that the profits of the business at that time were very large indeed. As a result of that season of prosperity a large surplus was accumulated, and in 1865 the capital was increased to \$750,000, the stock being distributed among the stockholders in the form of a special dividend.

In 1862 the company bought out the plant and property of the Nashua Watch Company; and, as they were at once incorporated with the Waltham works, it may be interesting to give a brief sketch of the history of the rise and fall of that establishment.

About 1857 or 1858 Mr. B. D. Bingham, of Nashua, N. H., who had been a maker of clocks and regulators, entered the employ of the Waltham Company, that he might learn the various processes by which watches were being made by machinery.

At that time Mr. Stratton was assistant superintendent of the factory. He had invented an improved main-spring barrel and obtained a patent upon it, and also a hair-spring stud, both of which had been adopted by the company.

Both Mr. Stratton and Mr. Bingham were quite

ambitious, and, in the belief that the problems of successful watch-making had been practically solved, they began to lay plans for the establishment of a similar enterprise.

In the confidence that capitalists could be induced to invest in the undertaking, these two men visited Nashua, N. H., in 1859, and did succeed in the formation of a company, with a capital of \$100,000. Returning to Waltham, they enlisted the services of several of the best men employed by the old company, among whom were Mr. Moseley, Mr. Vanderwoerd and some others.

A building was secured in Nashua, and fitted up so as to adapt it to the requirements of the work to be done. Mr. Stratton's desire was to make a watch of a higher grade than the Waltham Company had at that time undertaken, and with that purpose, work was at once commenced on the required machinery and tools. Mr. Moseley served as the master mechanic, and, in connection with Mr. Vanderwoerd, constructed a number of excellent machines.

But here the old story was quickly repeated, for in 1862 the money had all vanished; and, although about a thousand watches had been well-advanced toward completion, the stockholders declined to put in any additional money, and matters of necessity came to a standstill.

There being no hope of further money, the only thing remaining was to save as much as possible from the wreck—for such the enterprise begun with so much confidence had then become. It is not a matter of surprise that, with the knowledge of two failures in this industry, it was a difficult matter to find parties ready to invest in the purchase of this property. But Mr. Stratton finally succeeded in effecting a sale to the American Watch Company, the price paid being about one-half the original cost of the plant. The Waltham Company paid \$53,000 for the entire property, which, in addition to the machinery, included the watches then approaching completion, which were made in both what are known as sixteen and twenty size.

The Nashua factory was kept in operation while the addition of buildings needful for accommodating its machinery was being made to the Waltham factory, Mr. Charles W. Fogg being sent from Waltham to superintend the work, until the fall of 1862, when the property was removed to Waltham.

For several years these tools were kept by themselves, a new department being created, and put under the general charge of Mr. Fogg, with Mr. Vanderwoerd in charge of the mechanical part of the work.

Mr. Fogg retained his position till about 1877, when he retired from active life. The "Nashua Department" was maintained till July, 1878, when a portion of the work was consolidated with similar work of the original factory; and in 1884 the other parts of the work were distributed among the several departments where they appropriately belonged.

The Nashua watches were of the form of construction designated as "three-quarter plate," and, by virtue of their form, and also the excellence of their workmanship, as made at Waltham, took the highest rank among American watches, but were not for many years a source of direct profit to the company.

Having very briefly reviewed the history of the Nashua Watch Factory, and seen how in that instance, as in the case of the original venture of Mr. Dennison, the fondest and most confident anticipations of success were doomed to disappointment, it may be appropriate to make mention of the peculiar fascination which has seemed to be connected with the enterprise of watch-making in America.

When, on the sale of the property of the bankrupt Boston Watch Company to Mr. Robbins, in 1857, Mr. Howard retired, he took with him a confident assurance that watch-making could be made profitable, and, attempting to demonstrate the fact, he again embarked in the business at the original place in Roxbury, where the business has since that time been conducted, but with what measure of financial success it is not our province to indicate.

Not disheartened nor intimidated by the failure of the Nashua enterprise, several of the prominent men of the Waltham factory (including some who were engaged in the Nashua scheme), believing that the rapidly-growing part of the country in the West would prove favorable for the establishment of a factory patterned after the one at Waltham, visited Chicago, and so succeeded in interesting capitalists that the building of the Elgin, Ill., factory resulted.

The fact that the principal owners of the Elgin factory were men of wealth, and thus able to replenish their frequently exhausted treasury, alone prevented the repetition there of the unfortunate experiences of the earlier Waltham and Nashua factories. But notwithstanding the fact that ten years passed before the Elgin Company began to realize anything in the way of dividends, and with the struggles and disasters of the New England companies well known, there has ever seemed to be a fascination in the idea of organizing watch factories which has caused to be brought into existence a multitude of such establishments, to the financial ruin of many a too confident investor, and the heavy losses of very many more.

From this digression we now return to the consideration of the fortunes of the American Watch Company.

As has already been said, the original factory buildings were constructed of "concrete;" but when future enlargements took place, another form of construction was adopted. Following the building of the additions made needful by the absorption of the Nashua concern, several new wings were added, the years of 1864 and 1865 being particularly busy ones in this direction.

A short two-story wing had already been built in front, the lower story being devoted to the uses of the

gilding department, and the upper one to the work of fitting the "trains." Further additions were made by constructing other wings parallel with the street, the original two-story flat roof corridor building giving place to one of brick, with an additional story, which was used as a finishing-room. A second corridor building was built, also of brick. This was located about a hundred feet south of the first, and the two connected by a two-story workshop; another similar wing extended about eighty feet to the south of this second corridor, and in it was established a portion of the Nashua machinery. In addition to these, the machine-shop wing was extended toward the river, and two wings parallel with the front, but between it and the river, were built. Besides these, a second engine-house and boiler-house were built and equipped. With the exception of the two corridor buildings, and the engine and boiler-houses, all of these buildings were constructed with wooden frames filled in solid with brick.

This period of extensive building seems to mark an epoch in the history of the enterprise, which may perhaps be designated as the fourth stage. While the business was located at Roxbury it may be said to have been in the ideal stage. And after removal to Waltham, up to the year 1857, came the period of experiment and failure. Following that, and lasting till 1861, came a period of suspense, succeeded by the four years which we have just considered, and which may properly be regarded as a period of achievement and firm establishment.

The fifth stage, commencing about 1866 and reaching to the present time, has been one of continued enlargement, of which more will be said hereafter. Still further additions are definitely planned, and will doubtless be completed in due time.

In conjunction with the renewal and enlargement of the factory buildings, the company was engaged in providing homes for its people.

A large number of dwellings were erected within a convenient distance of the factory. These were planned in a variety of styles, and of varying sizes, so as to accommodate the operatives with larger or smaller families.

In many cases money was advanced to employees who desired to build houses for themselves. The streets were also adorned with young shade-trees, which at this time are assuming fine proportions.

The character, and consequent reputation, of the watches made by this company had been steadily gaining, and as a consequence were in demand, and found ready sale. But the attempts of foreign makers to retain their market in America, and the competition resulting from the multiplication of watch factories, has had the effect to continually reduce the prices, and so compelling a corresponding reduction in the cost of manufacture, either at the sacrifice of quality, reduction in wages, or in greatly increased production.

Manifestly the first of these plans could only result in eventual failure; but even if it could be otherwise, a concern which had by the labor of years gained a high place in the estimation of the watch trade would realize the value of what had cost them so much, and endeavor by all means to retain their good reputation by adhering to their high standard of quality.

The increased sales of watches also made necessary the corresponding increase of means for their production; and, while the tools which had been in use up to the period of which we are writing (1865) had probably never been equaled, it was by no means certain that very great improvements might not be made, both in capability and accuracy. It was natural that in the beginning of the enterprise the idea should obtain that accuracy of operation would be secured by delicacy of construction, and therefore the machinery of those earlier years was made very light, and with resulting sensitiveness, which involved a corresponding delicacy of manipulation on the part of the operative, which could only be acquired by a period of education, and with results depending largely upon individual ability.

But the experience of years had demonstrated that delicacy of machinery did not insure uniformity of result; and from about this time the theory of machine-building has been materially modified in the direction of increased strength and solidity. But while obtaining a very marked improvement in strength, and consequent uniformity of operation, no radical departure was made in the principles of the machines, the increase of factory capacity being secured by the multiplication of existing machines. There were occasional exceptions however, in the direction of semi-automatic machines, serving to foreshadow what might be done when the proper time should come.

But without doubt the policy pursued in this matter was the wisest for that time. Moreover, it may be doubted if the peculiar mechanical or inventive talent required for the production of automatic machines had then been developed to any considerable extent; although there was not lacking evidence of no mean order of ability in machine construction.

The era of automatic machine construction commenced a few years later, and Mr. Vanderwoerd was probably more prominent in his achievements in that direction than any other individual. The most interesting and valuable of his inventions was a machine for making the delicate screws which are so indispensable in the structure of watches. This machine is able to accomplish the work of three men, and is, moreover, so arranged that but little attention is required, so that one man can easily attend to as many as six machines.

When the United States Government called for volunteer soldiers to aid in putting down the Rebellion, and all through the loyal North men were leaving home and business, and enrolling themselves in the

ranks of the soldiery, the managers of the watch factory were active and earnest in endeavors to raise the needed recruits. Men who were valuable to the company by reason of their skill and experience were not on that account dissuaded from offering their services to their country in its hour of peril and need; but were urged to enlist in the army, with the promise of employment on their return.

Of the numbers who went to the front, some returned in safety, some were honorably discharged in consequence of wounds, others came home maimed, leaving perhaps some of their limbs to mingle with the soil of the sunny South; and some gave up their lives on the field of battle.

A stranger would be impressed in observing the employees as they leave the factory, by the number of persons walking by the aid of canes, others needing crutches, still others having but one arm; and it might seem that they were engaged in a business which was especially dangerous. Quite the contrary is the fact, however, for, among the tens of thousands of persons who have been employed during the existence of the company, there has not a single fatality occurred, the most serious accidents resulting in the loss of one or two fingers, in almost or quite every instance the result of individual carelessness.

The unusual number of lame and halt who are here gathered is explained by the fact that many veterans of the war are still employed, and that the nature of the work is such that bodily infirmities, which in many other industries would prove serious obstacles, do not prevent the performance of certain kinds of work which is essential. So, too, there are many individuals who are not in the enjoyment of vigorous health, and who are yet compelled to labor, who here find work which is within their ability.

But notwithstanding the fact that so many persons in delicate health, and a larger number by no means robust, are here employed, it has been a matter of surprise to those who have investigated the subject, to find that the death rate is remarkably low.

In 1888 Mr. John Swinton spent some weeks in studying the social life of Waltham, as connected with the watch factory, and, in an article written by him, he says, "One of the facts which has surprised me most, in studying the state of things in the watch factory, is the extraordinarily low rate of mortality among the operatives. I find, by the carefully kept records of each of the departments, that it is below a half of one per cent. per annum.

"This is, of course, owing partly to the healthfulness of the locality, partly to the absence of child labor in the factory, and partly to the excellent sanitary conditions in which the buildings are kept at every season of the year. It is, nevertheless, proof of the wonderful measure of welfare in the lives of the 2500 workers now under review. It would not be hard to mention factories in which the death rate runs as high as three or four per cent. per annum."

But while the above statements are no doubt correct, it is not to be supposed that sickness is a thing unknown.

It has always been the established policy of the company to make the most careful and generous provision for the comfort and health of its operatives, yet no provision can insure against the visits of epidemics which occasionally visit the various sections of the country (like "La Grippe," which occasioned a more general and serious disturbance than anything of like character within the history of the company).

To secure the advantages of mutual assistance in cases of need, the operatives in the year 1866 established the "Watch Factory Relief Association." Article 2 of its Constitution stated that "The object of this Association shall be to aid all members whose circumstances are such as to need relief in cases of sickness or injury while in the employ of the American Watch Company, or whose sickness or injury shall have been contracted while in the employ of said company. None but members shall receive aid except by concurrent action of the Relief Committee and the vote of the Association. Persons working as learners shall be exempt from dues the first four months of their services with the American Watch Company."

Other articles provided for choice of officers, among whom was "a Relief Committee, consisting of four gentlemen and three ladies, to whom all applications for relief must be made, and whose duty it shall be to see that timely assistance is rendered to all in need."

The dues prescribed were, from the foremen, sixty cents per quarter; from all other men, fifty cents; and from women, thirty cents.

A further provision was, that "no Superintendent or Foreman shall be eligible to any office in the Association."

A feeling of independence, and a disinclination to accept charity in any form, without doubt deterred very many members from applying for aid when in sickness; and quite possibly occasional payments to some who were not in actual need served in time to create a demand for a change in the method of relief; and, in 1881, the Association was re-organized on a strictly mutual basis; the assessment of dues was changed from quarterly to monthly intervals, and the amount of dues reduced to twenty-five cents, without distinction as to sex or position. The restrictions as to the holding of office were also abolished. The amount of money allowed to applicants for relief is fixed by the constitution at \$4.00 per week, after the first week (for which no appropriation is allowed), and in no case is the benefit to cover a period exceeding ten weeks in any one year. It is further provided that, in case of death of a member, the sum of \$50.00 shall be appropriated for funeral expenses.

The books of the treasurer of the Association show

that since its organization, in 1866, it has paid 103 such claims; and that, up to the close of the year 1889, there had been paid out a total of nearly \$45,000 in yearly amounts, varying from \$945 in 1866, to \$5814 in 1889.

Since the re-organization of the Association, in 1881, the condition of the treasury has allowed the omission of ten regular assessments, and never in its history has a special assessment been required until 1889, that being occasioned by the prevalence of the epidemic, "La Grippe." The sympathy of the management of the Watch Company with the aims and objects of this Relief Association has been manifested by its annual contribution of \$200 to its funds.

The years immediately following the close of the Civil War, while constituting a period of general business activity and apparent prosperity, were not without intervals of anxiety and depression in the watch-making industry. It has, however, seemed a very remarkable thing that at times, when business in general has been languishing, and many industries have been obliged to completely suspend operations, this factory has been almost uniformly kept busy. This is the more strange because it would be expected that in times of dullness and scarcity of money, watches would naturally be a drug in the market. But with the exception of a few months in the fall and winter of 1873-74, when financial disturbance was so nearly universal, this factory has been kept steadily at work. And it is probable that it may be truthfully said that few, if any, towns in our country suffered less during that period of business troubles, than did Waltham.

Such a measure of prosperity as was shared by this whole community was, without doubt, due almost entirely to the exertions and the sagacity of the watch factory management and its selling agents, and cannot but be a matter of the greatest gratification.

The steady increase in the volume of business made necessary a corresponding increase of capital. And on August 3, 1870, half a million dollars were added,—making a total of \$1,250,000. But within three years even this amount was found insufficient; and on January 14, 1873, the capital was increased to \$1,500,000.

With the desire to secure, if possible, a more complete identification of interest in the business on the part of the employes, and, at the same time, giving them the opportunity for a profitable investment of their accumulated savings, Mr. Robbins made a provision that the employes should be allowed to subscribe for a portion of the new issue of stock on terms much more favorable than could be obtained by other parties. This opportunity was embraced by many of the operatives, and while some of them subsequently disposed of their shares, many others are still securing their semi-annual returns. And if they are desirous of disposing of their stock, they can do so at a large advance.

When the National Centennial Exhibition was determined upon this company entered heartily into the work of providing an exhibit which should be a fitting indication of the progress which America had made in this branch of industry. Besides exhibiting a very large number of finished watches, in various grades, and in cases of silver and gold, a workshop was fitted up with a number of the most interesting automatic machines which had then been added to the equipment of the factory. These machines were kept in practical operation by a corps of operatives, who were in constant attendance during the entire season of the Philadelphia exhibition.

This exhibit proved to be one of the most attractive in the whole fair, and was from morning till night surrounded by a dense crowd of eager and interested visitors. In addition to these objects of such interest to the curious, the company entered a number of watches of various grades, to be submitted to the most searching and exacting tests, to demonstrate their accuracy as to time-keeping qualities.

It is a matter for congratulation and pardonable pride, that, although in competition with the watches of the old and celebrated makers of the Old World, the watches entered by the American Watch Company secured the highest award for accuracy. As an indication of the wonderful precision which has been attained in time-keeping mechanism, it may be said that the three watches which gained the highest award showed a mean daily variation of only .23 of one second; and an average difference of but .44 of one second between the first and eleventh weeks of the official tests.

The result of this competitive trial, together with the wonderfully attractive exhibition of watches, and the machines employed in their manufacture, was, as might naturally be expected, to bring into more extended and favorable notice the Waltham Company, and to create an increased demand for their goods. It moreover forced from the European watch-makers the unwilling acknowledgment that America had taken the lead, and that evidently the days of watch-making on the old plan were about numbered.

When Mr. Dennison severed his connection with this company, in 1861, the position of superintendent was assumed by Mr. Albert T. Bacon, who has been mentioned as having early entered the service of the original company in Roxbury. At about the same time Mr. Stratton was sent to London, to serve the company as its agent for the purchase of supplies. He remained there until 1878, when he retired from active life.

Mr. Bacon continued in the position of general superintendent until 1875, having as his assistant during the last two years Mr. Ambrose Webster, who was promoted to that position from his former one of master mechanic.

Mr. Woerd's abilities as an inventor of machinery have been recognized by Mr. Robbins, he was, in

1874, assigned to the position and duties of mechanical superintendent of the entire factory; and held that office until the resignation of Mr. Bacon, when he was appointed general superintendent of the factory, with Mr. G. H. Shirley as his assistant.

Mr. Webster retired in 1876, shortly after Mr. Bacon resigned.

While Mr. Woerd unquestionably possessed the inventive faculty in a large measure, he was not so well equipped to act as a manager, and his administration on the broader scale was not successful, and he retired in 1888.

Shortly after Mr. Robbins became identified with the factory the commercial and the manufacturing branches of the business were separated, and since that time the entire product of the factory has been marketed by the selling agents of the company, Messrs. Robbins & Appleton, who have evinced great business ability, in creating and maintaining, as well as supplying, an increasing demand for the Waltham watches.

This has been accomplished by the employment of a corps of trained salesmen, in their established offices in New York, Boston, Chicago and elsewhere; and also by sending out "missionaries," whose duties are to visit the numerous watch-dealers, and ascertain their wants, listen to their suggestions or complaints, and rectify their mistakes.

Among those early employed in this capacity was Mr. Ezra C. Fitch, a young man who came from an apprentice's bench in the store of Bigelow & Kennard, of Boston. After being in the Boston office of Robbins & Appleton for a time, he was sent out "on the road," visiting various districts, principally in New England. He was subsequently transferred to the New York office; and while connected with that office he traveled over nearly every section of the United States, becoming acquainted with nearly all the leading watch-dealers of the country. Later he devoted his entire time to the business of the New York office, remaining there for several years, acquiring an experience and developing a business sagacity which naturally raised him to the head of the office, and later to a partnership in the firm of Robbins & Appleton.

During the latter part of Mr. Woerd's administration it had become evident that a change was demanded, it was decided to place Mr. Fitch in the general management of the factory; and in March, 1883, he removed from New York City, and entered upon his new line of work and responsibility.

One great advantage obtained in this appointment was the fact that Mr. Fitch was able, by reason of his commercial experience and his extensive acquaintance with the trade, to appreciate their wants as they could not be felt by those whose entire experience had been in the direction of manufacturing.

About three months after the advent of Mr. Fitch, Mr. Woerd severed his connection with the factory,

and the office and duties of general superintendent were assumed by Mr. Fitch. He was also chosen to a place on the Board of Directors; and in May, 1886, was elected president of the company, all of which positions he now occupies.

At the time this factory was started, and for many years thereafter, all watches were made in the form now designated as "key-winding," in which the main-spring was wound by means of a key, which was entirely separate from the watch, and which was liable to be mislaid or lost, and to use which required the opening of the watch-case, with the liability of the introduction of dust, to the injury of the delicate mechanism. After a time improved means for winding were adopted, in which the separate key was discarded, and the winding performed by means of an arbor extending through the case-pendant, upon the outer end of which was fastened a knob or "crown." By means of a lever, concealed within the case, or a "push piece" projecting through its side, the mechanism could be disconnected from the winding, and made to engage with other wheels, for the purpose of moving the hands. This form of construction is known as the "stem-winding" or "keyless" watch, and has to a great extent superseded the old form of winding.

Desiring to still further improve their watches, both in quality of workmanship and in mechanical devices, the company in 1882 secured the services of Mr. D. H. Church, of Chicago, who was known as a thorough watch-maker, and possessed of unusual skill and ingenuity. One of the first results of Mr. Church's endeavors was the production of a device for still further improving stem-winding watches, so as to do away with the "hand-setting lever," which involved the necessity of opening the case during the operation of setting the hands. This new form of construction was soon adopted, and became very popular, being technically known as the "pendant-set."

In giving the history of an enterprise such as we have been considering, it would be of interest to dwell to some extent upon the careers of the individuals who have been prominent in its development; but it has been the endeavor of the writer to subordinate individuals so far as possible, in the simple story of the origin, trials and growth of this world-renowned industry. And it remains in closing to make mention of a few things which are of interest, and may well become matters of permanent record.

In 1885, by an act of the Massachusetts Legislature, this company was authorized to increase its capital to \$4,000,000 and also to change its corporate name by the insertion into it of the word "Waltham;" and under that authority it has, since March of that year, existed under the name of the American Waltham Watch Company.

In the same month it was voted by the stockholders to increase the capital from \$1,500,000 to \$2,000,000.

In March, 1889, it was voted to still further increase it, so as to make the amount \$3,000,000.

On that occasion Mr. Robbins made his thirtieth annual report as treasurer; and its close gave a brief review of the thirty years' work. Among other interesting items he stated that up to February 1, 1879, 1,112,133 watch-movements had been made; and at the close of the year 1888 the number had reached 3,800,496, showing that the production of the last ten years had been more than double that of the preceding twenty years; also that the sales since he became treasurer had reached an aggregate of nearly \$48,000,000.

While it is a matter for congratulation that this vast sum without question indicates a large total return to the stockholders, it is also no less a fact that the employees have shared in the prosperity of the business to an extent which, to say the least, is by no means common.

It has been a matter of no small pride with the management that the scale of wages has been a liberal one. It is also a matter of almost universal comment with visitors to the factory, as they are shown through the various departments, or observe the 2800 operatives as they pass out at the close of work, to note their appearance of superior intelligence and refinement.

It would be difficult to find another manufacturing concern the ranks of whose workmen have produced so many persons who have entered professional life, or adopted other forms of business as employers. Among the graduates from this factory there are several editors, lawyers, physicians, dentists and artists. Others have become merchants and manufacturers. Many are holding honorable positions in municipal affairs. One is mayor of the city, another is postmaster, and another a member of the State Legislature.

The high character and superior intelligence of the people who here find employment, together with the liberal wages paid, will, in a great measure, account for the absence of labor troubles, which have become so common in many industries. But much is also due to the governing desire on the part of the officers of the company to be just and fair in the consideration of all matters involving differences of opinion, and apparent conflict of interests.

The introduction of improved methods of work and the employment of labor-saving machines will without doubt occasion temporary individual hardships, but thoughtful men realize that such things are to be expected, and are in fact inevitable; but will also realize that the permanent prosperity of the individual operatives is dependent upon the financial success of their employers.

The decay of the watch industry in England, consequent upon their loss of the American market, and the fact that large numbers of Waltham watches are sold abroad, has compelled the English to acknowl-

edge that, in certain respects at least, the American system possesses a superiority. Several attempts have been made within the last few years to inaugurate the same general plan in some English establishments, but it is understood with only a partial degree of success.

Within recent months articles have been published in English horological journals, in which the attempt has been made to rob Mr. Dennison of the credit of having originated the system of interchangeability of parts, made possible by the employment of a series of special machines. Nevertheless, the fact remains that such a scheme, if ever conceived in Europe, was never carried out, nor practically demonstrated until Mr. Dennison accomplished it. So that whatever of honor or credit such an accomplishment can claim is certainly due to Mr. Dennison and his co-workers in originating this factory.

A person unacquainted with the almost infinite details involved in the conduct of a complete and extensive watch factory, can have little appreciation of the difficulties and perplexities which are continually arising. Nor can he comprehend the extremely wearing nature of the duties involved in the judicious management of such a business.

For these reasons it has often been felt that the safe and profitable limit of production could not be very greatly in excess of that already attained.

But the invention and use of improved machines continues to make possible an increase of product, without greatly complicating the details; so that it is expected that within a few months at least two thousand movements per day will be produced.

The completion of watch No. 2,000,000 in January, 1883, was made the occasion of a slight celebration, which took the form of a banquet. It was given by the foremen of the various departments of the factory; they having as invited guests, Mr. R. E. Robbins, the treasurer; Mr. C. V. Woerd, the superintendent; Mr. G. H. Shirley, assistant superintendent, and representatives from the offices of the selling agents. The most interesting feature of the occasion was the address of Mr. Robbins, who, after expressing his pleasure at meeting his captains and lieutenants in that social way, gave a most interesting narrative of some of the early difficulties and struggles of the Watch Company, some of which have been recorded in the foregoing pages. That occasion was so thoroughly enjoyed by all present that, as one result, The Watch Factory Foremen's Association was organized, holding regular meetings for the discussion of matters pertaining to the interests of the factory. Similar banquets have been held each succeeding year, the officers of the company, the selling agents, and the foremen successively being the hosts.

On the completion of watch movement No. 3,000,000, the company fitted it with a handsome gold case, and presented it to the Foremen's Association; and it has been carried by different members, no one being

allowed to possess it for a longer period than six months.

The present rate of production will, within a few months, bring the number of finished movements to a full 5,000,000, which event might well be the occasion of a celebration.

As in the natural world there seems to be a particular pest or enemy to the various forms of vegetation, so there has within a few years been developed to a marked degree an influence which has been the cause of very serious disturbance in the time rate of watches. The attempt to discover a remedy for this difficulty has engaged the time and taxed the ingenuity of the management of this company and some of its prominent assistants for many months, and the problem has been successfully solved by the discovery of certain alloys, which possess the properties of elasticity and sufficient expansion under the influence of heat, and also the non-magnetic property. So that watches are now made which can be safely exposed to strong magnetic influences without fear of injury.

The rapid introduction of electricity as an agent for the convenient transmission of power and for the production of artificial light will, without doubt, be the cause of injury to large numbers of watches of ordinary construction, and it is therefore felt that the ability to construct non-magnetic watches, which is alone possessed by this American company, is to be of increasing value.

Allusion has been made to the great amount of detail involved in the manufacture of watches, as conducted at this factory. The statement of a few facts will make this evident to the ordinary reader.

This company, at the present time (1890), is manufacturing watch-movements in five different sizes, and of each size several different grades are made. While the different grades of any one size may, and do, possess the same general appearance, yet in certain details there are radical differences, and in others there are required modifications in the operations which enter into their construction and finish.

An ordinary watch-movement is composed of upwards of one hundred and fifty distinct pieces, and a careful list of the distinct operations required to complete them all shows the number to be over three thousand seven hundred, or an average of twenty-five operations for each piece. Some of them are, of course, quite simple; but others are complicated and involve the employment of special machines, many of which are, from their character, very expensive.

It will doubtless be evident that a business involving so much of detail, and demanding such a degree of accuracy in workmanship, can be successfully conducted only by the most careful attention to all the details of it; and that thorough system is indispensable.

To attain these ends, the work of the factory is divided into twenty-two departments, each under the direct care of a foreman, some of whom have one or more assistants. The departments are as follows:

Full Plate Department	Leonard Greene, Foreman.
Three-quarter Plate Department	Lorenzo Noble "
Pinion Turning	" Martin Thomas "
Pinion-Cutting	" C. R. Hill "
Escapement	" C. C. Ryan "
Flat Steel	" J. T. Shepard "
Jewel-Making	" W. R. Wills "
Jewelling	" Alfred Warren "
Engraving	" William Murray "
Balance	" J. L. Keyser "
Main and Hair-Spring	" John Logan "
Screw-Making	" C. H. Mann "
Dial-Making	" E. W. Wetherbee "
Dial-Painting	" E. L. Hull "
Punch-and Hand	" N. P. Mulloy "
Machine-	" W. H. Wrenn "
Gilding	" A. P. Williams "
Finishing	" Thomas Gill "
Packing	" Muse A. Clark "
Repairing	" J. N. Hammond "
Carpentering	" C. W. H. Boulton "
Janitor and Supplies	" C. J. Olney "

Aside from the foregoing, who have specific duties, there is a corps of what may be called executive officers, whose duties and cares are more general, but not less exacting and wearing. The nature of their duties is suggested by the several titles, viz.:

General Superintendent	E. C. Fitch
Assistant Superintendent	G. H. Shirley
Master Mechanic	E. A. Marsh
Master Watchmaker	D. H. Church
Chief Inspector	D. W. Eldridge

The officers of the corporation have been as follows:

- 1858.—Horatio Adams, M.D., (Waltham Imp't Co.), president; R. E. Robbins, treasurer; W. H. Keith, clerk.
 1859.—Horatio Adams, M.D. (American Watch Company), president.
 R. E. Robbins, treasurer; W. H. Keith, clerk.
 1861.—W. H. Keith (American Watch Company), president; R. E. Robbins, treasurer; Henry Martyn, clerk.
 1867.—I. W. Mulliken (American Watch Company), president; R. E. Robbins, treasurer; Henry Martyn, clerk.
 1871.—I. W. Mulliken (American Watch Company), president; R. E. Robbins, treasurer; W. W. Titcomb, clerk.
 1874.—F. M. Stone (American Watch Company), president; R. E. Robbins, treasurer; W. W. Titcomb, clerk.
 1878.—Horatio Moore (American Watch Company), president; R. E. Robbins, treasurer; W. W. Titcomb, clerk.
 1883.—Horatio Moore (American Watch Company), president; R. E. Robbins, treasurer; P. W. Carter, clerk.
 1885.—Horatio Moore (American Waltham Watch Company), president; R. E. Robbins, treasurer; P. W. Carter, clerk.
 1888.—Ezra C. Fitch (American Waltham Watch Company), president; R. E. Robbins, treasurer; P. W. Carter, clerk.

In closing this imperfect, and somewhat fragmentary, sketch of the origin, trials and triumphs of this pioneer in the watch-making industry in America, it may be said, that while many other enterprises are much more easily conducted, and may yield returns to their stockholders far exceeding this, it may well be doubted if in the whole country, or indeed in the world, there can be found an enterprise more widely and favorably known, or one which has been able to promote such a general diffusion of sound prosperity, as has resulted, directly and indirectly, from the establishment and management of the manufacturing industry now conducted under the name of "The American Waltham Watch Company."

CHAPTER LI.

WALTHAM—(Continued).

PUBLIC LIBRARY.

BY NATHAN WARREN.

THE WALTHAM PUBLIC LIBRARY was organized as a free public library in 1865. At that time the Rumford Institute, an institution of long standing and great influence for good in the town, offered to give its large and well-selected library, on condition that it be made a free public library, and that its charge and support thereafter should be assumed by the town. The town accepted the proposition and the present Public Library was thus formed and organized. The management of the library was intrusted to a board of eight directors, four of whom were to be chosen in each year, and the funds for the maintenance of the library and the purchase of books were appropriated from the town treasury. Rooms for books, and a reading-room, were secured in the second story of the Waltham Bank Building. Miss Lorenza Haynes was appointed librarian, and thus the library, as one of the free public institutions of the town, started on its course of usefulness.

But the history of the library before it was taken under the fostering care of the town, is the most interesting feature of its existence. It shows the desire and successful efforts of a people to obtain information, and draw from the store of public knowledge that knowledge so essential to the welfare of a free and intelligent people. It also furnishes a shining example to the everlasting honor of the first cotton manufacturing establishment in America, of the care of the corporation for the moral and educational well-being of the operatives, and of the people residing in the locality of the manufactory. When the Boston Manufacturing Company established its mills in Waltham, among its early acts, besides the encouragement of the church and the school for those connected with the factories and their children, was the promotion of a library of useful and entertaining knowledge. Funds for that purpose were placed in the hands of Rev. Sewall Harding, the pastor of the church, who made the first purchases of books. This was in the year 1820. These books were loaned to the operatives at stated periods, and the library was called the Manufacturers' Library. When the Rumford Institute was organized in 1826, besides providing for lectures and debates, it started a collection of books. This institution was substantially encouraged by the manufacturing company, and as a foundation for a permanent library, the Manufacturers' Library was transferred to the Institute. This was a nucleus of the large and well-selected library which was finally given to the town as a public library. From small beginnings, the gradual accretions of books, from gift and purchase, swelled the number and insured a per-

manent and valuable collection. The manufacturing company with continued liberality erected a building for the lectures of the Institute, and provided cases and facilities for keeping and delivering the books. The proceeds of rent were devoted to the purchase of new books. The class of books purchased and added were of a general character, adapted to the use of such a population, and of a high order, which shows the care in their selection. The library was open every Saturday evening, and the annual fee for its privileges was merely a nominal sum. To minors especial encouragement was given for availing themselves of the use of the library and attendance at its lectures. Thus the library in the sphere of its usefulness, and the additions to its shelves, grew with the growth of the town, and was an important element in the social, moral and intellectual life. The noble and broad-minded men who were the projectors of the factories showed that they were guided by higher motives than those which attached to mere business enterprises. When the library was transferred to the town, it comprised about three thousand well-chosen volumes.

Soon after its organization as a Public Library, the Social Library, of the First Parish Church, was given to it. This library had been established under the statutes passed for the encouragement of learning and knowledge in that way, and was connected with the church of the town, though the books were mostly of a general and secular character. In 1873 the library of the Farmers' Club, consisting of about two hundred and fifty volumes of agricultural works, was added to the library as a gift from the club.

As the extent of the library and the convenience of the people required better accommodations, in 1880, by the advice of the directors, the town authorized the removal to a new block erected by Charles A. Welch, at the corner of Charles and Moody Streets, where, upon the ground-floor, much better facilities were secured. The area was judiciously divided into reception, reading, reference and alcove rooms, and the location has proved itself as well adapted to the purposes as any place not especially provided for such use in its original design. It is hoped that at some future time public or private munificence may provide a building devoted to its exclusive use as a Public Library. By the city charter the management of the library is in charge of a board of six directors, two of whom are elected annually by the Board of Aldermen. The appropriations by both the town and city have always been liberal and have been granted with an adequate comprehension of the benefit of such an institution. By co-operation with the School Board the library is made greatly to aid the scholars of the public schools in their studies. Special attention has been given to reference books, and the room devoted to their use is one of its most interesting apartments. The librarians have been

Miss Lorena Haynes, Mr. A. J. Lathrop and Miss Sumner Johnson, who at present holds that position. The number of books is about fifteen thousand.

CHAPTER LII.

WALTHAM—(Continued).

MANUFACTORIES.

BY ALEXANDER STARBUCK.

NOT many years after the settlement of Watertown advantage was taken of the water privileges within its borders for the establishment of such manufactures as the limited needs of the colonists required and would support. The earliest one of which we have any account as having been established within what are now the corporate limits of Waltham was a fulling-mill, erected at or near the site known as Kendall's Mill, on Beaver Brook. On the 30th of May, 1662, Timothy Hawkins sold to Thomas Agar, of Roxbury, fuller, three-quarters of an acre of land at this place, "with all the accommodation of water, for the erecting and maintenance of a fulling-mill in said place, and on the river that passeth through the same; also the right of way." Mr. Agar did not continue the business long at this place, for the record says that December 18, 1663, but little more than a year at best from the time he could have had his mill in operation, he sold the land, "with the fulling-mill thereon erected, to Thomas Loveran, late of Dedham, Co. Essex, Old England, cloth-worker." Loveran seems to have continued in business here until 1669-70. January 3d of that year he sold the mill to Timothy Hawkins and Benjamin Garfield. Prior to 1690—how long before does not appear—the mill was used for grinding corn. In 1700 Samuel Stearns, a son-in-law of Timothy Hawkins, was the owner in whole or in part of the property.

It appears by a vote passed by the town of Watertown, at a meeting held January 5, 1679-80, that a grist-mill was in process of erection on Stony Brook, the town voting "that the new corn-mill now set up and to be finished at Stony Brook, be freed from rates for 20 years." In 1684 this mill was owned by John Bright and others. According to Bond: "These mills were probably owned some time by Lieutenant John Brewer, and afterwards, for a long time, known as Bigelow's Mills." Bond also says: "The mills built on the three points just referred to" (that is, near the weir established at Watertown and the two localities mentioned in this article) "were the only ones in the town for the first seventy, probably the first hundred, years after its settlement." There was probably a mill also on the brook running east of Lexington Street, and crossing Beaver Street, a branch of Beaver Brook.

Probably the next mill which was erected in Waltham was the one known as the Boies Paper Mill, and was built and carried on by John Boies. Mr. Boies manufactured brown and white paper and his mill stood on land now occupied by the Boston Manufacturing Company. It was at that time a picturesque locality. The date of the erection of the mill is not definitely fixed, but it was probably between 1780 and 1790. The *Massachusetts Magazine* for April, 1798, published an engraving of the mill, showing the dwelling of Mr. Boies near by, and accompanied it with the following description: "We have the pleasure to present our patrons with a south view of Mr. John Boyce's Paper Manufactory, combining a prospectus of his dwelling-house and out-buildings, together with a view of the meeting-house, the seats of Messieurs Townsend and Pacy, and Charles River. The situation is acknowledged to be one of the most elegant and delightful in the township of Waltham, and has deservedly acquired the name of EDEN VALE. It is about ten miles from Boston, and one half mile from the Great Road on the Plains." Boies' estate in 1798 was valued at \$4550.

A similar mill was built by Governor Gore, near the site of the present Waltham Bleachery, prior to 1800. In 1802 Nathan Upham erected a small wooden building on Stony Brook, near the Weston line and commenced the manufacture of coarse wrapping papers. Nathan, and Amos his brother, had served an apprenticeship with John Boies. They continued the business until 1820, when they disposed of the mill to John M. Gibbs, who also continued the manufacture until 1835, when he sold the mill to John and Stephen Roberts. Stephen died in 1845, and John became sole owner. Eventually John's son William became a partner, and the business was carried on under the style of John Roberts and Son. John Roberts died in 1871, and William still carries on the business, but the firm-name is unchanged. The goods produced are sheathing and asbestos papers principally, and large quantities are yearly produced. The old wooden mill was long ago replaced by a more commodious and substantial stone structure, and the water-power of the brook was assisted by the steam engine.

In 1810 the Governor Gore mill was purchased by the Waltham Cotton and Woolen Company, which was organized that year. It is said that this company at one time employed about two hundred hands and its weekly products reached 10,000 yards. According to "M. U." in the *Massachusetts Historical Society's Collections* for 1815, the mill at that time run, in its cotton department 2000 spindles, and worked 300 pounds of cotton per day; in the woolen department were run 380 spindles, four jennies and two jacks. Fourteen woolen looms were in operation and sixty pounds of wool used per day. A portion of the weaving was done outside the factory in the

neighboring and even in some distant towns. It was unsuccessful, however, as a financial venture and nine years after its incorporation (in February, 1819), its property was sold to the Boston Manufacturing Company for \$200,000.

The Boston Manufacturing Company was incorporated in February, 1813. Francis C. Lowell and Patrick I. Jackson purchased the mill and water privilege established by Mr. Boies and, joining with Nathan Appleton and others, organized the company and were incorporated by the Legislature with a capital of \$400,000. Work was at once commenced on the buildings, and the mill nearest Moody Street was completed during the first year. While the building was in process of construction Mr. Lowell visited England to study the mechanism of weaving as practiced there and to obtain improved machinery, with the intention of providing for the complete production of cotton-cloth by machinery.

The new mill built by the company was of brick, five stories high, ninety feet long and forty-five feet wide, and running 3000 spindles. The roof was of the double-pitch pattern. Within five years this portion of the mill has been remodeled to conform to the more modern portions. It was several months after Mr. Lowell's return from England before the new power loom was perfected. The first record of its work is on the books of the company under date of February 2, 1816, at which time the entry was made of "1242 yards 4-4" or thirty-six inches wide cotton. There is no doubt that this entry records the date of the first manufacture of cotton-cloth in America where all the operations were performed under one roof. The goods mentioned were made in imitation of the cotton imported at that period from India.

The first product was at the rate of 4000 yards per week. Only one store in Boston, that of a Mrs. Bowers, on Cornhill, dealt in goods of this kind, and as home-made cotton-goods were not viewed with particular favor, the sales were not by any means encouraging. The experiment was tried of selling the product by auction. It proved successful; about thirty cents a yard being realized, and the business of the company was firmly established.

In 1818 a new mill was erected, and the production thereby increased to 25,000 yards per week. Three widths were made: 30 inches, $37\frac{1}{2}$ inches and 54 inches; the price being 30, $37\frac{1}{2}$ and 50 cents per yard, respectively.

In 1833 the canal now in use by the company was built. In 1836, by reason of drought, the water-supply failed, and a steam-engine was added to the mill equipment. In 1847 the old wooden dam was replaced by the present granite one. In 1852 a new mill, 200 feet long and 80 feet wide, was built for the manufacture of extra-wide sheetings; and soon after the first wide sheetings made in America were woven in this mill. The number of spindles at that time was 40,000. In 1873 a new mill, 150x91 feet, was

built; in 1879 an addition of 117 feet was built to this, and in 1882 another addition was made. In 1888 the remodeling of the old mill made the structures uniform; and at the present writing, another new mill, 100 feet long, 70 feet wide and four stories high, is being built between River Street and the Fitchburg Railroad and between Elm and Moody Streets. The number of spindles at present in use is 60,000, but the new mill will largely increase this number.

Soon after the Boston Manufacturing Company purchased the plant of the Waltham Cotton and Woolen Manufacturing Company the old mill was demolished, and a new building commenced for the bleaching of the company's product and the manufacture of a better grade of cotton-cloth. The original intention was to utilize the bleachery simply for the bleaching, finishing and dyeing of the company's goods, but the field was gradually extended until its customers are found in every portion of the United States. The old methods, including the large wooden drying-sheds, were replaced in 1873-74 with more modern appliances and buildings, the present structures being built of brick. The present capacity of the works is a little over 100,000 yards of cloth per day.

In 1868 the Boston Manufacturing Company commenced the manufacture of hosiery, but the manufacture was, after several years' trial, abandoned, or rather superseded by that of underwear. The present production of undershirts and drawers is about 150,000 dozens per year. The industry was started at the bleachery, but the machinery was subsequently removed to one of the company's new mill-buildings, near Moody Street.

The people of Waltham are much indebted to the pioneers of the Boston Manufacturing Company for many things. The corporation established, and for many years maintained at its own expense, schools. The Rumford Institute, which for many years was one of the educational institutions of Waltham, originated among its employees, and was carefully fostered by it until within comparatively few years. The library organized by the institute was the nucleus for the present Public Library. In various other ways has the company shown a lively interest in the welfare of Waltham.

In the year 1819 Patrick T. Jackson and others commenced the manufacture of sulphuric acid in a building near the junction of Charles River with Beaver Brook. About six years after the business was removed to a large lot of land bounded at present by High, Newton, Pine and Hall Streets. Here for many years a very extensive manufacture of this acid was carried on by a corporation called the Newton Chemical Company, the land at the time of their incorporation being a portion of Newton. For many years this establishment was without a rival in its special business. The manufacture was abandoned in 1872, and the land is now nearly covered with dwelling-houses.

In 1835 Dr. Francis F. Field, a dentist, invented a process for the manufacture of crayons for the use of schools, tailors, carpenters, etc.

This was the beginning of a business which was for several years carried on by Mr. Zenas Parmenter and by Messrs. Parmenter, Powers & Powell in a little shop, near the corner of Lexington and Pond Streets. A fire destroyed their shop and their increasing business demanding more room, they removed to the upper part of a building on Felton Street owned by Davis and Farnum. The accommodations here did not long suffice, however, and about 1863 the old bedstead factory, the site of the present factory, was hired. At first only the upper portion of that building was used, but the then firm of Parmenter & Walker soon occupied the whole building and has since so enlarged it on the east, the west, the north, the south, and perpendicularly that not a semblance of the original structure is left. In 1881 Mr. Parmenter purchased Mr. Walker's interest, and in January, 1882, a company was formed and incorporated under the title of the Parmenter Crayon Company, with a paid-in capital of \$45,000. From the insignificant beginning of fifty years ago, the business has reached colossal proportions. From two cases a week, which was formerly considered a good showing, the production has increased until now it has an average of from twenty to twenty-five cases per day, with facilities for twice that amount. The goods are shipped to all parts of Europe, and to the more distant portions of the globe, including New Zealand and Japan.

In 1862 Messrs. Kidder and Adams, machinists in the employ of the American Watch Company, believing that there was an opening for the manufacture of watch repairer's tools, left the employ of that company and commenced the manufacture of lathes for the trade. Their enterprise did not prove sufficiently remunerative, and their business eventually passed into the hands of Mr. John Stark, who has since continued it.

Mr. Stark died in 1887, and the business is now carried on by his son.

In 1872 Messrs. John E. Whitcomb and George F. Ballou, then in the employ of the American Watch Co., left the service of that company, and commenced the manufacture of watch-makers' lathes. They made what has ever since been known as the "Whitcomb" lathe, embodying in it the distinctive features which the experience of the watch company had found to produce the best results. In 1874 Mr. Ballou retired from the co-partnership, and in 1876, Mr. Ambrose Webster, who had resigned his position as assistant superintendent of the American Watch Company, joined with Mr. Whitcomb in the association known as the American Watch Tool Company.

October 15, 1886, Mr. C. Hopkins Van Norman commenced the manufacture of watch-makers' tools. The business increased to such an extent, that in 1889 a large wooden building was erected near Pros-

pect Street to accommodate it. The capital stock was increased in 1890, and the plant removed to Springfield, Mass.

The demand for lathes and tools made by these companies extends throughout the civilized world. The American Watch Tool Company has furnished a very considerable portion of the equipment of several watch-factories in this country and in Europe.

In 1883, Mr. Charles Vanderwoerd, after a connection of twenty years with the American Watch Company, resigned his position of general superintendent, and purchased the plant of some machinists who had recently commenced the manufacture of watch-makers' tools. A company was organized under the name of the Waltham Watch Tool Company, for the purpose of making watch tools and machinery. After making considerable machinery for watch-factories, the attention of the company was turned to the manufacture of watches on its own account. A tract of land on Charles Street was purchased from the town, and a brick building, 100x25 feet, and three stories high was erected. The original plans contemplate a structure with a central tower about forty feet frontage with a wing each side, the part now built being only a wing. The entire frontage of the completed building will be 240 feet.

In the rear of the factory is a two-story wooden building which is used as a carpenter's shop and gilding-room. In June, 1885, the present name of the corporation, "The United States Watch Company," was adopted in place of the former one, as expressing more clearly the business of the company.

The company is meeting with encouraging success in the sale of its watches and is considering the completion of its building according to the original designs.

In 1844 Mr. R. P. Davis established an iron foundry in a building near the Moody Street crossing of the Fitchburg Railroad. The business subsequently passed into the hands of Frederick J. Davis, who, in 1860, erected a much larger building for it between Felton Street and the railroad. Soon after the establishment of the business in its new location Mr. John R. Farnum acquired an interest in it, and the business was carried on under the name of Davis & Farnum. The firm-name was changed in 1876 to the Davis & Farnum Manufacturing Company, by which name it is now known. The excellence of the work turned out by Davis & Farnum soon so crowded them with orders that their establishment on Felton Street was entirely inadequate to meet their increasing business and the tract of land near the Bleachery, now occupied by them, was purchased and the buildings erected in 1870. The foundry building is 250 feet long and 125 feet wide, with three cupolas, having a combined melting capacity of thirty-five tons per day, running what is termed a three-hour heat. There are also a pattern shop about 100 feet square and a sheet-iron shop 100 feet by 50 feet, besides an office build-

ing and tenement-houses. About 150 persons are employed by the company during its busy season. The specialty of the company and the branch of business in which it has won its chief distinction is the equipment of gas plants with every detail in machinery and apparatus. Its operations in this line have extended not only through New England, but through the West and South and into the British Provinces.

In 1880 Mr. Henry Richardson, whose service as a machinist in the employ of the American Watch Tool Co. had led him to study the subject, began to experiment in the manufacture of a fine grade of emery wheels, with the design to produce a wheel better adapted to the fine work of watch and watch-machine makers than any at that time made. He was successful and the following year associated with him Mr. Henry Shuman, also a machinist. A portion of the brick building, now wholly occupied by the firm, was leased and the business vigorously pushed. The business was originally conducted under the name of The Richardson Emery-Wheel Co., subsequently being changed in style to The Waltham Emery-Wheel Co., its present title. In 1883 Mr. Harlan P. Hyde became associated with the firm as treasurer and general manager. Mr. Hyde's previous experience of nearly twenty years in the business made him a valuable accession. Mr. Shuman retired from the firm about six years ago. The business has steadily increased, new buildings have been erected to meet increasing demands, and instead of Messrs. Richardson and Shuman being able to supply the trade the labor of fifty employees is taxed to the utmost to that end. Even the buildings used are found inadequate and the company has purchased an extensive tract of land near the Central Massachusetts Railroad, where a large brick building, 250 feet long by 40 feet wide, especially adapted to the work is being erected. A considerable portion of this building will be two stories high. Commodious offices will be arranged and separate buildings for engine and boiler-rooms will be built.

The Waltham Gas-Light Company was incorporated in 1853. At the meeting for organization in January, 1854, Horatio Adams, R. P. Davis, I. R. Scott, R. S. Warren and Horatio Moore were chosen directors, and Thomas Page clerk and treasurer. Horatio Adams was elected president. The authorized capital was \$150,000, although only \$35,000 worth of stock was at first issued, the works being constructed for less than the paid-in capital. In October 1854, gas was first supplied to customers, the price being \$4 per 1000 cubic feet. In 1855 the production was 3,000,000 cubic feet. The present production is about 25,000,000 cubic feet. The paid-in capital has been greatly increased until it reaches now \$140,000. In 1886 an electric plant was added to the equipment, and on the 24th of December of that year the electric light was first used for street

and store illumination in this city. In 1890 a contract was made to supply power to the Newton Street Railroad, and as the electric plant in use by the company had been outgrown, and there was a considerable demand for power for industrial pursuits, new buildings were erected, a new engine and boiler added and the equipment in every way largely increased.

In 1889, the Judson L. Thompson Manufacturing Company of Syracuse, N. Y., having outgrown its facilities for manufacture in that city, and being desirous of locating nearer the market for its goods, which consisted of metal buckles for rubber footwear and small hardware decided to locate in Waltham, a tract of land at Roberts Crossing being placed at the company's disposal by the owner, William Roberts, Esq. A brick building 400 feet by 75 feet has been erected, and the business of the company has been removed to this city.

Three shoe factories flourished in Waltham between the years 1855 and 1860—one owned by Bills & Jones, located on Bacon Street, another owned by C. S. Gay, near the corner of Bacon and Pond Streets, and a third owned by B. F. Clough, and situated back of Prospect Street. The one owned by Bills & Jones employed just previous to the War of the Rebellion about 100 hands, that of Mr. Clough employed 60 persons in 1857, and the other about twenty-five. The business was long ago abandoned and the buildings remodeled into dwellings.

An industry which originated in Waltham, and which, while it did not in the brief years it was located here materially affect this municipality, has produced most important results in the commercial world, is the refining of kerosene oil. There seems to be no reasonable doubt but the first successful experiments in this country, if not in the world, through which kerosene oil became a cheap and popular illuminant, were conducted in an iron building known for years as the "Tar" factory, erected on the north bank of the Charles River, just east of Peterson's ice-houses. The building was constructed in 1852 or 1853 and was built for the purpose of utilizing gas tar, the waste of gas-houses. The early products were coal-tar benzole, naphtha, dead oils and pitches. Quoting from a letter written by Joshua Merrill, Esq., president of the Downer Kerosene Oil Company, "From the distillates were derived a variety of products such as coup oil, used in combination with fatty oils and castor oil. Another product, benzole, was used in making gas by passing air through it in a machine invented by Drake. It was a success and was largely used until the more volatile petroleum naphthas superceded it. Picric acid was another product made from phenic acid, a product of the coal-tar distillation. The dead oils were sold mostly to a Mr. Hiram Hyde, who erected a plant near the factory for preserving wood by creosoting, the dead oils containing large percentages of creosote. It was not until about 1855

J. B. Bright.

H. B. Leigh

that Luther Atwood and William Atwood made kerosene at these works. They used a product obtained in Canada, probably the outflow of the petroleum wells, which were, up to this date, unknown to exist, but they had, in some former time, flowed out oil through the surface of the ground and it had evaporated, leaving a kind of pitch. This was a true petroleum product and the Atwoods at once discovered its utility for oil-making. The oil made from the Canada petroleum surface pitch was the first burning oil made in this country. James Young, of Glasgow, Scotland, had made a product from coal distilled in retorts as early as 1850. Young's oil was very poor, disgusting in odor and of poor quality, while Atwood's was white in color, sweet in smell and of excellent burning qualities. I consider Luther Atwood the father of the burning oil industry from coal and petroleum, and to Waltham belongs the honor of having had him for a citizen from 1852 to 1856, and the plant from which the great industry subsequently developed."

The building now occupied in its greatly enlarged form by the Parmenter Crayon Company was used by Stratton Brothers for awhile for the manufacture of furniture. The extent of the business carried on by them in its most prosperous time may be judged from the fact that in 1857 they employed thirty men, making on an average 6260 bedsteads, 624 arm-chairs, 3756 what-nots, 2496 tables, and 2600 ottomans a year. In 1859, however, little trace of the business was left.

An organ-factory was established in 1890 by E. W. Lane. The business is, however, as yet in its infancy. Other small industries might be mentioned, but the amount of capital invested and number of hands employed make the industries important only in the aggregate.

BIOGRAPHICAL.

JONATHAN BROWN BRIGHT.¹

Jonathan Brown Bright was born in Waltham, Mass., April 23, 1800, and died there, Dec. 17, 1879.

Mr. Bright's volume, "The Brights of Suffolk, England," printed for private distribution in 1858, but accessible to genealogical inquiries, closes with Henry Bright, Jr., who came to New England in 1630, and settled in Watertown, Mass. Henry Bright, Jr., married Anne Goldstone, who came from Suffolk, England, in 1634. Through her he inherited the homestead of her parents, in Watertown, east of and adjoining the estate of the late John P. Cushing, and opposite that of the late Alvan Adams. Here Henry Bright, Jr., lived and died.

His son, the first Nathaniel Bright, of Watertown, married Mary Coolidge, of the same town; and their son, the second Nathaniel Bright, married Ann Bow-

man, all of Watertown. The homestead of the second Nathaniel Bright was about three-fourths of a mile west of the Goldstone place, and still remains in the hands of his descendants. The old house upon it, taken down in 1877, was said to have been built before 1700.

The third Nathaniel Bright, son of the second, married Sybil Stone, of Sudbury, Mass., a descendant of Gregory Stone. Their son, John Bright, of Waltham, married Elizabeth Brown, of Watertown, daughter of Captain Jonathan Brown. This John Bright settled, in 1776, in Waltham, where he lived until his death, in his eighty-seventh year, in 1840. His ten children, of whom Jonathan Brown Bright was the youngest, were born in the house which stood nearly where that stands in which the latter died, on the main highway into Waltham, on the eastern bank of Beaver Brook, the estate being divided by Grove Street.

Elizabeth Brown, the mother of Jonathan B. Bright, was a daughter of Jonathan Brown, of Watertown (captain in the army at Lake George, 1758), and Esther Mason, of Watertown, a descendant of Hugh Mason. Captain Jonathan Brown was a son of Jonathan Brown, of Watertown, and Elizabeth Simons, of Lexington. This Jonathan was son of Captain Abraham Brown, of Watertown, and Mary Hyde, of Newton. Captain Abraham Brown dropped the final e, which his father, Jonathan Browne, and his grandfather, Abraham Browne, had carried. Abraham Browne had married Lydia —, in England, and settled in Watertown, Mass.; and his son Jonathan married Mary Shattuck, of that town.

The old Brown estate, an original grant to the first Abraham, now reduced in size, is still owned by descendants of the name. The main body of the house was built by Captain Abraham Brown, but a part is still more ancient. It stands on the road from Watertown village to Waltham, a little to the east of the estate once owned by Governor Gore, afterwards by Theodore Lyman.

The items given above may be recapitulated in the following table, giving the pedigree of Jonathan B. Bright on both the father's and the mother's side.

Henry Bright Jr. = Anne Goldstone.
Nathaniel Bright = Mary Coolidge.
Nathaniel Bright = Ann Bowman.
Nathaniel Bright = Sybil Stone.
John Bright = Elizabeth Brown.
Abraham Browne = Lydia —.
Jonathan Browne = Mary Shattuck.
Capt. Abraham Brown = Mary Hyde.
Jonathan Brown = Elizabeth Simonds.
Capt. Jonathan Brown = Esther Mason.
Elizabeth Brown = John Bright.

John Bright, the father of Jonathan Brown Bright, was a farmer and a tanner. Only two of the descendants of Henry Bright, Jr., are known to have received a college education—Henry, Harvard 1770, and Nathaniel Francis, Harvard, 1866. But they have been and are, almost without exception, men of good

¹ By the Rev. Thomas Hill, D.D., LL.D., of Portland, Me.

sense, with a taste for reading, and of practical, sound judgment. Mr. John Bright's large family made industry an essential virtue among his children; and his strictly religious character made him a strict disciplinarian to enforce it. At the age of four Jonathan B. was sent to the district school; and during the next ten years was taught to read, to write and to cipher, working at home during the long vacations. At fourteen he was sent for one quarter to Westford Academy, after which he took lessons for a short time of the Rev. Samuel Ripley, so long pastor of the First Parish, Waltham; but, having no desire for a collegiate education, he resumed labor on the farm and in the tan-yard.

In 1816 he attended, one term only, Framingham Academy. The next year, having no more taste for tanning or farming than for study, he went, with an older brother, to New Orleans by sea, thence up the river to St. Louis, and became his brother's clerk in a store. Here he remained until of age, with the exception of one season in a branch store at Franklin, on the Missouri. As soon as he was of age he began a retail business for himself in St. Stephens, Alabama; but the next year moved to Selma. During the following year, 1823, of the seven men of Northern birth in that town, four died of fever; and the other three, including Mr. Bright, suffered severely with the same disease. This decided him to quit the South. In 1824, finding no vessel at Mobile for Boston, he went to New York and sought employment. Making an engagement with Blackstock, Merle & Co., cotton brokers, he paid first a brief visit, after seven years' absence, to his home; then returning, spent twenty-five years in New York, first as clerk, afterwards as partner; the firm changed to Merle & Bright, and then to Merle, Bright & Co.

In 1849 he returned to the homestead on Beaver Brook, then occupied by his maiden sister Mary, with whom also an unmarried brother John resided. Mr. Bright built here a larger house a few feet east of the old one; and he and his only child, with the brother and sister, constituted the family. Thirty-two years' absence had not diminished his attachment to the old place and to the companions of his childhood. They passed away before him, but the thirty years of quiet enjoyment which followed his retirement to the place of his birth were made much happier by the prolongation of the sister's life nearly to the close of his own.

In 1827 Mr. Bright married Miss Mary Huguenin Garbrance; but his happiness with her was interrupted by her early death in 1830. Her only child, a daughter, came with her father to Waltham in 1849, and in 1861 married her cousin, William Ellery Bright.

The thirty years, from 1849 to 1879, in which Mr. Bright lived free from active business cares, were by no means years of idleness. With the exception of a journey in 1859 to Nassau, Havana, New Orleans and

St. Louis, and a shorter one in 1860 to Buffalo and Quebec, the occupation of all those years was found in his native town, doing private kindnesses and fostering public improvements. I remember that one of the earliest impressions I received of him was from the chairman of the board of assessors, who told me that he had just had a peculiar experience: Mr. Bright had come in, after the town had been assessed, and said, "You have not made my tax large enough; add so many thousand dollars to my personal property." It revealed the character of the man; it was both his integrity and his public spirit that made him thus voluntarily assume a larger proportion of the public expenses.

In 1856 he was put on a town committee to select ground for a new cemetery; drew up the report, which was accepted, and named all the avenues in the new grounds, Mt. Feake, after ancient Waltham families—a token of the strong interest which he then took in the matter of genealogy.

He furnished a good deal of valuable local history and antiquarian lore to the *Waltham Sentinel* and the *Waltham Free Press*, during the years 1856-63. He was an active promoter and leader of the Union League of the town during the Civil War; and before that in the organization of a Farmers' Club, which is still in active operation. But the wire-pulling necessary to success in carrying on matters dependent on popular votes was so distasteful to a man of his pure, simple and manly integrity, that, after 1858, he resolutely declined to serve on any committee in town affairs.

In 1848, just before retiring from business in New York, Mr. Bright accidentally heard that Dr. Henry Bond, of Philadelphia, had a genealogy of the Bright family. Mr. Bright had a great interest in that matter, although up to that time he had had no leisure to examine it. He immediately wrote to Dr. Bond, and the correspondence was kept up until the latter gentleman's death. Dr. Bond proved to have descended, in one line, from Henry Bright, Jr., and was also remotely connected with Mr. J. B. Bright by the marriage of his grandfather to Mr. Bright's aunt. Dr. Bond visited Mr. Bright at Waltham and spent some weeks there, while both were much engaged in collecting genealogical material. Mr. Bright afterward employed Mr. H. G. Somerby to make researches in England; and in 1858 printed his valuable records of "The Brights of Suffolk, England."

Since that volume was printed Mr. Bright has collected material which would fill three more volumes of the same size, relating to the family on this side the Atlantic, and to other families of the same name.¹

¹ Mr. Bright was admitted a resident member of the New England Historic Genealogical Society Dec. 11, 1850, and made himself a life member March 20, 1863. He interested himself much in the society, and was a frequent donor to its library. In 1870 he gave five hundred dollars to the Building Fund, for purchasing and fitting for the uses of the society the building which it now occupies.

THE RESIDENCE OF MRS. W. E. BRIGHT,

John Roberts

The descendants of Henry Bright, Jr., have been mostly farmers and mechanics, occasionally shopkeepers, none holding other than town or parish offices; but none dishonoring the name. The number bearing the name is small, not exceeding, to the year 1850, one hundred and fifty; but the descendants in the female line have been more numerous.

By a will dated December 15, 1860, Mr. Bright bequeathed to Harvard College fifty thousand dollars, the income of which should be equally divided between the purchase of books for the college library and the support of scholarships to which Brights, lineally and legitimately descended from Henry Bright, Jr., shall have priority of claim. "I have selected Harvard College," he says, "the most ancient and venerated seat of learning in my native State, to be the custodian of this legacy, as an expression of my appreciation of its liberal yet conservative character; trusting that its government will always respect the sincere convictions of the recipients of the income thereof." His daughter was made sole executrix, and by a codicil her husband was added as co-executor. They paid over the full legacy a year in advance of the time allowed by law; so that the college entered at once upon the enjoyment of the income.

Mr. Bright's phrase "liberal yet conservative character," which he applies to the college, might well be employed in describing himself. With an energy of character which in less than thirty years lifted him from the humblest commercial beginning to a competence that could afford such a legacy, he combined a genuine shrinking modesty which obscured his worth from careless eyes. His energy led him to join in aiding liberalizing movements; his modesty held him in reserve and allowed his cool, sound judgment to keep him in a more conservative position. His independence was maintained by this happy self-restraint, which would allow him to run into neither extreme of standing by old errors nor of rushing into new ones.

Early in life Mr. Bright adopted views of the Christian religion in substantial agreement with those of Dr. Channing, and he never saw reason to modify them in any essential degree. His warmest virtues were kept, as it were, cool and in the background by this wise and modest caution. He gave time, labor and money to many good causes, public and private; and he gave with a kindly, cheerful spirit; yet so unostentatiously and so wisely that men's attention was more taken up with the results of the action, than with the action itself. In private, personal kindnesses he exercised a great delicacy; so that, in some cases, the recipient of a needed help received regular periodical donations of a fixed sum, and endeavored for some time in vain to know from whom, or through what channel, they came; in other cases the recipient thought of the gifts as tokens of friendship, rather than any pecuniary aid.

WILLIAM E. BRIGHT.

William Ellery Bright was born in Mobile, Ala., September 26, 1831, and died at Waltham, Mass., March 12, 1882. His father was Henry Bright, who was born in Waltham, August 31, 1793. His mother was Abigail Fiske, who was born November 3, 1794. His earliest American ancestor upon his father's side was Henry Bright, born in the county of Suffolk, England, in 1602, and coming to this country in 1630 with the company that settled at Watertown, Mass. The subject of this sketch was of the seventh generation from this founder, and the order of his ancestry was as follows, viz.:

Henry ¹ ,	John ⁶ ,
Nathaniel ² ,	Henry ⁶ ,
Nathaniel ³ ,	Henry ⁷ .
Nathaniel ⁴ ,	

On the maternal side he was also of the seventh American generation. The succession was as follows:

John ¹ ,	Jacob ⁵ ,
William ² ,	Abigail ⁶ ,
Thomas ³ ,	Henry ⁷ .
Jonathan ⁴ ,	

Mr. Bright received a good early education at private schools in New England, and was for many years a member of the well-known firm of Torrey, Bright & Capen, one of the leading carpet stores of Boston.

In 1861, February 28th, he was united in marriage with Miss Elizabeth G. Bright, daughter of Jonathan Brown Bright, of Waltham. From this union are three children,—a son, bearing his father's name, and two daughters, who, with their mother, survive.

A correspondent of the *Boston Transcript*, who writes after a long and intimate acquaintance with the deceased, says of him: "He was a man of excellent business faculty, with a calm, clear and capacious head, a soul of the highest rectitude and honor, and a heart framed of generosity and kindness. In 1875 the good people of Waltham elected him to the General Court, and urged him to be a candidate again the next year, but the pressure of his business obliged him to decline. For the same cause he declined various other local offices which he was, from time to time, solicited to undertake. A continuous residence of some thirty years in that town had made him well known; his steadfast integrity and his approved intelligence and liberality had gained him unbounded confidence; while the warm heart and open hand which he carried to works of piety and charity, his uniform suavity of manner and his good judgment and frank co-operation in matters of public interest in town and church, endeared him to the hearts of all who knew him."

JOHN ROBERTS.

Mr. John Roberts the subject of this sketch, was born in Boston in 1802. At the age of fourteen he

left school and went to work in a shop for wagon-building, where he remained until he was twenty-one. At that time he established himself in Watertown in the same business and continued there until 1835. Previous to this time there had been a small paper-mill on Stony Brook, in the southwest part of Waltham, near the confluence with Charles River. In 1835 Mr. Roberts, with his brother Stephen, who had had practical experience in paper-making, purchased this mill and entered into the business of paper manufacture. In a few years he bought out his brother and thereafter conducted the business alone until the last part of his life, when his son was associated with him. The firm-name of John Roberts & Son is one of the oldest and best known in the paper manufacturing trade. Mr. Roberts put all his energy, industry and leading qualities into his new business, and established the basis of an honorable and successful career, with the competence that follows good judgment and thrifty management. Being naturally of an inventive mind, he introduced many improvements of his own into machinery and the process of manufacturing. Among his inventions was a machine for tarring sheathing-paper used for building purposes. Previously this paper had been dipped by hand. Mr. Roberts' invention gave him a specialty in this kind of paper and established a high grade of standard article in tarred paper. He also manufactured the first fine grade hardware papers in this country, which are now so extensively used. In all improvements in machinery and methods his foresight and practical knowledge guided him to get the best. He was one of the earliest manufacturers in the United States to introduce the celebrated Fourdrinier machine into the manufacture of paper, a machine which, in its many modifications, is universally in operation in paper manufacture. The picturesque mill of stone, covered by a luxuriant growth of woodbine, surrounded by the beauties of nature and the evidences of thrift and prosperity, stands upon the original site and continues in successful operation under his son, William Roberts.

Mr. Roberts was a man of great firmness and force of character, of the strictest integrity and high business principles. Beneath the practical exterior of his nature he had a warm and generous heart which quickened in the desire to assist others who were worthy and in trouble. In a quiet and unostentatious way he materially helped many a young man in his business who was struggling with adverse circumstances and who, he thought, was honest and capable, and needed only pecuniary aid in order to be established on a good business foundation. His generosity though well known, was bestowed with little display. He was especially interested in the laying out and adornment of Mount Feake Cemetery, where, by the banks of the river on which he had lived and passed the greater portion of his life, his body now reposes. He died in 1871, at the age of sixty-nine years. As

a public-spirited citizen, most patriotic when the country was in danger, he took an active part in whatever related to the welfare of the community.

JONAS W. PARMENTER.

Mr. Jonas Willis Parmenter was a man of good, country-bred New England stock, who rose to prominence in local business matters and to affluence by untiring industry, shrewdness and integrity. Born in 1817, in the town of Sudbury, where the family name has been prominent since the days of early settlement, he came to Waltham in early manhood, and was, until the time of his death, actively engaged in pursuits identified with the interests of his adopted home. He commenced with no capital but a clear head and willing hands, and worked up through the hard discipline and experience of the man dependent entirely upon himself. He was at first employed in the Bleachery in an humble capacity, and afterwards started a small trade on Main Street. About 1850 he engaged in the coal business, and carried on that business successfully until failing health obliged him to retire. From small beginnings, with good business ability, zealous attention to the conduct of his affairs and unimpeachable credit, he built up a trade that steadily increased in amount and prosperity with the growth of the town. With this business as a foundation he amassed a handsome property acquired by trade and fortunate investments. Although his regular business was local, in his investments his operations took a broader range. His judgment in this respect was quite marked for the unerring sagacity displayed.

Mr. Parmenter was endowed by nature with a large share of common sense, with good judgment and large perceptive faculties. When he decided fully on a given question or course of action subsequent events almost invariably proved him to be right. His long service with the Waltham Savings Bank, as one of the trustees, and with the National Bank, as director, brought him in connection with many people seeking loans, and to them he gave the same attention as to his own immediate business. He never allowed his personal bias to influence him in accepting or rejecting an application for a loan, but guided his decisions entirely by the value and character of the security offered. In financial matters he was of excellent judgment and wise, natural foresight. By his connection with the Waltham Improvement Company, which was soon merged into the American Watch Company, he early became interested in the latter, being its firm friend when friends were not as plenty as in these days of its great prosperity.

He was a reserved man and of few words, but of warm feelings in all the domestic relations of life. In the home circle, where he was best known, he was revered for his qualities of mind and heart. He had strong convictions and never concealed them but by

J. W. Burrows -

Francis Buttrick

his natural reserve. He never sought public office, though he served occasionally in some capacity of trust. The last office he held was that of Water Commissioner. He was an officer of many corporations, and at the time of his death was a director in the Waltham National Bank, Newton and Watertown Gas-Light Company, Waltham Gas-Light Company, Bay State Brick Company, and a trustee and member of the Investment Committee of the Waltham Savings Bank. In all positions which he held he performed his duties with unfaltering trust. The later years of his life, until his death, in 1880, were passed amid much pain and severe suffering, which he bore with great courage and patience.

FRANCIS BUTTRICK.

Mr. Francis Buttrick has been prominently identified with the business interests of Waltham for upwards of a half-century. In the real estate operations incident to a growing New England town, and in the ownership of houses and other buildings which are so intimately connected with the welfare of the people and the prosperity of the place, he has been one of the leading men. He is now by far the largest real estate owner in the city. He has grown up with the material development of Waltham, and is still active in whatever pertains to the management of his property. Mr. Buttrick was born in Pepperell, Mass., in 1814, and removed with his family to Concord in 1828. Here, after receiving a limited education at the public schools, he learned the trade of house carpenter with his father. Working in that and the surrounding towns as a journeyman, he came to Waltham in 1838, where he continued the same occupation. In 1844 he commenced business on his own account as builder and employer. In 1857 he bought a lumber-yard, planing and saw-mill and box manufactory, and entered into quite extensive operations in that line of business, giving up his occupation as a carpenter. He had lately retired from active participation in his lumber business, which is now organized as the Buttrick Lumber Company.

Through his business as carpenter and builder, he became interested in real estate, mostly of improved character, with buildings devoted to the wants of a manufacturing and laboring community. From small beginnings in this way he has, by good judgment and sagacity, fair dealing and attention to his affairs, acquired a possession of real estate, varied and valuable, in different parts of the city. As a landlord and party in interest in property held by others, Mr. Buttrick has always been kind-hearted and disposed to assist those who were inclined to assist themselves. He has helped many to preserve their homes, when under a more exacting man they might not have been able to keep them. As a citizen, he has always taken an interest in the affairs of the town and city, and contributed his advice and support to all matters, public

and private, affecting the welfare of the community. In material aid to the many objects constantly presenting themselves for individual assistance, he has bestowed his benefactions willingly and liberally. Mr. Buttrick has been for many years a director in the Waltham National Bank, is president of the Waltham Music Hall Company, and a director in the New England Northwestern Investment Company. He was one of the original promoters and incorporators of the Waltham Co-operative Bank, and for several years has been its president. This institution has been most successful and praiseworthy in its practical operation in encouraging men to invest their earnings to the best advantage in their own locality, and to build for themselves homes. Mr. Buttrick has ever taken a deep interest in this institution, and has given it from the first, the benefit of his active efforts and good judgment.

He was a selectman of the town for several years, and was a member of the last Board of Selectmen, when the town government was changed to a city form of government.

Mr. Buttrick is a man unassuming in life and manner, bears the burdens of business easily and quietly. Genial and hospitable in social life, always on the side of good government and sound policy in public affairs, local and general, conservative and level-headed in business matters, he commands the respect of his townspeople, and the confidence of all who know him.

In 1849 he was married to Miss Augusta M. Farwell. He has no children.

CHAPTER LIII.

SOMERVILLE.

BY WILLIAM T. DAVIS.

IN writing a history of Somerville, as a contribution to a history of Middlesex County, in which the histories of all its towns are included, the writer thinks it will be superfluous to record the incidents in its career before its incorporation, and while it was contained within the bounds of Charlestown, from which it was separated in 1842. The histories of Malden and of the county of Middlesex, to be found in these volumes, cover enough of the ground prior to the incorporation of Somerville, and render any further allusion to it unnecessary.

In 1841 the people living in the westerly part of Charlestown, becoming dissatisfied with the burdens of taxation, unrelieved by corresponding benefits, held a meeting on the 22d of November in that year, at the Prospect Hill School-house, to discuss the question of a division of the town. At that meeting Joseph Miller presided, and Edwin Munroe, Jr., acted as secretary. A committee of seven, consisting of Francis Bowman, Asa Pritchard, Edward Cutter,

Robert G. Tenney, Benjamin Hadley, John S. Edgerly and John Tapley, was chosen to obtain the views of the people on the question and report at an adjourned meeting. At the adjourned meeting, held on the 29th of November, a committee of six, consisting of Francis Bowman, John S. Edgerly, Clark Bennett, James Hill, Jr., Oliver Tufts and S. S. Runey, was chosen to investigate and report on town affairs generally, and more particularly on the taxes paid by their section of the town.

On the 3d of December the committee reported that in 1840 the assessed tax of the town was \$34,093.76 of which the sum of \$5,687.78 was assessed on the inhabitants and property above the bridge, over the Middlesex Canal. An analysis of this tax showed that the portion of it paid by inhabitants on property in that section was \$4,378.36, while the sum of \$1,068.28 was assessed on non-residents, \$110.24 on residents for property below the bridge, and \$130.20 on the Tufts Miles Tan-yard. They also reported that in May, 1840, the population of that section was 1519, the number of families 224 and the number of polls 437. They reported that in 1841 the number of polls was 527, and the assessed tax of the whole town \$57,522.98, of which the sum of \$9,416.20 was paid by the inhabitants and property of that section, divided as follows: \$7,221.34 by the inhabitants on property within the section, \$1,821.83 on non-residents, \$156.03 on residents for property below the bridge, and \$217 on the Tan-yard Wharf.

It was determined at this meeting to make an effort to secure an act of incorporation for a new town, and a committee of nine, consisting of Charles E. Gilman, Hiram Allen, Edwin Munroe, Jr., Caleb W. Leland, John C. Magoun, Oliver Tufts, Charles Miller, Samuel Thompson and Robert G. Tenney, was chosen to secure the signatures of persons favorable to a division. It seemed necessary to make efforts to this end greater than the result proved necessary. An attempt to obtain an act of incorporation had been made in 1828, and had failed. A petition was sent to the Legislature at that time to be incorporated as the town of Warren, and the petitioners had been given leave to withdraw. It was now, therefore, determined to proceed with energy and with care, and to secure such evidence as would satisfy legislators that the best interests of all concerned demanded a division. The above committee was instructed to use all honorable means to secure an act of incorporation and to employ counsel. The committee organized by the choice of Charles E. Gilman as chairman and Edwin Munroe, Jr., as secretary. Ephraim Buttrick was retained as counsel, and after some discussion the name of Walford was selected for the proposed new town, in honor of the first white settler of Charlestown. At a later meeting, however, that name was abandoned, and the name of Somerville, having no special significance, was substituted.

At the session of the General Court held in 1842,

the following petition, signed by Guy C. Hawkins and many others, was presented, which was opposed by many citizens in the main part of the town, by the inhabitants immediately outside of Charlestown Neck by some of the people in the upper part of the section, asking for the division:

"To the Honorable Senate and House of Representatives of the Commonwealth of Massachusetts, in General Court assembled:

"Respectfully represent the undersigned that they are citizens of Charlestown, in the Commonwealth of Massachusetts aforesaid, and resident in that part of said town lying westerly and northwesterly of the bridge near the Middlesex Canal at the Neck, so-called, and the highway leading thence to Malden Bridge and bounded by Mystic River on the northeast and north, and by the town of Cambridge and West Cambridge in the south and southwest—that the part of Charlestown embraced within the limits aforesaid contain an area of about four square miles and a population exceeding fifteen hundred inhabitants thereof, and that the interests, convenience and just rights of the inhabitants require that the territory included within said limits shall be set off from the town of Charlestown and incorporated into a separate town.

"Wherefore your petitioners pray the Honorable Legislature that the territory aforesaid, with the inhabitants thereof, may be set off and in, incorporated into a separate town by the name of Somerville, and as in duty bound will ever pray."

The following petition, in aid of that of Mr. Hawkins and others, was signed and presented to the Legislature by persons presumably residing in Charlestown, outside the dissatisfied district:

"To the Honorable Senate and House of Representatives of the Commonwealth of Massachusetts in General Court assembled;

"Humbly show the undersigned citizens of said Commonwealth that they are severally the owners and proprietors of real estate, although they do not now reside thereon, but elsewhere situated in that part of Charlestown, in the Commonwealth of Massachusetts, being Westerly and Southwesterly of the bridge over the Middlesex Canal at Charlestown Neck, so-called, that the interests and just rights of your memorialists require that the part of Charlestown being Westerly and Southwesterly of said bridge should be incorporated into a separate and distinct town.

"Wherefore your petitioners pray that the prayer of Guy C. Hawkins and others, now pending before your Honorable bodies for the incorporation of that part of Charlestown into a new town by the name of Somerville, may be granted and in duty bound will ever pray."

Dr. E. C. Booth, in an interesting sketch of Somerville, says that "when the matter came before the Legislature, toward the close of the session, it was found that the act could not be secured with the boundaries as they were designated in the petition. The Rev. J. D. Green, member from Cambridge, a moment before the vote was to be put, declared nothing could be effected at the present session unless the line was drawn outside the neck as it now exists, and a narrow strip in the northerly part of the town extending near to Mystic Pond was ceded to Cambridge. Only two of the committee of the petitioners were present; but Mr. Hawkins declared he would assume the responsibility of the concession, and the act thus modified passed the Legislature and was approved by the Governor March 3, 1842." The act as is follows:

"Be it enacted by the Senate and House of Representatives, in General Court assembled, and by authority of the same, as follows:

"SECT. 1. The westerly part of the town of Charlestown, in the County of Middlesex, bounded and described as follows, viz.: beginning at the southerly corner of Widow Stearns' lot, near the town ledge, and running north seventy degrees east four hundred and four feet; thence north thirty-five and a quarter degrees east of Mystic River; thence along the Mystic River to the line of the town of Medford; thence

along the Medford line to Atewive Brook; thence along the brook to the line of the town of Cambridge; thence along the Cambridge line to the junction of Miller's River with Charles River; thence along the westerly side of Charles River to the westerly corner of the Mill dam; thence along the south westerly side of the Mill Pond to a point where a line north by the magnetic needle, will strike the point of beginning, is hereby incorporated into a town by the name of Somerville; and the inhabitants of the town of Somerville are hereby invested with all the powers and privileges, and shall be subject to the duties and requisitions of other incorporate towns according to the constitution and laws of this Commonwealth.

"SECT. 2. The inhabitants of said town of Somerville shall be holden to pay all arrears of taxes which have been assessed upon them by the town of Charlestown, before the passing of this act, and also their proportion of all county and State taxes that may be assessed upon them previously to the taking of the next State valuation, said proportion to be ascertained and determined by the last town valuation; and the said town of Somerville shall be holden to pay their proportion of the debts due and owing at the time of the passage of this act from the town of Charlestown, and be entitled to receive of the town of Charlestown their proportion of all the corporate property now owned by said last mentioned town, such proportion to be ascertained and determined by the last valuation of said Charlestown.

"SECT. 3. The said towns of Charlestown and Somerville shall be respectively liable for the support of all persons who now do or hereafter shall stand in need of relief as paupers, whose settlement was gained or derived from a settlement gained or derived within their respective limits.

"SECT. 4. Until the next apportionment of representatives to the General Court, the town of Somerville shall be entitled to one representative in the General Court and the town of Charlestown shall be entitled to four representatives.

"SECT. 5. In case said towns shall disagree in respect to a division of paupers, town property, town debts or State and county taxes, the Court of Common Pleas for the County of Middlesex are hereby authorized to and shall, on application of either town, appoint three disinterested persons to hear the parties and award thereon; which award, when accepted by the Court, shall be final.

"SECT. 6. Any justice of the peace in the County of Middlesex is hereby authorized to issue his warrant to any principal inhabitant of the town of Somerville, requiring him to warn the inhabitants of said town to meet, at the time and place therein appointed, for the purpose of choosing all such town officers as towns are, by law, authorized and required to choose at their annual meetings.

"This act shall be in force from and after its passage."

On the 30th of April, 1856, an act was passed altering and defining the boundary line between Somerville and Cambridge, which provided that

"The dividing line between these towns should hereafter be as follows; beginning on Milk Row (so-called) at a point being 20 ft. 8 inches distant from the point on Milk Row where the land of Anna Hunnewell is divided from the land of Benjamin Rand, and thence running in a northeasterly direction along the boundary line of said estates, there measuring from Milk Row 222 ft. 4 inches, thence turning at a right angle and running northwesterly along the west side of a until it strikes Cottage street (so called), there measuring 296 ft. 6 inches, then turning and running along the southerly side of said Cottage street in a direction north of west until it reaches Elm street (so called), there measuring 308 ft. until it intersects on the westerly side of Elm street the line before established between the said towns."

The territory of the new town was four square miles in extent and contained 2700 acres. Within this territory were the several hills called Quarry Hill, Ploughed Hill, Winter Hill, Prospect Hill and Cobble Hill, and Ten Hills Farm, which, consisting of 600 acres, lay on the banks of Mystic River and was granted to John Winthrop, September 6, 1630. On this farm Winthrop built a house which he probably occupied during a portion of the year. The first vessel built in New England was built by Winthrop on this farm called "Blessing of the Bay," and

launched about July 4, 1631. In 1677 it passed out of the hands of the Winthrop family and in 1740 was bought by Robert Temple and from him acquired the name of Temple's Farm, by which it was known in later days. In still later years it has been owned by Elias Hasket Derby and leased to Samuel Jacques, in whose hands it became famous for the thorough and successful manner in which it was conducted.

On Quarry Hill the old powder-house stood, in which powder was stored at the beginning of the Revolution. On the 1st of September, 1774, General Gage sent Lieutenant-Colonel Madison with 216 men in thirteen boats up the Mystic, who crossed Winter Hill, and, seizing the powder, conveyed it to Castle William. Forts and redoubts were built on the other hills in 1775 and on the 18th of July in that year, on Prospect Hill, General Israel Putnam unfurled a flag bearing on one side the inscription, "An appeal to Heaven," and on the other, three vines, the armorial bearing of Connecticut and the motto of the State. On the 1st of January, 1776, with a salute of thirteen guns, a Union flag with thirteen stripes was on this hill flung to the breeze. In 1777, Burgoyne and his soldiers were encamped as prisoners on Prospect and Winter Hills under a guard commanded by General Nathaniel Goodwin of Plymouth. On Cobble Hill, the McLean Insane Asylum, a branch, as it may perhaps be called, of the Massachusetts General Hospital in Boston, was built and opened in 1818. This hospital stands on the grounds once occupied by the residence of Joseph Barrell and received its name from John McLean, who gave to the institution about \$115,000. It has received numerous other gifts, among which may be mentioned those of Samuel Eliot, in 1819, of \$10,000; of Joseph Lee, in 1830, of \$20,000, and of Mary Belknap, in 1832, of \$88,602, the residuary amount of her estate. The different superintendents of the institution up to the present time have been Dr. Rufus Wyman, a native of Woburn, appointed March 23, 1818, Dr. Phineas G. Lee, a native of New Britain, Conn., appointed in 1832; Dr. Luther V. Bell, a native of Franchestown, N. H., appointed in 1866; Dr. Chauncy Booth, a native of Coventry, Conn., appointed in 1856; Dr. John E. Tyler, a native of Boston, appointed in 1858; Dr. George F. Jelly, a native of Salem, appointed in 1871, and Dr. Cowles, the present superintendent. On Cobble Hill a fortification planned by Putnam and Knox was begun November 22, 1775, which was a part of the works encircling Boston and afterwards forcing its evacuation by the British forces in 1776.

On Ploughed Hill the Ursuline Convent was built which was destroyed by a mob in 1834. It was first established in Boston and removed to Somerville in 1826. On Central Hill, as it is now called, but really one of the eminences of Prospect Hill and connected in the early part of the Revolution with the other eminences by a rampart, are located the City Hall of Somerville, the Public Library and High

School building. There are few localities in Massachusetts from which so comprehensive and interesting a view of the surrounding country may be had, and it redeems the city from the monotonous expression which the generally flat character of the territory would otherwise give to it.

On Winter Hill separated from Prospect or Central Hill by a valley which forms a considerable portion of the main part of the town, the most extensive fortifications of 1775 were built. They were begun by Stark on the 18th of June, and when finished they were occupied by General Sullivan with troops from New Hampshire.

At the time of the incorporation of the town its valuation was \$988,513, and its population 1013. It had one grammar-school, five primary schools, no meeting-house, less than two hundred houses, no stores, one factory and one old tub fire-engine. It had been simply an outlying suburb of Charlestown, its people maintaining themselves by the products of their milk and vegetable farms. The factory referred to was the Milk Row Bleaching Company which was incorporated April 18, 1838, with a capital of \$50,000, for the purpose of bleaching calendering, printing, dyeing and finishing silk, cotton and linen yarns. This company was authorized, April 17, 1848, to increase its capital to \$100,000 and to change its name to "The Somerville Dyeing and Bleaching Company."

There had been enterprises established within the territory forming the new town, however, which had brought its people into closer contact with the business world, and had doubtless excited a feeling of unrest in the quiet life they had pursued. The Middlesex Canal had been chartered in 1793 and opened in 1803 from Charles River to the Merrimack. In 1804 the Medford turnpike was opened, and in 1835, about the time that other important avenues of travel were constructed, the Lowell Railroad was opened. The final incorporation of the town was one of those steps in the process of evolution which when taken seem almost matters of accident, but which are really consummated in obedience to inexorable law.

In compliance with the act of incorporation, a warrant issued by Ephraim Buttrick of East Cambridge, justice of the peace, directed to Charles Edward Gilman, dated March 5, 1842, requiring him to call a town-meeting at two o'clock in the afternoon of March 15th, for the organization of the town at the Prospect Hill School-house. At a meeting of citizens held March 10th, of which Columbus Tyler was chairman, and Nathan Tufts, Jr., secretary, a committee of three was chosen to nominate a committee of nine to nominate a list of town officers. The committee of three was composed of Guy C. Hawkins, Charles Adams and James Hall, Jr., who nominated for the committee of nine: O. N. Towne, Wm. A. Tufts, W. A. Russell, Jr., Joseph Miller, Charles Miller, John Runey, Robert Vinal, Hiram Hackett

and Wm. Bonner. At the town-meeting held on the 14th of March, Francis Bowman was chosen moderator and Charles E. Gilman, clerk. Edward Tufts was chosen treasurer and collector, and Nathan Tufts, John S. Edgerly, Caleb Leland, Luther Mitchell and Levi Russell, selectmen. The School Committee were James Hill, Henry Adams, Levi Russell and Alfred Allen; the Assessors, Guy C. Hawkins, John C. Magoun and Oliver Tufts; Assistant Assessors, Nathan Tufts, John Runey and Charles Adams; Overseers of the Poor, Isaac S. Spring, Charles Adams and Robert G. Tenney; Board of Health, Hiram Allen, Robert G. Tenney and P. W. Hayes; Constables, Robert Sanborn and Benjamin Fiske; Field-Drivers, Robert Sanborn and Asa Tufts; Fence-Viewers, Wm. Bonner and Wm. A. Tufts; Tythingmen, Wm. Bonner and Moses Griffin; Finance Committee, Robert Vinal, Wm. Munroe and Luther Mitchell. The selectmen were made surveyors of highways.

At an adjourned meeting held on the 4th of April, \$1800 was appropriated for schools; \$2000 for highways; \$450 for county tax; \$200 for the poor, and \$300 for contingencies. At the same meeting Wm. A. Russell, Jesse Simpson and Robert Sanborn were chosen a committee on fisheries, and Hiram Allen, Levi Russell, T. Frost, Robert G. Tenney and Charles Adams, fire-wards; John S. Edgerly was added to the School Committee; and Francis Bowman was chosen to fill the place of Levi Russell on the Board of Selectmen, who had declined.

The following persons were subsequently chosen selectmen in the year set against their names up to 1871, the year of the incorporation of Somerville as a city:

1843, Francis Bowman, Luther Mitchell, Caleb W. Leland, John S. Edgerly and O. N. Towne.

1844, Luther Mitchell, Caleb W. Leland, John S. Edgerly, James Hill, Jr., O. N. Towne and Benjamin Hadley.

1845, Francis Bowman, Benjamin Hadley, George O. Brastow, Joseph Clark and Silas Kingsley.

1846, Benjamin Hadley, Joseph Clark, Silas Kingsley, Edward Cutter and Isaac S. Spring.

1847, Isaac S. Spring, Benjamin Hadley, Edward Cutter, Joseph Clark and Gardner T. Ring.

1848, Abram Welsh, John S. Edgerly, Thomas J. Leland, Gardner T. Ring and Charles Miller.

1849, John S. Edgerly, Thomas T. Leland, Charles Miller, Abram Welsh and Gardner T. Ring.

1850, John S. Edgerly, Charles Miller, Thomas T. Leland, Chester Guild and James Hill.

1851, John S. Edgerly, Thomas T. Leland, Charles Miller, Chester Guild and John Runey.

1852, John S. Edgerly, Thomas T. Leland, Charles Miller, Nathan Tufts, Jr., and John Runey.

1853, John S. Edgerly, John Runey, Nathan Tufts, Jr., James M. Shute and Joseph Clark.

1854, John S. Edgerly, John Runey, James M. Shute, Joseph Clark and John K. Hall.

1855, John K. Hall, James M. Shute, C. C. Walden, Benjamin Woodward and Benjamin Randall.

1856, James M. Shute, C. C. Walden, John C. Tenney, John S. Edgerly and N. C. Hawkins.

1857, James M. Shute, John S. Edgerly, Samuel Hamblin, Benjamin Randall and John C. Tenney.

1858, James M. Shute, John C. Tenney, Benjamin Randall, Mark Fiske and Samuel Hamblin.

1859, James M. Shute, John C. Tenney, Benjamin Randall, Mark Fiske and John S. Ware.
 1860, Benjamin Randall, Mark Fiske, Albert Kenneson, Henry A. Snow and Thomas Cunningham.
 1861, Benjamin Randall, Henry A. Snow, Thomas Cunningham, Albert Kenneson and Charles H. Guild.
 1862, Benjamin Randall, Henry A. Snow, Thomas Cunningham, Albert Kenneson and Charles H. Guild.
 1863, Henry A. Snow, Thomas Cunningham, S. C. Whitehen, Levi Tomson and John R. Poor.
 1864, John R. Poor, Levi Tomson, Francis Houghton, Nelson Howe and George W. Hadley.
 1865, Nelson Howe, Levi Tomson, George W. Hadley, John R. Poor and Francis Houghton.
 1866, John R. Poor, Nelson Howe, Francis Houghton, George W. Hadley and Silas H. Holland.
 1867, Francis Houghton, George W. Hadley, Silas H. Holland, George O. Brastow and Jacob T. Glines.
 1868, Francis Houghton, Silas H. Holland, Jacob T. Glines, Charles S. Lincoln and John A. Paine.
 1869, Francis Houghton, Silas H. Holland, Jacob T. Glines, John A. Paine, Charles S. Lincoln, Horace Haskins, John G. Hall, Austin Belknap and Robert A. Vinal.
 1870, John G. Hall, Horace Haskins, Austin Belknap, Jr., Cyrus S. Crosby, Jacob T. Glines, Robert A. Vinal, Francis Houghton, Charles S. Lincoln and Nelson Howe.
 1871, Austin Belknap, Charles S. Lincoln, John G. Hall, Robert A. Vinal, Horace Haskins, Cyrus T. Crosby, Person Davis, Jacob T. Glines and Francis Houghton.

The following persons have represented Somerville in the General Court from the date of its incorporation in 1843 to the present time:

1843—Caleb W. Leland	1855—James M. Shute
1844—None	1856—Isaac Story
1845—Caleb W. Leland	1857—John S. Edgerly
1846—None	1858—Rollin W. Keyes
1847—None	1859—Isaac F. Shepard
1848—None	1860—Asa Fisk
1849—George O. Brastow	1861—Columbus Tyler
1850—Same	1862—George O. Brastow
1851—Same	1863—Chester Guild
1852—Edward C. Purdy	1864—Charles Powers
1853—None	1865—Robert A. Vinal
1854—Chester Guild	1866—Frederick R. Kinsley

In 1867 Somerville and Malden constituted the Fourth Representative District of Middlesex County and were represented as follows:

1867—James Pierce, Malden	1870—S. Z. Bowman, Somerville
David M. Bean, Malden	George P. Cox, Malden
John A. Hughes, Somerville	Joseph M. Russell, Malden
1868—John Runey, Somerville	1871—S. Z. Bowman, Somerville
John A. Hughes, Somerville	Chester H. Guild, Somerville
George P. Cox, Malden	Joseph M. Russell, Malden
1869—George P. Cox, Malden	1872—John H. Abbott, Malden
John Runey, Somerville	Charles Taylor, Somerville
Chester H. Guild, Somerville	Samuel A. Carlton, Somerville

In 1873 Somerville, Everett and Malden constituted the Fourth Representative District in Middlesex County and were represented as follows:

1873—Quincy A. Vinal, Somerville	1875—S. Z. Bowman, Somerville
Alonzo H. Evans, Everett	J. A. Cummings, Somerville
John H. Abbott, Malden	James Pierce, Malden
1874—K. C. Sleeper, Malden	1876—Theodore N. Fogue, Malden
Horace Haskins, Somerville	Charles G. Pope, Somerville
J. A. Cummings, Somerville	Alonzo H. Evans, Everett

In 1877 the First Ward of Somerville constituted the Fourth Representative District of Middlesex County, the Second Ward the Fifth District, the Third and Fourth Wards the Sixth District, and these districts were represented as follows:

<i>District.</i>	<i>District.</i>
1877—Charles G. Pope . . . 4th	1882—Charles H. Guild . . . 4th
Thomas Cunningham . . . 5th	Quincy A. Vinal . . . 5th
Enoch R. Morse . . . 6th	Edward Glines . . . 6th
1878—Richard E. Nickerson . . 4th	1883—Elijah C. Clark . . . 4th
Thomas Cunningham . . . 5th	Charles S. Lincoln . . . 6th
Jacob T. Glines . . . 6th	Edward Glines . . . 6th
1879—Richard E. Nickerson . . 4th	1884—Elijah C. Clark . . . 4th
James Long . . . 5th	John M. Wood . . . 6th
Jacob T. Glines . . . 6th	Joseph M. Bailey . . . 6th
1880—John Haskell Butler . . 4th	1885—Levi T. S. Davis . . . 4th

As has been already stated, at the time of the incorporation of Somerville as a town there was no religious society or meeting-house within its borders. In earlier times the existence of a distinct parish was almost invariably the pioneer of a new town. All through the periods of colonial and provincial days the precinct was established as the nucleus of a separate municipal life, and indeed the town was almost another form of the precinct, adding civil services and methods to the ecclesiastical life of the people. In later times the factory on some outlying stream became the centre of a new population, which in time found it necessary to demand a distinct corporate individuality. But Somerville, an exception to both rules, was a mere extension of the people of Charlestown farther out into the rich lands near the Mystic, without any well-marked or natural line of division—a people who gradually became so numerous as to pay a considerable sum of the town tax without receiving its equivalent in improvement of schools, roads and other features of a well-governed community.

The first movement made towards a separate religious organization was made by Elizabeth Page Whittridge, of Beverly, a teacher in one of the public schools, who, on the 1st of June, 1842, opened a Union Sabbath-school on Medford Street. Its officers were George Tapley, superintendent; Elizabeth Page Whittridge, assistant; Miss E. A. Bonner, secretary, and Jeremiah Thorpe, librarian. This Sabbath-school formed the nucleus of the first church, which held its first meeting in an upper room of the engine-house the third Sunday in March in 1844. Rev. Richard Manning Hodges, of Cambridge, officiated, and about thirty families were represented. Mr. Hodges continued his service with the society about a year, and on the 22d of August, 1844, the First Congregational Society was organized. Imme-

diately after, a meeting-house was built on Highland Avenue, on land presented to the society, by Jacob Mudge and Ezra Sleeper, of Boston, and dedicated September 3, 1845.

Mr. Hodges is thought by the writer to have been a native of Salem, and graduated at Harvard in 1815. Before preaching in Somerville he was at one time settled in Bridgewater, but at the time of his service in Somerville was unsettled and a resident of Cambridge. Dr. Richard M. Hodges, the successful and distinguished physician of Boston, is his son.

The following persons took an active part in the formation of this society: Henry Adams, Sanford Adams, Hiram Allen, Charles Bennett, Mary Bonner, William Bonner, Emily Bonner, Levi Bolles, Samuel C. Bradshaw, Jr., George O. Brastow, Edward Cullen, Fitch Cullen, John S. Edgerly, Charles Forster, William B. Graves, Guy C. Hawkins, James Hilt, Jr., Mary B. Homer, Mrs. Jordan, Charles Miller, Abigail Prentiss, Mary Runey, John Runey, Stephen B. Sewall, A. C. Spring, O. N. Town, Nathan Tafts, Timothy Tafts, Columbus Tyler and Robert Vinal.

The successor of Mr. Hodges, or rather the first settled minister in this society, was Rev. John Turner Sargent, of Boston, who was installed February 8, 1846, and resigned March 4, 1848. Mr. Sargent was also a Harvard graduate and a member of the class of 1827. He was a member of the family in Boston bearing that name, of which Col. Henry Sargent, an artist of note and a member of the Academy of Arts and Sciences, and Lucius Manlius Sargent, the author of "Dealings with the Dead by a Sexton of the Old School," were well-known members. He was a man of thorough education, scholarly habits and refined tastes, and could not fail to cleanse and purify the moral atmosphere of any community in which his lot might be cast.

Rev. Augustus R. Pope followed Mr. Sargent and continued in the pastorate until his death, May 24, 1858. Mr. Pope was a native of Boston and graduated at Harvard in 1839, and from the Cambridge Divinity School in 1842. Before his settlement at Somerville he had been settled over the First Church of Kingston, and both in Cambridge and Kingston the writer, who knew him well during the latter part of his life, had opportunity of seeing the energy and devotion with which he carried on every work he was entrusted to perform. In Somerville his boundless activity could not find full play within the narrow limits of his church, and various enterprises and interests, among which were those of an educational character, received and profited by his earnest labors.

Rev. Charles Lowe succeeded Mr. Pope, and was installed May 8, 1859. Mr. Lowe graduated at Harvard in 1847, and from the Cambridge Divinity School in 1851. He remained with the society until ill health compelled him to resign on the 18th of June, 1865. He continued, however, to reside in Somer-

vile until his death, in June, 1874, and though, serving as the secretary of the American Unitarian Association, to be of service as trustee of the Public Library and in other capacities to the community in which he lived.

Rev. Henry Hervey Barber succeeded Mr. Lowe and was installed December 2, 1866. Mr. Barber had previously been settled five years in Harvard. Rev. J. S. Thompson succeeded Mr. Barber, but at the present time, October, 1890, the society is without a pastor.

The first meeting-house of this society, built of wood, was burned July 22, 1852, and the second, built of brick, which was dedicated April 28, 1854, was also burned October 8, 1867. The present brick church erected on the same site was dedicated January 31, 1869.

The Perkins Street Baptist Society was organized May 4, 1845, and held its meetings in a building on the Neck and was called the Neck Village Baptist Society. In the summer of 1853 the building was removed to Perkins Street in Somerville and enlarged, and on the 22d of February, 1854, by an act of the Legislature the present name of the society was assumed. On the 8th of January, 1866, the meeting-house of this society was burned, and on the 26th of June, 1867, its present church edifice was dedicated. Previous to 1845 the easterly part of Somerville had few inhabitants, and the first meeting house of the society was built at the corner of Main and Haverhill Streets in Charlestown at a cost of \$6124.98, and dedicated June, 1845. The new edifice, built in 1866, cost \$25,000. The first pastor of this society was Rev. William Stow, who was ordained June 25, 1845, and remained in service until 1850. He was succeeded by Rev. C. H. Topliff, who was ordained September 30th in that year, and Rev. N. M. Williams followed Mr. Topliff in 1852. Other pastorates followed, but at the present time the society has no pastor.

The First Orthodox Congregational Society was organized at a meeting held at the house of Ebenezer Davis, September 15, 1853. Oliver Dickson was chosen moderator, S. N. Watson, clerk, and Isaac S. Gross, treasurer. The Prudential Committee chosen were: Ebenezer Davis, Joseph Lovett, Temple Paul, G. S. Wheelwright and John R. Poor. On the 28th of June, 1854, a committee was chosen to select a lot of land and procure plans for a church edifice. The corner-stone of the church was laid October 10, 1854, and the house on Franklin Street was dedicated July 12, 1855. On the 4th of May, 1855, Ebenezer Davis, Oliver Dickson and Joseph Lovett were chosen deacons; N. J. Knight, Joshua H. Davis, James L. Tyler and O. H. Granville, examining committee; Joseph Lovett, treasurer; and Moses H. Sargent, clerk. On the 30th of November, 1855, it was voted to extend a call to the Rev. Benjamin Judkins, Jr., and he was installed January 3, 1856. Mr. Judkins closed his pastorate June 2, 1858, and after a supply of the pul-

pit by Rev. David Temple Packard, he was invited to become pastor, and was installed September 21, 1860. Mr. Packard resigned April 1, 1866, and preached his farewell sermon on the 23d of September.

On the 16th of March, 1867, the meeting-house of the society was burned, and on the 27th of June, 1867, Rev. L. R. Eastman, Jr., was installed. The cornerstone of a new house of worship was laid August 27, 1867, and the house was dedicated September 30, 1868. Mr. Eastman resigned April 29, 1871, and was followed by Rev. Wm. S. Hubbell, of West Roxbury, who was installed February 1, 1872. Mr. Hubbell resigned November 5, 1881, and his successor, Rev. Wm. E. Merriman, was installed April 19, 1882. The present pastor of the society is Rev. James H. Ross.

The following are the other religious societies in Somerville: The First Baptist was organized December 30, 1852. Its house of worship is on Belmont Street near Summer, and its present pastor is Rev. F. O. Cunningham.

The Free-Will Baptist Society has a church edifice on Broadway, between Lincoln and George Streets, and was removed from Charlestown to Somerville October 1, 1874. The present pastor is Rev. E. D. Moulton.

The Union Square Baptist Society was organized in 1885, and has a place of worship at 73 Bow Street. Its present pastor is Rev. Charles S. Scott.

The West Somerville Baptist Society was organized in June, 1874. The church edifice is on Elm Street, corner of Winslow Avenue, and Rev. Drew T. Wyman is pastor.

The Winter Hill Baptist Society was organized June 27, 1881. Its house of worship is on School Street, opposite Maple Avenue, and Rev. E. D. Mason is pastor.

The Broadway Congregational Church was organized in June, 1864. Its present pastor is Rev. C. E. Andrews.

The Day Street Congregational Society was organized in April, 1874. Its house is on Day Street, corner of Herbert, and Rev. H. C. Hitchcock is its pastor.

The Prospect Hill Congregational Society, which was organized December 30, 1874, has a church edifice on Warren Avenue, near Union Square, which was dedicated October 19, 1876. Its pastor is Rev. Edward S. Tead.

The Winter Hill Congregational Society was organized January 29, 1883. Its house is on Central Street, corner of Broadway, and its pastor is Rev. Charles L. Noyes.

The Emanuel Episcopal Church was erected in 1870, on Central Street, corner of Summer, and Rev. N. V. Bishop is pastor.

The St. Thomas Episcopal Church was erected in 1870, on Somerville Avenue, near Union Square. Its pastor is Rev. George W. Durell.

The St. James Episcopal Church is on Newbury Street, near Broadway.

The St. Ann's Catholic Church was dedicated September 25, 1881, and stands on Thurston Street, corner of Medford. Its pastor is Rev. John B. Galvin.

St. Joseph's Catholic Church was dedicated November 21, 1874, on Washington Street, corner of Webster Avenue. The pastor is Rev. Christopher T. McGrath.

The Broadway Methodist Church was organized in June, 1873, and its house of worship on Broadway, opposite Sargent Street, was erected in 1872. Its pastor is Rev. A. M. Osgood.

The First Methodist Society, whose house is on Bow Street near Summer, was organized in 1856. Its pastor is Rev. George Skene.

The Flint Street Methodist Society was organized November 17, 1868, and has a house of worship on Flint Street. Rev. C. M. Melden is its pastor.

The Park Avenue Methodist Society is located in West Somerville, on Park Avenue near Elm Street, and its pastor is Rev. H. Mathews.

The Union Square Presbyterian Society was organized September 25, 1887, and has a house on Warren Avenue. Its pastor is Rev. C. S. Dewing.

The First Universalist Society was organized in 1853. Its first church was burned January 2, 1860, and the present one on First Street, corner of Tufts, was dedicated in 1869. Its present pastor is Rev. Charles A. Skinner.

The Third Universalist Society was organized August 10, 1881. Its place of worship is on Morrison Street, corner of Elm, and Rev. Mr. Smith officiates as the pastor.

The Winter Hill Universalist Society was organized June 23, 1879, and is located on Thurston Street, corner of Evergreen Avenue. Rev. Charles A. Skinner officiates as pastor.

In 1850 a Fire Department was established by an act of the Legislature passed on the 2d of April of that year, and the equipment for extinguishing fires has grown from the single tub-engine located within the territory at the time of the incorporation of the town, to an apparatus surpassed by no community in the State of equal size and population. The Fire Department now consists of James N. Hopkins, chief engineer, and Nathaniel C. Barker, assistant, with the following apparatus and men: Steamer, Somerville, No. 1, located on Highland Avenue, with H. A. Byrnes, engineer, W. A. Burbank, fireman, L. D. Bixby, clerk, Irving C. Jackson, driver, L. D. Bixby, driver of hose-carriage, James A. McLane, fireman, Frank Langen, assistant foreman and seven hosemen; the John E. Wool Hose Company, No. 1, on Webster Street, with Thomas H. Daley, foreman; the Winter Hill Hose Company, No. 2, on Marshall Street, with F. W. Ring, foreman; the George H. Foster Hose Company, No. 3, on Washington Street, with C. H. Bridges, foreman; the George O. Brastow Hose Company, No. 4, with Samuel H. Stevens, foreman, and the R. A. Vinal Hook-and-Ladder Company No. 1, with Edwin H. Bright as

foreman, and a fire alarm with forty-six stations. Besides the above the Department has two fire extinguishers and about eight thousand feet of hose. The sum expended for the current expenses of the Department during the year 1889 was \$32,696.65.

In 1853, by an act of the Legislature passed February 23d in that year, the Charlestown Gas Company was allowed to extend its pipes into Somerville, and on the 11th of April in the same year the Cambridge Gas Co. was allowed the same privilege; but on the 13th of April, 1854, Augustus R. Pope, James M. Shute and others were incorporated under the name of the Somerville Gas Company. In 1851 the first directory of Somerville was published, containing the names of five hundred and sixty-one males. It was published by Edward Tufts, of Somerville and is a small duodecimo pamphlet of thirty-two pages. At that time the population of the town, which in 1842 was 1013, and in 1843 had increased to 1445, had still further increased to 3540. The names of the justices of the peace contained in the Directory were Henry Adams, Alfred Allen, George O. Brastow, Luther V. Bell, Ebenezer F. Cutter, John F. Hall, Jonas H. Kendall, John C. Magoun, Samuel Poor, Edward L. Stevens and Columbus Tyler.

A list of the streets and places, of which there were fifty, may be interesting for purposes of comparison with the present localities of the town. They were as follows:

Broadway, from Charlestown to West Cambridge.
 Elm, from Broadway to Milk.
 Medford, from East Cambridge to Medford.
 Adams, from Broadway to Medford.
 Central, from Broadway to Milk.
 Sycamore, from Broadway to Medford.
 Derby, from Broadway to Medford Turnpike.
 Walnut, from Broadway to Bow.
 Cross, from Broadway to Medford.
 Bush, from Broadway to Pearl.
 Glen, from Broadway to Flint.
 Franklin, from Broadway to Cambridge.
 Mount Vernon, from Broadway to Perkins.
 Pearl, from Cross.
 Medford Turnpike, from Charlestown to Medford.
 Park, from Beech to Broadway.
 Heath, from Park to Derby.
 Bond, from Park to Derby.
 Perkins, from Franklin to Charlestown.
 Cambridge, from Charlestown to Cambridge.
 Tufts, from Cambridge to Cross.
 Joy, from Cambridge to Poplar.
 Linden No. 3, from Cambridge to Milk.
 Boston, from Cambridge to Walnut.
 Linden, from Milk to Walnut.
 Prospect, from Cambridge to Cambridgeport.
 Dane, from Cambridge to Milk.
 Vine, from Cambridge to Milk.
 Snow Hill, from Beacon to Milk.
 Beacon, from Somerville to Cambridgeport.
 Church, from Medford to Central.
 Milk, from East Cambridge to Cambridge.
 Bow, from Milk to Milk.
 Laurel, from Milk to Summer.
 Oak, from Milk to Beech.
 Spring, from Milk to Summer.
 Belmont, from Milk to Summer.
 Porter, from Elm to Summer.

Linden No. 2, from Elm.
 Russell, from Elm to Cambridge.
 Orchard, from Russell.
 Cottage Place, from Russell.
 Hamlet, from Church.
 Summer, from Central.
 Beech, from Oak to Spring.
 Harvard, from Beech to Summer.
 Elm Court, from Harvard.
 Harvard Court, from Harvard.
 Myrtle, from Perkins to Cambridge.
 Florence, from Perkins to Pearl.

On the 29th of April, 1854, the Middlesex Railroad Company was incorporated and constructed, in 1855, a street railway to Boston, from the eastern boundary of the town through Washington Street. In May, 1851, the Medford and Charlestown Railroad Company was chartered, and on the 29th of May, 1857, George O. Brastow, Henry A. Snow and Isaac F. Shepard and others were incorporated as the Somerville Horse Railroad Company, one of these occupying Main Street and Broadway and the other Washington, Milk and Elm Streets. The Somerville Horse Railroad Company was authorized by its charter to receive the rights, powers, privileges and franchises of the Middlesex Railroad Company, so far as the same relate to proceedings within the limits of Somerville. At the present time all the various lines of street railway in the town are owned and managed by the West End Street Railway Company, whose centre of operation is in Boston, which was incorporated in 1887.

In 1880 the population of the town had increased to 8025, and its valuation, which had increased from \$988,513 in 1842 to \$2,102,631 in 1850, had further increased to \$6,033,053. The number of houses was at this date 1282, the number of polls 1751, and the town debt was \$90,924.

The first militia company in Somerville was the Somerville Light Infantry, organized in October, 1853. In May, 1854, the company was enrolled as Company B, Fourth Regiment, Third Brigade, Second Division; but the regiment was afterwards numbered the Fifth, instead of the Fourth. The first captain was George O. Brastow, who was succeeded, June 29, 1854, by Francis Tufts, who served until April, 1859. Captain Brastow was then re-elected, and served until the autumn of 1861. Captain B. F. Parker succeeded Captain Brastow, and still later it was commanded by Captain W. E. Robinson, Captain J. N. Coffin, Captain G. W. Daniels, Captain Charles F. King, Captain R. Kramer and Lieutenant R. T. Blackwell, and was disbanded July 6, 1876.

Coming now to the period of the late war, the activity and patriotic spirit which characterized the people of the whole Commonwealth were displayed in Somerville. Before the blow was struck, the Somerville Light Infantry, in anticipation of trouble on the part of the government of the State, had been, like other militia companies in the Commonwealth, notified of a possible call for men and of the necessity

of retaining only such men in their ranks as would be willing to respond at a moment's notice. When, therefore, on the 15th of April, 1861, dispatches were received announcing the surrender of Fort Sumter and the issue of a proclamation by the President of the United States, calling for seventy-five thousand men for three months' service, Somerville was fully prepared to perform her share in the emergency. Further dispatches announced that Governor Andrew had issued orders to the commanders of the Third, Fourth, Sixth and Eighth Regiments of Massachusetts Militia to report, with their commands, on Boston Common the following day. A little later the Fifth Regiment, under the command of Colonel Lawrence, of Medford, was called for, and the Somerville company quickly responded. On the 17th of April a meeting of the citizens was held for the purpose of rendering such aid to the company and to the families of its members as might, under the circumstances, become necessary. Henry A. Jones was chosen chairman, and Aaron Sargent secretary. A committee of five, consisting of B. F. Adams, James M. Shute, Columbus Tyler, Charles H. Guild and Charles S. Lincoln, was chosen to prepare a plan, and subsequently at the same meeting the following resolution was reported and adopted:

"Resolved, that in the opinion of this meeting the town should take measures to provide for such families of members of the Somerville Light Infantry as may need aid during the absence of that company in defense of the National Government and of the rights and liberties of mankind."

Remarks were made by James M. Shute, Columbus Tyler, E. H. Wakefield, M. H. Sargent, Ebenezer Davis, Asa Fisk, John R. Poor, C. C. Walden and others. Subscriptions were at once raised, amounting to \$4308.50, and of this amount the sum of \$700 was presented to Captain Brastow, who had entered the hall with his company.

It was voted that the remainder of the amount subscribed should be deposited in the Lechmere Savings Bank, subject to the drafts of the Board of Selectmen. On Saturday, the 20th of April, the company gathered about the flagstaff in Union Square, where the flag was saluted and Rev. Mr. Fairbanks made a fervent prayer. A procession was then formed under the direction of John K. Hall as chief marshal, and marched to the Congregational Church, in Franklin Street, where each member was presented with a Testament by Moses H. Sargent, each of which bore the following inscription: "And behold I am with thee and will keep thee in all places whither thou goest and will bring thee again into this land, for I will not leave thee until I have done that which I have spoken to thee of."—Gen. 28:15. The procession then escorted the company to Faneuil Hall, in Boston, where it was quartered until the next morning. On Sunday, the 21st, it went to New York by the Fall River route, reaching that city in the evening. At New York the

regiment embarked on steamers for Annapolis, and reached Washington on the morning of Saturday, April 27th. It was quartered in the United States Treasury Building, performing guard duty during four weeks; and then encamped for one week in Camp Andrew, on the Virginia bank of the Potomac, about four miles from Washington. On Monday, June 2d, the regiment encamped in Camp Massachusetts, about one mile southwest of Alexandria, where it remained until Tuesday, July 16th. The regiment was engaged in the battle of Bull Run, in which Frank E. Hanaford, a member of Company B, was killed. On Sunday, the 28th of July, the regiment left Washington; and arriving home, the Somerville company was received by the Second Battalion of Infantry, and escorted by citizens, under a salute of one hundred guns, to Prospect Hill, where, gathered round the flagstaff, they were addressed by Rev. Mr. Fairbanks and N. B. Proctor and an ode of welcome was sung. Captain Morton responded to the addresses of welcome, and received also, with his men, the more private congratulations of his neighbors and friends. W. Francis Morris, a member of the company, was left in the hospital, in Washington, sick, and died on the 31st of July.

At a legal meeting of the town, held on the 29th of April, 1861, it was voted to instruct the selectmen to provide for the families of volunteers, and to authorize the town treasurer to borrow a sum not exceeding \$5000 for the purpose. On the 28th of April it was voted to borrow \$6000 for the purpose of aiding families. In June, 1862, the President called for three hundred thousand men, and of this number the quota of Somerville was ninety-two. On the 19th of July the town voted to raise a company to fill the quota and to pay a bounty to each volunteer of one hundred dollars. For this purpose it was voted to borrow twelve thousand dollars. A committee of sixty, with the selectmen added, was chosen as a rallying committee. On the 27th of August, 1862, the town voted to pay a bounty of one hundred dollars to other volunteers, and on the 24th of September to pay an additional bounty of seventy-five dollars to members of the Somerville Light Infantry.

On the 27th of April, 1863, it was voted to borrow ten thousand dollars for aid to soldiers' families, and on the 10th of December, 1863, other appropriations were made for the purpose of enlisting volunteers. In 1862 the Somerville Guard, raised to fill the quota called for in June of that year, was recruited to the full number of one hundred and one men, and encamped on the 12th of August on Prospect Hill, when it was mustered in for three years, and remained until the 3d of September, when it encamped at Boxford. It was attached as Company E to the Thirty-ninth Regiment, and on the 6th of September took the cars for Washington. After a short encampment at Arlington Heights, it went into quarters at Poolesville, Maryland, where it passed the winter.

In April, 1863, the regiment removed to Washington, and on the 9th of July joined the Army of the Potomac, with which it remained until the close of the war. The casualties of the Somerville Guard, during its service, were as follows: F. J. Oliver, Washington Lovett, Joseph W. Whitmore, Henry E. Howe and Richard J. Hyde died in rebel prisons; William D. Palmer, Samuel O. Felker, Robert Powers, J. H. Roberts, William M. Harburn, Eugene B. Hadly, Willard C. Kinsly and John Moran were killed. Besides these, Frederick A. Glines, James M. Allen, Charles G. Jones, David Gorham, John E. Horton, George H. Hatch and David Kendrick fell victims to disease.

It is unnecessary to recount all the various votes of the town concerning the enlistment of men and appropriations of money for bounties and aid to families. It is sufficient on this point to say that the whole amount of money appropriated by the town for war purposes, exclusive of State aid, was \$133,039.41, and that the amount contributed by citizens was \$65,823.38.

It is stated by Dr. Booth, in his sketch of Somerville, already referred to, that "Somerville furnished forty commissioned officers and one thousand and eighty-five men for the war in all branches of the service, which was a surplus of one hundred and forty-seven above the number required. Ninety-eight were killed or died of disease incident to the hardships of war, and two hundred and fifty were wounded. A marble monument was erected in the cemetery in 1863 to the memory of the dead, and was paid for by the money raised at the citizens' meeting, held April 18, 1861, for the purpose of aiding the Somerville Light Infantry, previous to its departure for a three months' service. It was the first soldiers' monument erected in Massachusetts."

The writer finds no roll of soldiers in the office of the clerk of Somerville, and has therefore been obliged to rely on the Massachusetts record published by the adjutant-general of the State for such a list as he is able to furnish. In this record he finds only four hundred and fifty-one names entered as belonging to Somerville, and their names will be found in the list included in this sketch. To be added to this list are, of course, the names of three or four hundred who entered the naval service to the credit of Somerville which the writer has not the data at hand to include in the list. To be further added are the soldiers credited generally to Massachusetts, of whom Somerville had its share placed to its credit. The writer trusts that it may be properly within his province to suggest to the authorities of the city that early steps be taken to secure from the archives in Boston and Somerville and other available sources a complete list of all soldiers and sailors entering the service either credited to or belonging to the town.

The following is a list of the members of the Somerville Light Infantry belonging to Somerville, who

were mustered into the United States service in April, 1861, and served three months:

George O. Brastow, capt.
Wm. E. Robinson, 1st lt.
Fred. R. Kinsley, 2d lt.
Walter C. Bailey, sgt.
John Harrington, sgt.
Wm. R. Corien, sgt.
John C. Watson, sgt.
Henry H. Robinson, corp.
James E. Paul, corp.
Isaac Barker, Jr., corp.
Albion Adams.
John Adams.
Hawes Atwood.
Edwin C. Bennett.
Martin H. Binney.
Warren A. Bird.
Charles H. Bonner.
Edward Brackett.
Albert Caswell.
Elkanah Crosby.
John E. Davis.
John T. Giles.
Joseph J. Giles.
Joseph Hale, Jr.
Henry C. Hammond.
Frank E. Hannaford.
George F. Harris.
John K. Hodgkins.
James R. Hopkins.
Pliny R. Howe.
Richard J. Hyde.
Horatio Jenkins, Jr.
Charles Kilham.
Willard C. Tinsley.
Charles A. Mooney.
Francis W. Moors.
George W. Nason, Jr.
Fletcher N. Nelson.
Judson W. Oliver.
Joseph W. Paine.
Oscar Parsons.
Charles H. Powers.
Charles C. Quimby.
Benjamin F. Schellinger.
Lucius H. Shuttuck.
Wm. E. Shaw.
Nathan A. Simonds.
Charles H. Sweeney.
John Van De Land.
Edward M. Walker.
Kinsley Wallace.
Wm. W. Watson.
George F. Whitcomb.
Joseph Young.

Mustered Sept. 19, 1862, for nine months in Co. B, 5th Regiment:

Benjamin F. Parker, capt.
Walter C. Bailey, 1st lt.
John Harrington, 2d lt.
Edward W. Denny, 1st sgt.
James E. Paul, sgt.
Kinsley Wallace, sgt.
Charles T. Robinson, sgt.
Henry A. Angier, sgt.
Ebenr C. Mann, Jr., corp.
Charles E. Davis, corp.
Granville W. Darcett, corp.
Nathaniel Dennett, corp.
Edwin Turner, corp.
Cyrus B. Rowe, corp.
Willard L. Hawes, corp.
Wm. F. Snow, corp.
Thos. E. Watson, corp.

James H. Flagg, mus.
Frank Walburg, mus.
Henry H. Robinson, 2d wag.
Nathl T. Abbott.
Melvin Adams.
Wm. A. Aiken.
Lewis A. Allen.
Joseph Anthony.
Wm. W. Anderson.
Joseph Arnold.
Joseph A. Austin.
Wm. Ayers.
George W. Barnes.
Thomas A. Barr.
Romanus E. Beers.
Charles K. Brackett.
Samuel R. Brintnell.
Calvin A. Bruce.
George W. Burroughs.
Alonzo Butler.
John Cashin.
Russell T. Chamberlain.
John Clausen.
Fred. R. Cobb.
James Cunningham.
Fred. Cushing.
Ferdinand D. Daniels.

Mustered Feb. 10, 1864, Reg. Army:
Joseph Hale.

In the early days of the town its meetings were held either in the Medford Street School-house or in the engine-house on the corner of Prospect and Washington Streets. When the Unitarian Church was completed its vestry was used for a time, but after the erection of the High School-house which was founded in 1852, town-meetings were held in its lower hall until the Forster School building was erected in 1867, when the large hall in the upper story was fitted for a town hall and used by the town until the incorporation of the city in 1871.

On the 3d of May, 1866, an act was passed by the General Court authorizing Charlestown to supply the town of Somerville with water, and, on the 14th of May, 1868, another act was passed authorizing Somerville and Charlestown to lay pipes for the supply of water. Before that time the main reliance of the town had been in wells. A contract was made with the Charlestown authorities for a supply of water, provided their present supply was more than sufficient for Charlestown and Chelsea, at the rates charged to the inhabitants of those cities, with a rebate to the town. The sum of \$100,000 was raised for the purpose of carrying out the enterprise, and the town at once received the necessary supply. In 1870 under a subsequent act of the General Court, the town was authorized to raise an additional sum of \$100,000 and afterwards a third amount was raised, making the sum total of water loan \$400,000. The town is now supplied with Mystic water by the city of Boston through pipes, and a water tower for high service of its own. Boston collects the water rents and returns to the city of Somerville fifty per cent. of the same. The expenditure for high service was authorized by the Legislature May 21, 1889. The pumping station and tower intended for the high service alone can furnish a supply of two million of gallons in twenty-four hours. A small part of Somerville near the Cambridge line is supplied with water from Cam-

bridge, but the Somerville Water Board in their Report for the year 1889 advise that 7051 feet of pipe laid by the Cambridge Company, and supplying about two hundred and fifty houses, be replaced by the Somerville pipes; so that the supply of the whole town shall be exclusively their own.

On the 31st of March, 1860, the town of Somerville was authorized to lay sewers. The system is now progressing rapidly towards completion, and during the last year nearly twelve thousand feet have been laid. During the same year the cost of construction and maintenance was \$16,968.64.

On the 29th of April, 1871, the town of Somerville appointed a committee to prepare a set of by-laws for the organization of a Public Library. Trustees were chosen October 21, 1872, and on the 14th of November met and organized. The trustees were John P. Marshall, Quincy A. Vinal, Charles G. Pope, Charles H. Guild, Charles Lowe and Samuel A. Carlton. Isaac Putnam was chosen librarian and the library was opened in a room in City Hall in May, 1879, with 2386 volumes.

The present elegant and commodious Library Building on Prospect Hill was finished in 1885, and dedicated in the Unitarian Church on the 29th of September in that year. Mark F. Burns presided, and the principal address was delivered by Justin Winsor, the librarian of Harvard University. Short addresses were also made by Rev. George W. Durell, Rev. John S. Thomson and George A. Bruce. The library contained at the close of 1889, 17,045 volumes, of which 1162 were added during the year. The available revenues for the same year were an appropriation of \$3000. Receipts from dog licenses allowed by the town, \$2382.90; fines, \$293.76; receipts from catalogues, \$44.05; payments for books, \$15.50, making a total of \$5736.21. The expenses were: Salaries, \$1874.88; books, \$2520.81; printing and stationery, \$406.67; binding, \$146.95; newspapers, \$12; gas, \$182.01; fuel, \$233.05; water, \$29; repairs, \$382.83; labor, \$121.15; express, \$41.15; incidentals, \$48.66; insurance, \$142.50, making a total of \$6151.66.

In 1868 two petitions were presented to the General Court for a division of the town, but the petitioners received leave to withdraw. In that year also, under the direction of the selectmen, a census was taken which showed a population of 12,535. In 1869 a movement was made looking towards annexation with Charlestown and Boston, and the representatives to the General Court from Somerville were instructed to vote for it. The movement, however, failed, and from that time until 1871 the popular feeling grew in favor of a city charter. In that year a petition was presented to the Legislature, and on the 14th of April, 1871, the act was passed.

On the 7th of December, 1871, the selectmen met and counted and declared the vote for city and ward officers. For Ward One, Ansel Lewis was chosen warden, and M. B. Stebbins clerk; for Ward Two,

Robert A. Vinal, warden, and Samuel S. Sias, clerk; Ward Three, Samuel M. Pennock, warden, and Forest G. Hawes, clerk; Ward Four, Lebbeus Stetson, warden, and George W. Pratt, clerk. George O. Barstow was chosen mayor, and the following aldermen and Common Council:

Aldermen.

Wm. H. Furber	Daniel E. Chase
Clark Bennett	Jacob T. Glines
George W. Hadley	Person Davis
John R. Poor	John G. Hall

Council.

Charles G. Pope	Albert Keneson
E. A. Curtis	Thomas H. Lord
John T. Bolton	Wesley C. Crane
Walter S. Barnes	E. D. Conant
C. E. Byrnes	Patrick Raftery
Michael Doohan	Stewart French
Oren S. Knapp	H. F. Woods
George W. Wyatt	Nathl. Morrison

The following persons have served as mayors of the city since 1872, in the years set against their names:

1872-73, George O. Barstow; 1874-75, Wm. H. Furber; 1876-77, Austin Belknap; 1878-80, George A. Bruce; 1881-84, John A. Cummings; 1885-88, Mark F. Burns; 1889-90, Charles G. Pope.

At the ceremonies attending the inauguration of the city government January 1, 1871, the meeting was called to order by August Belknap, chairman of the Board of Selectmen, and a prayer was offered by Rev. Henry F. Barber. Hon. George O. Barstow then delivered his inaugural address. George Oliver Barstow was born in Wrentham, September 8, 1811. After a few years' residence in Maine he removed to Somerville and engaged actively in business. In 1845 he was a selectman, from 1844 to 1862 on the School Committee, Representative in 1849-51 and 1862, a member of the Senate in 1854, 1866-69, and President of the Senate in 1868 and again in 1869 after the resignation of Robert C. Pitman on his appointment to the bench of the Superior Court. His connection with the Somerville Light Infantry and his service in the war have been already mentioned. After his return from the war he was for a time a paymaster in the army, and in 1874-76 he was a member of the Executive Council. He died November 23, 1878.

ADDRESS OF MAYOR BARSTOW, JAN. 1, 1871.

Gentlemen of the City Council.—In entering upon the duties assigned me by the very flattering vote of my fellow-citizens, the first impulse of my heart is to express my thanks for the honor which their confidence confers and to acknowledge my full appreciation of the responsibility which it imposes upon me. The change from a town to a city form of government was regarded by the wise and good men who established our State, as of sufficient importance to be recognized and provided for in the Constitution of the Commonwealth.

For about two centuries after the settlement of the Colony the people of Massachusetts adhered without change to the town system of local government. In small communities the town organization is the most desirable and the best, because it is the most simple and the most democratic. It brings the people frequently together to consider and discuss all matters pertaining to their municipal welfare, and by them all such business is transacted in the town-meeting. But where a town has increased in population beyond a certain limit, and its various public needs become more and more weighty and pressing, it is impossible for the peo-

ple in the crowded town-meeting to give to all the questions which arise that careful deliberation which their importance demands; consequently a delegated or city form of government becomes a necessity. The real difference in the two forms of government is just this. In the town the people act directly for themselves in 'open town-meeting'; in the city the people elect certain officers to act for them. This change is entirely optional with the people themselves. No town can become a city unless its citizens desire the change.

"The city charter of Somerville, granted by the last Legislature, has been voted upon and legally accepted, and a city form of government adopted by the people; and to us, the City Council, they have delegated the public affairs of our new city. The Board of Aldermen and the Common Council, in the exercise of their various duties, hold to the City Government similar relative powers which the Senate and the House of Representatives do to the State Government; the upper branch being considered the conservative and the lower branch the popular body.

"Each branch in its action has a check upon the other; and this feature, and the fact that every measure must pass through several stages of consideration before it is finally adopted, is a peculiarity of a city form of government as compared with that of a town, and furnishes ample security against hasty and inconsiderate action.

"Upon us is imposed a great trust, and a weighty responsibility—to us the welfare of our beautiful and rapidly-growing city is confided.

"It is well that a divine blessing has been invoked for the future welfare of our city, and it was fitting that a thank offering was rendered for the past prosperity of our town.

"I congratulate you and I congratulate our fellow-citizens that this change in our municipal government, which is the most important event in our history, is made under circumstances so promising and so encouraging.

"The present debt of the town, including the water bonds, is five hundred and ninety-three thousand three hundred and forty-nine dollars, and the last assessed valuation of its public property is six hundred and sixty thousand dollars.

"The growth and increase in population and taxable property in Somerville, and her progress in all that tends to improve and elevate a community, have been constant and rapid, from its incorporation as a town in 1842 to the present time. Its beginning was small and humble, and the contrast between its then 'day of small things' and its present vigorous population is most striking. At the time of its incorporation the population of the town was only ten hundred and thirteen; to-day our population is fully sixteen thousand. In 1842 the assessed value of taxable property of the town was nine hundred and eighty eight thousand five hundred and thirteen dollars. In 1871 it was fifteen million seven hundred and seventy-five thousand dollars. The whole amount of money raised by taxation in 1842 was four thousand seven hundred and fifty dollars; in 1871 the amount was two hundred and sixty thousand four hundred and sixty dollars and ninety-five cents. In 1842 there were but four schools and four teachers in Somerville; to-day there are fifty two schools and sixty-five teachers. The whole amount appropriated for the support of schools in 1842 was eighteen hundred dollars; the amount appropriated the last year for the same purpose was fifty-nine thousand four hundred dollars. When incorporated as a town, and for two years subsequent thereto, there was not a church edifice within our corporate limits, nor did there exist a religious society distinct from former parish connections; to-day there are eleven church edifices, with as many distinct organized religious societies. It will be seen from this brief enumeration that our public schools have been one of our most popular and cherished institutions, and always in advance of our progress in wealth and population. They have ever stood high on the public record; and for several years Somerville has ranked number one in the whole list of towns and cities in the Commonwealth, judged by the amount of money appropriated for each scholar. That the high character of our schools has contributed much toward the rapid and vigorous growth of our town there can be no doubt. They were never as a whole in a more satisfactory condition than at the present time; and I venture but little when I pledge, in the name of myself and my associates, that they shall not be permitted to recede from their present high position from any lack of judicious fostering care on the part of the new City Government.

"The removal within a few days of the scholars of the High School from the building occupied by them in past years to the new and elegant edifice just being completed, will leave the old High School building unoccupied and subject to such use as may be desired. I respectfully recommend that it be set apart for a City Hall, and used for the purposes of the City Government. With few alterations and small expense it can be made to af-

ford ample and convenient accommodations for all our wants for several years to come. If this recommendation meets the approval of the City Council, I would suggest that the necessary alterations be at once made; and that they include a thoroughly fire-proof vault, sufficiently large for the safe-keeping of the town as well as city records, the preservation of which must forever be of incalculable importance.

"The proper care of our streets should, and, I have no doubt, will, receive that attention at your hands which their importance demands. At the present time they are generally in better condition than usual; especially is this the fact in regard to the main thoroughfares. In a city making such rapid growth as ours, and where individual interests and enterprise are constantly opening new streets, the question of accepting and maintaining them by the city is one of daily increasing importance, and will require the exercise of our best judgment, in order that the interests of the city, and of individual citizens, may be alike properly regarded. In this connection, I would recommend that a careful attention be given to the provisions of the betterment act, which have so much importance and such salutary bearing upon the question of laying out new streets and the altering of old ones; as they have, also, in regard to drainage and the construction of sewers. These two subjects are so intimately connected that it is hardly possible—nor is it desirable—to separate them. With so much presenting itself which requires early attention, and while so little can be accomplished in one year, it is impossible but that individuals must be more or less annoyed by temporary delays; and there will be much less difficulty in deciding what ought to be done than in determining what can best be deferred for a brief season. When and where reasonably practicable, without imposing too heavy taxation upon the people, the want of public improvement surely ought not to retard private enterprise; nor should the waiting patience of individuals be unreasonably taxed. I trust that by constant vigilance on your part, by reasonably liberal appropriations of money, judiciously and prudently expended, the work of public improvement will be sure and constant, and the past hopes and expectations of our citizens be fully realized.

"Closely connected with the matter of streets and highways are the street railroads, which pass through our municipal thoroughfares. They were originally constructed with the T rail on the side of the streets; but having, in the judgment of the citizens, become practically the cause of too much inconvenience, they were last summer removed from Milk, Washington and Elm Streets, and new tracks were constructed in the centre of the streets, with flat rails, and thoroughly paved. This change has proved beneficial and satisfactory to our people. The same change should be made on Broadway, and I recommend the application of all proper means for its speedy accomplishment. In the matter of common sewers, it is your duty to carry out what has been begun, and of perfecting the present system. A considerable extent of sewerage has been constructed, and, so far as I know, the plan has been proper and the work well done. You will judge whether any improvement can be made upon the existing plan, and if so you will adopt them.

"Our Fire Department is, as it has been for many years, in a most efficient and satisfactory condition, and is regarded by our people with feelings of just and honest pride, not only for the services it has rendered, but for the manly conduct and bearing of its officers and men. For the toils, hardships and dangers which firemen encounter, their greatest reward, next to an approving conscience, is in the knowledge that their labors are properly appreciated by their fellow-citizens; and in both these respects I am sure the Somerville firemen have been richly rewarded. The proper maintenance and encouragement of this indispensable organization is in our keeping.

"The comfort and convenience of a large proportion of our people have been much enhanced by the introduction of Myletic water. More than twenty-eight miles of pipe are laid in our streets, with one hundred and forty-six hydrants connected therewith and judiciously distributed over our territory. The former appropriation for the water works has been expended, and the responsibility of their further extension, and of making the requisite appropriation therefor, devolves upon you.

"The Police Department of Somerville has increased in numbers and efficiency with an increase in population and wealth, until it has become of great interest and importance. In my judgment the force is well organized and the members generally are vigilant and faithful to their trust. In every large community a well-organized police is indispensable for the protection of persons and property, and for the maintenance of good order; and although strongly being clothed with the authority of law, its usefulness and efficiency depend upon the personal character and manly deportment of its individual members, and upon the moral

support and sympathy of the citizens, of whose lives and property they are the constant protectors and guardians.

"Upon the Health Department rests a great responsibility. It is charged with duties which immediately affect the comfort and well-being of every citizen. Intimately connected with this department is a matter of great importance, and one which demands judicious consideration and efficient action. I allude to the nuisance in Miller's River, caused by an accumulation of filth which covers a large area of flats which are bare at low water. The flats are partly in Somerville and partly in Cambridge, the river being the boundary line between the two cities for a considerable distance, and both are equally responsible for the nuisance. During 'the heated term' of last summer, when the tide was out, the stench from the flats was most offensive. The selectmen of Somerville and the City Government of Cambridge sought by united and harmonious action to improve the condition of this locality. The act of the State Board of Health was sought and stringent rules were adopted for the prevention of further corruption of the water; but in the judgment of the authorities of Cambridge and Somerville and of the State Board of Health, nothing short of the filling the flats with sand or gravel could cure the existing evil, and such filling cannot be undertaken without permission from the Legislature. I know you will heartily unite with the authorities of Cambridge in procuring the needed legislation, and in devising the best and most speedy mode for abating the nuisance, and thereby reclaiming a large extent of worthless territory to valuable building land. The improvement contemplated embraces the construction by the two cities of a large box sewer of sufficient size to conduct off all the water of the stream, and to serve the purpose for drainage for quite an extent of both localities.

"With the requisite legislation granted, it is hoped and expected that the several owners of the flats will at once enter upon the work of filling, and that without any reasonable delay this great improvement will be accomplished. Of course it will take time to complete the improvements, and the people, realizing and acknowledging the fact, that the work of a year cannot be accomplished in a day, must endeavor for a while to cultivate the virtue of patience.

"The services of the Board of Overseers of the Poor, which in the early history of our town were hardly required, are now and have been of late years of much importance in relieving the wants of the destitute and needy. The people will require of their servants that this class be kindly cared for; that necessary aid be cheerfully, not grudgingly bestowed; that none among us shall suffer from want of the necessities of life, and that no child be kept from school for want of proper clothing. The Board of Soldiers' Relief have a most sacred duty to perform. The sick and needy of our returned soldiers who endured hardships and privations, and periled their lives for the preservation of our National Government, are worthy objects of our favor and solicitude. The people of Somerville who in the time of their country's need exhibited so much liberality in encouraging enlistments, and in care and providing for the wants and comforts of her men in the field, and their families at home, will never consent that one of them shall suffer from want, or that he or any one of his family shall ever be classed or treated as a pauper; and especially will they require that the families of our fallen heroes shall be regarded with the most tender care. If the occasion permitted I would gladly say more in regard to the part which our people took in promoting enlistments and furnishing volunteers for the war; but a single statement of Gen. William Schouler in the second volume of his most valuable 'History of Massachusetts in the Civil War' must suffice. After speaking of the great liberality of our people, both men and women, he says, 'Somerville furnished eleven hundred and thirty-five men for the war, which was a surplusage one hundred and forty-seven over and above all demands.' That statement stands as the proud record of our town, when its population was much less than at present, and that record will forever stand as enduring proof of the patriotism and liberality of its people, who, by their devotion to the public welfare, have in the years that have passed been steadily laying the sure foundation of our city, which is destined at no distant day to rank favorably among the older cities of our Commonwealth.

"Gentlemen of the retiring Board of Selectmen: I cannot let the occasion of entering upon my term of official service pass, without expressing to you my appreciation of the magnitude and importance of your public duties during the past year; and also my high appreciation of the fidelity with which those duties have been discharged. In thus expressing to you my own judgment, and my own feelings, I am sure I am but giving utterance to the sentiments of all our citizens who have had opportunity to know and judge of your official action. The faithful manner in which the duties of a long line of town officers have always been

performed, has been most creditable to them, and most satisfactory to an appreciative public; and I congratulate you that in retiring from public service, you carry with you the confidence, the esteem and the best wishes of our entire community.

"Gentlemen of the City Council: The people of Somerville, always confident and liberal, are ever watchful and exacting in regard to all matters pertaining to the public good; and while they will justify liberal appropriations for the welfare of the city, they will exact of its government zealous devotion to its various duties, and a judicious economy in the expenditure of the public money. Let us see to it that no duty be neglected, and that not a dollar be wasted."

Allusion has already been made to the small population of Somerville, the meagre number of its school children and the few schools maintained for their education at the time of the incorporation of the town in 1842. After that date it became not only necessary to improve schools already existing, but to add new ones to meet the rapidly increasing wants of pupils. After the schools of low grade had been provided for, it was voted in the spring of 1851 to establish a High School. The building now occupied as a city hall was first erected for the school. It was designed to accommodate one hundred scholars, and was dedicated on the 28th of April, 1852. It opened with sixty scholars, and Robert Beckford with an assistant had charge. From 1854 to 1858 two assistants were employed. The old building being soon outgrown, the present building on Prospect Hill was erected in 1871, and dedicated February 27, 1872. Since Mr. Beckford left the school it has been under the management of H. H. Babcock and George L. Baxter. In May, 1889, the number of children in the town between the ages of five and fifteen was 6155, for whom during the last year, one hundred and sixteen schools were provided, under the care of one hundred and thirty-five teachers. The following is a list of the school-houses in that year with the date of their erection and number of teachers. Most of these houses, it will be understood, accommodate more than one school:

Buildings.	Erection.	Tehrs.	Buildings.	Erection.	Tehrs.
High	1851	10	Cedar Street	1853	1
Prescott	1857	12	Morse	1859	1
Edgerly	1871	8	Beech Street	1872	1
Davis	1884	4	Spring Hill	1886	1
Luther A. B-B	1854	18	Franklin	1846	1
Prospect Hill	1878	8	Harvard	1851	1
Cummings	1884	4	Brown	1886	4
Readlow	1861	7	Highland	1880	9
Bennett	1868	4	Lincoln	1881	1
Johnson	1864	4	Elm Street	1861	2
Weston	1868	8	Morse	1859	1
Lincoln	1868	1	Drawing	1861	1
Proctor	1860	11	Sewing	1861	1
Boughton	1886	4			

The amount expended for the support of schools in 1889 was, For school contingent, \$20,556; fuel, \$1049.00; school-house incidentals, \$14,225.38; salaries, \$9365.42, making a total of \$433,896.77. Besides these amounts the sum of \$25,000 was appropriated for school-house in Ward 2, of which \$14,727.14 was expended, and the sum of \$25,000 was appropriated for addition to the Morse School-house, of which \$5439.88 was expended. Beside the above schools

there were the St. Joseph's Parochial School, under the care of Sister Mary Gertrude and eleven assistants, and the Kindergarten School on Somerville Avenue, conducted by Alice L. Warren and Sarah E. Kilmer.

The following is a complete list of expenditures of the city in 1889 for various departments:

Fire Department, \$40,016.71; Health Department, \$5226.54; Highways, \$51,358.95; Indigent Soldiers and Sailors, \$1500; Interest, \$45,824.16; Miscellaneous, \$9373.25; Police, \$41,241.08; Public Library, \$6151.66; Public Grounds, \$9109.58; Printing and Stationery, \$5189.11; Reduction of Funded Debt, \$38,000; Salaries, \$25,494.91; Schools, \$183,896.77; Sewers, \$15,716.07; Sidewalks, \$8,654.89; Street Lights, \$16,986.17; Support of Poor, \$14,610.92; Watering Streets, \$9228.28; Water Maintenance, \$16,542.35; County Tax, \$21,367.03; State Tax, \$27,560; Overlay, \$6997.37; School-house in Ward 2, \$14,727.14; Addition to Morse School-house, \$5439.88; Water Works Extension, \$82,279.26. The value of the property of the city is estimated at \$1,287,023.44. The funded debt, December 31, 1889, was \$952,500, and at the same date the valuation was \$30,004,600.

The following societies and institutions are in existence in Somerville at the present time:

Somerville Savings Bank, incorporated February 21, 1885.
Somerville Co-operative Bank.
John Abbot Lodge of Masons, chartered September 8, 1858.
Soley Lodge of Masons, chartered April 2, 1879.
Somerville R. A. Chapter, chartered October 10, 1871.
Orient Council of Royal and Select Masters, established Jan. 25, 1889.
Oasis Lodge of Odd Fellows, instituted September 17, 1868.
Paul Revere Lodge, instituted March 15, 1878.
Caleb Rand Lodge, instituted May 29, 1888.
Somerville Encampment, No. 48.
Grand Canton Washington, No. 6, P. M., instituted May 9, 1883.
Component, No. 16.
Component, No. 17.
Erminie Lodge, No. 76, Daughters of Rebekah; Ivanhoe Lodge, No. 7, instituted January 28, 1870.
Odd Fellows' Building Association, incorporated June 4, 1884.
American Legion of Honor, Prospect Council, No. 111.
Ancient Order of Foresters.
Ancient Order of Hibernians, Division No. 6, instituted 1876; Division, No. 17, instituted 1872.
Ancient Order of United Workmen, Somerville Lodge, No. 48.
British American Association, Branch No. 10, organized October, 1887; Branch No. 53.
Brotherhood of Carpenters and Joiners, Local Union No. 24, organized July 16, 1888.
Equitable Aid Union, Mystic Council, No. 703, instituted March 9, 1889; Somerville Subordinate Union, instituted May 23, 1889.
Willard C. Kinsley Post 139, G. A. R.
Sons of Veterans, Henry B. Leighton Camp, 16.
Woman's Relief Corps, Willard C. Kinsley, No. 21.
Somerville Fife, Drum and Bugle Corps.
Home Circle—Harmony Council, No. 43, ins. March 8, 1882; Irving Council, No. 44, ins. March 23, 1882; Somerville Council, No. 103; Washington Council, No. 9, ins. February, 1880.
Knights and Ladies of Honor, Evening Star Lodge, No. 792.
I. O. of Red Men, Webcowet Tribe, No. 66; Wonalagunham Tribe, No. 69.
Knights of Honor, Warren Lodge, No. 182, instituted November, 1875; Mt. Benedict Lodge, No. 872, instituted January, 1878; Cameron Lodge, No. 1146, instituted July 2, 1878; Winter Hill Lodge, No. 423.
Knights of Labor, Assembly No. 2919; Ernest Assembly.
Knights of Pythias, Franklin Lodge, No. 41, instituted May 23, 1870.
L. O. L., Mount Herob Lodge, No. 19, organized April 18, 1871.
Order of the Iron Hall, Local Branch, No. 257, org. Nov. 11, 1886; Lo-

cal Branch, No. 314; Local Branch, No. 430; Local Branch, No. 885, org. Oct. 25, 1888; Sisterhood Branch, No. 586, org. Nov. 12, 1887; Sisterhood Branch, No. 866, org. October, 1888.
Mass. Catholic Order of Foresters, Count Benedict, No. 39.
New England Order of Protection, Prospect Lodge, No. 71; Warren Lodge, No. 26.
Plasterers' Union of Cambridge and Somerville.
Royal Arcanum, Elm Council, No. 36, instituted Dec. 5, 1877.
Company M, 8th Regiment, M. V. M.
Royal Society of Good Fellows, Mt. Benedict Assembly, No. 119, ins. Oct. 25, 1887; Prospect Assembly, No. 73; Somerville Assembly, No. 22, org. July 1, 1886.
Royal Conclave of Knights and Ladies, Charles E. Gilman Council, No. 24; John A. Cummings Council, No. 13; Mystic Council, No. 14; Provident Council, No. 7.
Women's Christian Temperance Union—East Somerville, Union Square, West Somerville, Winter Hill.
Young Women's Christian Temperance Union.
St. Joseph's Total Abstinence and Benevolent Society, org. Dec. 14, 1873.
United Fellowship, Reliance Council, No. 55.
Order of United Friends, Revere Council, No. 235; Union Square Council, No. 202; Excelsior Council, No. 3; Somerville Council, No. 6; Unity Council, No. 59.
Golden Star Lodge, No. 82, L. O. G. T., org. 1881.
Sons of Temperance, Kinsley Division, No. 88; Prospect Division, No. 89; Prospect Section, No. 7, org. 1888; Putnam Commandery, No. 38, org. 1888; Crystal Wave Commandery, No. 264.
Order of Tontu, Somerville Lodge, No. 316.
Tenders' Union.
U. O. of L. O. L., Unity Lodge, No. 7, org. 1884.
United Order of Pilgrim Fathers, Clarendon Colony, No. 73; Delft Haven Colony, No. 27.
United Order of the Golden Cross, Grand Commandery of Mass.
Atlas Real Estate Association, organized Jan. 4, 1889.
Central Club, incorporated Dec. 13, 1886.
Fireman's Charitable Association.
Hillside Club, Winter Hill, org. Oct. 18, 1882.
McLean Asylum.
Owl Club, organized June 14, 1880.
Royal Arcanum Social Club, Excelsior Council.
Shield Literary Association.
Somerville Chess Club.
Somerville Union Hall Association, incorporated April 17, 1869.
Webcowet Club.
Somerville Catholic Lyceum.
Somerville Cycle Club.
Somerville Improvement Society.
Somerville Young Men's Christian Association.
Somerville Wharf and Improvement Company, incorp. March 29, 1880.
Firemen's Relief Association, incorporated March 28, 1890.
Somerville High School Association.

Among the manufacturing establishments in the town are the American Tube Works, organized in 1871, and having a capital of \$300,000; the Eagle Shade Roller Company, incorporated in 1881, with a capital of \$100,000; the Middlesex Bleachery, with a capital of \$300,000, and the Union Glass Company, organized in 1864, with a capital of \$50,000. Among other industries is the North Packing Company, with their slaughtering establishment on Medford Street, with a capacity of two thousand hogs per day.

The Somerville Police Court was established by an Act of the Legislature, passed April 23, 1872. Its officers are Isaac Story, justice, Charles G. Pope and John Haskell Batten, special justices, and Herbert A. Chapin, clerk.

The city government for the year 1890 is composed of the following officers:

MAYOR: Charles G. Pope.

ALDERMEN: Ward 1. Charles Hemenway, president, Charles B. Sanborn.

James W. Smith

Ward 2—George A. Kimball, Allen F. Carpenter.

Ward 3—Ezra D. Souther, Alvano T. Nickerson.

Ward 4—John W. Converse, Albert W. Edmunds, George I. Vincent, clerk.

COMMON COUNCIL: Ward 1—Clarence H. Willey, Edwin A. Wilcox, Edric Elbridge, George W. Prichard.

Ward 2—Charles S. Butters, L. Roger Wentworth, William J. McLean, William M. Armstrong.

Ward 3—Charles B. Osgood, president, William E. Pulsifer, William L. Barber, Frank E. Dickerman.

Ward 4—Isaac R. Webber, William A. Hunnewell, Frank E. Merrill, Newell F. Caswell, Charles S. Robertson, clerk.

SCHOOL COMMITTEE: Charles G. Pope, mayor *ex officio*, Charles B. Osgood, president of Council *ex officio*.

Ward 1—S. Newton Cutler, term expires 1891; Horace C. White, term expires 1892; Horace P. Hemenway, term expires 1890.

Ward 2—A. H. Carvill, term expires 1891; James E. Beard, term expires 1892; Charles I. Shepard, term expires 1890.

Ward 3—Norman W. Bingham, term expires 1891; Quincy E. Dickerman, term expires 1892; William P. Hill, term expires 1890.

Ward 4—Giles W. Bryant, term expires 1892; Martin W. Carr, term expires 1890; Addie B. Upham, term expires 1891.

SUPERINTENDENT OF SCHOOLS AND SECRETARY: Clarence E. Melroy.

ASSESSORS: Benjamin F. Thompson, term expires 1890; George W. Hadley, term expires 1891; Hiram D. Smith, term expires 1892; Wm. F. Mitchell, clerk.

ASSISTANT ASSESSORS: Ward 1—George W. Bartlett.

Ward 2—David A. Sanborn.

Ward 3—Edgar T. Mayhew.

Ward 4—Samuel T. Richards.

BOARD OF HEALTH: J. Frank Wellington, chairman, term expires 1891; Alvah B. Dearborn, term expires 1892; Charles B. Crane, term expires 1892; William P. Mitchell, clerk; Caleb A. Page, inspector.

OVERSEERS OF THE POOR: Charles G. Pope, mayor, chairman *ex officio*; Charles G. Brett, four years from 1889; Herbert E. Hill, four years from 1886; Edward B. West, Daniel C. Stillson, Charles C. Tolson, agent; Frank W. Kean, secretary.

WATER BOARD: Adna C. Widding, Walter C. Mentzer, Samuel W. Holt, Frank G. Lombard, Frank A. Titus, Nathaniel Dennett, superintendent; Frederick W. Stone, secretary.

REGISTRARS OF VOTERS: Cromwell G. Rowell, chairman, Charles F. Lincoln, William B. Hawes, George I. Vincent, city clerk.

TRUSTEES OF LIBRARY: George A. Bruce, term expires 1892; William E. Weld, term expires 1893; James E. Whitaker, term expires 1893; John B. Veall, term expires 1893; Charles S. Lincoln, term expires 1891; Christopher E. Rymes, term expires 1891; Elijah C. Clark, term expires 1892; Henry Flitner, term expires 1891; Charles H. Brown, term expires 1892.*

LIBRARIAN: Harriet A. Adams.

CITY CLERK: George A. Vincent.

CITY TREASURER AND COLLECTOR: John F. Cole.

MESSENGER: Jairus Mann.

SOLICITOR: Selwyn Z. Bowman.

AUDITOR: Charles S. Robertson.

ENGINEER: Horace L. Eaton.

SUPERINTENDENT OF STREETS: Thomas H. Eames.

SUPERINTENDENT OF BUILDINGS AND LIGHTS: Thomas R. Roulstone.

CHIEF OF POLICE: Melville C. Parkhurst.

CHIEF ENGINEER OF FIRE DEPARTMENT: James R. Hopkins.

INSPECTOR OF BUILDINGS: James R. Hopkins.

CITY PHYSICIAN: Alvah B. Dearborn.

INSPECTOR OF MILK AND VINEGAR: Thomas Cunningham.

There are three newspapers in the town, with job printing offices attached—the *Somerville Journal*, the *Artisan*, and the *Sentinel*.

On the 25th of March, 1874, Somerville was authorized by law to take land for a public park. Under the authority conferred by this act, about sixteen acres of the Temple, or Ten Hills farm, on the banks of Mystic River, have been taken and converted into a park, which has probably cost up to the present time between three and four hundred thousand dollars.

Besides the clergymen and mayors whose names have been mentioned in this sketch, there are many others who should be referred to as identified with the life and prosperity of Somerville. It is making almost an invidious distinction to include here the names of a few, while there are and have been many worthy of credit. To the names of James M. Shute, Thomas Cunningham, George O. Brastow, George A. Bruce, S. Z. Bowman, J. R. Poor, Nelson Howe, Charles H. Guild and J. Haskell might be added a long list of those of other citizens who have performed their full share in promoting the welfare of their native or adopted town.

In closing this sketch of Somerville it may not be improper to allude to the probable future of this enterprising and rapidly-growing town. Had it not been detached from Charlestown it would of course have been long before this a part of Boston. So far as the cause of its being is concerned, and the inspiration of its life it is really a part of Boston now. Upon the business of Boston, and its prosperity and growth, the future increase and prosperity of Somerville depend. So many of its people, both male and female, are engaged in enterprises and seek employment in that city, that the welfare and good government of the metropolis are almost as much matters of interest to them as their own. The time, therefore, may not be far distant when the city which its people have nourished in its infancy and youth, will become in its full manhood a part of that great municipality which, with Somerville, Cambridge, Medford, Malden, Everett, Chelsea, Brockline and Watertown embraced within its limits, will, at the end of another decade, include nearly nine hundred thousand inhabitants within its borders.

BIOGRAPHICAL.

HON. JAMES M. SHUTE.

Mr. Shute is descended from Richard Shute, who appeared in Medford in 1642, and had a wife, Elizabeth, and a son, Richard. The son, Richard, had a wife, Lydia, and a son, John, born in Malden, March 26, 1699. John had a son, Ebenezer, who was one of twelve children, and was born in Malden, Sept. 28, 1740. Ebenezer had a son, Ebenezer, born in Malden, who married Susanna Beal, of Hingham, and had six children. The last Ebenezer was a carpenter and builder, and removed to Boston, where the subject of this sketch, one of his children, was born, May 6, 1812.

Mr. Shute attended the public schools of Boston and graduated at the Boston English High School. He learned the trade of printer, and soon after secured employment with the Boston Type and Stereotype Foundry. This foundry was established in Charlestown, in 1817, by Elisha White, as a branch of his foundry in New York. In 1818 the property

was bought by Charles Ewer and Timothy Bedlington, who appointed Samuel Haskell superintendent, and finally removed the establishment to Boston, where it was conducted for several years, on Washington Street, in the rear of the store of Samuel T. Armstrong, between Court Street and Cornhill. Up to that time the method prevailed of moulding and casting type by hand. The process was of course a slow one, and made the daily product of type small and its cost high. About the year 1826 the first machines were invented for casting type, and their use was attempted by the company. In 1829 the foundry company was incorporated as the Boston Type and Stereotype Foundry.

Mr. Shute, after some years of faithful service as an employee of the company, was appointed, while still a young man, its agent and treasurer, and with his assumption of its management may be dated the birth of that prosperity which has since marked its career. He continued in the management until 1852, when the establishment was sold to John K. Rogers and David Watson, and carried on in the name of John K. Rogers & Company until in 1865, it was incorporated as the Boston Type Foundry, the name the company now bears.

When Mr. Shute assumed the management of affairs the experiments with the type-machines had not proved successful. The type produced by them were pressed in the form with a want of uniformity, and thus here and there a letter failed to make its proper impression on the printed page. Mr. Shute after further trial abandoned their use and ordered them destroyed. At this juncture David Bruce, of New York, appeared at the foundry with a machine which he claimed remedied all the defects of the old machines, and offered it for sale to the company. Its merits were at once detected by Mr. Shute, and its defects also; but, believing that the defects could be remedied, he bought the right to use it in the manufacture of type for general sale, and to manufacture the machines for the New England market. Mr. Leonard, an intelligent artisan, was at once engaged to make a new machine, heavier in all its parts, with some alterations suggested by Mr. Shute. The result was a successful one, and until the patent on the machine expired the company held the market at its own price. The process of electrotyping fancy types and borders was also introduced by Mr. Shute, and added largely to the profits of the company's business. During his connection with the foundry company he laid the foundation for wealth on which, in later years, by shrewd business management he has been steadily building.

In 1848 Mr. Shute removed to Somerville, then a town in the sixth year of its municipal life, and at once won the confidence and esteem of his fellow-citizens. From 1853 to 1859, inclusive, after his retirement from active business in Boston, he served as chairman of the Board of Selectmen of his adopt-

ed town, and on declining further service, the town, at its annual meeting held on the 5th of March, 1860, voted "that the thanks of the town be presented to the Hon. James M. Shute, for the able, energetic and faithful manner in which he has for several years performed the arduous duties of chairman of the Board of Selectmen, and that they be entered upon the books of the town."

From 1861 to 1864, inclusive, he was a member of the Executive Council, and no member of the board during those years held more confidential relations with Governor Andrew, or was held by him in higher esteem. During the busiest and most exacting years of the war he was chairman of the Finance Committee of the Council, and the admirable financial condition of the Commonwealth at the close of the struggle is a sufficient commentary on his service.

As chairman of the Hoosac Tunnel Commission for several years, he rendered valuable service to the State. On the resignation, in 1866, of John M. Brooks, a member of the commission he was anxious to have ex-Governor Andrew appointed in his place, and proposed to surrender to him the position of chairman. Governor Bullock, of course, was ready to make the appointment, and Mr. Andrew gave a hesitating consent to accept it. This consent, however, he afterwards withdrew in the following letter to Mr. Shute which is included in this sketch for the purpose of showing both the relations existing between him and Mr. Shute, and the conscientiousness which he carried with him into the performance of public duties:

"96 WASHINGTON STREET, BOSTON, Oct. 16, 1866.

"My dear Mr. Shute:—I have again reconsidered the subject of which we talked yesterday, and with every desire to help you, and to aid the grand design of another through route to the Lakes, I am still wholly unable to perceive how I could be of substantial advantage without so far neglecting 'The Law' as to injure me pecuniarily very much more than any compensation I should receive would repay. For I could never be satisfied without trying to master every problem, nor without doing my utmost to conquer success, on whatever line of action we might undertake to 'fight it out.' Thus I should soon find myself in over head and ears, to this work, neglecting all other things, working at a trade other than my own, and losing sight of the only trade which is my own; and when I know so many men whom I think to be better fitted at the moment than I am to take a leading part on your Board, I do not feel that, in declining it, I omit any duty. I am very grateful for your kind and generous appreciation of me, as well as for the cordial and friendly way in which you have always treated me during an acquaintance both intimate and confidential, in which we have shared together the cares of office.

"Nor do I fail to recognize the Governor's good will and consideration towards me in consenting to entertain my name when presented and to give it precedence. I owe, both to the Governor and yourself, my hearty thanks, and hope always to remain,

"Your sincere friend & servant,

"JOHN A. ANDREW."

Mr. Shute married, November 25, 1835, Mary Eaton, daughter of Thomas Robinson, of Boston, at that time engaged in business in Chili, and has had thirteen children. Of these, two died in infancy, one, a girl, at four years of age, and two sons at full age. Of these two sons, Thomas Robinson died in the Feejee Islands, and the other, James M., Jr., married Helen

W. Chaffin

Damon, of Holden, and died in Somerville. The remaining children, five daughters and three sons, are all married. Walter, the oldest son, is engaged in the lumber business in Charlestown; Frank, the second son, carries on the hardware business in Boston; and Arthur, the third son, is in the lumber business in Ellsworth, Maine. Two of the daughters live in Cambridge, two in Somerville, and one in Boston.

About 1870 Mr. Shute suffered a severe fracture of a thigh-bone, from the effects of which he was for a long time confined to his house in Somerville. After a partial recovery he removed to Boston about twelve years ago, purchasing the house No. 137 Newbury Street, where, with his wife and the children of his deceased son James, he still lives. The writer of this sketch has known him for many years, both in public and private life, and has had occasion to know the esteem in which he has been held, both as a private citizen and a servant of the State.

KNOWLTON SAMPSON CHAFFEE.

Matthew Chaffee lived in Boston as early as 1636, and was a ship carpenter by trade. He was made a freeman May 17, 1637, and was a member of the Artillery Company in 1642, and removed to Newbury in 1649, where he bought a large farm of Dr. John Clark. Thomas Chaffee was in Hingham in 1636, and removed to Swansey before 1660. From one of these the subject of this sketch is descended.

He was born in Becket, Massachusetts, July 11, 1814. His father and grandfather, both named Thomas, lived in Becket and carried on the business of farming. Thomas Chaffee, the father, born in Becket, March 15, 1768, married at Ashford, Conn., November 21, 1791, Abigail, daughter of Colonel Abraham Knowlton, of Lee, and had the following children: Sampson Knowlton, born August 4, 1792; Frederick, November 25, 1793; Wolcott, May 3, 1795; Numan H., December 15, 1796; Alma, February 9, 1801; Anna H., February 4, 1803; Thomas S., March 24, 1805; Lucinda, January 12, 1807; Prentiss, January 1, 1809; Abigail H., April 12, 1811, and Knowlton Sampson, the subject of this sketch, July 11, 1814.

Mr. Chaffee attended the public schools of his native town and the Lenox Academy, leaving the latter institution at the age of eighteen. As his father's means were small he was obliged at this age to earn his own living and assist if possible in the maintenance of the family home. His first occupation was that of driving a peddler's wagon, which in the days before railroads were built, when small traders found it difficult to travel to central points for purchasers, and drummers were unknown, was an important one, and was carried on in New England to an extent almost equaling in magnitude in some instances, by especially enterprising men, the business of many well-known wholesale merchants of our

own day. In this line of business the late James Fiske began his career, and the highly finished carriages and well-groomed horses of the various owners and drivers rattled into the villages of Massachusetts with as much flourish and excitement as attended the arrivals of coaches on the different important lines of travel. It was not long before Mr. Chaffee owned and drove his own team, and by unusual enterprise and activity laid the foundations of the wealth which in later years he has been able to accumulate.

With a mind and resources outgrowing one after another the limited opportunities which such a man would naturally find in the kinds of business first sought by him in earning a livelihood, after a few years of peddling he engaged in the stage business on the great through route from Springfield to Albany. First as driver and afterwards as a proprietor, he continued in this business until the establishment of railroad lines drove the stages off the road. While acting as driver his day's work was in summer and winter, in all weathers from Springfield to West Stockbridge and back. By the exposure attending these early occupations he secured a rugged constitution which has served him well in the responsible enterprises with which he has since been connected. While still a young man he removed to Somerville, in the earliest years of that town, and established himself in the coal business at tide-water in East Cambridge. After living in Somerville three or four years he removed to East Cambridge and has since that time made that part of Cambridge his home.

In the coal business his means permitted him to start only in the humblest way. By economy, thrift, thorough integrity and the exercise of a shrewd judgment in the general management of his trade, the business, however, grew to large proportions, and the savings of his earlier years began to swell into rapidly accumulating wealth. So thoroughly were his business qualities appreciated by those with whom he came in contact, that he was early made a director in the Lechmere National Bank at East Cambridge, and finally president of the Union Horse Railway Company. He was also for many years the treasurer of the Union Glass Company in Somerville, of which his son was until his death business manager. His position in these two companies finally demanded the use of all his time and the coal business was abandoned. His position in the railroad company was especially an arduous and responsible one. The Union Company owned and ran all the Cambridge lines, and the Everett and Watertown and Newton lines, and, under his watchful eye and incessant scrutiny, grew into that great corporation which became finally the property of the West End Company, and the nucleus of that organization, which is doing so much towards the solution of the problem of rapid-transit in the city of Boston.

Mr. Chaffee married in Lee, January 27, 1836, Amelia Shaylor, daughter of Pliny Shaylor, of that

town, and has had one son, Charles S. Chaffee, who died in 1878, at the age of thirty-nine years, an active, enterprising man, who at the time of his death, as has already been mentioned, was the business manager of the Union Glass Company in Somerville.

Mr. Chaffee was brought up in the Baptist faith, and still belongs to the Baptist organization. In politics he was reared a Whig, but became a Democrat on the dissolution of the Whig party, and is an earnest and conscientious opponent of the policy of the Republicans. He was a delegate to the Democratic National Convention in Charleston in 1860, and at that time a supporter of Douglas for the Presidency. He was a member of the House of Representatives in 1863, and of the Senate in 1868, and in various other capacities he has faithfully served confiding constituencies. After a long life of active labor, he now lives in East Cambridge, in feeble health, and since the death of his wife, in 1889, has depended for the comforts which an old man needs, on the faithful and loving care of an adopted daughter, who anticipates every want and alleviates the burdens of his declining years.

CHARLES H. NORTH.

The subject of this sketch was born in Thomasville, Georgia, April 8, 1832, and is the son of Charles P. and Lydia (Kendall) North, of West Winsor, Vermont. He is descended from John North, who came to Boston in the "Susan and Ellen" in 1635, at the age of twenty, and settled in the same year in Farmington, Conn. His father, Charles P. North, was born in West Winsor, and his grandfather Aaron North, who became a permanent resident in West Winsor, was born in Farmington, Conn. Charles P. North, the father, was in business a number of years in the South, but when the war of 1861 broke out he was living in Covington, Kentucky. Early in the war he enlisted in an Ohio regiment, and while serving with the rank of captain, was killed at the battle of Shiloh.

At the age of four years Charles H. North, the subject of this sketch, went to West Winsor, and was brought up in the family of his grandfather Kendall, the father of his mother. Until he was fourteen years of age he attended the common schools of that town, and from fourteen to eighteen was employed in farming. At the age of eighteen, he went to Waltham, Mass., where, after a year's service in a bakery, he entered French's Academy, and there received an additional year's education. At the age of nineteen he entered the employ of Sewall Blood, a Waltham baker, and was engaged two years driving his customers' wagon. At the age of twenty-one he removed to Boston, and was employed in the Quincy Market by John P. Squire, at twelve dollars a month. He had already, before going to Waltham, a short experience in the same market.

At the age of twenty-two he leased stall No. 29, in

Quincy Market, and there established himself on his own account in the business of selling pork. The energy and fidelity to business which he displayed had already borne their fruit in result unusual for so young a man, and gave promise of a career of enterprise and success. His enlarging business required more room than a single stall could furnish, and not long after he established himself in No. 29, he bought out the lessee of No. 27, and occupied an entire square. Not long afterwards, he added the store now occupied by him in North Market Street to the needed accommodations of his business.

Until 1867, Mr. North continued alone in business, but in that year he formed a partnership with John N. Merriam, S. Henry Skilton and Newman E. Conant. Under the new partnership the business of killing hogs was added to their previous enterprise, and a killing and packing-house was established in Somerville. In 1872, Mr. North bought out the share of Mr. Merriam in the business, and that gentleman retired from the firm. At the end of ten years more he bought out Mr. Conant, and until the present year the firm has since continued with only Mr. North and Mr. Skilton as members.

In January, 1890, a corporation was formed with a capital of twelve hundred thousand dollars, and the partnership ceased to exist. Of this corporation entitled the "North Packing Company," G. F. Swift, of Chicago, is president; E. C. Swift, of Boston, treasurer; Charles H. North, general manager, and S. Henry Skilton, assistant manager.

In June, 1878, the packing-house of the firm of C. H. North & Co., in Somerville, was burned and a loss was sustained over and above insurance of eight hundred thousand dollars. Another packing-house was secured before the fire was extinguished, and preparations were at once made, not only to resume, but to largely increase the former business. With present accommodations the company is killing two thousand hogs daily, and arrangements are soon to be completed for the transaction of double that amount of business. At the present time the pay-roll of the company contains the names of thirteen hundred men, receiving thirteen thousand dollars per week. Probably the name of no man in the world is better known throughout the various channels of the special trade in which he is engaged than that of Mr. North. He finds his market in every nation of the globe, and it is not an exaggerated statement that the product of his establishment would furnish an abundance of food for a half a million of persons every day in the year.

Mr. North has discovered several remedies which are sold on their merits and which he believes are a great relief to suffering humanity. These remedies are: North's pure white pepsin, North's rheumatic cure, kidney cure, cure for heart disease and liver cure.

Mr. North after removing to Boston made that city

Wm. H. 1876

R. B. Stickney.

his place of residence until 1876, when he removed to Prospect Hill, Somerville, where he now lives. He married, September 24, 1856, Jane, daughter of Micah N. Lincoln, of West Windsor, Vermont, and has eight children now living: Wayne H., Charles L., Jennie, Mark N., George, Onata, Frederick K. and Harry J.

Mr. North is in theology orthodox, and in politics Republican, having departed from the Democratic faith in the transformation scenes immediately before and after the secession of the States of the South. It is only necessary to read the record of his career, to form a true estimate of the predominant traits in his character. To have created and controlled the great enterprise in which he has for so many years been engaged, required peculiar and strong natural powers, both physical and mental. These Mr. North possesses to an eminent degree. Good intellectual capacity, a readiness to plan and promptitude to execute, a devotion and concentratedness in his work, an indomitable resolution and a courage almost heroic, and withal a hopeful spirit not easily quenched, are the elements which have given their possessor power, and made his career a success. He illustrates well the true American, who with health, strength, industry and integrity, under the elevating influences of a free government, cannot fail to win both reputation and wealth.

RUFUS BARRUS STICKNEY.¹

The subject of this sketch is descended from Robert Stickney of Frampton, in Lincolnshire, England. William Stickney, son of Robert, was baptized December 30, 1558, and married, June 16, 1585, Margaret Pierson. William, son of the last William, was baptized in St. Mary's Church in Frampton, September 6, 1592. He came from Hull to New England in 1637 with his wife Elizabeth and three children, Samuel, Amos and Mary, and landed at Boston from whence he went with his family to Rowley, of which place he was one of the first settlers. Samuel Stickney, one of his three children, was born in England in 1633 and married, first, in Rowley, April 18, 1653, Julia Swan, and second, in Bradford, April 6, 1674, Prudence (Leaven) Gage. William, one of the children of Samuel, was born in Bradford, January 27, 1674, and married in that town, September 14, 1701, Anne Hazeltine. He died in Bradford, February 21, 1706, leaving three children. William, one of the children was born in Bradford, October 14, 1705, and married in Billerica, in June, 1729, Anne Whiting, who died in Billerica, March 25, 1749, at the age of forty-four years. He married second, November 23, 1749, Hannah (Ballard) widow of Jeremiah Abbot, of Billerica. His second wife died February 17, 1789, at the age of seventy-five. Eleaser Stickney, one of the fourteen children of the last William, was born in

Billerica, August 30, 1740, and married there, January 25, 1762, Martha, daughter of Samuel Brown, who died May 21, 1818. On the 24th of April, 1775, he enlisted from the town of Wilmington, as second lieutenant in Captain John Harnden's company in Colonel Ebenezer Bridge's regiment. He was afterwards ensign in Captain Ebenezer Harnden's company in the same regiment, and was with that company at the battle of Bunker Hill. In 1776 he enlisted as private in Captain Jonathan Brown's company, in Colonel David Green's regiment, and served in one or another station three years. After the war he removed to Tewksbury, and there died, January 5, 1824. William Stickney, one of the fourteen children of Eleazer, was born in Billerica, June 22, 1783, and removed to Boston in 1805, where he married, March 22, 1809, Lucy, daughter of Micah and Lucy (Howe) Drury, who was born in Framingham October 3, 1787, and died June 21, 1812. He married, second, in Boston, December 29, 1814, Margaret Nowell, who was born in Boston, July 30, 1792, and died December 15, 1840. He married, third, in Boston, July 10, 1842, Catherine P., widow of Artemas Hyde, and daughter of Joshua Hardy, of Boston. He at various times after leaving Boston lived at Medford and Charlestown and Somerville, and died in Somerville, January 12, 1868.

Rufus Barrus Stickney is the son of the last-mentioned William, and was born in Medford, October 1, 1824. His father was engaged as a retail grocer in Salem Street, in Boston, many years, and while in that business, began to prepare mustard for table use, and carry it about for sale. He finally abandoned his grocery business, and, removing to Medford in 1822, built in that town a small factory for the manufacture of mustard, the sale of which had so largely increased as to warrant the enterprise. In 1825, when Rufus was nine months old, he removed to Charlestown, and there erected a larger factory for his still increasing business. Rufus attended the public schools of Charlestown until he was thirteen years of age, when he entered his father's establishment, and began a business career, which has been eminently prosperous.

Up to 1842 the manufacture of mustard had been carried on by hand. At that time Rufus, who was then eighteen years of age, induced his father to put an engine into his factory, and thus make himself better able to meet demands which he thought he saw an opportunity of largely increasing. At that time, also, his father established a grocery store in connection with his mustard enterprise, and devoting himself to the store, surrendered the care and management of the factory to his son. In 1846, Rufus separated from his father, and began to manufacture mustard on his own account in South Boston, where he remained two years. In 1848 he formed a partnership with J. R. Poor, of Danvers, under the firm-name of Stickney & Poor, and the new concern built a factory in Charlestown for the purpose of grinding

¹ By Wm. T. Davis.

and packing mustard, spices and coffee. A store was also soon opened in Chatham Row, in Boston, for the sale of goods, the firm afterwards for some years occupying the stores 19 and 20 India Street. Mr. Poor left the firm in 1877, and since 1880, Mr. Stickney, retaining the old firm-name, has occupied the store No. 205 in State Street Block.

In 1867, Stickney & Poor built another and larger brick factory in Charlestown, retaining the old wooden one for purposes of storage. The business of Mr. Stickney now consists of the manufacture of mustard, coffee and spices, including cloves, cassia, mace, pimento and ginger, the grinding of herbs, the preparation of yeast powders, sauces and flavoring extracts, in which he employs about fifty hands, and finds for his product a market in every State in the Union. He imports his own raw materials, obtaining his mustard seed from England, Holland, Italy and California.

Mr. Stickney married, October 1, 1846, Mariana D., daughter of Henry Homer, of Boston, and had four children—one who died in infancy; Anna, who died in June, 1890; Susie, now living, and Rufus, who was engaged in business with his father, and died August 6, 1886. He married, second, October 26, 1865, Abbie L. Beck.

A fair estimate of the character of Mr. Stickney is suggested by his career. There are few men in business in Massachusetts whose name is more widely known. The products of his establishment have found their way into many thousands of households, and wherever they are used or known they carry with them a trade-mark which commands the utmost confidence and trust. From small beginnings, with a knowledge and experience commencing at the early age of thirteen years, he has built up an industry of large proportions and accumulated wealth. His career is only one of many illustrations of the folly of modern legislators who, forgetting that the factory is as much a place for the instruction of youth as the public school, pass laws forbidding their employment in those very occupations which can alone best prepare them for a life of enterprise and usefulness. Had Mr. Stickney remained longer over his books, under the eye of a teacher, he would probably have failed to learn the alphabet of a trade, upon a thorough knowledge of which, in all its parts, his success in life was to depend.

Mr. Stickney has devoted his whole time and energies to his business. In political associations a Republican, he has neither accepted nor sought office. In religion an avowed Unitarian, he has always avoided conspicuous notoriety in the affairs of his church. Shrewd, sagacious and prudent in financial affairs, he has been ready to give counsel and advice when asked, but has refrained from accepting positions of responsibility and trust when he knew that he could not give to them that care and scrutiny which the confidence of those interested demanded

and deserved. At the age of sixty-six he is still managing his affairs with unimpaired activity and zeal; and as a merchant and citizen, he has secured universal respect and esteem in both his commercial and civil life.

CHAPTER LIV.

HOPKINTON.

BY CLEMENT RESERVE.

HOPKINTON, which received its name from Edward Hopkins, is situated on the highest land in the extreme southwesterly corner of Middlesex County, about thirty miles southwesterly from Boston, on the line of the Hopkinton and Milford Railroad.

It is bounded on the north by Southborough and Ashland, on the east by Ashland and Holliston, on the south by Holliston and Milford, and on the west by Upton and Westboro'. The Congregational Church is in latitude 42° 13' south, and longitude 10° 31' west. Its Indian name was Quansigomog, and originally occupied by the Nipmuck Indians.

The geological formation is calcareous gneiss, and the land is hilly, broken and rocky, but productive and well watered, it being the principal source of the Charles, Sudbury and Blackstone Rivers. The town contains two large ponds. The larger of these is called Lake Whitehall, and is the source of the Sudbury River. The other pond, called North, is one of the sources of the Blackstone River. The ponds and streams abound in pickerel, perch, bream (*fomotis vulgaris*), and other edible fish, which made the place a favorite resort for the aborigines at the time of the settlement of the town. The town contains three large swamps, originally covered with cedars, which appears, by the town records, to have been of great value to the early settlers.

Saddle Hill in the northern, and Bear Hill in the southern part of the town, are noted rocky eminences, on which the rattlesnake formerly had its home.

The Hopkinton Mineral Springs, situated west of Lake Whitehall, were discovered in 1816, and at one time were quite celebrated as a fashionable resort. The waters contain carbonic acid, carbonate of lime, and now one of the springs is impregnated with sulphur. In the eastern part of the town—now Ashland—the Rev. John Eliot, previous to 1669, had established a band of "praying Indians" on the northern slope of Magonco Hill, and as early as 1669 had taught them to make cedar shingles and clapboards, of which Elliot says, "Unto which work in moyling in the swamp ye are fitter yn many English, and many English choose to buy ym of the Indians yn make ym themselves." Of these Indians Major-Gen. Gookin, in 1674, gave the following report: "Wagwonkmonkon is the seventh town where the 'praying Indians' inhabit. The

signification of the place's name is 'the place of great trees.' It is situated partly within the bounds of Natick, and partly upon land granted by the county. It lieth west-southerly from Boston, about twenty-four miles—midway between Natick and *Hassananiissett* (now Grafton). The number of the inhabitants are about eleven families and about fifty-five souls. There are men and women eight members of the church at Natick, and about fifteen baptized persons. The quantity of the land belonging to it is about 3000 acres. The Indians plant upon a great hill, which is very fertile; and these people worship God and keep the Sabbath, and observe civil order as do other towns. They have a constable and other officers. Their ruler's name is *Pomhamon*, a sober and active man, and pious. Their teacher's name is Job, a person well accepted for piety and ability among them. This town was the last settling of the old towns. They have plenty of corn, and keep some cattle and swine, for which the place is well accommodated."

It appears that *Nitus Annecocker*, Joshua Assalt, John Dublet, William Joseph and John Jackstram were members of the praying band of Indians, who, with others, under the lead of Nitus, made an attack on the 1st of February, 1676, upon the house of Thomas Eames, near Farm Pond, in Framingham. Mr. Eames had gone to Boston, but the mother and her nine children made a stout resistance; but she and four of the children were killed, and the remainder taken captive. Nitus, the leader of the party, was killed at Marlborough, on the 27th of March following. Annecocker died soon after, and three others were tried, condemned and executed Sept. 21, 1676.

What were left of the Magunko Indians at the close of King Philip's War moved from the place and joined the Natick Indians, who for a long time held possession of the Magunko lands. It was voted by them, September y^e 24, 1715, "That the land of Magunkook be sold to the trustees of Edward Hopkin's legacy; that Capt. Thomas Waban, Samuel Abraham, Solomon Thomas, Abraham Speen, Thomas Pegan, Isaac Nehemiah and Benjamin Fay be a committee of agents for the proprietors of Natick to agree with Captain Sewell, Mr. John Leveritt, Major Fitch and Mr. Daniel for y^e sale of the lands of Magunkook and to all things requisite in y^e law for y^e effectual inverting y^e said lands in y^e trustees of Hopkin's legacy."

On July 20, 1715, the trustees had petitioned the General Court for a license to purchase a tract of waste land known by the name of Magunkayog. This petition was granted, and in accordance with the petition and vote the following deed for eight thousand acres was executed by the Indians:

"A Copy of Record-Book 17, Page 627.

"Attorn, CHAS. B. SEEVERS, Rep.

"This Indenture, made the Eleventh Day of October, Anno Domini one Thousand Seven Hundred and fifteen, Annoz Regiz, Regiz Georgiz nunc Magna Britania, &c., Secundo, Between Thomas Waban, Samuel Abraham, Solomon Thomas, Abraham Speen, Thomas Pegan, Isaac Nehemiah and Benjamin Tray, a Committee or Agents for the Indian

Proprietors of the Plantation of Natick, within the County of Middlesex and Province of the Massachusetts Bay in New England, of y^e one part, and Joseph Dudley, William Tayler, Waitstill Winthrop, Samuel Sewall, Eliakim Hutchinson, Penn Townsend, Edward Bromfield, John Higginson and Simeon Stoddard, Esq^r., Increase Mather, Doctor in Divinity, Cotton Mather, Doctor in Divinity, Jon. Leverett, President of Harvard College, Jeremiah Dummer, John Burrill, Esq^r., William Brattle, Minister of Cambridge, Nehemiah Walter, Minister of Roxbury, Daniel Oliver & Thomas Fitch, Merchant, Andrew Belcher, Addington Davenport and Adam Winthrop, Esq^r., All Inhabitants within the Province aforesaid, Trustees appointed by a Decree in His Majesties High Court of Chancery, Dated the Nineteenth day of March, Anno Domini 1712, for the Purchasing Houses or Land for the perpetuating of the Charity of y^e Honorable Edward Hopkins, Esq., and Improving y^e same on y^e other part, Witnesseeth, that the said Thomas Waban, Samuel Abraham, Solomon Thomas, Abraham Speen, Thomas Pegan, Isaac Nehemiah and Benjamin Tray, a Committee or Agents as aforesaid, for Divers good Causes and Considerations, Them thereunto moving more especially for, and in Consideration of the Sum of Six Hundred pounds in Good Bills of Credit on the Province aforesaid To them in hand paid To & for the use, benefit and behoofe of the Proprietors of the Plantation of Natick and of the Order of Settled Indian Inhabitants thereof By the Trustees above named at and before the Ensealing and Delivery of this present Indenture. The Receipt of which sum to full Consent and Satisfaction they do hereby acknowledge, and for themselves and all other the proprietors and inhabitants of the Plantation or Town of Natick aforesaid, their heirs, Executors, Adms, Agents or Committees, Acquitt, Exonerate and Discharge the said Joseph Dudley, William Tayler, Waitstill Winthrop, Samuel Sewall, Eliakim Hutchinson, Penn Townsend, Edward Bromfield, John Higginson, Simeon Stoddard, Increase Mather, Cotton Mather, John Leverett, Jeremiah Dummer, John Burrill, William Brattle, Nehemiah Walter, Daniel Oliver, Thomas Fitch, Andrew Belcher, Addington Davenport and Adam Winthrop, Trustees as aforesaid, and their successors forever. Have given, granted, bargained, sold, aliened, Enfeoffed, Conveyed and Confirmed, and by these presents Do fully, freely, Clearly and absolutely give, Grant, bargain, Sell, alien, Enfeoffe, Release, Convey and Confirm unto the said Joseph Dudley, William Tayler, Waitstill Winthrop, Samuel Sewall, Eliakim Hutchinson, Penn Townsend, Edward Bromfield, John Higginson, Simeon Stoddard, Increase Mather, Cotton Mather, John Leverett, Jeremiah Dummer, John Burrill, William Brattle, Nehemiah Walter, Daniel Oliver, Thomas Fitch, Andrew Belcher, Addington Davenport and Adam Winthrop, Trustees as aforesaid (who have lately obtained liberty of the Great and General Court or Assembly of the Province aforesaid to Purchase the Same & to their Successors for Ever All that Certain Tract or parcel of Land Situate, lying and being within the County of Middlesex aforesaid Commonly Called and known by the Name of Magunkawog, containing by Estimation Eight Thousand Acres, be the Same more or less bounded Eastwardly and southwardly by Sherborne; Westwardly partly by Mendon, principally by Province Lands; Northwardly by Sudbury River, or, however, otherwise bounded or Reputed to be bounded. The said Land being more particularly Delineated, Set forth and Described in and by the Plan or Draught thereof hereunto annexed, Together with all and singular y^e Houseing, Edifices, Buildings, fruits, Trees, Woods, Underwoods, wayes, Waters, Water Courses, Rivers, Ponds, Brooks, Creeks, Mines, Minerals, profits, Privileges, rights, Commodities, hereditaments, emoluments, appur^s whatsoever, thereunto belonging or in any wise appertaining, and the Reversion and Reversions, Remainder and Remainders, Rents, Issues and profits thereof. To Have and To Hold the said Tract or Parcel of Land with the members, profits, privileges and appurtenances thereof and all other ye above granted Premises unto the said Joseph Dudley, William Tayler, Waitstill Winthrop, Samuel Sewall, Eliakim Hutchinson, Penn Townsend, Edward Bromfield, John Higginson, Simeon Stoddard, Increase Mather, Cotton Mather, John Leverett, Jeremiah Dummer, John Burrill, William Brattle, Nehemiah Walter, Daniel Oliver, Thomas Fitch, Andrew Belcher, Addington Davenport & Adam Winthrop, Trustees as aforesaid To & for the proper & sole use & uses Expressed in the Said Decree of His Majesties High Court of Chancery and to & for no other use, Intent and Purpose whatsoever to them & to their Successors for Ever. And ye said Thomas Waban, Samuel Abraham, Solomon Thomas, Abraham Speen, Thomas Pegan, Isaac Nehemiah and Benjamin Tray, Agents as aforesaid, Do Covenant and Grant to and with the Trustees aforesamed, and their Successors, That they, the said Grantors, in their Capacity aforesaid, Have in themselves by virtue of the power and Authority to them given by the Indian Proprietors of Natick, aforesaid, full power

and Lawfull Authority to give, grant, Sell and Convey the said Granted Land & premises in manner as aforesaid. The same being free and Clear and Clearly Exonerated & Discharged of & from all former and other Gifts, Grants, Bargains, Sales, Leases, Mortgages, Joyntures, Dowers, Titles, troubles, Charges and Incumbrances whatsoever. And further, they the said Thomas Waban, Samuel Abraham, Solomon Thomas, Abraham Speen, Thomas Pegun, Isaac Nehemiah and Benjamin Tray, Agents aforesaid, Do hereby Covenant and Grant for themselves & ye Proprietors of Natick, aforesaid (who are the owners of the said Granted Land and premises), and for their severall and Respective heires, Executors and Administrators To warrant & Defend the same and every part thereof unto them the said Joseph Dudley, William Taylor, Waitstill Winthrop, Samuel Sewall, Eliakim Hutchinson, Penn Townsend, Edward Bromfield, John Higginson, Simeon Stoddard, Increase Mather, Cotton Mather, John Leverett, Jeremiah Dummer, John Burrill, William Brattle, Nehemiah Walter, Daniel Oliver, Thomas Fitch, Andrew Belcher, Addington Davenport & Adam Winthrop, Trustees as aforesaid, and their Successors for the uses aforementioned forever against the Legall Claimes and Demands of all and Every person and persons whomsoever, Saving out of the Said Granted Land the farm of Messrs. Simpson and Parker's farm, so called, who have heretofore purchased the same. Signed, Sealed and Delivered in the presence of us John Cotton, Sam^l Bullard, W^m Ryder, Jr., John Wainsquon in Middlesex, October 15, 1715, Thomas Waban, Samuel Abraham, Solomon Thomas, Abraham Speen, Thomas Pegun, Isaac Nehemiah and Benjamin Tray, a Committee or Agents for the Indian Proprietors of Natick, personally appeared before me, one of His Majesties Justices of ye Peace for ye s^d & acknowledged the within written Instrument by them and in their said Capacity Executed to be their free act & Deed, Thomas Oliver, Justice of ye Peace.

"Charlestown, February 17, 1715-16, Rec'd & Accordingly Entered

"By SAM^l PHIPPS, Reg^t."

"Oct. 15, 1715-16."

Afterward the General Court gave to the trustees the province land, thus swelling their possessions to twenty-five thousand acres, which, on the petition of the trustees, was incorporated into a township by the name of Hopkinton. About one-half of these acres was leased for ninety-nine years, and the remainder was held as common land.

The province was granted on the condition that the fee should remain in the province. This reservation prevented the trustees from making valid conveyances, and the condition was removed December 1, 1716. But this question still remained: Could the trustees legally give leases to run more than twenty-one years, the land being "College or School land"? To remedy this, the General Court, December 3, 1719, by a special act gave the trustees power to execute leases for a term "not exceeding ninety-nine years."

Under these full powers, the trustees proceeded to renew the leases already made, and to give other leases, all to run for ninety-nine years from March 25, 1723, at an annual rent of three pence per acre. These terms, being unsatisfactory to the tenants, were changed by authority of the General Court, to an annual rent of one penny sterling per acre until March 25, 1823, and three pence per acre during the remaining time of the leases. In 1823 troubles arose again concerning the payments of rent, and the Courts and Legislature were resorted to by both par-

ties. The matter was formally settled in 1832, when the Legislature agreed to pay \$8000 to the trustees, and the tenants \$2000. In consideration of this amount, the trustees abandoned their claim in the land.

Edward Hopkins came from England in 1637, and settled in Connecticut, and became its Governor. Returning to England, he died in 1657, bequeathing the sum of five hundred pounds out of his estate in New England to trustees, to be invested, after the death of his wife, in houses and lands in New England; and that the income from these should be devoted to the support of students in the grammar and divinity schools at Cambridge, Mass., and to the purchase of books to be given to meritorious students at Harvard College.

The widow died in 1698, and after suit in chancery the trustees obtained a verdict in satisfaction of the legacy of five hundred pounds, amounting, with interest, to eight hundred pounds. Six hundred pounds of this sum was wasted in the purchase of the Maguncoy land in Hopkinton.

Hopkinton was originally bounded by Sudbury, Sherborn, Mendon, Sutton and Westboro'. At this time the town contained 25,000 acres. On June 14, 1735, by an act of the General Court, about 4000 acres were set off and formed a part of Upton, leaving about 21,000 acres.

The boundaries of the town remained the same until March 16, 1846, when a part was taken to form the town of Ashland. The town at the present time contains 18,509 acres.

It appears that in 1662 the Hon. William Crown received a grant of land, which, according to its description, would cover nearly the entire village of Ashland; the deed and plan describes five hundred acres "at a place near Cold Spring Brook, near the road which leadeth from Sudbury on to Connecticut, known as the (Connecticut Path), on the south side of a branch of the Sudbury River, at a place called by the Indians, Maguncoy hill."

The path referred to in the description of the grant to the Crown was a trail followed by a small party who passed up between the Charles and Sudbury Rivers, through Hopkinton, Grafton and Thompson in Connecticut, to the Connecticut River in 1633, and was followed by Hooker and his party of one hundred and sixty persons and about the same number of cattle, who started from Watertown in 1635 for the Connecticut River, crossed Cold Spring at the ford-way and entered upon and passed over the Crown Grant, thence through Hopkinton, following the old Indian trail, to what was called at that time Hassanamisset (now Grafton).

The town of Hopkinton was incorporated December 13, 1715, and the first town-meeting was held under the charter, March ye 25, 1724, under the following warrant:

"Whereas the Great and General Court of ye province of the Massa-

chusetts Bay in New England, have enacted and constituted all those lands formerly called Magunucog together with other waste lands lying westward to Suten line from said Magunucog township by the name of Hopkinton; and granted all and singular the privileges and powers of a township therunto. And whereas it has been a continued practice and custom in the several towns within the province annually to choose Selectmen for the managing of the prudentials of such towns, and other Town Officers for the executing of other matters and things in the law appointed by them to be done and performed; and whereas it is enacted by ye said Great and General Court that the Freeholders and Inhabitants of each town qualified to vote in town affairs shall sometime in the month of March, annually convene according to notice given to the said Freeholders and Inhabitants, and nominate and choose Selectmen or Townsmen, and all other officers and convenient for the ordering the prudentials of the town, and executing of all other matters and things in the law appointed by them to be done, and whereas, the Freeholders and other Inhabitants of the town of Hopkinton have often desired the direction and assistance of the Comety of the Trustees of the said Town of Hopkinton in order to their meeting and convening together for the purpose and intentions aforesaid, and the said Comety have desired the Subscriber, one of the said Comity and a Justice of the Peace within the said County of Middlesex to make out and sign notation, there being no Selectmen or other Town Officers in the said Town. These are therefore to notify the town tenants both Free Holders and other Inhabitants of Hopkinton aforesaid to meet at their Public Place for Divine Service and worship on the Lord's Day, on Wednesday the twenty-fifth of March, next coming, at ten of the clock before noon, to choose Selectmen and all other officers that the law allows of and directs unto. Given under my hand and seal in this twenty-ninth day of Feby. in the twelfth year of the reign of King George, Anno goodomi 1723-24.

JOHN LAMBERT,

"Justice of the Peace."

"Mr. John How you are directed to set up the above written notation in some public place in Hopkinton.

"J. LEVERETT."

On the day named in the warrant the town to the number of upwards of thirty met and transacted the following business:

"Voted—that we resolve to take upon us the powers of a Town and proceed and choose Town officers as the law directs shall be chosen in the month of March.

"Voted—to choose five Select Men.

"Voted—that all persons that have taken land and have made improvements in said town and are here present may vote.

"Voted—that John How shall be Moderator in said meeting.

"Voted—that John How should be Town Clerk and the first Selectman.

"Voted—that John Wood should be second Selectman.

"Voted—that Henry Mellen should be third Selectman.

"Voted—that Joseph Colar should be fourth Selectman.

"Voted—that James Colar should be fifth Selectman.

"Voted—that the divisional line as to the Constables Collections to be the hyway leading from Womalos meadow, so-called, to the meeting-house place and so continue to the river.

"Voted—that Samuell Watken should be Constable for the year ensuing, in ye East End of ye town.

"Voted—that Mr. Benjamin Burnap should be Constable in ye West end of ye town.

"Voted—that Mr. Elnathan Allen should be Town Treasurer for ye year ensuing.

"Voted—that Johnathan Knowlton, Thomas Walker, Mr. John Wood and James Coles, Senior, should be Surveyors of hyways for ye year ensuing.

"Voted—that Mr. Robert Hambleton and Mr. Robert Huston should be Tying men.

"Voted—that Joseph Comens, Ebenezer Lock should be fence viewers.

"Voted—that Francis Parse and Thomas Crook should be hogh Reeves.

"Voted that swine should run at large this year.

"Voted—that Daniel Stone and John Butler should be field drivers.

"Voted—that Thomas Walker should be Clark of the market."

The following is a list of those who served as selectmen in the years set against their names:

1724-25—Joseph Haven, Capt. John Wood, John Jones, Benjamin Burnap, Henry Mellen. Aug. 26, 1725, John How was chosen selectman to supply the place of Capt. John Wood, removed by death.

1725-26—John How, Joseph Haven, Robert Houston, Lieut. Henry Walker, Peter How.

1726-27—Joseph Haven, Benjamin Burnap, John Jones, Henry Mullen, Peter How.

1727-28—Henry Walker, John How, Peter How, Daniel Clafin, Robert Houston.

1728-29—Henry Walker, Henry Mellen, Joseph Haven, Joseph Bixby, Samuel Work.

1729-30—Henry Walker, Peter How, Joseph Bixby, John Brewer, Isaac Whitney.

1730-31—John Jones, Joseph Haven, Joseph Bixby, Paul Langdon, John Brower.

1731-32—John Jones, Joseph Haven, Paul Langdon, John Brewer, Deacon Bixby.

1732-33—Paul Langdon, Nathaniel Smith, John Jones, John Osborne, Edmund Bowker.

1733-34—Capt. Jones, Joseph Haven, Paul Langdon, Jabez Dodge, Peter How.

1734-35—Capt. Jones, Joseph Haven, Lieut. Paul Langdon, Ebenezer Kimbal, Peter How.

1735-36—Daniel Clafin, John Brewer, Joseph Hollen, Ebenezer Lock, Jacob Gibbs.

1736-37—Peter How, Jabez Dodge, Thomas Walker, Enth John Wood, John Brewer. The annual meeting held in March was, by the General Court, on the 6th day of June, declared null and void, and on the 26th day of July the following board was chosen. Capt. John Jones, Ebenezer Kimbal, Deacon Benjamin Burnap, Lieut. John Wood.

1737-38—John Jones, Peter How, Isaac Whitney, Benjamin Burnap, Jr., John Wood.

1738-39—John Jones, Joseph Haven, Peter How, Jabez Dodge, Ebenezer Kimbal.

1739-40—John Jones, James Gooch, John Haden, Ebenezer Kimbal, Benj. Burnap.

1740-41—John Jones, Joseph Haven, James Gooch, John Wood, Joseph Houghton.

1741-42—Capt. Gooch, Benj. Burnap, Thomas Walker, Lieut. Wood, Jacob Gibbs.

1742-43—John Jones, James Gooch, Charles Morris, Capt. Dunch, Deacon Kimble.

1743-44—John Jones, Capt. James Gooch, Charles Morris, Henry Mellen, Roger Dunch.

1744-45—Major John Jones, Henry Mellen, Thomas Walker, C. Morris, Benj. Wood.

1745-46—John Jones, James Gooch, Henry Mellen, Charles Morris, Benj. Burnap.

1746-47—Peter How, John Wood, Thomas Walker, John Jones, Joseph Haven.

1747-48—James Gooch, John Jones, Dec. Kimble, Solomon Parks, Dec. Mellen.

1748-49—John Jones, James Gooch, Henry Mellen, John Wood, Thomas Walker.

1749-50—John Jones, Benj. Wood, Henry Mellen, James Work, John Rockwood.

1750-51—John Wood, Daniel Burnap, Timothy Townsend, Joseph Cody, Joseph Haven, Jr.

1752—John Wilson, Henry Mellen, John Jones, Thomas Wood, Jason Walker.

1753—John Wilson, Joseph Wood, Jacob Gibbs, Benj. Wood, George Carriel.

1754—John Wilson, Henry Mellen, Joseph Wood, James Work, Eleazer Rider.

1755—John Wood, Joseph Cody, John Nutt, John Wilson, Henry Mellen.

1756—Thomas Mellen, Joseph Albee, Lamson Jones, Caleb Clafin, John Wood.

1757—Thomas Mellen, Joseph Albee, John Wilson, John Jones, John Chamberlain.

1758—Joseph Albee, John Wilson, Thomas Mellen, Richard Smith, James Nutt.

1759—John Wood, Samuel Chamberlain, Joseph Mellen, John Wilson, Jason Walker.

1760—John Wilson, Joseph Mellen, Jacob Chamberlain, William Eames, Israel Walker.

- 1761—John Wilson, Joseph Albee, James Wark, John Jones, Joseph Mellen.
- 1762—John Wilson, John Holmes, John Jones, Jr., Joseph Mellen, Samuel Chamberlain.
- 1763—Thomas Mellen, Timothy Townsend, John Holmes, John Chamberlain, Jacob Gibbs.
- 1764—John Wilson, John Jones, John Albee, John Nutt, Samuel Chamberlain.
- 1765—John Jones, James Wark, Thomas Mellen, Timothy Townsend, Samuel Chamberlain.
- 1766—John Wilson, Joseph Mellen, John Chamberlain, Jacob Gibbs, John Osborn.
- 1767—Joseph Mellen, John Wilson, Eleazer Rider, Timothy Townsend, James Nutt.
- 1768—Thomas Mellen, Joseph Albee, Timothy Townsend, John Chamberlain, Abraham Tilton.
- 1769—Jason Walker, John Holmes, John Jones, James Wark, John Clark.
- 1770—John Wilson, Jason Walker, John Jones, Joseph Wood, Samuel Parks.
- 1771—Joseph Mellen, Samuel Chamberlain, Roger Dench, Elisha Hayden, James Hisecock.
- 1772—John Wilson, John Holmes, James Nutt, Samuel Parks, Roger Dench.
- 1773—Thomas Mellen, Deacon Haven, Samuel Chamberlain, Gilbert Dench, William Andrews.
- 1774—Captain Mellen, Captain Townsend, Jasper Daniels, Jacob Gibbs, Colonel Jones.
- 1775—Captain Holmes, Samuel Parks, Barrekias Morse, Gilbert Dench, Jasper Daniel.
- 1776—Captain Holmes, Colonel Jones, Barrekias Morse, Samuel Parks, Ebenezer Claffin, Jr.
- 1777—Colonel Jones, Moses Haven, Samuel Parks, Samuel Bowker, Walter McFarland.
- 1778—Colonel Jones, Barrekias Morse, Captain Dench, Edmund Chamberlain, Henry Mellen.
- 1779—Colonel Jones, Barrekias Morse, Samuel Parks, Captain Holmes, Isaac Clark, Jr.
- 1780—Captain Dench, David Cutler, Captain Eames, Isaac Clark, Samuel Hayden.
- 1781—Colonel Jones, Bars. Morse, Captain Holmes, Henry Mellen, Matthew Medcalf.
- 1782—Henry Mellen, Matthew Medcalf, Abner Fiske, Captain McFarland, James Freeland.
- 1783—Matthew Medcalf, Captain Holmes, Bars. Morse, Isaac Clark, Isaac Burnap.
- 1784—Colonel Jones, Matthew Medcalf, David Cutler, Samuel Haven, John Freeland.
- 1785—Matthew Medcalf, Bars. Morse, Henry Mellen, James Nutt, John Hayden.
- 1786—Captain Holmes, Colonel Jones, Bars. Morse, Samuel Parks, Ebenezer Claffin, Jr.
- 1787—Captain Walter McFarland, Lieutenant Abel Fiske, Isaac Burnap, Captain N. Perry, Jeremiah Stimpson.
- 1788—Captain Gilbert Dench, Captain John Holmes, Lieutenant Isaac Burnap, Joseph Walker, Captain Nathaniel Perry.
- 1789—Henry Mellen, Joseph Walker, Samuel Haven, Nehemiah How, Timothy Townsend.
- 1790—Abel Fiske, Walter McFarland, Henry Mellen, John O. Wilson, Benj. Adams.
- 1791—Abel Fiske, Henry Mellen, Isaac Burnap, Aaron Claffin, Wm. Valentine.
- 1792—Henry Mellen, Walter McFarland, Nehemiah How, Wm. Valentine.
- 1793—Matthew Metcalf, Colonel Nathan Perry, Joseph Walker, Wm. Valentine, Wm. Nutt.
- 1794—Henry Mellen, Nehemiah How, Joseph Walker, Nathan Perry, John Goulding.
- 1795—Joseph Walker, Nehemiah How, Samuel Haven, Dr. Jeremy Stimpson, Eleazer Perry.
- 1796—Joseph Walker, Nehemiah How, Samuel Haven, Isaac Burnap, Moses Berry.
- 1797—Joseph Walker, Nehemiah How, Samuel Haven, Isaac Burnap, Johnathan Stearns.
- 1798—Joseph Walker, Henry Mellen, Nathan Perry, Nehemiah How, John Haven.
- 1799—Timothy Shepard, Henry Mellen, Nathan Perry, Joel Norcross, Josiah Rockwood.
- 1800—Dr. Shepard, Henry Mellen, Dec. Walker, Nathan Perry, Capt. Wm. Wood.
- 1801—Nathan Perry, Nehemiah How, Walter McFarland, Johnathan Stearns, Wm. Wood.
- 1802—Nathan Perry, Wm. Wood, Asa Eames, Johnathan Stearns.
- 1803—Timothy Shepard, Nathan Perry, Moses Chamberlain, Josiah Rockwood, Sampson Bridges.
- 1804—Timothy Shepard, Benj. Adams, Joel Norcross, Benj. Pond, Isaac Burnap.
- 1805—Benj. Adams, Benj. Pond, Joel Norcross, Moses Chamberlain, John Goulding.
- 1806—Moses Chamberlain, Benj. Adams, Benj. Pond, Abijah Ellis, Joseph Morse.
- 1807—Asa Eames, Abijah Ellis, Samuel Phipps, Aaron Smith, Benj. Herrick.
- 1808—Abijah Ellis, Samuel Phipps, Abel Smith, Daniel White, Fisher Metcalf.
- 1809—Abijah Ellis, Samuel Phipps, Nathan Perry, Elisha Adams, Joseph Morse.
- 1810—Walter McFarland, Nathan Perry, Joel Norcross, Joseph Valentine, Ameziah Claffin.
- 1811—Moses Chamberlain, Nathan Perry, Joseph Walker (2d), Perry Daniels, Joel Norcross.
- 1812—Joseph Valentine, Joel Norcross, Nathaniel Loring, Isaac Burnap, David Eames.
- 1813—Joseph Valentine, Ameziah Claffin, Nathaniel Loring, David Eames, Samson Bridges.
- 1814—Joseph Valentine, Ameziah Claffin, Samson Bridges, Wm. Rockwood, Wm. Wood.
- 1815—Joseph Valentine, Ameziah Claffin, Wm. Wood, Wm. Rockwood, Joseph Walker.
- 1816—Benj. Adams, Joseph Walker, Samson Bridges, Nathan Phipps, Wm. Rockwood.
- 1817—Nathan Phipps, Samson Bridges, Joseph Walker, Isaac Homes, Joseph Smith.
- 1818—Nathan Phipps, Samson Bridges, Isaac Homes, Joseph Smith, Joseph Morse.
- 1819—Joseph Valentine, Samson Bridges, Ameziah Claffin, David Eames, Elijah Fitch.
- 1820—Joseph Valentine, Nathan Phipps, Samson Bridges, Elijah Fitch, Isaac Homes.
- 1821—Nathan Phipps, Samson Bridges, Elijah Fitch, Isaac Homes, Thomas Buckley.
- 1822—Nathan Phipps, Joseph Valentine, Michael Homer, Nathan Woolson, Carlton Corbett.
- 1823—Joseph Valentine, Elijah Fitch, Carlton Corbett, Michael Homer, Samuel Prentiss.
- 1824—Joseph Valentine, Nathan Phipps, Samson Bridges, Arba Thayer, John Singletary.
- 1825—Joseph Valentine, Nathan Phipps, Arba Thayer, William Jenison, Mathew Metcalf.
- 1826—Nathan Phipps, Arba Thayer, Mathew Metcalf, William Jenison, Timothy Perry.
- 1827—Nathan Phipps, Arba Thayer, Mathew Metcalf, Timothy Perry, Nathan Adams.
- 1828—Abraham Harrington, Arba Thayer, Mathew Metcalf, Timothy Perry, John Goulding, Jr.
- 1829—Mathew Metcalf, Nathan Phipps, James Jackson, Aaron Smith, John H. Jones.
- 1830—Mathew Metcalf, Nathan Phipps, Arba Thayer, John H. Jones, Amasa Eames.
- 1831—Samuel B. Walcott, Arba Thayer, Amasa Eames, Nathan Adams, Richard Gamage.
- 1832—Samuel B. Walcott, Mathew Metcalf, Ameziah Claffin, Samson Bridges, Richard Gamage.
- 1833—Samuel B. Walcott, Nathan Phipps, Samson Bridges, Ezra Haskell, John Stone.
- 1834—Samuel B. Walcott, Nathan Phipps, Samson Bridges, Amasa Eames, Ezra Haskell.
- 1835—Samuel B. Walcott, Nathan Phipps, Amasa Eames, John Stone, Samuel D. Davonport.
- 1836—Samuel B. Walcott, Moses Phipps, Samson Bridges, Josiah Burnam, Cromwell Gibbs.
- 1837—Nathan Phipps, Josiah Burnam, Cromwell Gibbs, Albert Wood, Abner Albee.

1838—Albert Wood, Amara Eames, Josiah Burnam, Willard Wadsworth, Silas Mirick.
 1839—Mathew Metcalf, Willard Wadsworth, William A. Phipps, Joseph Woodward, William Adams.
 1840—Willard Wadsworth, Joseph Woodward, William Adams, Montgomery Bixby, Nathan Coburn.
 1841—Moses Phipps, Nehemiah Pierce, Willard Wadsworth, Jonas Phelps, Silas Moore.
 1842—Moses Phipps, Nehemiah Phipps, A. R. Ellery, Benjamin Homer, Almora Adams.
 1843—Amara Eames, Nehemiah Pierce, Abram R. Ellery.
 1844—Amara Eames, Albert Wood, John Workes, William A. Phipps, Addison Thompson.
 1845—Amara Eames, Cromwell Gibbs, William Seaver, Calvin Dyer, John Workes.
 1846—Cromwell Gibbs, Nehemiah Pierce, Nathan P. Coburn.
 1847—Henry Waldron, Charles Seaver, Joseph Woodward, Benjamin F. Herrick, Augustus Phipps.
 1848—Augustus Phipps, Charles Seaver, Joseph Woodward, Benj. F. Herrick, Almon Adams.
 1849—William A. Phipps, William Claflin, Isaac V. Adams, Lowell Claflin, Hiram Comee.
 1850—William Claflin, Isaac V. Adams, Dexter Rice, Uriah Bowker, A. G. Walker.
 1851—Albert Wood, Samuel D. Davenport, Eliakim A. Bates, John A. Bagley, David W. Eames.
 1852—Albert Wood, A. G. Walker, Uriah Bowker, William Adams, Cromwell Gibbs.
 1853—Augustus Phipps, Joseph Woodward, Amasa Pierce, Uriah Bowker, Artemus Johnson.
 1854—Albert Wood, Uriah Bowker, A. W. Johnson, Amasa Pierce, Cromwell Gibbs.
 1855—Isaac V. Adams, Almond Adams, Addison Thompson, Samuel D. Davenport.
 1856—Almon Adams, I. V. Adams, Ambrose Woolson, A. W. Johnson, Cromwell Gibbs.
 1857—Albert Woods, A. W. Johnson, C. W. Claflin, Daniel T. Bridges, F. B. Mansfield.
 1858—Almond Adams, C. W. Claflin, D. T. Bridges, P. R. H. Matthews, David Eames.
 1859—B. F. Herrick, F. B. Mansfield, Gardner Parker, E. A. Bates, David Eames.
 1860—E. A. Bates, F. B. Mansfield, Otis L. Woods, David Eames, L. R. Mayberry.
 1861—N. P. Coburn, E. A. Bates, B. F. Mansfield, David Eames, Otis L. Woods.
 1862—N. P. Coburn, E. A. Bates, Gardner Parker, C. P. Morse, Thos. Meade.
 1863—N. P. Coburn, E. A. Bates, Gardner Parker, C. P. Morse, Thos. Meade.
 1864—N. P. Coburn, E. A. Bates, Gardner Parker, C. P. Morse, Thos. Meade.
 1865—E. A. Bates, E. Thompson, Thos. Meade, Charles Seaver, M. C. Phipps.
 1866—E. A. Bates, E. Thompson, M. C. Phipps.

 1881—C. Meserve, D. J. O'Brien, M. M. Woods.
 1882—M. C. Phipps, D. J. O'Brien, M. M. Woods, L. H. Wakefield, Wm. O'Shaughnessy.
 1883—Erastus Thompson, D. J. O'Brien, M. M. Woods, M. C. Phipps, John Phelan.
 1884—Erastus Thompson, D. J. O'Brien, M. M. Woods, John Phelan, Horace Wood.
 1885—Horace Wood, D. J. O'Brien, John Phelan.
 1886—Horace Wood, D. J. O'Brien, John Phelan, Granby A. Bridges, Gardner P. Woods.
 1887—M. M. Woods, D. J. O'Brien, John Phelan, Horace Wood, R. M. Fahy.
 1888—M. M. Woods, Philip H. Carroll, Horace Phipps.
 1889—Horace Phipps, Marcus M. Woods, John Loughlin.
 1890—H. Phipps, John Loughlin, Fred A. Wood.

A list of the moderators of the annual meetings, treasurer, clerk and representative of each year:

1724—John How, moderator; Elnathan Allen, treasurer; John How, clerk.
 1724-25—Henry Mellen, moderator; John Jones, treasurer; Joseph Haven, clerk.
 1725-26—John How, moderator; John How, treasurer; Joseph Haven, clerk.
 1726-27—John How, moderator; John How, treasurer; Joseph Haven, clerk.
 1727-28—Henry Walker, moderator; John How, treasurer; Henry Walker, clerk.
 1728-29—Henry Walker, moderator; Daniel Claflin, treasurer; Joseph Haven, clerk.
 1729-30—Henry Walker, moderator; Daniel Claflin, treasurer; Henry Walker, clerk.
 1730-31—John Jones, moderator; Daniel Claflin, treasurer; Joseph Haven, clerk.
 1731-32—John Jones, moderator; Daniel Claflin, treasurer; Joseph Haven, clerk.
 1732-33—Paul Langdon, moderator; Daniel Claflin, treasurer; Joseph Haven, clerk.
 1733-34—John Jones, moderator; Daniel Claflin, treasurer; Joseph Haven, clerk.
 1734-35—John Jones, moderator; Daniel Claflin, treasurer; Joseph Haven, clerk; John Jones, representative.
 1735-36—Peter How, moderator; Daniel Claflin, treasurer; Daniel Claflin, clerk; Capt. John Jones, representative.
 1736-37—John Jones, moderator; Thomas Walker, treasurer; Peter How, clerk.
 July 28th—John Jones, moderator; Thomas Walker, treasurer; Ebenezer Kimbal, clerk.
 1737-38—John Jones, moderator; Thomas Walker, treasurer; Peter How, clerk.
 1738-39—John Jones, moderator; Nathaniel Smith, treasurer; Peter How, clerk.
 1739-40—John Jones, moderator; Joseph Haven, treasurer; Peter How, clerk; John Jones, representative.
 1740-41—John Jones, moderator; Joseph Haven, treasurer; Joseph Haven, clerk; John Jones, representative.
 1741-42—Capt. Gooch, moderator; Thomas Walker, treasurer; Joseph Haven, clerk; John Jones, representative.
 1742-43—John Jones, moderator; Thomas Walker, treasurer; Charles Morris, clerk; John Jones, representative.
 1743-44—John Jones, moderator; Thomas Walker, treasurer; Charles Morris, clerk; John Jones, representative.
 1744-45—John Jones, moderator; Thomas Walker, treasurer; Charles Morris, clerk; John Jones, representative.
 1745-46—John Jones, moderator; Thomas Walker, treasurer; Charles Morris, clerk; John Jones, representative.
 1746-47—John Jones, moderator; Thomas Walker, treasurer; James Gooch, clerk; John Jones, representative.
 1747-48—James Gooch, moderator; Thomas Walker, treasurer; James Gooch, clerk.
 1748-49—John Jones, moderator; Thomas Walker, treasurer; James Gooch, clerk.
 1749-50—John Jones, moderator; Thomas Walker, treasurer; Thomas Walker, clerk; John Jones, representative.

- 1750-51—John Jones, moderator; Thomas Walker, treasurer; Thomas Walker, clerk.
- 1752—Joseph Haven, moderator; Thomas Walker, treasurer; Thomas Walker, clerk.
- 1753—John Wilson, moderator; Timothy Townsend, treasurer; Thomas Walker, clerk.
- 1754—Henry Mellen, moderator; Joseph Haven, treasurer; Thomas Walker, clerk.
- 1755—Henry Mellen, moderator; Joseph Haven, treasurer; Thomas Walker, clerk.
- 1756—John Jones, moderator; Timothy Townsend, treasurer; Timothy Townsend, clerk.
- 1757—John Wilson, moderator; Timothy Townsend, treasurer; Timothy Townsend, clerk.
- 1758—Henry Mellen, moderator; Timothy Townsend, treasurer; Timothy Townsend, clerk.
- 1759—Henry Mellen, moderator; Timothy Townsend, treasurer; Timothy Townsend, clerk.
- 1760—Thomas Mellen, moderator; Jacob Gibbs, treasurer; John Wilson, clerk; John Jones, representative.
- 1761—John Jones, moderator; Jason Walker, treasurer; John Wilson, clerk.
- 1762—John Jones, moderator; Jason Walker, treasurer; John Wilson, clerk.
- 1763—Thomas Mellen, moderator; Jason Walker, treasurer; Jason Walker, clerk; John Jones, representative.
- 1764—John Jones, moderator; Jason Walker, treasurer; Jason Walker, clerk.
- 1765—Thomas Mellen, moderator; Jason Walker, treasurer; Jason Walker, clerk; John Jones, representative.
- 1766—Thomas Mellen, moderator; Jason Walker, treasurer; Jason Walker, clerk.
- 1767—Joseph Mellen, moderator; Jason Walker, treasurer; Jason Walker, clerk; Joseph Mellen, representative.
- 1768—Joseph Mellen, moderator; Jason Walker, treasurer; Jason Walker, clerk; Joseph Mellen, representative.
- 1769—John Wilson, moderator; John Abbe, treasurer; John Abbe, clerk; Joseph Mellen, representative.
- 1770—John Wilson, moderator; John Abbe, treasurer; John Abbe, clerk.
- 1771—John Wilson, moderator; Joseph Mellen, treasurer; Samuel Barrett, Jr., clerk; Joseph Mellen, representative.
- 1772—Samuel Chamberlain, moderator; Jacob Gibbs, treasurer; Samuel Barrett, Jr., clerk; John Wilson, representative.
- 1773—Thomas Mellen, moderator; Jacob Gibbs, treasurer; Samuel Barrett, clerk; John Wilson, representative.
- 1774—Capt. Mellen, moderator; Jacob Gibbs, treasurer; Samuel Barrett, clerk; Capt. Mellen, representative.
- 1775—John Homes, moderator; John Homes, treasurer; Samuel Barrett, clerk.
- 1776—Col. Jones, moderator; James Nutt, treasurer; Samuel Barrett, clerk; John Homes, representative.
- 1777—Col. Jones, moderator; James Nutt, treasurer; Samuel Barrett, clerk.
- 1778—Capt. Dench, moderator; James Nutt, treasurer; Samuel Barrett, clerk.
- 1779—Col. Jones, moderator; James Nutt, treasurer; Samuel Barrett, clerk.
- 1780—Capt. Dench, moderator; David Cutter, treasurer; Samuel Barrett, clerk; Gilbert Dench, representative.
- 1781—Capt. Dench, moderator; David Cutter, treasurer; Samuel Barrett, clerk; Gilbert Dench, representative.
- 1782—Col. Jones, moderator; Joseph Walker, treasurer; Samuel Barrett, clerk; Gilbert Dench, representative.
- 1783—Mathew Metcalf, moderator; Joseph Walker, treasurer; Samuel Barrett, clerk.
- 1784—Col. Jones, moderator; Joseph Walker, treasurer; Samuel Barrett, clerk.
- 1785—Mathew Metcalf, moderator; Joseph Walker, treasurer; Samuel Barrett, clerk; Gilbert Dench, representative.
- 1786—Col. Jones, moderator; James Nutt, treasurer; Samuel Barrett, clerk; Walter McFarland, representative.
- 1787—Mathew Metcalf, moderator; Mathew Metcalf, treasurer; Thomas Freeland, clerk; Gilbert Dench, representative.
- 1788—Gilbert Dench, moderator; Mathew Metcalf, treasurer; Thomas Freeland, clerk; Walter McFarland, representative.
- 1789—Gilbert Dench, moderator; Mathew Metcalf, treasurer; Thomas Freeland, clerk.
- 1790—Gilbert Dench, moderator; Samuel Haven, treasurer; Thomas Freeland, Jr., clerk; Eben Clafin, representative.
- 1791—Dr. Jeremy Stimpson, moderator; Samuel Haven, treasurer; Thomas Freeland, Jr., clerk; Eben Clafin, representative.
- 1792—Henry Mellen, moderator; Samuel Haven, treasurer; Thomas Freeland, clerk.
- 1793—Mathew Metcalf, moderator; Samuel Haven, treasurer; Thomas Freeland, clerk; Mathew Metcalf, representative.
- 1794—Dr. John Nelson, moderator; Timothy Townsend, treasurer; Thomas Freeland, clerk; Mathew Metcalf, representative.
- 1795—Gilbert Dench, moderator; Timothy Townsend, treasurer; Thomas Freeland, clerk; Mathew Metcalf, representative.
- 1796—John O. Wilson, moderator; Moses Chamberlain, treasurer; Thomas Freeland, clerk; Gilbert Dench, representative.
- 1797—John O. Wilson, moderator; Moses Chamberlain, treasurer; Thomas Freeland, clerk; Walter McFarland, representative.
- 1798—Walter McFarland, moderator; Moses Chamberlain, treasurer; Thomas Freeland, clerk; Walter McFarland, representative.
- 1799—Timothy Shepard, moderator; Moses Chamberlain, treasurer; Ephrm. Read, clerk; Walter McFarland, representative.
- 1800—Doct. Shepard, moderator; Moses Chamberlain, treasurer; Ephrm. Read, clerk; Dr. Shepard, representative.
- 1801—Walter McFarland, moderator; Joseph Walker, treasurer; Ephrm. Read, clerk; Timothy Shepard, representative.
- 1802—Ass. Eames, moderator; Joseph Walker, treasurer; Ephrm. Read, clerk.
- 1803—Timothy Shepard, moderator; Joseph Walker, treasurer; Ephrm. Read, clerk; Dr. Shepard, representative.
- 1804—Walter McFarland, moderator; Joseph Walker, treasurer; Ephrm. Read, clerk; Walter McFarland, representative.
- 1805—Moses Chamberlain, moderator; Joseph Walker, treasurer; Ephrm. Read, clerk; Walter McFarland, representative.
- 1806—Moses Chamberlain, moderator; John Goulding, treasurer; Ephrm. Read, clerk; Walter McFarland, representative.
- 1807—Ass. Eames, moderator; John Goulding, treasurer; Ephrm. Read, clerk; Walter McFarland, representative.
- 1808—Ass. Eames, moderator; John Goulding, treasurer; Ephrm. Read, clerk; Walter McFarland, representative.
- 1809—Moses Chamberlain, moderator; John Goulding, treasurer; Ephrm. Read, clerk; Walter McFarland, representative.
- 1810—Moses Chamberlain, moderator; John Goulding, treasurer; Ephrm. Read, clerk; Moses Chamberlain, representative.
- 1811—Moses Chamberlain, moderator; John Goulding, treasurer; Ephrm. Read, clerk; Moses Chamberlain, representative.
- 1812—Joseph Valentine, moderator; Thomas Bucklin, treasurer; Ephrm. Read, clerk; Joseph Valentine and Moses Chamberlain, representatives.
- 1813—Joseph Valentine, moderator; Thomas Bucklin, treasurer; Ephrm. Read, clerk; Joseph Valentine and Moses Chamberlain, representatives.
- 1814—Joseph Valentine, moderator; Thomas Bucklin, treasurer; Ephrm. Read, clerk.
- 1815—Joseph Valentine, moderator; Thomas Bucklin, treasurer; Ephrm. Read, clerk.
- 1816—Nathan Phipps, moderator; Thomas Bucklin, treasurer; Ephrm. Read, clerk; Nathan Phipps and Walter McFarland, representatives.
- 1817—Nathan Phipps, moderator; Thomas Bucklin, treasurer; Ephrm. Read, clerk.
- 1818—Nathan Phipps, moderator; Thomas Bucklin, treasurer; Ephrm. Read, clerk.
- 1819—Nathan Phipps, moderator; Thomas Bucklin, treasurer; Ephrm. Read, clerk.
- 1820—Joseph Valentine, moderator; Moses Chamberlain, treasurer; Ephrm. Read, clerk; Nathan Phipps, representative.
- 1821—Nathan Phipps, moderator; Moses Chamberlain, treasurer; Ephrm. Read, clerk.
- 1822—Nathan Phipps, moderator; Moses Chamberlain, treasurer; Ephrm. Read, clerk; Joseph Valentine, representative.
- 1823—Joseph Valentine, moderator; Moses Chamberlain, treasurer; Ephrm. Read, clerk; Joseph Valentine, representative.
- 1824—Joseph Valentine, moderator; Moses Chamberlain, treasurer; Ephrm. Read, clerk; Joseph Valentine, representative.
- 1825—Joseph Valentine, moderator; Moses Chamberlain, treasurer; Ephrm. Read, clerk; Joseph Valentine, representative.

1826—Nathan Phipps, moderator; Moses Chamberlain, treasurer; Ephr. Read, clerk; Nathan Phipps, representative.

1827—Nathan Phipps, moderator; Moses Chamberlain, treasurer; D. Singletary, clerk; Thomas Bucklin, representative.

1828—A. Harrington, moderator; Moses Chamberlain, treasurer; D. Singletary, clerk.

1829—Nathan Phipps, moderator; Moses Chamberlain, treasurer; D. Singletary, clerk; Thomas Bucklin, Matthew Metcalf, representatives.

1830—Nathan Phipps, moderator; Moses Chamberlain, treasurer; D. Singletary, clerk; Mathew Metcalf, representative.

1831—Nathan Adams, moderator; D. Singletary, treasurer; D. Singletary, clerk; S. B. Walcott, representative.

1832—S. B. Walcott, moderator; D. Singletary, treasurer; D. Singletary, clerk.

1833—S. B. Walcott, moderator; Daniel Eames, treasurer; D. Singletary, clerk; S. B. Walcott, representative.

1834—S. B. Walcott, moderator; D. Singletary, treasurer; D. Singletary, clerk; S. B. Walcott, Nathan Phipps, representatives.

1835—Nathan Phipps, moderator; D. Singletary, treasurer; J. D. Singletary, clerk; S. B. Walcott, Nathan Phipps, representatives.

1836—S. B. Walcott, moderator; D. Singletary, treasurer; D. Singletary, clerk; S. B. Walcott, Michael Homer, representatives.

1837—Nathan Phipps, moderator; D. Singletary, treasurer; D. Singletary, clerk; Jeffrees Hall, representatives.

1838—Amara Eames, moderator; Augt. Phipps, treasurer; D. Singletary, clerk; Moses Phipps, Jefferson Pratt, representatives.

1839—Mathew Metcalf, moderator; Daniel Singletary, treasurer; D. Singletary, clerk; Jefferson Pratt, Amara Eames, representatives.

1840—Amara Eames, moderator; Marshall Whitney, treasurer; D. Singletary, clerk; Jefferson Pratt, representative.

1841—S. B. Walcott, moderator; Marshall Whitney, treasurer; Augt. Phipps, clerk; Amara Eames, representative.

1842—S. B. Walcott, moderator; Marshall Whitney, treasurer; Augt. Phipps, clerk; Marshall Whitney, representative.

1843—Amara Eames, moderator; Marshall Whitney, treasurer; Augt. Phipps, clerk; Neh. Pierce, representative.

1844—Albert Wood, moderator; J. Pratt, treasurer; Augt. Phipps, clerk; Josiah Burnam, representative.

1845—Amara Eames, moderator; Nathan A. Phipps, treasurer; Augt. Phipps, clerk.

1846—Abijah Ellis, moderator; A. C. Putnam, treasurer; Augt. Phipps, clerk; S. B. Walcott, representative.

1847—Amara Eames, moderator; A. C. Putnam, treasurer; A. H. Keith, clerk; Augt. Phipps, representative.

1848—S. B. Walcott, moderator; A. C. Putnam, treasurer; A. H. Keith, clerk; William Claflin, representative.

1849—Augt. Phipps, moderator; A. C. Putnam, treasurer; W. Woodward (2d), clerk; William Claflin, representative.

1850—Albert Wood, moderator; A. C. Putnam, treasurer; W. Woodward (2d), clerk; William Claflin, representative.

1851—Augt. Phipps, moderator; A. C. Putnam, treasurer; L. P. Coburn, clerk; William Claflin, representative.

1852—Augt. Phipps, moderator; A. C. Putnam, treasurer; L. P. Coburn, clerk; Levi P. Coburn, representative.

1853—Augt. Phipps, moderator; A. C. Putnam, treasurer; L. P. Coburn, clerk; John A. Fitch, representative.

1854—Daniel Eames, moderator; A. C. Putnam, treasurer; J. A. Tillinghast, clerk; John A. Fitch, representative.

1855—John Fitch, moderator; John S. Crook, treasurer; J. A. Tillinghast, clerk; Uriah Bowker, representative.

1856—Albert Wood, moderator; John S. Crook, treasurer; J. A. Tillinghast, clerk; Albert Wood, representative.

1857—Albert Wood, moderator; J. Whittemore, treasurer; J. A. Tillinghast, clerk; Albert Wood, representative.

1858—Daniel Eames, moderator; J. Whittemore, treasurer; J. A. Tillinghast, clerk; W. F. Ellis, representative.

1859—Albert Wood, moderator; J. Whittemore, treasurer; J. A. Tillinghast, clerk; Wm. A. Phipp, representative.

1860—Albert Wood, moderator; J. Whittemore, treasurer; J. A. Tillinghast, clerk; Hilton Claflin, representative.

1861—Albert Wood, moderator; J. Whittemore, treasurer; J. A. Tillinghast, clerk; Benj. Homer, representative.

1862—Daniel Eames, moderator; J. Whittemore, treasurer; J. Tillinghast, clerk; Erasmus Thompson, representative.

1863—C. P. Morse, moderator; J. Whittemore, treasurer; J. Tillinghast, clerk; N. F. Coburn, representative.

1864—N. P. Coburn, moderator; J. Whittemore, treasurer; J. A. Woodbury, clerk; John Clark, representative.

1865—C. Meserve, moderator; J. Whittemore, treasurer; J. A. Woodbury, clerk; E. S. Thayer, representative.

1866—C. Meserve, moderator; J. S. Tilston, treasurer; J. A. Woodbury, clerk; L. H. Bowker, representative.

1867—C. Meserve, moderator; L. B. Maybry, treasurer; J. A. Woodbury, clerk; J. N. Pike, representative.

1868—C. Meserve, moderator; L. B. Maybry, treasurer; J. C. Palmer, clerk; M. C. Phipps, representative.

1869—J. Whittemore, moderator; L. B. Maybry, treasurer; C. Meserve, clerk; E. A. Bates, representative.

1870—J. A. Fitch, moderator; L. B. Maybry, treasurer; C. Meserve, clerk; J. A. Pike, representative.

1871—J. A. Woodbury, moderator; L. B. Maybry, treasurer; C. Meserve, clerk; A. C. Putnam, representative.

1872—J. A. Woodbury, moderator; L. B. Maybry, treasurer; B. F. Coburn, clerk; M. L. Buck, representative.

1873—C. Meserve, moderator; L. B. Maybry, treasurer; B. F. Coburn, clerk; Chas. Alden, representative.

1874—C. Meserve, moderator; L. B. Maybry, treasurer; B. F. Coburn, clerk; C. Meserve, representative.

1875—C. Meserve, moderator; L. B. Maybry, treasurer; B. F. Coburn, clerk; E. A. Bates, representative.

1876—J. A. Woodbury, moderator; L. B. Maybry, treasurer; B. F. Coburn, clerk; Wm. F. Ellis, representative.

1877—J. A. Woodbury, moderator; L. B. Maybry, treasurer; J. Whittemore, clerk; John Mabon, representative.

1878—C. Meserve, moderator; L. B. Maybry, treasurer; J. Whittemore, clerk; J. Whittemore, representative.

1879—C. Meserve, moderator; L. B. Maybry, treasurer; J. Whittemore, clerk; Silas F. Thayer, representative.

1880—J. A. Woodbury, moderator; L. B. Maybry, treasurer; J. Whittemore, clerk; Owen Wood, representative.

1881—C. Meserve, moderator; Owen Wood, treasurer; C. P. Wonderly, clerk; Owen Wood, representative.

1882—J. A. Woodbury, moderator; Owen Wood, treasurer; C. P. Wonderly, clerk; Caleb Holbrook, representative.

1883—J. A. Woodbury, moderator; Owen Wood, treasurer; C. P. Wonderly, clerk; Cromwell McFarland, representative.

1884—R. M. Fahey, moderator; Owen Wood, treasurer; C. P. Wonderly, clerk; Alonzo Coburn, representative.

1885—C. Meserve, moderator; Owen Wood, treasurer; C. P. Wonderly, clerk; Fred. N. Oxley, representative.

1886—R. M. Fahey, moderator; E. D. Bliss, treasurer; C. P. Wonderly, clerk; D. J. O'Brien, representative.

1887—R. M. Fahey, moderator; E. L. Bridges, treasurer; C. P. Wonderly, clerk; D. J. O'Brien, representative.

1888—R. M. Fahey, moderator; E. L. Bridges, treasurer; C. P. Wonderly, clerk; Abner Greenwood, representative.

1889—J. A. Woodbury, moderator; E. L. Bridges, treasurer; C. P. Wonderly, clerk; Alonzo Coburn, representative.

1890—J. A. Woodbury, moderator; D. J. O'Brien, treasurer; John F. Fitzgerald, clerk.

MILITARY.—It appears that in the expedition against the West Indies, in the Spanish War, in 1741, the town furnished eleven men and a boy, who enlisted under Captain Jonathan Prescott.

These men were: Henry Walker, Henry Walker, Jr., Edward Caryl, Gideon Gould, Frances Parce, Thomas Bellevs, Eleazer Rider, Cornelius Clafton, Samuel Frale, Samuel Clemons, Ebenezer Collar and Samuel Rousseau. The affair was badly managed; disease set in, and only Gideon Gould and the boy, Henry Walker, Jr., returned to Hopkinton.

The first record of money being granted for military purposes was at the October meeting, 1743, when the town voted £20, old tenor, with the addition of £2 already in the hands of Captain Jones, to provide a stock of ammunition. This grant was probably made in anticipation of war between France and England.

This war was declared June 2, 1744, known in America as "King George's War," and was well represented by Samuel Speen, Edward Bowker, Josiah Bowker, John Kelley, John Devine, Gideon Gould, Samuel Walker, Sr., Timothy Tounling, Capt. Charles Morris, Ebenezer Hall, Jr., Robert Bowker, Micah Bowker, Jonathan Fairbanks, John Galloway, Ebenezer Hall, Isaac Jones, Elisha Kenney, Isaac Morse, Benjamin Stewart, Edmund Shays, Patrick Shays, Simpson Twamuch, John Watkin, Joshua Whitney, John Wilson, Sr., and John Wilson, Jr. Patrick Shays was the father of Daniel Shays, who afterward was at the head of the well-known "Shays' Rebellion." Sergeant John Devine, Gideon Gould and James Cloyes were at the capture of Louisbourg under General Sir William Pepperill, 2d company, First Massachusetts Regiment.

At the annual meeting in 1755 the town voted to appropriate twenty pounds to furnish guns, powder and bullets, which were stored in the meeting-house.

Many from Hopkinton were engaged in the French and Indian War, which lasted from 1754 to 1763. Joseph Cody, Jr., George Ware, Daniel Gasset and George Stimpson went to Crown Point. Daniel Gould, Jason Rice and Solomon Walker were wounded in the service.

Pelatiah Bixby, John Evans, Cornelius Claffin, Joseph Cody, James Pierce, Samuel Bowker, Benjamin Watkins, Daniel Evans, were at Fort George in Captain Jones' company.

Thomas Webster, John Evans and John Walker were at Fort William Henry in 1756.

The passage of the Stamp Act by the British Parliament appeared to arouse the indignation of the citizens of Hopkinton, as well as the citizens of neighboring towns, for at a town meeting held November 27, 1767, the following article was acted upon, "To consider some measures lately proposed by several wise and publick-spirited gentlemen, adopted by the town of Boston, to use our utmost endeavors unitedly to save this Province from Poverty and Ruin that threaten us; By using and recommending the strictest frugality and economy; By encouraging to the utmost of our Power our own manufactures, not only such as we have been heretofore in the Possession of, but also by introducing new ones; By discouraging to the utmost of our power the importation of European Goods, particularly the Articles Enumerated in the account published in the proceedings of the town of Boston Relating thereto—Voted: That the town will take all the produce and manufactures of this Province; and to Lessen the use of Superfluities and Particularly the following Enumerated Articles imported from abroad, viz: Loaf Sugar, Cordage, Anchors, Coaches, Chases and Carriages of all sorts, house furniture, Men and Women's hats, Men's and Women's apparel, Ready-made household furniture, Gloves, Men and Women's Shoes, Sole Leather, Sheating and Deer-tails, Gold and Silver and Thread Lace of all

sorts, Gold and Silver Buttons, Wrought plate of all sorts, Diamond, Stone and plate ware, Snuff, Mustard, Clocks and Watches, Silversmith's and Jeweller's Ware, Broadcloths that cost above 10s. per yard, Muffs, furs and Tippetts, and all sorts of Millinery Ware, Starch, Women and children's Stays, fire engines, china ware, Silk and Cotton Velvets, Gauzes, Peuterers' Silk of Wore, linseed oyl, Glue, lawns, Cambrick, Silks of all kinds for garments, Malt Liquers and Cheas."

This action of the town tended to awaken the spirit of industry and constituted every household a busy workshop.

"At a meeting held Sept. ye 21, 1768, for the purpose of seeing if the town would think proper to make choice of one or more suitable persons to serve them as a committee at a convention proposed to be held at Faneuil Hall in Boston, the 22nd day of September, Instant, at ten of the clock, before noon, the citizens of the town Voted—To send one man to represent the town at the Convention at Boston."

They chose Capt. Joseph Mellen to represent them. "Voted, to choose a committee to give advice to our Representative."

They chose Dr. John Wilson, Samuel Chamberlain, John Nutt, Jacob Gibbs, John Albe and James Wark.

At an adjourned meeting October 3d they voted four dollars for the expenses of Capt. Mellen White at Boston, and thanks for his services.

As the feeling against England deepened, a resort to arms became a certainty, and in consequence the town commenced to make preparations for the inevitable crisis. It was voted September 5, 1774, to grant £12 "to buy a stock of Powder, bullets and tents." September 12th it was voted "to send Capt. Dench and James Mellen as delegates to attend a Provincial Congress at Concord." A committee was also chosen "to draw up a bill of regulations in the time of confusion and non-operation of the civil law." February 20, 1775 it was voted to have three companies in town. "Roger Dench was chosen Captain for ye East Company, John Homes for ye West Company and John Jones for ye Alarm Company." The town also voted "that any man train under that Captain he liketh best, and that every man equips himself with arms and ammunition according to Law."

On the 17th of April it was voted to have a company of Muster Men numbering forty, and that these men have £1 each at their enlistment. It was also voted to raise £50 to pay the Muster Men, and £6, 13s. 4d. for powder and other purposes.

April 19, 1775, when the news reached the town of the advance of the British on Lexington, the citizens of all classes became intensely excited, and no people in the colonies caught the echo of the "shot heard round the world," with a quicker or more responsive ear, than the people of Hopkinton. For the Minute Men mustered at once and went forward to aid in arresting the progress of the enemy.

The following persons were present April 19th, at Roxbury:

Capt. John Homes, Lieut. Aaron Albe, Lieut. Daniel Emes, Sargt. Henry Millen, Sargt. Ebenezer Clafflin, Jr., Sargt. John Freeland, Sargt. Samuel Bowker, Corp. John Battle, John Pirmenter, Isaac Burnap, Dr. Samuel Johnson, Wm. Freeland, F. Wm. Barnes, Joseph Thomas, Elisha Hayden, Wm. Bread, Abel Fiske, T. Walker, Joshua Andrews, Jacob Parker, Thomas Mone, Nathan Perry, Nathan Loring, Alex. Calby, Francis Homes, Caleb Clafflin, Jr., Arthur Carey, Daniel Loring, John Wales, Grendley Jackson, David Johnson, Thomas Fletcher, Joseph Jackson, Joseph Cuddy, Atherton Clark, Joseph Barnes, Benj. Adams, John Hers, Samuel Stimpson, Isaac Jones, Samuel Valentine, Reuben Johnson, John Comney, Jacob Chamberlain, Elisha Warren, Dr. Sigismund Bondley, John Homes, Jr., Benjamin Smith, Isaac Clafflin, Ebenezer Singletary, Jeremiah Butler, Thomas Hayden, Daniel Singletary, Anariah Hayden, Ebenezer McFarlin, Ebenezer Smith, Nathaniel Smith, Jr., Joseph Loring, Thomas Low, Amos Barrett, Wm. Haven, John Gibson, Samuel Clark, John Emes, Fred'k Haven, Jr., Ezekiel Adams, Samuel Snell, William Prentice, Wm. White, Thomas Fanning, Levi Dunton, Moses Watkins, Anthony Jones, Jr., Eli Clafflin, William Pierce, Amos Stimpson, Alex. Stimpson, William Fanning, Joseph Freeland, Samuel Clafflin, Moses Rice, Daniel Seaver, James McFarland, John Clafflin, Elisha Adams, Aaron Emes, Henry Dunn, William Thomas, Simeon Miller, Simeon Green.

Asa Bowker enlisted May 8, 1776, for three months and Arthur Carey, July 23d, served nine days in Samuel A. Warren's company, Col. Read's regiment; James White enlisted, in Capt. Cramor's company, Col. Arnold's regiment; Aaron Emes, Joseph Neeld, in Capt. Jacob Miller's company, Col. Doolittle's regiment; George Clark, Theo. Biss, in Col. Patterson's regiment, Capt. Fay's company, in 1775. Capt. James Miller, Lieut. Aaron Albee, Lieut. Samuel Clafflin, Sergt. James Freeland, Sergt. Joseph Freeland, Sergt. Samuel Snell, John Snell, Samuel Hiscock, William Prentis, John Clemens, Daniel Sever, Benj. Mastick, Ebenezer Tombs, Nathan Evans, William White, Thomas Fanning, David Dunston, Moses Watkins, Anthony Jones, Thadeus Spring, Richard Hiscock, Joseph Dickinson, Eli Clafflin, Abel Ephraam, Seaver Hammond, Joshua Burnam, James Gibson, William Pierce, William Tombs, Edward Gould, Thomas Freeland, Lovett Mellen, William Fanning, Thomas McFarland, Col. Ward's regiment.

An abstract of the mileage of men to and from camp, at a penny a mile, reckoning twenty miles to a day, 1776:

	Miles	Travel and Wages
Major John Haden	64.1	5£ 9d
Serg. John Willson	64.1	6£ 7d 6s
John Whitney	64.1	5£ 7d

John Eames	64.1	6£ 7d
Abel Smith	64.1	5£ 7d
Nath ^l . Peke	64.1	5£ 7d
John Walker	64.1	5£ 7d
James Wise	64.1	5£ 7d

Seth Morse	17	5 11
George Wearo	16	5 6
Daniel Bowker	20	5 7
Joseph Young	16	5 6
Reuben Albee	17	5 8½
Benj. Green	18	5 3
Thomas Morey	38	5 11
Isaac Savage	40	5 7½

List Serving in the Army in 1780.—Simeon Page, Moses Craigie, Oliver Todd, Asa Rider, John Harris (Sergeant), William Harris, William Toombs.

A List of the Men Enlisted in the Continental Army for Three Years or During the War.—Joshua Wheaton, William Fanning, William White, Iono Toombs, Isaac Bixby, Edmund Gould, Asa Rider, William Young, Daniel North, Erastus Harris, Jr., Thomas Freeland, Jr., John Walker, William Toombs, James Gay, William Prentice, John Graves, George Fischer, John Welden, John Gould, Thomas Bushell, John Haven, Adam Britas, Geffree Graves, Barnhard Rodemaker, Granshaw Maharau, William Roseman, Frances Duplarey, Samuel Gellius, Moses Gray.

At a meeting held June 17, 1776, I find the following record: "Put to vote to see whether the town will Declare themselves Independent of the Kingdom of Great Britton in case the Centennial Congress should Declare the same—Past in the Affemitive by a very Unanamose vote."

April 7, 1777, the town voted to give the men that enlisted into the Continental service, eighteen pounds as a bounty by the town each man.

The records of the town, in the War of the Revolution, for patriotism and love of liberty, cannot be surpassed by any town in the State or country, when taken in connection with the fact that it appears, by a report of a committee made to the town December 28, 1789, that there was less than 200 families in town.

It appears that in the War of 1812, the town furnished its full quota. Colonel Joseph Valentine was in command at Boston.

When the War of the Rebellion broke out, the first meeting to consider the matter relating to the war, was held April 29, 1861, at which meeting Nathan P. Coburn, Alonzo Coburn, William A. Phipps, Clement Meserve and John A. Phipps were appointed a committee to consider and report what should be done by the town "to aid in the defence of the nation." The committee reported "that the town appropriate a sum not to exceed five thousand dollars, to be expended for the purpose of organizing and drilling military companies for the national defence." The report was accepted and the money appropriated. Lee Claffin, William A. Phipps, Albert Wood, Charles P. Morse and Thomas Mead were chosen a committee to superintend the expenditure of the money.

1862, July 17, the town voted to pay a bounty of fifty dollars to each volunteer for three years, or during the war, to the number of forty-seven, to fill the quota of the town. On the 18th of August the town

voted to increase the bounty to one hundred dollars, and on September 18th the same bounty was authorized to be paid to volunteers for nine months' service, and to pay the men Government pay from the time they enlist until they are mustered into the service.

No action appears to have been taken by the town in its corporate capacity for the years of 1863 and 1864, although recruiting was continued as usual.

April 11, 1865, voted to pay a bounty of one hundred and twenty-five dollars to each volunteer to the credit of the town for three years' services, to continue until March 1, 1865. Also to pay the same bounty to drafted men.

Hopkinton furnished four hundred and twenty-five men for the war, which was a surplus of sixteen over and above all demands; three were commissioned officers. The total amount of money appropriated and expended by the town on account of the war exclusive of State aid was thirty thousand dollars (\$30,000.00).

The amount of money raised and expended by the town for State aid was as follows: In 1861, \$1,499.03, in 1862, \$6,572.11, in 1863, \$8,178.71, in 1864, \$8,600.00, in 1865, \$5,000.00. Total amount \$29,849.85.

The selectmen in 1861 were N. P. Coburn, E. A. Bates, David Eames, O. L. Woods; in 1862, 1863, 1864, N. P. Coburn, E. A. Bates, Gardner Parker, C. P. Morse, Thomas Mead; 1865, E. A. Bates, Erastus Thompson, Thomas Mead, Charles Seaver, and M. C. Phipps. The town clerk for 1861, 1862, 1863, was Joseph A. Tillinghast; I. Augustus Woodbury, for 1864 and 1865; the town treasurer during all the years of the war was Jonathan Whittemore.

A list of persons serving in the Civil War as recorded in the records of the town:

Adams, Charles H., enl., July 3, 1861, Co. D, 15th Reg.; res., Hopkinton; died, Feb. 27, 1862, at Washington, D. C., in hospital.

(It find that by the record that the 14th Regiment is used instead of the 1st Regiment of H. A., which is incorrect as there was no 14th Regiment in the same from Mass.)

MEETING-HOUSE.—A town-meeting to see about building a meeting-house was held January 5, 1724-25, within one year after the organization of the town. It was "voted to build a house forty-eight feet long, thirty-eight feet wide and twenty feet between joyns and that the house be stooled: that John Bowker, Samuel Comins, Samuel Watkin, be a Comety to provide the timber and frame it. Improving the people of the town to worke out their rates, that the comety have 4s. a day til March, and after that 4s. 6d. a day they finding themselves vital and drink; that the meeting-house be raised by ye 2d of May.

Some difference of opinion arose as to the proper location of the meeting-house, three places being selected: first, at a lopt chestnut-tree, second, where the timber lieth, third, at a place south of burying-place marked by a walnut-tree. As a compromise, all parties agreed to leave it to be decided by the lot; the lot was cast and it fell upon the spot south of the burying-place in what is the highway.

The raising of the meeting-house was a great affair as appears by the record. At a meeting held November 29, 1725, it was "voted that the town appropriate ten pounds for the purpose; that the meeting-house be raised with spike poles, that it be left with the select-

men to appoint the time when to raise the meeting-house, that Sart. Samuel Watkins, Sart. John Manning and Thomas Walker, be a Comitee to take care and provide for raising ye publick meeting-house; that all those that entertain those men with a supper the evening after the raising of our publick meeting-house that have been to said raising shall have one shilling 3 pence per head for each man allowed them by the town of Hopkinton, they giving their names of each man to the town."

The house was raised in December, 1725, and was so far completed that the town held its first meeting in it June 26, 1726. The trustees contributed £100 towards the meeting-house. The house stood on the spot where it was built until 1829, when it was moved and used as a barn by Col. Joseph Valentine, afterwards by ex-Gov. Ciaffin & Co., as a boot factory.

Pew-ground was granted to the leading families who were placed around next the walls; the size of the pews was fixed by a vote of the town and varied from six feet to seven feet long, and from five feet to seven wide, according to the size of the family. Where a pew came against a window the owner was required to keep the glass in repair—an obligation the owners appear to neglect, as the town at one of its meetings chose a committee to board up the windows.

The meeting-house was a plain structure without a cupola or steeple, and was painted outside in 1773 for the first time.

A number of the original members of the church were Scotch Presbyterians. April 9, 1731, the church voted to comply with the Cambridge platform adopted at Cambridge, 1649, as the rule of their discipline. This action of the church gave great offence to the Presbyterians who, in 1734 organized a Presbyterian Church and built a small meeting-house on what is now called High Street, near the Ellery corner, but they eventually removed to New Glasgow, now Blandford, west of the Connecticut river. Robert McCook, one of the number, said that he desired no letter of dismission, but thought that the church should ask a dismission from himself.

The pastor, Rev. Samuel Barrett, Jr., was born at Boston 1700, graduated at Harvard 1721. It appears that he came from Medway here, as the town at a meeting July 24, 1725, allowed John How five shillings for going to Midway to treat with Mr. Barrett. In a notice published at the time of his death it is said "He was a pious good Christian; a man of great candor and good nature." He died December 11, 1772.

The trustees gave one hundred acres of land to the first minister that should be ordained and settled in the town, to be for him and his heirs for the term of ninety-nine years, free from paying any rent, and thirty pounds toward building his house upon his own land.

The town voted him £100 "in day labor, oxens worke, boards, shingle, clapboards, slet-worke or other materials needful for the building an house for him, and to pay it by the 1st of October next." The house was built, in 1725, on the present site of the town hall, where it remained until 1830, when it was taken down by Col. Joseph Valentine.

Rev. Elijah Fitch was the second pastor; he died December 16, 1788. It is said of him that he was an eloquent preacher, a fine scholar and poet. He wrote and published a poem of several cantos, entitled "The Beauties of Religion," also a poem called "The Choir," in which he described his manner of life in Hopkinton.

The following is an extract from a Century Sermon preached in 1815 by the Rev. Nathaniel Howe. It shows the nature of some of the controversies which take place between a pastor and his people:

"When the public took sides upon politics your minister was a federalist, though he was sensible, a very great majority of the town were of different sentiment. He believed then as he does now that he ought to have more regard for his county than to any particular part of it. And when he has occasionally preached political sermons they have repeatedly occasioned uncomfortable feelings.

"Another difficulty your Minister has had to encounter was the want of support. A vast change has taken place in the expense of dressing and living since my ordination, and yet no addition has been made to my salary.

"When a candidate I determined I would never settle till I saw a reasonable prospect of a comfortable support, and when settled I would never complain of my salary. I remained of this mind till I had been your minister for fifteen years.

"Borne down with the fatigues of manual labor, pressed into the woods in the winter, to the plough in the spring, into the meadows in the summer, to support my family comfortable and fulfill my promises, I felt the business of the ministry was greatly neglected; that it was impossible for me to do what ought to be done in my profession unless the people did more toward my support.

"I Committed my thoughts to paper then committed them to four brethren of the church, then to the church as a body and afterward to the town."

At a meeting of the town held December 15, 1806, I find the following record: Mr. Howe was called upon to read to the town the communication he had made to the church, upon which the vote to "see if the town will (on account of the depreciation of money) add \$116.67, to the yearly salary of the Rev. Nathaniel How till such times as labor and provisions fall in their price as low as when he was ordained." This passed in the negative by a large majority."

"Then Mr. How proposed to see if the town would add \$116.67 till such times as the members of our General Court receive less than two dollars per day for their services. This was negatived by a large majority.

"Then Mr. How proposed to see if the town will add \$116.67 for seven years from the first day of January next. This passed in the negative by a large majority.

"Then Mr. How proposed to see if the town will make up one-half the depreciation on his salary from this time while he continues their minister. This passed in the negative by a large majority.

"Then Mr. How proposed to see if the town will, in the future, pay two hundred dollars for his annual salary and average in on labor, corn, rye, cider, butter and cheese, beef, pork, at the prices they bore on the day of his ordination. This passed in the negative by a large majority.

"Then Mr. How proposed to see if the town will purchase his house and land and keep it for the next minister. This passed in the negative by a large majority."

"Then Mr. How proposed to see if the town will request the church, by a vote, to grant him a dismission. This passed in the negative by a large majority.

"Then Mr. How said he had but one proposition to make, which was to see if the town were willing he should publish the communication he had made to the church and read to the town and all the doings of the town therein. And this also passed in the negative by a large majority."

Near the conclusion of the sermon Mr. How says :

"My brethren, may I ask a question, a plain, simple question? How shall I obtain your consent? Shall I take silence for consent? Your countenances discover a willingness? The question is this, Do you know by what means I have become so rich as to have a great house finished and furnished? A farm, a herd of cattle, a flock of sheep, horses and money at interest? I say nothing of my debts to-day. Shall I answer the question? The principal reason is this, because I have been doing *your business* and neglecting *my own*. What is your business? Your business is to support your minister, and that what I have been doing for more than twenty years, and what is my business? My business is to study and preach; and in this have never abounded. It is I have been absent from public worship not more than four or five Sabbaths for twenty-five years; but I have frequently been present and attempt to preach when it has been mortifying to me and could not be edifying to you. I have sometimes admonished reproof both to the church and society in a manner that has been thought to discover some degree of severity, but in these cases you have always had the good sense enough to know you richly deserved it."

Ministers Phelps and Hall served as colleague pastors with Mr. Howe.

Mr. Howe had one of the longest and most successful pastorates. He succeeded in doing much good for the church in many ways, and his death, in 1837, was an event which caused much sorrow. He was a man who, strong in his own convictions, had no fear in announcing them from his pulpit.

The first meeting-house was commenced in 1725, and the first meeting held therein was on June 26, 1726. But the building, which was not finished for many years, was removed in 1829, and another was built, which was burned in the destructive fire in April, 1882.

May 21, 1723, a bigger part of ye inhabitants of the town met, and "the following business was done:"

"Voted, The endeavoring for a minister to preach with us constantly on Sabbath days.

2. "Voted, To levy a tax of an half-penny upon the acre upon all the lots that are either taken up or picked upon by gentlemen that they will take them for the support of a minister.

3. "Voted, That they will every man bring in his proportion to said tax to John How by the last day of June next ensuing.

4. "Voted, To have a contribution every Sabbath, and that every man paper his money and write his name upon the paper, and set the sum that he puts in.

5. "Voted, That Mr. Hustone and Mr. Wood shall receive said contribution, and take an account what it is, and deliver it to the aforesaid John How, and take care of none of said papers that none of them be lost.

6. "Voted, That Mr. John Wood and John How take care that we are constantly provided with a minister to preach with us on Sabbath days.

7. "Voted, To meet at John How's house on Sabbath days at present."

This was the beginning of the movement which established the church.

The pastors which have been in charge of the parish are as follows :

Rev. Samuel Barrett	1724-1772.
Rev. Elijah Fitch	1772-1788.
Rev. Nathaniel Howe	1791-1837.
Rev. Amos A. Phelps	1830-1832.
Rev. Jeffries Hall	1833-1838.
Rev. John C. Webster	1838-1864.
Rev. Joseph Boardman	1865-1868.
Rev. George H. Ide	1868-1876.
Rev. Horatio O. Ladd	1877-1880.

Rev. Mr. Fullerton officiated until Rev. B. Story was installed in 1867.

ENGLISH CHURCH.—The Rev. Roger Price, rector of Kings Chapel of Boston, came to Hopkinton in or about 1745, and took up a tract of land containing seven hundred and nine acres and one hundred and forty-two acres of common land.

He built a small church edifice and endowed it with a glebe of one hundred and eighty acres, the deed being dated July 9, 1748. After officiating here for three or four years, he returned to England and was succeeded by Rev. John Troutbeck, who was appointed chaplain of "frigate" Rose in 1769. The following appear to be members of the church in 1752, Sir Charles Henry Frankland, Thomas Higgins, Julius Chase, William Wesson, Capt. David Ellis, James Devine, Thomas Valentine, Patrick White, John Mastick, Robert Barrett, James Fannys, Thomas Chadock, William Brown, Patrick Shays (father of the rebel Daniel Shays), Hugh Dempsey, Richard Kelly, Rebecca Wilson, Peter Vialas, John Kelly and Mrs. Dench.

The present members are James F. Braithwaite, clerk; James Frith Braithwaite, Robert H. Braithwaite, William Kennedy, Samuel A. Kennedy, Robert H. Kennedy, James W. Kennedy, Dr. Walter A. Phipps, George Davis, Harry Hemenway, David H. Fisher.

The first building remained where it was built until 1818, when a committee made the following report to the Board of Managers: "That having viewed and examined the church in Hopkinton, and they were decidedly of the opinion that the same was so far decayed that any expenses bestowed on repairing it would be lost, and that they had made a contract with Samuel Valentine to build a new church, which was done at a cost of three thousand sixty-one dollars and twenty-four cents; the church was consecrated October 7, 1818, and destroyed by fire, July 18, 1865."

The first Methodist Church was built on Hayden Row Street about eighty years ago, and had for its pastor Elder Bonney.

The church building on Church Street was built in 1865, by Deacon Lee Claflin.

CATHOLICITY IN HOPKINTON.¹—Time rolls his restless course; the changing years flit on, and, one by one, unbidden to-morrows burst forth to-days only to lose themselves again in the yesterdays of the sombre, silent past. Life is one continual change, and to none can this be more evident than to him who will carefully pause and reflect on the wonderful transformations that have been effected during the past forty years, since the inauguration of the Parish of Hopkinton. Who, in those early days would have presumed to predict so glorious a future for this little hamlet? Who then dared hope that the day would ever come when the Catholics of Hopkinton could claim the proud distinction of having erected to the honor and glory of God the grandest edifice within the confines of New England. Truly it seems the finger of God had pointed out the way for His devoted children, and strengthened their hearts in the hour of darkness against the attacks of a bigoted and unrelenting world. But few of the early settlers survive to tell the story of the sufferings and privations undergone in the cause of Christ when the faithful were forced to travel many weary miles over almost impassable roads to receive the consolations of our holy religion. As early as 1846 the Parish of Milford was formed, which included the present parishes of Hopkinton, Medway, Holliston, Ashland, Upton, Marlboro', Maynard, Rock Bottom, Westboro', Cordaville and Saxonville. Rev. Father Boyce of Worcester was appointed first pastor, assisted by Rev. Father Gibson, by whom regular monthly services were instituted in the surrounding towns; the priest being obliged to travel from place to place, oftentimes exposed to the inclemency of the weather, to care for the wants of his devoted flock. Previous to this time the Catholics of Hopkinton attended Mass at the homes of Dominic McDevitt and Edward McGovern, both of Milford; but upon the arrival of Father Boyce as pastor of Milford, services were held at the residence of John McDonough, who sympathized with and materially aided these early pioneers in their unswerving fidelity to their holy cause. Still they remained unsatisfied and longed for a church wherein they might worship God according to the dictates of conscience. The faith of Saints Patrick and Columba glowed in their hearts; nor could they rest until they had a place wherein a priest might dwell and preach the word of God. With this object in view, a meeting was called in November, 1849, by John Wilson, a Protestant, at his home on Mt. Auburn Street, where were assembled all the Catholic men, twenty-two in number, from the outlying districts—very few then resided in the town proper. What transpired at that meeting is best told in the words of Michael Raferty, an eyewitness, and the oldest Catholic resident living: "I have attended many meetings, both political and re-

ligious, but never have I witnessed such enthusiasm displayed as at that first meeting of the Catholics of Hopkinton, and to John Wilson must be given the honor of being the first to propose the establishment of a Catholic Church in our town. His actions on that occasion were something not soon to be forgotten, and his generosity is worthy of record. Seven hundred dollars were subscribed in a few moments, and we voted to build a House of Prayer."

The following day Dr. Pratt offered an acre of land (now a portion of the Catholic Cemetery) as a site for the proposed church. Michael Raferty was appointed to confer with Father Boyce, who in the meanwhile had received an offer from another source. This was from E. A. Bates, Esq., a citizen who owned considerable property on what is now known as Cedar Street, and, wishing to enhance the value of the same, offered Father Boyce an acre of land and \$200, provided the building was erected within a certain time. The offer was accepted, Father Boyce paying \$100; but the building was not begun before 1851.

Toward the close of the year 1849, Father Boyce was succeeded by Rev. Father Hamilton, assisted by Father McGrath, who immediately undertook the arduous work of erecting a church on the site previously selected. The following year Father Farrilly, of Saxonville, succeeded Father Hamilton, coming here as often as necessity required, and holding services at the home of Mr. John McDonough, and later in the old Town Hall.

The labors and the sacrifices of the pioneer missionaries of the East form the most important part of our Catholic history. They are chronicled in the traditions of the faithful, and need not be recited here.

Despite his manifold duties and the countless sacrifices incident to so great an undertaking, Father Farrilly determined to build a Church, and early in 1851 the contract was awarded to Artemus Johnson, of Holliston, for the erection of a wooden church, sixty by forty feet, known as St. Malachi's. Two years later an addition was made, and here the Catholics of Hopkinton knelt 'neath the shadowing protection of the cross of Christ and heard the Word of God.

It was in the spring of 1854 that Father Farrilly was transferred from Saxonville to Milford, where he was stationed as resident pastor, with charge of the original parish heretofore mentioned, assisted by Father O'Beirne and Father Welch, of Natick, lately deceased. Three weary years he labored assiduously for the welfare of his people, when at length his rugged frame, weakened, no doubt, by years of unceasing toil, fell a prey to a disease which resulted in his death in August, 1857. His remains were interred in the church-yard, where they reposed until August 15, 1883, at which time they were transferred to the Catholic cemetery, where a monu-

ment had been erected in his honor by his old Hopkinton parishioners. September 15, 1857, Rev. P. Cuddihy, present rector of St. Mary's Parish at Milford, was appointed his successor, who divided the old parish with Father Welch, who had previously acted as curate to Father Farrilly, receiving for himself the present towns of Milford, Hopkinton, Medway, Holliston, Ashland, Marlboro' and Upton. This system continued as late as 1866, at which time Father Cuddihy gave up Hopkinton, Ashland, Marlboro', and commenced the building of a new church in Milford. The history of Father Cuddihy's pastorate during the nine years he remained with us, is but the repetition of what every priest has been obliged to undergo, whose mission was to sow the seed of wisdom in a sparsely-settled locality. Yet Father Cuddihy merits more than a passing notice for his indefatigable exertions, and the respect and esteem in which he is held to day by his people is the best criterion by which to judge of his ability as a man and his zealous devotion as a priest in his sacred profession. Upon the retirement of Father Cuddihy, July, 1866, his curate, Father Barry, was appointed first resident Catholic pastor of Hopkinton, with charge of Westboro', Ashland and Cordaville. This was the real beginning of the Hopkinton Parish, and during its brief existence of twenty-four years what has it not accomplished?

The work done in the short time which has intervened since the institution of this parish shows more plainly than any words of mine the noble generosity which has ever been characteristic of this people, and the self-sacrificing, zealous spirit of the pastors, who, from time to time, had charge of this devoted flock. Father Barry diligently followed in the footsteps of his predecessors, and what he accomplished during his mission of four short years here will not soon be forgotten. April 1, 1870, he was transferred to Rockport, where he remained until his death, which occurred Jan. 7, 1883. His remains lie at rest in our own cemetery, as it had always been his desire to return to his former parishioners. A few months ago the St. John's C. T. and L. Society erected in his honor a massive and costly monument as a memorial to one whose services were as lasting as they were exceptional.

Upon the removal of Father Barry, Father Minetti, an Italian by birth, assumed charge April 23, 1870, remaining in charge until Oct., 1872, at which time he returned to Italy, giving place to Father Ryan, formerly assistant rector of St. Joseph's, Boston. Soon after the advent of Father Minetti the Boston diocese was divided, Springfield being the new See, with Right Rev. P. T. O'Reilly in charge. This left Hopkinton and Ashland as one parish, Westboro' and Cordaville having been included in the new diocese. It was not until August, 1877, that Hopkinton became a separate parish, at which time Rev. J. S. Cullen, present rector of St. Stephen's, South Fram-

ingham, and formerly curate to Rev. Father Ryan, was placed over a new parish, comprising the towns of Ashland and Framingham. Meanwhile, Hopkinton had thrived prosperously. Factories had been built, and the Catholic population, which a few years before numbered but a few hundred souls, steadily increased, until at the time of Father Ryan's arrival they numbered nearly two thousand souls. This, together with the poor condition of St. Malachi's Church, called for a larger and more substantial place of worship. Accordingly, several meetings were held relative to the proposed new church, until at a meeting held in 1875, arrangements were completed for the erection of a granite edifice, to be known as the Church of St. John the Evangelist. The land on Church Street was purchased from the late Dr. Pratt, at a cost of \$6000, and the laying of the foundation commenced in May, 1876, the first sod being turned by Father Ryan himself. Thence the work rapidly progressed, and May 15, 1877, we had the pleasure of seeing the corner-stone laid with imposing rites, by the Most Rev. John J. Williams, Archbishop of Boston. Rev. Fr. Marsden, of Lawrence, delivered the oration. No delay was now permitted, as the "Old Church" had become rather unsafe, and all were desirous of entering St. John's. At length the basement was completed, and Christmas morning, 1878, Mass was celebrated for the first time by Rev. Father Ryan, which my friend, Rev. Father J. J. O'Connor, now of Cleveland, Ohio, and myself had the honor of serving. What a Mass was that! Never did the pealing anthems resound more joyously than did our heartfelt Alleluias on that happy morn. The very air of heaven seemed to re-echo with the joyous "Gloria in Excelsis," and the sublime strain of the "Credo." How happy was our beloved pastor that morning; how feelingly he spoke of the kindness and generosity extended him in the work he had undertaken, and the gratifying results which had attended his every effort; closing his admirable discourse by wishing us a merry Christmas and a happy, prosperous future. And we! Were we silent? Never were more heartfelt prayers uttered than were poured forth that morning for the health and prosperity of our dear pastor, who had already begun to show signs of weariness from the mighty load with which he was over-burdened. Still he persevered in his endeavor, overseeing the whole work himself, both at the church and at the quarry, until at length, broken-down by his persistent labors, he was forced to yield to the entreaties of his friends, and January 11, 1881, started to make a tour of the south for the purpose of recruiting his health, now very much impaired. Meanwhile, the building had been completed, except the interior upstairs, and the spire; St. Malachi's had been torn down, the lumber disposed of, and the land sold.

The finances of the parish were in an excellent condition, Father Ryan having paid, during 1880,

\$13,000 of the debt, which in all amounted to scarcely \$25,000.

On the eve of his departure all the parishioners assembled at the church to bid him farewell, never thinking for a moment it was the last time they should ever see him, and presented him on that occasion with a purse of \$700 as a slight token of their affection and regard for him. The next morning he departed, and during the following months of his absence frequent letters told of his speedy recovery till we had been lured into the hope of seeing him return in perfect health. Alas! how sad, on awaking Saturday morning, March 26, 1881, word was flashed over the wires announcing the death of our faithful pastor at St. Louis, of spinal meningitis, which he contracted during his brief sojourn there on his way home. He had spent the intervening time traveling through Florida, Nassau and Cuba, and was returning home much improved in health when the fatal disease seized him which terminated in his death. His body arrived on the 29th; escorted from the station by the grandest funeral cortege ever witnessed in this vicinity. Two days he laid in state in the basement of the church, which was crowded day and night by the thousands who came to do honor to his memory.

The funeral took place Wednesday, preceded by a Solemn High Mass of Requiem, in which Rev. J. S. Cullen, a former curate, was celebrant; Rev. T. Maginnis, of Jamaica Plains, Deacon; and Rev. P. A. McKenna, Marlboro', Sub-deacon. An eloquent panegyric was preached by Rev. Jno. M. Kremmer, of Southbridge, a life-long friend of the deceased. Over 150 priests from all parts of the State were present at the obsequies, the church was heavily draped, the whole town in mourning and business generally suspended.

In the words of Hamlet, of him we can say: "He was a man, taken for all in all, we shall not look upon his like again." He had devoted his time, labor, ay! even his life to promote an enterprise which shall ever stand a monument to his untiring energy. Father Ryan was born in Boston, December 26, 1845. The greater part of his youth was spent at Lawrence, Mass., whither he went with his parents while yet a mere boy. At an early age he entered Montreal College, when having completed his collegiate course he entered Troy Seminary, and was ordained to the holy priesthood December 25, 1865. His first charge was St. Joseph's Parish, Boston, where he remained until transferred to Hopkinton, in November, 1872. Would that it were permitted us to give in detail the edifying history of his labors while in our midst; and yet! where is the need? Though ten years have passed since he was laid to rest his memory still lives in the hearts of the people, who will ever hold him in loving remembrance.

After the demise of Rev. Father Ryan conjecture was rife as to his probable successor. Rev. F. J. Glynn, of Brockton, Mass., then curate here, retained

full charge until a pastor should be appointed. Nearly every priest in the diocese was mentioned as the next rector; nor was it a matter of slight importance, as the condition of affairs needed an able administrator. Here was a costly church half finished, with quite a debt when the size of the parish—about 2000 souls—is taken into consideration. Some little time elapsed, however, before the appointment was made, and it was not until the Sunday after Easter, April 24th, that Father Mohan, who had been selected to fill the vacancy, arrived. Up to this time he had been rector at Ayer, Mass., but, obedient to his Bishop, cheerfully resigned a flourishing parish to accept one which required the work of years and care before he could hope to enjoy the fruits of his labors. Yet Father Mohan was not a man likely to become alarmed at the enormity of the work laid out for him, nor disheartened at the well-nigh hopeless task of completing the church.

The financial strain under which the people had been laboring prior to his coming had necessitated a cessation of the same at least for a brief period, and accordingly Fr. Mohan contented himself by renewing the Church Debt Society instituted some years previously by Fr. Ryan.

This was a society formed for the purpose of liquidating the debt on the church by equalizing the burden so that all should pay a monthly assessment which, though small, amounted to quite an item in the year's income. During the next few years it thrived, but afterwards gradually fell away, until finally in 1888 it ceased to exist altogether. Having permitted one year to pass without calling on the people for any subscription aside from the ordinary revenues of the church, Fr. Mohan thought it time to make some endeavor to remove altogether the debt which he had been steadily diminishing. But ere he began, a calamity as direful as it was unexpected befell the town, which for the time being paralyzed the business interests and delayed for a considerable time all prospects of completing the church. The morning of April 4, 1882, was a dark one indeed for Hopkinton. About 2 o'clock A. M., we were awakened from our beds to find the very heart of the town, where stood our principal factory, enveloped in flames. Aid was quickly sent from the surrounding towns, but vain were all endeavors to check the onward rush of the flames which now presented one vast wall of fire extending from the cemetery to Walcott Street. Dark, very dark seemed the future of Hopkinton to that grief-stricken throng gazing upon the ruins on that fatal morning; utterly hopeless seemed every prospect of ever again attaining the prosperity which up to that time we had enjoyed. Then spread forth the rumor, discouraging indeed to those who had depended for their livelihood upon that factory, that the company would not rebuild. It was verified but too soon, as a few months later the firm of Bridges & Co. commenced the erection of a new factory at South Framingham. That

was a severe blow to Hopkinton, one from which the town never fully recovered. All thought of completing the church was now at an end, and it was deemed impracticable to attempt to pay off the old debt. The people generally were in poor circumstances with no prospect of brighter days to which they might look forward, and accordingly it was thought advisable to let matters rest for a while at least and allow them time to recover from the effects of the sad calamity which had befallen them. As in the previous year Fr. Mohan contented himself with the proceeds of the Church Debt Society calling for no subscriptions until the following spring when a collection was taken up which reduced the standing debt considerably. Early in June, 1885, he was transferred to Everett, being succeeded by Rev. M. D. Murphy, our present pastor. During his ministration here he had endeared himself to his people by his modest, kindly bearing and exceptional piety. He was an earnest advocate in the cause of temperance and was charitable beyond measure. As a testimony of the appreciation with which his many good qualities were received on the eve of his departure he was presented with a large purse by his parishioners, who assembled in the basement of the church to bid him farewell and wish him a hearty God Speed. The altar boys at the same time presented him with a beautiful gold pyx.

Time and space do not permit us to give the credit due to each one of the different curates who so ably seconded the efforts of their pastors in the interest of God and religion. Would that it were permitted us to dwell on the records of the past, giving to each his full share of praise, so richly deserved, from the time of the advent of Fr. Barry, first resident-pastor, to the present time; but we must be content to remember them as we knew them.

Below are given the names in the order of their succession: Rev. Fr. Le Bretin, August to October, 1869; Rev. Fr. O'Farrell, October, 1869, to November, 1870; Rev. Fr. McNamara, May, 1871, to December, 1871; Rev. Fr. Cullen, at present pastor at South Framingham, December, 1871, to August, 1877; Rev. Fr. Glynn, of Brockton, November, 1878, to December, 1881; Rev. Fr. Whalen, December, 1881, to February, 1883; Rev. Fr. McManus, of Salem, April, 1883, to November, 1885; Rev. Fr. Fagan, December, 29, 1885, to the present time.

In the summer of 1885 the Rev. M. D. Murphy received his appointment as pastor of this parish, which was already encumbered by a heavy debt. This was entirely liquidated in a short period of time, and the church, which remained for years in an unfinished condition, with no prospect of completion, dedicated with the most gorgeous details of ceremonial ever witnessed in New England. It is a noteworthy fact that the two great ecclesiastical dignitaries on this occasion were the same who were selected to act in a similar capacity at Baltimore, on the occasion of the one hundredth anniversary of the establishment of

the hierarchy of America. Mt. Rev. J. J. Williams, D.D., Archbishop of Boston, celebrant, and the Mt. Rev. P. J. Ryan, D.D., Archbishop of Philadelphia, orator.

Our sketch ends here, as it is Father Murphy's desire that this work, and not the pen of any individual, bespeak his praise.

Non nobis Domine non nobis sed nomini tuo da gloriam.

EARLY SETTLERS.

Hopkinton was first settled in 1710 or '12. There were some peculiar facts in the settlement of the place, which had an effect on the character of the people. The first settlers did not come in colonies, as in other places, nor by the way of relationship or acquaintance, but single and alone, seeking a home. They came from almost as many different places as there were individuals; the most of the first settlers came from Sudbury, Framingham, Sherborn, Concord, Needham and Marlborough. There was one element that entered largely into the character of these settlers. They must have had some knowledge of the place where they were to make their homes; there were rocks, hills and an almost unknown and unbroken forest. The soil was rich, but required the hardest possible labor for its cultivation. To overcome such obstacles one must have indomitable courage and energy, a self-reliance and a will-power that never tires, and only those who had such qualities would seek here a home. Early in 1719 the town received an important addition by the settlement of some Scottish families. A century before their ancestors had emigrated from Argyshire, in the west of Scotland, to the counties of Londonderry and Antrim, in the north of Ireland, where they and their descendants shared largely in the persecutions of the Protestants, in the reign of Charles the First and James the Second. Burdened with rents and tithes, and thirsting for the enjoyments of civil and religious liberty, three Presbyterian ministers, with many of their congregations resolved on removal to this country, of which they had heard flattering reports. In the autumn of 1718, 120 families arrived, some in Boston and some in Portland. Some eighteen families of the 120 in the spring of 1716 came to Hopkinton.

Among this number was Hugh Black, William Montgomery, James Collier (one of the first selectmen elected in the town), Samuel and James Walk, John, Robert and Patrick Hambleton, Robert McFarlane, Robert McCook, Robert Hustons, William Donaghy, Samuel Crooks and Joseph Young, the ancestor of Brigham Young.

Among the first settlers were Joseph Bixby, the father of Abner Bixby, born August 30, 1712, and is the earliest recorded birth to be found on the records. Captain John Wood, elected on the Board of Selectmen in 1724, and "died Aug^t ye 21, 1725;" Henry Mel-

len, who, it is said, built the first house in what is now Hopkinton, near the Sheffield place; "Samuel Comins, one of y^e builders of y^e meeting-house," who came to this place with his wife, Lydia, and six children, from Needham, in 1716; John How, in whose house the meetings were held previous to the building of the meeting-house, and others.

According to the census of 1845 the following schedule shows the agricultural product of the town :

Indian Corn	8,400 bushels, value	6,290 dollars.
Rye	1,235 "	940 "
Barley	677 "	457 "
Oats	4,226 "	1,378 "
Potatoes	17,417 "	4,353 "
Other Vegetables	600 "	450 "
Hay	1334 tons	17,238 "
Fruit	40,155 bushels	5,366 "
Butter	31,915 lbs.	4,676 "
Cheese	11,397 "	590 "

POPULATION.—1776, 1134; 1790, 1317; 1800, 1372; 1810, 1345; 1820, 1655; 1830, 1809; 1840, 2245; 1850, 2801; 1855, 3024; 1860, 4340; 1865, 4132; 1870, 4419; 1875, 4503; 1880, 4601; 1885, 3922; 1890, 4063.

Boot and Shoe Manufactory.—The cause of the rapid increase of the population from 1840, when it was 2145, to 1860, when it was 4340, notwithstanding the loss of Unionville in 1850, a loss of nearly 1000, was the successful prosecution of the manufacture of boots and shoes. To this town belongs the credit of showing to the world that the bottoms of a boot or shoe might be put on by wooden pegs. In 1820 Joseph Walker, a descendant of Thomas Walker, the first "clark of the markit, which office he held for one fifty years," in Hopkinton, made the discovery that he could, instead of sticking on the sole of a boot or shoe, as had been the practice heretofore, fasten the parts together by inserting rows of pegs, cut from well-seasoned birch or maple wood. This discovery has produced a great and wonderful revolution in the manufacture of boots and shoes in the New England States. Mr. Walker with his five sons long carried on the business in this town. He died January 9, 1852.

In 1826 two of his sons, Leonard and Lovett set up for themselves, and for a number of years continued to carry their boots and shoes to Boston and Providence in a one-horse wagon. The work at that time was done by hand, and in small shops attached to or near by the dwellings of the workmen. By degrees division of labor was introduced in the business, and machinery driven by steam-power required larger shops. Our manufacturers then had the privileges and were proud to stamp their names on their works. But not so in this day of improvements.

Judging from the names we read on the boots and shoes manufactured in Hopkinton at the present time, one would imagine that the first settlers had left, and the Dutch and Greeks have taken their places. Mr. Lee Claflin, father of ex-Governor Claflin, commenced the making of boots and shoes in Hayden Row in 1840, employing L. H. Bowker to do the work, while he himself attended to the sale of the goods in Boston. Mr. Bowker was afterward of the firm of Phipps & Bowker. The firm of Davenport & Gibbs commenced

business about this time. Claflin, Coburn & Co., commenced the business in the old meeting-house previous to 1847, on Main Street, where they remained until their new shop was built, in 1850. The business was removed to Framingham, in 1833. S. & A. Crook commenced the business in 1849 in the J. Walker shop on Hayden Row Street, where they remained until 1853, when then removed into the old meeting-house on Grove Street, and remained there until March, 1860, when they removed into their present quarters, the third if not the second largest boot and shoe factory in the State, containing over sixty-five square feet of floorage; the machinery is driven by a one hundred horse-power engine, the capacity of the establishment being thirty-six hundred pairs per day.

The Messrs. Crooks are natives of Hopkinton and descendants of Samuel Crook, who came from Londonderry, Ireland, and settled in this place in 1719.

Erastus Thompson & Co.—Mr. Thompson came to Hopkinton and commenced the boot and shoe business in 1846, under the firm-name of Thompson, Bales & Barker, in the upper story of the old Coffee-house store on Main Street. The firm was dissolved in 1853. Mr. Thompson continued the business in the same place until 1857, when he removed to his new shop, and the business has been carried on under the present firm-name until the present time. Mr. Thompson died in January, 1885; since that time the business has been carried on by his sons.

The factory is 40x120, four floors, machinery run by steam and has a capacity of 1200 cases per day. A. Coburn commenced business with W. F. Claflin, brother of the ex-Governor, in the Woodard shop on Hayden Row Street, in 1855; the firm continued until 1870, when it was dissolved, and a new firm formed under the name of A. Coburn Son & Co. A new factory was built on the site of the old factory in 1859, which was destroyed by fire Aug. 27, 1889, which was replaced by a factory on the same site, forty by one hundred and eighty, with an annex twenty-seven by thirty, four floors, and is the best constructed factory in the town and has a capacity of 1200 pairs per day.

G. & F. W. Wood & Co., of Woodville, a part of Hopkinton. They commenced business in 1867, in a building on Wood Street, 25x50, four floors. Employment was given to about forty persons, the output being 1200 cases the first year, the result of hand-work alone. In 1870 they bought of their father, Colonel Albert Wood (a descendant of Captain John Wood, one of the first Board of Selectmen, elected in 1724, and died August 21, 1725, and from whom the village received its name), the stone mill formerly used by Colonel Wood as a cotton factory, and in 1877 they built a new building, 36x90, four floors, the extensive machinery being run by water-power, the total capacity of the whole establishment being 1100 pairs per day.

The Wood brothers are natives of Hopkinton and the pioneers of the business in their native village.

In 1850 there was eleven boot and shoe factories in Hopkinton.

In 1855 the value of boots and shoes manufactured in Hopkinton amounted to \$1,058,820; males employed, 1233; females, 88; total, 1321.

In 1885: value, \$1,562,837; males employed, 737; females, 164; total, 901, showing an increase in valuation of over \$500,000, and a decrease of over 400 hands, the effect of machinery in thirty years.

John Young, a descendant of Joseph Young, who came from Londonderry, Ireland, and settled in Hopkinton in 1719, was born in Hopkinton, March 7, 1763. He was the father of Brigham Young, the *Mormon*. He moved from Hopkinton to Whittingham, Vt., in January, 1801, where Brigham was born, June 1st of the same year. John returned to Hopkinton and lived on Saddler Hill.

Walter McFarland, son of Ebenezer McFarland and descendant of Robert McFarland, born in 1749. He represented the town in the Legislature for twelve years and served in the Senate for the year 1787. He held many important positions of public trust. By occupation a farmer and civil engineer. Died in 1827.

Lee Clafin, son of Ebenezer and Sarah Clafin, was born in Hopkinton, November 19, 1791, and died February 23, 1871. Mr. Clafin was the architect of his own fortune. He had no ancestry to boast of and no one to help him so much as he helped himself. He was the first president of the Hopkinton Bank and through his influence, with that of Colonel Valentine, D. Bucklin and others, the Hopkinton Academy was instituted. He was in his day and time prominent in the boot and shoe business and a great friend of the Methodist Society and served one term in the Senate.

John Barrett, grandson of Samuel Barrett, the first settled minister in Hopkinton was born in Hopkinton in 1769, and died April 4, 1821. He was the author of an English Grammar, which was published in 1819. He was remarkable as a teacher of the Classic Language and was one of the teachers of Horace Mann.

Col. Joseph Valentine, son of Samuel Valentine, born in Hopkinton, November, 1776, and died March 26, 1845. He possessed fine business capacity and was for a long time one of the most prominent men of the town. He was a delegate in the convention for the revision of the Constitution in 1820, and represented the town in the General Court for six years, and served as chief marshal at the consecration of Bunker Hill Monument.

Col. Albert Wood was born in Hopkinton, August 1, 1801, and died in 1887. Possessed of sterling common sense, he for the long period of his life was one of the most prominent men of the town. He was previous to 1845 in the manufacture of cotton cloths and twine. The statistics of the cotton industry for 1845 show the following facts: Cotton consumed, 280,000 pounds; manufactured, 612,000 yards; value, \$30,500; twine manufactured, 20,000 pounds; value, \$2,800; batting manufactured, 30,000 pounds; value,

\$1400; males employed, forty; females employed, fifty. This industry was carried on in Massachusetts by M. Wood, who was the father of Woodville.

The machinery was run by water-power supplied by White Hall Pond.

He represented the town in the Legislature in 1856 and 1857, and held many other town offices, and was a man of sterling integrity.

Capt. Daniel Shays, the leader of Shays' Rebellion in 1786-87, son of Patrick Shays, was born in Hopkinton, at the "Shays place" on Saddle Hill (where at the present time the old well and cellar can be seen), in 1747. He left Hopkinton when about twenty-one years old, and served in the Army of the Revolution. He raised a company of which he was appointed captain, and was wounded in the service. After the war he settled in that part of Pelham now Prescott. He finally settled in Sparta, where he died poor September 29, 1825. He was of Scotch descent, and the name on the early records is spelled Shea, Sha, and sometimes Psha.

At a meeting of the trustees held in Boston, 1711, it was, "voted, 1st, that the committee for signing leases to the tenants of the lands in Hopkinton be directed and empowered to allot and set out 12,500 acres of the best and most improvable of the land, within said township. 2d, that they are directed to lay out 100 acres of land for the ministry in such convenient place and manner as they shall find most suitable for that use; that 100 acres of land shall be laid out for the first minister that shall be ordained and settled in the town, to be for him and his heirs for the term of ninety-nine years from the 25th of March last past, free from paying any rent, and that 100 acres shall be laid out for the school a training-field and burying-yard by said committee, as they shall judge most accommodable, and that 200 more shall be reserved to be allotted for other public uses, as the trustees from time to time shall see meet to direct. 3d. That the residue and remainder of the lands over and above the above 12,500 acres within said township belonging to the trustees, either by purchase or the General Court grant, (the cedar swamp that part of the town grant by the General Court excepted), shall and remain a common to and among the tenants that shall hold these lands by lease under the said trustees for their use and benefit, each tenant to have a right and privilege to said common, according to the quantity of land contained and specified in their leases for and during their term."

^a The within is a true copy of Record Book of Hopkinton Records No. 3, Page 37. per CALER HAYDEN, Reg.

^b This Indenture, made the twenty-fifth day of March, in the twenty-third year of the Reign of our Sovereign Lord George, by the Grace of God, of Great Britain, France and Ireland, King Defender of the Faith, etc., Antoine Bonini, 1581. Between His Excellency, William Shirley, Esq., The Honorable Jonathan Belcher, William Dunster and Spencer Philips, Esq., Paul Dudley, Edward Hutchinson, Josiah Willard, Jacob Wendell, Esqs., The Rev. Dr. Joseph Sewall, The Rev. Edward Holyoke, President of Harvard College in Cambridge; The Rev. Nehemiah Walter, minister of Roxbury; The Rev. Nathaniel Appleton, minister of Cambridge; Samuel Sewall, Andrew Oliver, Thomas Hutchinson, Esq., and Mr. Edward Brumfield, merchant, all inhabitants within

his Majesty Province of the Massachusetts Bay, in New England, Trustees appointed by a Decree in his Majesty's High Court of Chancery, Dated the nineteenth day of March, Anno Domi 1712, for the purchasing houses and lands for the perpetuating the Charity of the Honorable Edward Hopkins, Esq., and improvement of the same. On the one part and includes John Jones, James Wank, Henry Millen, Benjamin Wast and John Rockwood, Selectmen of Hopkinton, in the County of Middlesex, and their successors within the Province aforesaid, of the other Part. Witnesseth, that the said William Shirley, Jonathan Belcher, Wm. Dummer, Spencer Phelps, Paul Dudley, Edward Hutchinson, Josiah Willard, Jacob Wendall, Esq., Joseph Sewall, Edward Holyoke, Nehemiah Walter, Nathaniel Appleton, Samuel Sewall, Andrew Oliver, Thomas Hutchinson and Edward Bromfield, Trustees as aforesaid, as well for and in consideration of the Rents and Services herein after reserved and of the performance of the Covenants and Agreements herein after expressed and mentioned to be kept, done and performed on the part and behalf of the said John Jones, James Wank, Henry Millen & others; as also for other good and valuable causes and considerations, them here unto especially moving, Have demised, granted, and to Farm, Letten, and by these presents do demise, grant and to farmlet unto the said Selectmen and their successors, three certain tract or parcel of land situate, lying and being in Hopkinton, within the County of Middlesex aforesaid, containing one hundred acres, as surveyed and laid out by John Jones, Surveyor, being under-ath, for the use and benefit of a *Sea Land Training field and Burying place, fenced* and is bounded viz. Southly on Wilson and Gordon, westerly on a High way, northerly on Mr Barrett and on highway, and Easterly on a highway and on Stimpson land, the other tract of forty-five acres Layeth at White hall, and is bounded southerly on Common land, westerly on Common land, northerly on John Kelly land, and Easterly on Common land, as may more appear by the plans annext.

"To Have and To Hold the above-mentioned demised Premises with the appurtenances, unto the said Selectmen, and their Successors, for the use aforesaid, for and during, and unto the full Era and Term of Nine hundred and ninety-nine years from the twenty-fifth day of March as above said, thence next ensuing and fully to be compleat and ended; Yielding and paying therefor yearly and every year during the said Term hereby demised unto the Treasurer of the said Trustees for the true being or his assigns the Yearly Rent of one pepper corn if demanded, next coming. And if it shall happen that the yearly Rent or Rents herein before Reserved, or any of them or any part thereof, shall be behind or unpaid, in part or in all, by the space of Thirty days next after any of the said days or Times on which the said ought to be paid as aforesaid, That then and from thenceforth it shall and may be lawful unto and for the Trustees or Treasurer there or his Successors and Assigns into the Demised premises and every or any part thereof with the appurtenances, to enter and distrain for the same: And the Distress or Distresses there found to take, lead, drive and carry away and the same to detain, impound and keep until the said yearly Rent and Rents in manner and form, as aforesaid Reserved, and the arrearages thereof, if any such shall be, shall be unto the said Trustees or Treasurer, or to their or his successors and assigns fully satisfied, contented and paid: And if it shall happen, that the said yearly Rent or Rents herein before Reserved shall be behind and unpaid in part or in all, and no distress made and taken as aforesaid during the thirty days above mentioned, by the space of thirty days next after the expiration of the thirty days on which the same ought to have been paid, or a distress might have been made: That then and from thenceforth, it shall and may be lawful to and for the said Trustees or Treasurer, their and his successors and assigns into and upon the said Demised Premises and every part thereof with the appurtenances wholly, to re-enter and the same to have again, retain, repossess and enjoy in their former estate and title, anything in these Presents contained to the contrary in any wise notwithstanding. And the said Selectmen, for themselves and their successors, and every of them, doth covenant, Grant and Agree to and with the said William Shirley, Jonathan Belcher, Wm. Dummer, Spencer Phelps, Paul Dudley, Edward Hutchinson, Josiah Willard, Jacob Wendall, Esq., Joseph Sewall, Edward Holyoke, Nehemiah Walter, Nathaniel Appleton, Samuel Sewall, Andrew Oliver, Thomas Hutchinson and Edward Bromfield, Trustees, as aforesaid, their successors and assigns, and every of them by these presents in manner and form following, That is to say, That the said Selectmen, or some of them, shall yearly and every year and from Time to Time during the said Term hereby Demised well and truly content, satisfy, pay or cause to be paid unto the said Trustees or Treasurer, and their or his successors or assigns the said yearly Rent or Rents herein before Reserved, and on the several Days or Times herein before appointed for the payment thereof, and in the same manner and form as the same shall grow due and payable, according to the true Intent and meaning of these Presents. And at the Expiration of the said Term or other Determination thereof, shall and will surrender and deliver up unto the said Trustees or Treasurer, their or his Successors, the said premises in the good and Tenant like Repair peaceably, quietly and willingly; and that he and they shall from time to time and at all times during the said Term pay all Rates and Taxes to Church and Common Wealth that shall be set and imposed, according to Law, upon him and them and the Premises. And the said Trustees, for themselves and successors, do Covenant, Promise and Agree to and

with the said Selectmen and their successors, in manner and form following, That is to say, That they faithfully performing and fulfilling all and singular the Covenants, Agreements and Payments above Expresssed, may and shall peaceably have, hold, possess and enjoy all the above Demised Premises, for and during the Term aforesaid, without Let, Trouble, Eviction or Disturbance from them the said Trustees or their Successors, or from any other Person or Persons, from, by or under them, or by their means or Procurement. And they further Covenant and Promise, That the said Selectmen and their Successors, holding and continuing in the Possession and Improvement of the Premises, under the faithful performance of the Covenants, Agreements and Payments above expressed unto the Compliment and Ending of the said Term of Nine hundred and ninety-nine years, without eviction or ejectment for breach of covenant at the expiration of the same may and shall, if he or they see cause, Renew their Lease for such Term of years or for the Life or Lives as shall then be agreed upon, by and between the Lessor and Lessees that shall then be, without any alteration of the covenants and Agreements before expressed, Save only of the Rent to be then Reserved which yet the Trustees for themselves and Successors covenant, Promise and Agree to and with the said Selectmen and their successors, That it shall not be lawful for them or will the Demand, Let and Reserve above Nine Pence per Acre for the said Lands and Premises, from and after the Expiration of the Term, as above said, at any time or for any Term whatsoever. And, Finally, the said Trustees, for themselves, their Successors and Assigns, do Agree, Covenant and Promise to Discharge and Save the said Selectmen and their successors from paying any Province Land Tax for Three-quarters of the above Demised Lands. In Witness Whereof, the aforesaid parties to these Presents have interchangeably hereunto set their Hands and Seals the day and year first above written.

"Signed, sealed and delivered in presence of us,	EDWARD HUTCHINSON.
SAMUEL BALLARD,	THOMAS HUTCHINSON.
TOMAS BROMFIELD,	EDWARD BROMFIELD."
	[SEAL.]

"Memorandum

"Whereas the within named Trustees at their Meeting November 16, 1720, have agreed and voted that the Residue and remainder of the Lands over and above Twelve Thousand five hundred Acres within the Township of Hopkinton belonging to the said Trustees either by purchase or the General Courts Grant (the Cedar Swamps in the Part of the Township granted by the General Court excepted), shall be and remain a Common to and among the Tenements, &c., Each Tenant to have Right and Privilege in the said Common according to the quantity of Land specified in his Lease and during his term: That notwithstanding the Exception and Reservation of the Cedar Swamps as aforesaid all and singular the Tenants that shall take and sign Leases within three years, from the 25th of March last past, &c., shall be allowed the Benefit of cutting both Cedar and Pine in the said Swamps for covering, Flooring and finishing the Houses and Barns which they shall erect and maintain on the Premises; but they are prohibited cutting and carrying off any Timber out of the said swamps for sale and if any presume so to do, such shall be impeachable of waste, &c., as in and by the third, fourth and fifth votes past at the said meeting, more amply and plainly may appear, reference thereunto being had: Wherefore now, pursuant to the Direction and Power given unto us the Committee Subscribers unto this present Endorsement for ourselves and the within named Lessors and to and their Subscribers, We do Covenant and Grant to and with the within named Lessees, viz., His Executors, Administrators and Assigns to have and to hold a right and privilege in the said Common according to the Quantity of land, specified in the within written Lease for and during his Term. And further that the said Lessee and his Executors, Administrators and Assigns, shall, and may lawfully from time to time, have the benefit of cutting both Cedar and Pine, in the Swamps aforesaid, for the covering, flooring and finishing the Houses and Barns he shall erect upon the Premises within written. And the said Lessee for himself, his Heirs, Executors, Administrators and Assigns, doth Covenant and agree to and with the Lessors and their Successors not to cut or carry off timber of any kind out of the said Swamps for sale or any more than for the Uses aforesaid on pain and penalty of being Impeached and Prosecuted for Waste.

"Before me

JOHN FATERWEATHER, Jus. Peace."

In closing the history of Hopkinton, there is much, if space would allow, that could be added. The schools of the town are in good condition and in the

hands of a competent superintendent, and a committee devoted to their interest. The town report for 1890 shows the followings statistics: number of schools of all grades, 23; number of pupils enrolled, 789; support of schools and incidentals, \$12,693.16; Highways, \$3000; street-lights, \$250; support of the poor, \$6000; incidentals, \$1200; town officers, \$1566; interest on town debt, \$10,150; Memorial Day, \$100.

The town has water-works which furnishes a liberal supply of good water.

BIOGRAPHICAL.

HON. LEE CLAFLIN.

Hon. Lee Claflin³, (Ebenezer², Ebenezer¹), born in Hopkinton, November 19, 1791, married Sarah Adams, daughter of Elisha and Sarah (Watkins) Adams, December 19, 1815, certificate of the Rev. Isaac Bowney. Engaged in the tanning business in Milford as early as 1813; added the boot and shoe business about 1821. He rose from an humble beginning and many judicious steps to wealth and distinction. He represented the town in the Legislature in 1834. In 1839 or '40 he returned to Hopkinton, where he attained many honorable positions; having been a member of the State Senate in 1859, while a resident of that town. He was very early a prominent member of the Liberty Party, and was always active in the anti-slavery cause. He was instrumental in establishing three banks, of which he was the first president, the Milford, the Hopkinton, and the Hide and Leather, of Boston. He was greatly interested in all educational matters, being one of the three designated founders of Boston University. After South Carolina surrendered to the Federal arms, he took an active part in the purchase of the abandoned seminary at Orangeburg, which finally became Claflin University, which was named for him.

While an apprentice to Mr. Warren in Framingham he joined the Methodist Church of which he was a devoted and steadfast supporter all his life. He made many donations to the churches and literary institutions of that denomination, and frequent benefactions of a more general nature to the community. He was a man of great mental vigor as well as physical strength, which lasted to the end of his life. He died from the effects of an accident, Feb. 23, 1871.

By his first wife he had three sons, William, Charles Lee, who died in infancy, and Wilbur Fisk, who resided in Hopkinton until his death, August 31, 1885—she died April 6th, 1834. Mr. Claflin married March 8th, 1836, Polly Jones Harding, who survived him several years.

SAMUEL AND ABRAM CROOKS.

The ancestors of Samuel and Abram Crooks were Scotch Presbyterians who, as runs the record, were originally dwellers in Argyleshire, in the west of

Scotland. They went from there to Antrim and Londonderry, in the North of Ireland, as early as 1618. Just one hundred years later than this date, a colony of 120 families, among whom were the Crooks, emigrated to America, a portion of them landing in Portland, Maine, while the remainder came to Boston. Quite a large number of these colonists went northward and became the original settlers of Londonderry, Derry, Derryfield and other of the pioneer towns in New Hampshire, while another portion consisting of eighteen families journeyed westward and settled upon the high-lands of Hopkinton, in the winter of 1719. Among these sturdy settlers was Samuel Crooks, from whom, in the fifth generation, the subjects of this sketch are descended. First, Samuel; second, John; third, Abraham; fourth Samuel, who was the father of Samuel and Abraham, whose portraits accompany this sketch.

Their father, Samuel, was born in Hopkinton, August 22, 1792, and in March, 1818, married Emeline, daughter of Jonathan and Hannah (Thayer) Stearns, to whom were born three sons, John, Samuel and Abram. Their father was a farmer and became one of the leading spirits in the town. For many years he was superintendent of the Town Farm) and was a useful and valued citizen, who died in October, 1873, universally respected. Coming now to the fifth generation, we find the eldest *John* born, May 29, 1819; SAMUEL, the second, who was born in Hopkinton, December 17, 1821, and ABRAM, the youngest of the family, also born in Hopkinton, March 29, 1826. *Samuel* and *Abram* having been so intimately connected, and so closely identified with each other in all business matters, it is thought better to make the record of their lives a joint one, rather than to give them in separate sketches. The childhood days of these boys were spent on the farm, and their experiences doubtless were similar to those of the average New England farmer's boys. Their educational advantages were such as were commonly afforded by the District School, which was situated about a half mile from their home. Leaving school they were fully occupied with the ordinary farm duties, until at about the age of fifteen, they commenced in what has since proved to be their life-work, and which has, from very small beginnings, so wonderfully developed, that at this writing they stand *third* only in the output of their manufacture of all the boot and shoe manufactories of this Commonwealth.

They began by bottoming boots and shoes at the village of Woodville, in the western part of the town of Hopkinton. Here they gradually acquired a knowledge of the full details of this business as then prosecuted, and in 1849, commenced as boot and shoe manufacturers in the building then known as the Joseph Walker shop, which they rented from a man who had befriended them in the early part of their career as manufacturers. Hon. Lee Claflin, the father of Ex-Gov.—William Claflin, of Newtonville, Mass.

Dr. Hapton

Samuel Crooks

Abram Crooks

L. B. Maybry

Here they remained steadily increasing their business until 1853, when they removed to Grove Street and carried on a thriving business in "*the old meeting-house*" which after disuse for purposes of religious worship was fitted up for a manufactory. Here they continued until 1860, when for the purpose of securing more extensive and better facilities for conducting their large business, they removed to the "Davenport Block" on Main Street, in Hopkinton, where they have since remained. The premises now occupied by them cover an area of about two acres, and the main shop is an imposing building of five stories, and is supplied with the latest appliances and machinery, all of which is driven by an engine of 100 horse-power. In this shop are employed about 500 operatives, who are furnished by this firm with steady and remunerative employment, and the result of their busy and skilled handiwork is shown in the daily completion on an average of over three thousand pairs of boots and shoes which go into nearly all parts of the world through the agency of the celebrated house of William Claffin, Coburn & Co., of Boston, who handle all of this immense output. The style of the firm as it has existed for nearly forty years is S. & A. Crooks & Co. Samuel Crooks has been identified with the Orthodox Church since 1842, and has taken an active part in its welfare, and contributed largely to its support. While declining to take any active part in the official line of political affairs, the Messrs. Crooks have been Republicans ever since the organization of that party. Samuel has been quite prominent in the financial affairs of the town, and for several years the vice-president and a director in the Hopkinton National Bank, and also vice-president of the Hopkinton Savings Bank, both of which are thriving institutions, and both Samuel and Abram have contributed very largely to the success and the importance of this beautiful town, and the prosperity, wealth and happiness of her citizens. November 13, 1844, Samuel Crooks married Sarah B., daughter of Ezekiel and Betsey (Johnson) Guy, and there have been born to them seven children—Emeline E., Charles H., Mary E., Alice M., Herman R., Jennie L. and George H., all of whom except Jennie L. are deceased. Jennie L. was married December 13, 1883, to G. A. Bridges, and resides in Hopkinton. ABRAM Crooks was married November 27, 1849, to Annie M. Guy, a sister of the wife of Samuel. From this union there have been three children—Florence I., Mary A. and Arthur R. Of these there are two living—Mary A. and Arthur R. Florence I. died May 22, 1877, aged twenty-one years. Mary A. was married in October, 1882, to Frank Thompson, and they resided in Hopkinton. Arthur R. married October, 1889, Lillian, daughter of Henry and Marietta A. (Fiske) Adams, and they reside in Hopkinton.

The mother of the Messrs. Crooks died April, 1864.

LOWELL BOWKER MAYBRY.

The unostentatious routine of private life, although in the aggregate more important to the welfare of the community, cannot from its nature figure in the public annals. But the names of men who distinguish themselves for the possession of those qualities of character which so largely contribute to the success of private life and to the public stability, of men who have been exemplary in their personal and social relations, thus winning the affection, respect and confidence of those around them, ought not to perish. Their example is more valuable to the majority of local readers than that of illustrious heroes, statesmen and writers, and all are benefited by the delineation of those traits of character, which find scope and exercise in the common walks of life. Among the individuals of this class few are better entitled to be held in respectful remembrance than the subject of this sketch. His ancestors were among the early settlers of Hopkinton. His father was Dexter L. Maybry and was born April 22, 1799. He carried on at different times in his life both farming and the boot and shoe business. He married Mary Gage Bowker, who was born Nov. 30, 1801, and they had five children,—Lowell B., Susan L., Sarah L., Samuel D., and Eliza C.

Lowell B. was born Aug. 28, 1820, in Hopkinton, which has been his permanent home since that date. His childhood and youth were as uneventful as were those of the average New England boy. As the first born there would naturally come to him a degree of responsibility for the care of a younger brother and sisters, who a little later on became the sharers in childhood sports and school-day duties. Lowell attended the district school in the winter months and received such education as could there be obtained. Leaving school he went into the boot shop of his Uncle Lovett H. Bowker in Hayden Row to learn that business and there he remained for a long period. And becoming well versed in all details of this manufacture, he in 1854 took charge of Bowker & Phipps' large boot factory in the centre of the town, also the carrying business which was connected with it, where he remained eight years.

He became prominently associated with the town affairs, being elected a director of the Hopkinton National Bank in 1854, where he served continuously until 1876, when a further expression of confidence was shown by his being elected to the presidency, which position he still holds. He had but little taste for politics and declined nominations to various positions of political trust. Being strongly opposed to slavery he very naturally affiliated with the Republicans, and has acted with them ever since their organization. Mr. Maybry is a member of the Congregational Church and contributes to its support. He is a lover of music and has for over fifty years occupied a place in the choir of that church. He has also had a hand in the organization of the various musical associations of the town.

Mr. Maybry has been twice married,—first, September 22, 1847, to Sophia P. Walker, who died May 15, 1884, and second, February 27, 1889, to Mrs. Mary M. Glidden, of Claremont, N. H., who is now living. Mr. Maybry was, for many years, treasurer and collector of the town of Hopkinton, and has served on the Board of Selectmen. He has also, for many years, had the management of the large real-estate interests of Hon. William Claflin in this town, by whom he is highly esteemed as trustworthy and reliable. He is also the manager of several other large estates. In matters of public policy his views are sought, and he has the confidence and esteem of his fellow-citizens of all parties. He has an intense love of the beautiful in nature, and is a successful farmer and an amateur florist.

CROMWELL MCFARLAND.

This family was one of the colony of Scotch and Irish families that emigrated to America in 1718, and many of whom settled in the vicinity of Hopkinton. The name of the first American ancestor was Robert, and he had a son, Ebenezer, who was a soldier in the War of the Revolution. Ebenezer had a son, Lawson, who was the father of the subject of this biographical notice. It seems proper here to note the fact that a brother of Ebenezer was born in Hopkinton, who became a very prominent citizen. He was Walter McFarland, a farmer, and also a skillful surveyor, in which latter capacity he laid out a large portion of Hopkinton and adjoining towns. He represented his native town in the lower branch of the Legislature for twelve years, and was for one term a member of the upper branch.

Cromwell, son of Lawson and Deborah (Rockwood) McFarland, was born in Hopkinton February 7, 1819, and his boyhood days were spent on his father's farm, where he assisted his parents in the duties incident to farm life in New England, and joined in the sports peculiar to that locality. After a few years of instruction in the Common School, where at least the average of success was achieved, Cromwell worked on the farm until, at the age of seventeen years, he concluded to try his hand at the prevailing occupation of the town's-people, making boots and shoes. He followed this business until about 1840, when an opportunity offered for him to join with William A. Phipps, of Hopkinton (a brother-in-law), in the business of supplying fresh meat to the families of Hopkinton and vicinity. This was long before the days of refrigerator cars, Chicago Dressed Beef or Luncheon Beef, and this firm did all their own butchering.

They at first bought fat cattle in the vicinity of Hopkinton, but as the population increased rapidly they soon were obliged to go to the Brighton Stock Yards for the supply. Mr. McFarland has continued uninterruptedly in this business from 1840 up to the present time and has met with a good measure of success. June 2, 1842, Mr. McFarland married Han-

nah, daughter of Moses and Hannah (Adams) Phipps, and they had three children—Curtis, born June 10, 1844; Anna, born July 3, 1850, and Henry, December 17, 1852. Curtis died January 15, 1864, and Anna was married August 5, 1869, to J. Sanford Haven, of Hopkinton and they have had two children, one of whom only is living—Henry McFarland married Katie B. Adams, April 1, 1880. Cromwell McFarland has not been a man to court notoriety, or to seek office, but was on the Board of Assessors of Hopkinton and represented the town in the Legislature one term, and also has been a director in Hopkinton National Bank. Mr. McFarland has ever discharged the duties of citizenship in a creditable manner. Mr. McFarland, while not a member of any church, is a regular attendant of the Congregational Church, and contributes to the support of public worship there. For almost fifty years Mr. McFarland and the wife of his choice in his young manhood have journeyed on together, mutually helpful, winning material success beyond any personal need, as they stand facing the approaching sunset of their well-spent lives.

WILLIAM ADAMS PHIPPS.

The Phipps family are of English ancestry. For our present purpose it is not thought necessary to go beyond the date of the early settlement of New England. There were several of this name who were of the colony of 1718, some of whom landed at Portland, Maine, and settled that State. The name of the first settler of whom William A. is a descendant, we are unable to determine from any available records, but it is definitely stated in an early history of Maine "that several families of this name had reared large numbers of children, one family having consisted of *twenty-six* children." With a few such samples at the present day, the census enumerator might safely be charged with inaccuracy. During the early days of the French and Indian War, William Phipps, of Maine, a brave, fearless man, organized a body of 2000 men and marched at their head to join in the assault on Quebec, but losing his way he arrived too late to be of any service, but was afterwards in several engagements and was knighted for bravery, thus becoming Sir William Phipps.

In 1762 he was made Governor of the Province of New Hampshire. Some of the Phipps family were among the early settlers of Holliston, Mass.; and Moses, the father of our subject, was born there and moved to Hopkinton about 1800, where he became a prominent citizen, representing the town of Hopkinton in 1835, beside being for several years on the Board of Selectmen, and in 1840-41 and '42 was chairman of the Board. He carried on farming besides keeping a store and he was also a skilled blacksmith. Moses married Hannah Adams and they had seven children—William A., Benjamin, Alpalet, John, James, Hannah and Elmira. Of these children Benjamin, John and James are deceased. The last

A. W. Farland

Wm. A. Phillips

named became a noted physician of Boston. William Adams Phipps was born in Hopkinton, September 19, 1809. He spent his boyhood at home and attended the district school assisting in the work out of school hours. He made good progress in school and on leaving it he attended for some time a private school in Holliston, also a term in Milford, Mass., and in Thompson, Connecticut. He became a teacher and was efficient in that occupation, teaching in his native town, also in Milford.

At the age of twenty-three he left teaching and became a butcher, taking with him his brother-in-law Cromwell McFarland, and they continued several years. About 1847 he commenced the manufacture of boots, in which he continued with success until 1876 when he retired from active business. Mr. Phipps was for many years on the Board of Selectmen, and represented the town in the General Court. He has been a director in the Milford National Bank. In politics his affiliations have chiefly been with the Republican party. He has been a contributor to the support of the Congregational Church. Mr. Phipps has been twice married, first to Sarah Bowker, of Hopkinton, and they had ten children—Wm. H., Marilla F., Waldo, Vernon E., Frederick S., Anna A., Isabel D., Joseph B., Norman B., and a son who died in infancy. Of these children four only are living. The mother of these children died in October, 1870. His second marriage was with Maria S., daughter of Stephen D. and Hannah (Farrington) Willie, December 11, 1872. She is a superior woman and in a refined and tender way ministers to the needs of Mr. Phipps in his declining years with uncomplaining tenderness.

CHAPTER LV.

MEDFORD.

BY JAMES A. HERVEY.

MEDFORD, one of the oldest towns in Middlesex County, lies about five miles northwest from Boston, and joins boundaries on its different sides with Somerville, Arlington, Winchester, Stoneham, Melrose, Malden and Everett. The town has borne its present name from its first settlement, but all conjectures which have been made as to its origin are unsatisfactory. It is much to be regretted that the first twenty or thirty pages in the manuscript which contain the earliest town records are lost, the opening entry being dated "the first Monday in February, in the year of our Lord, 1674." For all information touching the history of the settlement of the town, we must have recourse to contemporaneous records, to the writings of Winthrop, Dudley, Wood, Hutchinson and others, and to the registries of deeds and probate; and much light is incidentally thrown upon the life and history

of the town by the Massachusetts Colony Records and the Historical Collections of the Massachusetts Historical Society. All the sources of information have been carefully gleaned by Charles Brooks, the historian of the town.

Medford has been especially fortunate in possessing such an annalist. A native of the town, with which his family had a most respectable ancestral connection, his history of the town was a labor of love, and he devoted many years of his life to the work. It is well observed by his editor, Mr. Usher, that "no complete history of Medford can be written which does not largely embody the material collected by him." We are indebted to Mr. Usher for the additions he has made to Brooks' text, and for his careful narrative of the later history of the town, bringing it up to a very recent date.

The settlement of Medford, contemporaneous with that of Boston and the towns in its immediate vicinity, was made by a detachment from the large body of immigrants who, under the auspices of the Massachusetts Bay Company, came over from England in 1630, disembarking at Salem. The Massachusetts Bay Company, which was chartered in 1628, had for its first governor, Matthew Cradock, who, although he never visited New England, took an important part in the management of the affairs of the colony, and especially, as will be seen, in the settlement of Medford. Although Cradock seems to have resigned the office of governor in 1629, with a view to the transference of the government to New England, he was elected one of the "Assistants" of the Company, and appears to have retained the home direction of its affairs. Winthrop, the first Colonial governor, did not enter upon his office until 1631.

The initiatory movements in England for the establishment of the colony, as well as the manner in which the immigrants distributed themselves in forming the different settlements, have been carefully detailed by Governor Dudley in his well-known letter to the Countess of Lincoln. We give these extracts from the letter:—

"To the Right Honourable my very good Lady, the Lady Bridget, Countess of Lincoln.

"MADAM.—Touching the plantation which we have begun, it fell out thus: About the year 1625 some friends, being together in Lincolnshire, fell into discourse about New England and the planting of the gospel there; and, after some deliberation, we imparted our reasons, by letters and messages, to some in London and the West Country, where it was likewise deliberately thought upon, and at length, with often negotiation, so ripened, that in the year 1628 we procured a patent from his Majesty for our planting between the Massachusetts Bay and Charles River on the south, and the River of Merrimack on the north, and three miles on either side of those rivers and bays, as also for the government of those who did or should inhabit within that compass. And the same year we sent Mr. John Endicott, and some with him, to begin a plantation, and to strengthen such as we should find there, which we sent thither from Dorchester and some other places adjoining; from whom, the same year, receiving hopeful news, the next year (1629) we sent divers ships over, with about three hundred people, and some cows, goats and horses, many of which arrived safely.

"These, by their too large commendations of the country and the commodities thereof, invited us so strongly to go on, that Mr. Win-

throp, of Suffolk (who was well known in his own country, and well approved here for his piety, liberality, wisdom and gravity), coming in to us, we came to such resolution, that in April, 1630, we set sail from Old England with four good ships. And, in May following, eight more followed; two having gone before in February and March, and two more following in June and August, besides another set out by a private merchant. These seventeen ships arrived all safe in New England for the increase of the plantation here this year (1630), but made a long, a troublesome and costly voyage, being all wind-bound long in England, and hindered with contrary winds after they set sail, and so scattered with mists and tempests, that few of them arrived together. Our four ships which set out in April arrived here in June and July, where he found the colony in a sad and unexpected condition; above eighty of them being dead the winter before, and many of those alive weak and sick, all the corn and bread among them all hardly sufficient to feed them a fortnight. But, bearing these things as we might, we began to consult of our place of sitting down; for Salem, where we landed, pleased us not.

"And to that purpose some were sent to the Bay to search up the rivers for a convenient place, who, upon their return, reported to have found a good place upon *Mistick*; but some other of us, seconding these, to approve or dislike of their judgment, we found a place liked us better, three leagues up Charles River, and thereupon unshipped our goods into other vessels, and with much cost and labor brought them in July to Charlestown. But there receiving advertisements (by some of the late arrived ships), from London and Amsterdam, of some French preparations against us (many of our people brought with us being sick of fevers and the scurvy, and we thereby unable to carry up our ordnance and baggage so far), we were forced to change counsel, and for our present shelter to plant dispersedly,—some at Charlestown, which standeth on the north side of the mouth of Charles River; some on the south side thereof, which place we named *Boston* (as we intended to have done the place we first resolved on); some of us upon *Mistick*, which we named *Medford*; some of us westward on Charles River, four mile from Charlestown, which place we named *Watertown*; others of us two miles from Boston, in a place we called *Roxbury*; others upon the River Saugus, between Salem and Charlestown; and the Western-men four miles south from Boston, in a place we named *Dorchester*. They who had health to labor fell to building, wherein many were interrupted with sickness, and many died weekly, yea, almost daily.

"After my brief manner I say this: that, if any come hither to plant for worldly ends that can live well at home, he commits an error of which he will soon repent him; but if for spiritual, and that no particular obstacle hinder his removal, he may find here what may well content him, viz., materials to build, fuel to burn, ground to plant, seas and rivers to fish in, a pure air to breathe in, good water to drink till wine or beer can be made; which, together with the cows, hogs and goats brought hither already, may suffice for food; as for fowl and venison, they are dainties here, as well as in England. For clothes and bedding, they must bring them with them, till time and industry produce them here. In a word, we yet enjoy little to be envied, but endure much to be pitied in the sickness and mortality of our people. If any goodly man, out of religious ends, will come over to help us in the good work we are about, I think they cannot dispose of themselves, nor of their estates, more to God's glory and the furtherance of their own reckoning; but they must not be of the poorer sort yet, for divers years. I am now, this 28th March, 1631, sealing my letters.

"Your Honor's old thankful servant,

"THOMAS DUDLEY."

In the Charlestown records, 1664, John Green, in giving a history of the first-comers, says:

"Amongst others that arrived at Salem, at their own cost, were Ralph Sprague, with his brethren, Richard and William, who, with three or four more, by joint consent, and approbation of Mr. John Endicott, Governor, did, the same summer of anno (1628) (29), undertake a journey from Salem, and traveled the woods above twelve miles to the westward, and lighted of a place situate and lying on the north side of Charles River, full of Indians, called *Aberghinians*. Their old sachem being dead, his eldest son, by the English called John Sagamore, was their chief, and a man naturally of a gentle and good disposition. . . . They found it was a neck of land, generally full of stately timber, as was the main and the land lying on the east side of the river, called *Mystick River*, from the farm Mr. Cradock's servants had planted, called *Mystick*, which this river led up unto; and, in-

deed, generally all the country round about was an uncouth wilderness, full of timber."

These seem to have been the first Europeans who visited the site of the present town of Medford.

Of the "four ships" mentioned by Dudley as sailing from England in April, 1630, two belonged to Cradock, and one of the others, the "*Arbella*," brought over Winthrop. Cradock was a merchant and a man of wealth, and the lading of his vessels was largely a private venture. The emigrants sent over by him were men selected for their fitness to engage in the business of the fisheries and shipbuilding, in which he proposed to embark, and among them were "coopers and cleavers of timber." Although the company declared in 1629 that "the propagation of the gospel is the thing we do profess above all to be our aim in the settling of this plantation," there can be no question that they expected to make the enterprise self-supporting, and even profitable, and from the very start they took the proper steps to attain that end.

Governor Winthrop in his journal says: "Thursday, 17th of June, 1630: We went to Massachusetts to find out a place for our sitting down. We went up 'Mystic River' about six miles." This, so far as we know, was the first exploration of the river. Winthrop at once established himself on a tract of land on the south side of the Mystic, where he built a house. To this estate he gave the name of the "Ten Hills Farm," which it has ever since retained.

The name of "Mystic Fields," or "Mystic," was applied to the lands on the south side of the river, stretching from Charlestown Neck to the ponds at the head of the stream, and including the Winthrop farm. The name "Mystic" was sometimes extended to Medford itself.

A grant of six hundred acres of land was made by the "Court of Assistants" to Winthrop, in 1631, "to be set forth by metes and bounds, near his house in Mystic, to enjoy to him and his heirs forever." Mr. Winthrop appears to have been much pleased with his new possessions, for writing to his son he says: "Here is as good land as I have ever seen there [in England], though none so bad as there," and in a letter to his wife, written November 29, 1630, we find these words: "My dear wife, we are here in a paradise."

It was about the time when Winthrop established himself at the Ten Hills Farm, in the summer of 1630, that Cradock's people made their settlement at Medford. It was probably under Winthrop's direction that the agent of Cradock fixed his headquarters on the north side of the Mystic, nearly opposite the Ten Hills Farm, and here the settlers at once addressed themselves to the work which they had in hand. The existence of the plantation was authoritatively recognized as early as September 28, 1630, when a tax of £3 was imposed on Medford for the support of military teachers; and, in November of

the same year, another tax of £3 was laid on the settlement.

From the beginning, Governor Cradock had been an earnest and active friend of the new plantations, and had held wise and far-reaching views as to the means by which their prosperity could be secured. Some of his letters are extant, and furnish abundant proof of his enthusiastic devotion to the enterprise, at the same time giving us very favorable impressions of the character of the man. Writing to Endicott, in February, 1628, he says:

"We are very confident of your best endeavors for the general good, and we doubt not but God will in mercy give a blessing upon our labors, and we trust you will not be unmindful of the main end of our plantation, by endeavoring to bring the Indians to the knowledge of the gospel, which that it may be speedier and better effected, the earnest desire of our whole company is, that you have diligent and watchful eye over our own people; that they live unblamable and without reproach, and demean themselves justly and courteous towards the Indians, thereby to draw them to affect our persons, and consequently our religion; as also to endeavor to get some of their children to train up to reading, and consequently to religion, while they are young; herein, to young or old, to omit no good opportunity that may tend to bring them out of that woful state and condition they now are in; in which case our predecessors in this our land sometimes were, and, but for the mercy and goodness of our good God, might have continued to this day; but God, who out of the boundless ocean of his mercy hath showed pity and compassion to our land, he is all sufficient and can bring this to pass which we now desire in that country likewise. Only let us not be wanting on our parts, now we are called to this work of the Lord; neither, having put our hands to the plough, let us look back, but go on cheerfully, and depend upon God for a blessing upon our labors, who, by weak instruments, is able (if he see it good) to bring glorious things to pass.

"Be of good courage, go on, and do worthily, and the Lord prosper your endeavor.

"And now, minding to conclude this, I may not omit to put you in mind, however you seem to fear no enemies there, yet that you have a watchful eye for your own safety, and the safety of all those of our nation with you, and not to be too confident of the fidelity of the savages. It is an old proverb, yet as true, *the burnt child dreads the fire*. Our countrymen have suffered by their too much confidence in Virginia. Let us by their harms learn to beware; and as we are commanded to be innocent as doves, so withal we are enjoined to be wise as serpents. The God of heaven and earth preserve and keep you from all foreign and inland enemies, and bless and prosper this plantation to the enlargement of the kingdom of Jesus Christ, to whose merciful protection I commend you and all your associates there, known or unknown. And so, till my next, which shall be (God willing) by our ships, who I make account will be ready to set sail from hence about the 20th of this next month of March, I end, and rest."

Another of his letters, written in April, 1629, speaks well for his notions of equity in dealing with the Indians:

"Above all, we pray you be careful there be none in our precincts permitted to do any injury (in the least kind) to the heathen people; and if any offend in that way, let them receive due correction. If any of the savages pretend right of inheritance to all or any part of the lands granted in our patent, we pray you endeavor to purchase their title, that we may avoid the least scruple of intrusion."

The importance of the service which Governor Cradock rendered to the infant plantations is recognized in the "First Letter of the Governor and Deputy of the New England Company for a Plantation in Massachusetts Bay, to the Governor and Council for London's Plantation in the Massachusetts Bay, in

New England," written in April, 1629. From this we quote as follows:

"We pray you give all good accommodation to our present governor, Mr. Mathew Cradock, who, with some particular brethren of the company, have deeply engaged themselves in their private adventures in these ships, and those to come; and as we hold these men, that thus deeply adventure in their private, to be (under God) special instruments for the advancing and strengthening of the plantation, which is done by them without any charge to the company's general stock, wherein, notwithstanding, they are as deep or deeper engaged than any other.

"We have sent six shipwrights, of whom Robert Moulton is chief. These men's entertainment is very chargeable to us; and by agreement it is to be borne two-thirds at the charge of the general company, and the other one-third is to be borne by Mr. Cradock, our Governor, and his associates interested in the private stock. We hope you will be careful to see them so employed as may countervail the charge, desiring you to agree with Mr. Sharp that their labor may be employed two-thirds for the general company, and one-third for Mr. Cradock and his associates, praying you to accommodate said Mr. Cradock's people in all fitting manner, as he doth well deserve.

"Our Governor, Mr. Cradock, hath entertained [paid the expenses of] two gardeners, one of which he is content the company shall have use of, if need be."

It is probable that Mr. Cradock's people at once engaged in the fisheries, building, farming, and in such other employments as furthered the interests for which the settlement was established. Their patron kept a watchful eye over their welfare. In the first year of their settlement he provided a man, Richard Waterman, "whose chief employment," he writes, "will be to get you good venison." Cradock's operations were not confined to Medford. He had an establishment also at Marblehead, where he employed "Mr. Allerton and many fishermen." As early as 1632, his agent, Mr. Davison, built a vessel of one hundred tons on the Mystic; and the next year, one of two hundred tons. Davison, in 1638, under the authority of the General Court, built the first bridge over the Mystic River, a short distance from the site of the present substantial stone structure known as the Cradock Bridge.

The General Court, March 4, 1634, made a grant of land to Cradock as follows: "All the ground, as well upland as meadow, lying and being betwixt the land of Mr. Nowell and Mr. Wilson on the east, and the partition betwixt Mistick bounds on the west, bounded with Mistick River on the south, and the rocks on the north." In 1635 the court ordered that "the land formerly granted to Mr. Cradock, merchant, shall extend one mile into the country from the river-side in all places." These grants of land covered almost the whole of the north side of the valley of the Mystic within the present boundaries of Medford, and comprised about two thousand acres.

This included all the territory of Medford in the earliest stage of its history. Wood, in his description of the Bay Settlements, written in 1634, thus speaks of Medford:

"Towards the northwest of this bay is a great creek, upon whose shore is situated the village of Medford, a very fertile and pleasant place, and fit for more inhabitants than are yet in it."

And further on, he says:

"The next town is Mistick, which is three miles from Charlestown by land, and a league and a half by water. It is seated by the water's side very pleasantly; there are not many houses as yet. At the head of this river are great and spacious ponds, whither the alewives press to spawn. This being a noted place for that kind of fish, the English resort hither to take them. On the west side of this river the Governor has a farm, where he keeps most of his cattle. On the east side is Mr. Craddock's plantation, where he has impaled a park where he keeps his cattle till he can store it with deer. Here, likewise, he is at charges of building ships. The last year one was upon the stocks of a hundred tons; that being finished, they are to build one twice her burden. Ships, without either ballast or loading, may float down the river, otherwise the oyster bank would hinder them which crosseth the channel."

While Mr. Craddock must in justice be considered as the founder of the town of Medford, it is doubtful whether his connection with the settlement enured to its ultimate advantage. His monopoly of the land kept out small proprietors, thus restricting the settlement of a permanent population, and after his death, which occurred in 1644, the settlement lost whatever benefit it had received from his patronage. Mr. Savage, in his edition of *Winthrop's Journal*, says:

"Of so flourishing a town as Medford, the settlement of which had been made as early as that of any other, except Charlestown, in the bay, it is remarkable that the early history is very meagre. From several statements of its proportion of the public charges in the colony rates, it must be concluded that it was, within the first eight years, superior in wealth, at different times, to Newbury, Ipswich, Hingham and Weymouth, all ancient towns. . . . Yet the number of people was certainly small; and the weight of the tax was probably borne by the property of Gov. Craddock, there invested for fishing and other purposes. When that establishment was withdrawn, the town languished many years."

With our present scanty information, we can only conjecture that the population of the infant settlement consisted in a very large part of Mr. Craddock's dependants and tenants, and so remained for some years after his death. In 1652 the heirs of Craddock quit-claimed to Edward Collins "all that messuage, farm or plantation, called Medford, in New England," by them owned. In 1656, Collins sold 1600 acres of the land, together with the mansion and buildings to Richard Russell of Charlestown. Five years after, Russell sold the "mansion-house" with 1200 acres of land to Jonathan Wade. After the death of Russell, his heirs sold 350 acres to Peter Tufts.

These successive sales of large portions of the Craddock estate indicate little more than a change of proprietorship, and show that the taste for land speculation is not a thing of recent origin. It was not till after the middle of the seventeenth century that the lands of Medford were sold in smaller parcels and the town began to enter upon a natural and healthy growth.

According to Brooks, the following Medford names are found in the list of freemen, between 1630 and 1646:

John Collins, Jonathan Porter, Richard Bishop, Thomas Brooke, John Waite, William Manning, John Hall, Richard Francis, William Blanchard, Henry Simonds, Zachery Fitch, Richard Wade, Richard Bugbe, John Watson, Abraham Newell, Henry Brooke, Gamaliel Wayte, Hezekiah Usher, Thomas Bradbury, Richard Swan, John Howe, Edmund Angier, Thomas Oakes, Hugh Pritchard.

In the county records we find the following names of men represented as at Medford:

George Felt	1633	Jonathan Wade	1668
James Noyes	1634	Edward Collins	1669
Richard Berry	1636	John Gail	1669
Thomas Mayhew	1636	Daniel Deane	1669
Benjamin Crisp	1636	Samuel Hayward	1670
James Garrett	1637	Caleb Brooks	1672
John Smith	1638	Daniel Markham	1675
Richard Cooke	1640	John Whitmore	1678
Joshua Dawton	1641	John Greenland	1678
— Dix	1641	Daniel Woodward	1679
Ri. Dexter	1644	Isaac Fox	1679
William Sargent	1648	Stephen Willis	1680
James Goodnow	1650	Thomas Willis	1680
John Martin	1650	John Hall	1680
Edward Convers	1650	Gershom Swan	1684
Goulden Moore	1654	Joseph Angier	1684
Robert Burden	1655	John Bradshaw	1685
Richard Russell	1656	Peter Francis	1685
Thos. Shephard	1657	Stephen Tufts	1686
Thos. Danforth	1658	Jonathan Tufts	1690
Thomas Greene	1659	John Tufts	1690
James Pemberton	1659	Simon Bradstreet	1695
Joseph Hills	1662		

The following persons owned land in Medford before 1680:

William Dady.	Increase Nowell.
Rob. Broadick.	Zachary Symmes.
Mrs. Anne Higginson.	John Betts.
Caleb Hobart.	Jotham Gibbons.
John Palmer.	Richard Stilman.
Nicholas Davidson.	Mrs. Mary Eliot.

The town had, in 1707, 46 ratable polls, indicating a population of about 230.

The depressed condition of Medford in the first half century of its existence is plainly enough shown by the small proportion of the tax imposed upon the town under the general levy. It should be remembered, however, that the grants of land, some of them lying in Medford, made by the General Court to Rev. Mr. Wilson, Matthew Craddock, and Mr. J. Newell, were exempted from taxation. In the records of the General Court, April 4, 1641, we find the following curious piece of legislation: "It is ordered that all farms that are within the bounds of any town shall be of the town in which they lye, except *Medford*." Of course the income of the town was reduced by the amount of such exemption. In a general levy of £600, in 1634, Medford paid £26; Charlestown, £45. In 1635, Medford paid £10, and Charlestown, £16. Winthrop tells us:

"Of a tax of £1,500, levied by the General Court in 1637, the proportion paid by Medford was £52.10s.; by Boston, 233.10s.; Ipswich, £180; Salem, £170.10s.; Dorchester, £140; Charlestown, £138; Roxbury,

£115; Watertown, £110; Newton, £106; Lynn, £105."

In 1645, the levy upon the towns of the Province was £616. 15s.; and Medford's share was £7.

Following Brooks, we find that in 1657, Medford was taxed as one of the towns of the county of Middlesex, in a county levy, £3. 6s. 11d.; in 1658, £3. 3s. 1d.; in 1663, £4. 4s. 6d.; in 1670, £4. 12s.; in 1674, £4. 3s. 10d.; in 1676, £4. 1s. 10d. During these years Cambridge was paying £40; Woburn, £25; Malden, £16; and Charlestown, £60. A county-tax of £1. 13s. 9d., levied on Medford, January 17, 1684, was paid by the inhabitants as follows:

	£	s.	d.		£	s.	d.
Capt. Jonathan Wade	0	6	4	John Bradshor	0	0	8
Capt. Nathaniel Wade	0	4	3	Jonathan Tufts	0	0	10
John Hall	0	3	3	Daniel Woodward	0	0	8
Caleb Brooks	0	1	11	Andrew Mitchell	0	0	8
Thomas Willis	0	3	7	Roger Scott	0	0	7
Stephen Willis	0	1	10	Edward Walker	0	0	8
Peter Tufts, Jr.	0	3	4	Jacob Chamberlain	0	0	8
Stephen Francis	0	1	10	Joseph Baker	0	0	8
John Whitmore	0	1	7				
Gershom Swan	0	1	5				41 15 8
Isaac Fox	0	0	11				

The excess raised in this tax, over the sum required, was to pay the collector.

"The first session of the General Court, under the second charter, began June 8, 1692; and they voted that 10s. a poll, and one quarter part of the annual income on all real and personal estate in the Province, be assessed. These taxes, assessed upon the Province by the House of Representatives from 1692 to 1702, averaged £11,000 per annum. Of this sum, Medford paid, in 1692, £32. 18s.; in 1696, £42; in 1698, £20; in 1702, £19. 1s.; while Malden paid, in the same years, £121, £90, £45, and £48. Woburn paid £181, £144, £75, and £85. Cambridge paid £214, £189, £102, and £102.

"To show a town-tax at this period, and also the names most frequently occurring in the town's records, we here insert 'a rate made by the selectmen, May 16, 1701, for defraying town-charges; namely, for the deputy, and the laying-in of ammunition, and for fetching and carrying Mr. Woodbridge, and the entertaining of him.'

As we follow down these records of assessments, we find a gradual increase in the number of tax-payers. The tax-list, in 1730—one hundred years after the town's settlement—includes 98 names; and, in 1798, we learn that there were 146 "occupiers of houses" who were taxed for more than \$100 of property. We have tolerably good proof that Medford had in 1754, its share of men of substance, and could in that respect compare not unfavorably with the neighboring towns. In that year the General Court laid a tax on coaches, chariots, chaises, calashes, and riding-chairs. Medford had 1 chariot, 7 chaises, and 31 chairs. Cambridge, at the same date, had 9 chaises and 36 chairs; Woburn, 2 chaises and 9 chairs; Malden, 2 chaises and 20 chairs.

In its possession of a "chariot," Medford shows to advantage in this record. The vehicle was probably owned by Col. Isaac Royall.

The Indians seem to have played an unimportant part in the early history of Medford. Nanepashemit, the sachem of the Pawtuckets, is said to have taken up his residence on the Mystic near the close of his life, and was killed and buried there in 1619. He left three sons, of whom Sagamore John was the chief of that portion of the tribe which resided on the Mystic. Governor Dudley, writing in 1631, says: "Upon the River Mystic is situated Sagamore John; and upon the River Saugus, Sagamore James, his brother. Both these brothers command not above thirty or forty men, for aught I can learn." Rev. Francis Higginson, in 1629, says of the Sagamores: "Their subjects, above twelve years since, were swept away by a great and grievous plague that was amongst them, so that there are very few left to inhabit the country. . . . The greatest Sagamores about us cannot make above three hundred men, and other less Sagamores have not above fifteen subjects, and others near about us but two." Governor Winthrop states that, in 1633, Sagamores John and James, and most of their people died of the small-pox. Sagamore John was extremely friendly to the whites, and is thus kindly noticed in "New England's First Fruits":

"Sagamore John, Prince of Massaguessers, was from our very first landing more courteous, ingenious, and, to the English, more loving, than others of them. He desired to learn and speak our language, and loved to imitate us in our behavior and apparel, and began to hearken after our God and his ways, and would much commend Englishmen and their God, saying, 'Much good men, much good God;' and being convinced that our condition and ways were better far than theirs, did resolve and promise to leave the Indians, and come live with us, but yet, kept down by the fears and scoffs of the Indians, had not power to make good his purpose; yet went on, not without some trouble of mind and secret plucks of conscience, as the sequel declares; for, being struck with death, fearfully cried out of himself that he had not come to live with us to have known our God better. 'But now,' said he, 'I must die. The God of the English is much angry with me, and will destroy me. Ah! I was afraid of the scoffs of the wicked Indians. Yet my child shall live with the English, and learn to know their God, when I

and dead. I will give him to Mr. Wilson: he is much good man, and much love me." So consent for Mr. Wilson to come to him, and committed his only child to his care, and so died."

After the death of Nanepashemet, his wife, or Squa-Sachem, as she was called, succeeded to his authority. She married Webcowit, the medicine-man of the tribe, and, in 1639, she deeded to Charlestown a tract of land bordering on Medford, in terms as follows:

"The 15th of the 24 mo., 1639. Wee, Web-Cowet, and Squa-Sachem do sell unto the inhabitants of the towne of Charlestowne all the land within the line granted them by the Court (excepting the farmes and the ground on the west of the two great ponds, called *Misticke Ponds*), from the south side of Mr. Nowell's lot, neere the upper end of the ponds, unto the little runnet that cometh from Capt. Cook's mills, which the Squa reserveth to their use for her life, for the Indians to plant and hunt upon; and the weare above the ponds they also reserve for the Indians to fish at whiles the Squa liveth: and, after the death of Squa Sachem, she doth leave all her lands, from Mr. Mayhues' house to neere Salem, to the present Governor, Mr. John Winthrop, sen., Mr. Increase Nowell, Mr. John Willson, Mr. Edward Gibbons, to dispose of, and all Indians to depart. And, for satisfaction from Charlestowne, wee acknowledge to have received, in full satisfaction, twenty and one coates, ninten fathom of wampoun, and three bushels of corn. In witness whereof, wee have here unto sett o'r hands the day and year above named.

"The mark of Squa SACHEM, m'c.

"The mark of WEB-COWET, m'c."

The last remnant of the tribe which once held the lands of the Mystic, is said by Brooks, to have taken up its residence in "Turkey Swamp," in the northern part of Medford. The skeletons of five Indians were exhumed, from the grounds of the late Edward Brooks in West Medford, in 1862, and many evidences of their former occupancy of the locality have been found in tools and weapons of stone.

Medford had a very contracted territory up to the middle of the last century, and embraced only the grants made to Mr. Cradock, in 1634 and '35; the lands granted to Wilson and Newell, 400 acres in extent, intervened between the eastern boundary of the town and Malden River. On the north, its line followed the range of hills then called the "Rocks," parallel to, and one mile from the river. The Mystic Ponds formed the western boundary, and on the south, the town rested on the Mystic. The area of the town was about 2000 acres. Until 1640, Medford was surrounded by Charlestown, which then embraced the present territory of Malden, Stoneham, Woburn, Burlington, Somerville and a part of the three towns of Cambridge, Arlington and Medford.

The General Court ordered, Oct. 7, 1640, that

"Mr. Tyng, Mr. Samuel Shephard, and Goodman Edward Converse, are to set out the bounds between Charlestown and Mr. Cradock's farm on the north side of Misticke River."

In 1687, the town appointed three gentlemen, who, in conjunction with three appointed by Charlestown, were directed to fix the boundaries between the two towns. The committee reported as follows:

"We have settled and marked both stakes and lots as followeth: From the creek in the salt-marsh by a ditch below Wilson's farm and Medford farm to a stake and heap of stones out of the swamp, then turning to a savin-tree and to three stakes more to heaps of stones within George Blanchard's field with two stakes more and heaps of stones standing all on the upland, and so round from stake to stake as the

swamp runneth, and then straight to a stake on the south side of the house of Joseph Blanchard's half, turning then to another oak, an old marked tree, thence to a maple-tree, old stakes, thence unto two young maples, new marked, and thence to three stakes to a creek-head, thence straight to the corner line on the south side of the country road leading to [Malden]."

Chafing within their narrow limits, the inhabitants of Medford made repeated efforts for the extension of their boundaries. In 1714, a committee was chosen to petition Charlestown on the subject of annexing certain districts. The petitioners ask "for some part of Charlestown adjoining to Medford, on the north side of Mystic River." The same year, having received, as is supposed, an adverse reply to that petition, they chose another committee to examine the Province Records, and see if Medford has any right to land lying in Charlestown, and, if so, to prosecute the same at the town's expense.

Again, in 1726, the town presented a petition to the inhabitants of Charlestown, praying that the lands on the north side of the Mystic River might be set off to Medford. This request was emphatically refused; and, in 1738, another petition of the same import met with a like fate.

In 1734, the town voted to "petition the Great and General Court for a tract of the unappropriated lands of this Province, to enable the said town of Medford the better to support the ministry and the schools in said town." The record of the action taken on this petition is as follows:

"At a Great and General Court or Assembly for his Majesty's Province of Massachusetts Bay, in New England, begun and held at Boston, upon Wednesday, the 28th of May, 1735, and continued by several adjournments to Wednesday, the 19th of November following,—

"20 May, 1735: A petition of the inhabitants of the town of Medford, showing that the said town is of the smallest extent of any in the Province, and yet their town-charges extremely high, so that the maintenance of ministry and school is very chargeable to them, and therefore praying for a grant of some of the waste lands of the Province to be appropriated for the support of the ministry and schoolmaster in said town.

"In the House of Representatives, read and ordered that the prayer of the petition be so far granted as that the town of Medford is hereby allowed and empowered, by a surveyor and chairman on oath, to survey and lay out one thousand acres of the unappropriated lands of the Province, and return a plan thereof to this Court, within twelve months, for confirmation for the uses within mentioned.

"In Council, read and concurred. Dec. 29th: Consented to,

"J. BELCHER.

"A true copy, examined:

"THADE MASON,

"Deputy Secretary."

Under this grant the town selected 1000 acres of land on the Piscataqua River. The tract was called the "Town's Farm," and was sold after a few years' possession. It was of small value.

The long-felt desire of the people of Medford for an increase of territory was at length gratified. In 1753 they presented the following petition to the Provincial authorities:

"To his Excellency, William Shirley, Esq., Captain-General and Governor-in-Chief in and over his Majesty's Province of the Massachusetts Bay, in New England, to the Honorable his Majesty's Council, and to the Honorable House of Representatives.

"The petition of the inhabitants of the town of Medford, in the County of Middlesex, humbly sheweth that there are certain tracts of

land lying on the southerly and northerly sides of said Medford, which are bounded as follows; viz, the southerly tract, lying in Charlestown, is bounded northerly with Mistic or Medford River, westerly with the westerly bounds of Mr. Smith's farm, southerly with the southerly bounds of Mr. Smith's, Mr. James Tufts's, and Mr. Jonathan Tufts's farms, and then running from the south-easterly corner of said Jonathan Tufts's farm eastward straight to the westerly side of Col. Royal's farm, again westerly with the westerly bounds of Col. Royal's farm, again southerly with its southerly bounds, and then running from the south-easterly corner thereof, eastward, straight to Medford River.

"The northerly tract, lying also in Charlestown, is bounded southerly with said Medford's northerly line and the southerly bounds of Mr. Symmes's farm, westerly with the line that divides Mr. Symmes's from Mr. Gardner's farm, northerly with Woburn and Stoneham lines, easterly on Malden line.

"Which lands, with their inhabitants, we pray may be added to the contractable limits of the said town of Medford, together with a proportionable part of the said town of Charlestown's rights and privileges, according to the quantity and circumstances of said lands: at least, these pieces of land, and the privileges, which are within the lands hereby petitioned for.

"And inasmuch as the said town of Charlestown has conveyed the land called the gravel-pit, with the marsh adjoining, containing about half an acre, that they used for getting gravel, laying timber, etc., for the southerly half of the bridge commonly called Mistic Bridge, and the 'Causey' thereto adjoining, to Capt. Aaron Cleaveland and Mr. Samuel Kendal; for which consideration they have covenanted and agreed with the said town of Charlestown to keep the half of the bridge and the 'Causey' aforesaid in good condition forever:

"We pray, that, in case the before-described lands are laid to said Medford, it may not be subjected to any cost or charges on account of the before-mentioned part of said bridge and the Causey adjoining.

"Which petition we humbly conceive will appear reasonable by what follows:—

"First, The contents of the said town of Medford are exceedingly small, amounting to but about two thousand acres, the inhabitants very few, and consequently its charges very great, compared with other towns. Besides, as to brick-making, upon which our trading and a great part of our other business depends, it very much fails.

"Secondly, The said town of Charlestown almost encompasses the town of Medford, and therefore (notwithstanding the great necessity) it cannot receive large addition from any other town.

"Thirdly, Those that now dwell on the said tracts of land, and those who heretofore dwell on them, have from time to time enjoyed the liberty of attending the public worship in Medford without paying any thing to the taxes there. Neither is there any probability that any of the inhabitants of said lands, or any other persons that may settle on them, can, with any convenience, attend the public worship in any other town. Moreover, the inhabitants of the said southerly tract are within about half a mile of said Medford meeting house,—the greatest part of them,—and the rest within a mile.

"And the inhabitants of the northerly tract before-mentioned are, the farthest of them, but about two miles from said meeting house. And great part of the lands in both the said tracts are now owned and possessed by those who are with us in this petition, and some of the inhabitants of said Medford.

"Beside, we apprehend it to be a very great hardship for the inhabitants of said tracts of land to be obliged to go, almost all of them, more than four miles, and others more than seven miles, to town-meetings, trainings, etc.

"Furthermore, we would humbly move that some of the honorable members of the General Assembly may be appointed to view the premises petitioned for, etc.

"In consideration of what is before-mentioned, and other moving arguments that might be used in this affair, we hope your Excellency and Honors, in your great wisdom and goodness, will grant our petition. Although the inhabitants of said Charlestown have not been pleased to be so free (when petitioned) as to let us know whether they would grant us herein or not.

"So shall your petitioners, as in duty bound, ever pray.

"CALEB BROOKS.	JONATHAN TUFTS.
"BENJAMIN PARKER.	JOHN JENKS.
"BENJAMIN TEAL.	ROBERT CRANE.
"JAMES TUFTS.	JOHN DEGENBY.
"EBENEZER MARROW.	

"Medford, Dec. 13, 1753.

"We, the subscribers, being owners of a considerable part of the

said lands, and having dwelling-houses thereon, do hereby signify that we heartily join with the inhabitants of Medford in the foregoing petition.

"SAMUEL BROOKS.	} Committee for Medford "
"EBENEZER BROOKS.	
"Z. TUCKER.	
"JOSEPH TULLS.	
"STEPHEN HALL.	

This petition was granted April 17, 1754, and from that date the town entered upon a new and more prosperous era of its history. Under the act the boundaries of the town at the north were considerably extended, and its accessions on the south included all of its present territory, which lies south of the river. The area of Medford was more than doubled, and now embraced nearly six thousand acres. Since that time it has lost portions of its territory, which have at different times been set off to neighboring towns—to some of them on their formation. The present area of the town is about five thousand acres, or nearly eight square miles.

The organization of the municipal government of the Colonial towns in the early times was of the simplest sort. The population was small, nothing like the present elaborate system of public service was known, and little was done at the public charge. Medford was very peculiarly situated. Mr. Davison, Governor Craddock's agent, was vested with full authority to conduct the affairs of the plantation, and, owing to the loss of the earliest town records, we cannot tell how soon the people took the management of their concerns into their own hands. Probably it was not till after the death of Mr. Craddock, in 1644. Among the earliest existing records of the town is the following entry touching the proceedings of a town-meeting:

"The first Monday of February in the year of our Lord 1677, Goodman John Hall was chosen constable by the inhabitants of Medford for the year ensuing. Joseph Wade, John Hall and Stephen Willis were chosen selectmen for ordering of the affairs of the plantation for the year ensuing. John Whitmore, Daniel Woodward, Jacob Chamberlain, John Hall, jun., Edward Walker, Walter Cranston, Patrick Hay, Andrew Mitchell and Thomas Fillebrown, jun., took the oath of fidelity.

"JOSEPH WADE, Towns clerk."

Mr. Brooks has preserved for us a copy of an old-time warrant for a town-meeting:

"To Mr. Stephen Hall, jun., Constable of Medford, Greeting: You are hereby required, in his Majesty's name, to warn the freeholders and other inhabitants of Medford to meet at their meeting-house, the first Monday of March next ensuing the date hereof, by eight o'clock in the morning, then and there to choose a constable, selectmen, town clerk and other town-officers, as the law directs. And all persons to whom the said town is indebted to bring in their accounts, and lay the same before the said town. And the town-treasurer for said Medford is hereby required to give said town at said meeting a particular account of the disposing of the said town's money; and whatsoever else may be needed, proper, and necessary to be discussed on and determined at said meeting. Hereof you may not fail, as you will answer your default at the peril of the law.

"Dated in said Medford, February 14, 1702, in the fourteenth year of his Majesty's reign.

By order of the selectmen of said Medford.

"JNO. FRANKLIN, Towns clerk."

A few years later we find that the departments of the public service had increased in number:

"March 5, 1691: Caleb Brooks was chosen constable for the year ensuing. Major Nathaniel Wade, Lieut. Peter Tufts and Stephen Willis were chosen selectmen. John Bradshaw and John Hall, jun., were chosen surveyors of highways. Ensign Stephen Francis was chosen tything-man. John Hall, sen., and Lieut. Peter Tufts, were chosen viewers of fences; and Stephen Willis, town-clerk."

Again, in 1710 :

"At a town-meeting, legally convened in Medford, March 6, 1710, Lieut. Stephen Willis, chosen moderator; Peter Secomb, chosen constable; Ebenezer Brooks, John Hall and Samuel Wade, selectmen; John Whitmore, jun., and Thomas Dill, surveyors of highways; Benjamin Peirce and Isaac Farwell, viewers of fences; Ichabod Peirce and John Albree, wood-corders; Nath. Peirce, hog-constable. At said meeting, Lieut. Thomas Willis was chosen tything-man and sealer of weights and measures. At said meeting, the selectmen were chosen assessors for this year."

Coming down to a later date we find that the departments of public service take a more modern complexion :

"At a town-meeting legally convened at Medford, March 7, 1748, Mr. Andrew Hall was chosen Moderator.

Dea. Benj. Willis, Capt. Samuel Brooks, Lieut. Stephen Hall, Selectmen.

Thomas Secomb, Town-clerk.

Benj. Parker, Town-treasurer.

Joseph Tufts, Thos. Brooks, Edward Hall, Assessors.

Stephen Willis, chosen Constable, refused to serve, and paid £10, old tenor.

Francis Whitmore, 2d Constable, but refused to serve, and paid £10, old tenor.

Samuel Reeves, 3d Constable. He refused to serve, and paid £10, old tenor.

Samuel Page, hired to serve as Constable, for £25, old tenor.

Jonathan Hall, Henry Fowle, Tything-men.

Stephen Bradshaw, Lieut. John Francis, Stephen Greenleaf, Surveyors of Highways.

Samuel Brooks, jun., William Tufts, John Hall, Fence-viewers.

Stephen Greenleaf, John Bishop, Ebenezer Francis, Hog-reeves.

John Tufts, Jacob Polly, Thomas Brooks, Wood-corders.

Jonathan Watson, Capt. Saml. Brooks, Surveyors of Boards and Timber.

Samuel Reeves, Pound-keeper.

Samuel Francis, Benjamin Tufts, Haywards, or Field-drivers.

John Bradshaw, Joseph Tufts, Deer-reeves.

Dea. Thomas Hall, Sealer of Leather.

Benjamin Parker, Sealer of Weights and Measures.

Stephen Bradshaw, Grand juror.

Andrew Hall, Esq., Capt. Samuel Brooks, Lieut. Stephen Hall, jun., Zechariah Poole, Ebenezer Brooks, a committee to manage the affair of obtaining some part of the lands now belonging to Charlestown, with the inhabitants thereon.

Joseph Tufts, Lieut. Stephen Hall, jun., Thomas Brooks, a Committee to audit the Town-treasurer's accounts for the year past, 1747, and the town's account likewise.

The inhabitants of Medford took a deep interest in the rights secured by the charter. In 1732 the town voted that "it was their desire that their representative should act with the greatest caution, and stand for the defence of the privileges granted us by his Majesty in the royal Charter."

The town maintained a thoroughly patriotic attitude in the stirring events which immediately preceded the Revolution, and from time to time entered vigorous protest against the oppressive acts of the British Government. After the passage of the Stamp Act (Oct. 21, 1765), the inhabitants of Medford held a public meeting and gave open expression to their sense of its unconstitutionality and injustice. A remonstrance, addressed to their representative, was

adopted, in which they denounce the Stamp Act as "this most grievous of all acts, wherein a complication of those burdens and restraints are unhappily imposed which will undeniably deprive us of those invaluable liberties and privileges which we, as free-born Britons, have hitherto enjoyed. . . . Therefore we seriously enjoin it upon you, as our representative, that you be no ways aiding and assisting in the execution of said act."

That the town was in full sympathy with the action of Boston in resisting the importation of taxed tea is proved by the following vote, passed December 31, 1772:

"Voted that the thanks of the town of Medford be given to the respectable inhabitants of the town of Boston for their patriotic care and vigilance (manifest on several occasions) in endeavoring to preserve our civil constitution from innovation, and to maintain the same inviolate. And we do assure them that our assistance shall not be wanting in the use of all such lawful proper measures as shall be thought expedient to be adopted for the preservation of our liberties, civil and religious."

A little later they expressed their sentiments upon the same subject in a series of resolutions adopted in town-meeting. A single extract will show their spirit:

"That we will exert ourselves, and join with our American brethren, in adopting and prosecuting all legal and proper measures to discourage and prevent the landing, storing and vending and using those teas among us; and that whosoever shall aid or assist said India Company, their factors or servants, in either landing, storing or selling the same, does a manifest injury to his country, and deserves to be treated with severity and contempt.

"That we are ready at all times, in conjunction with our American brethren, as loyal subjects, to risk our lives and fortunes in the service and defense of His Majesty's person, crown and dignity; and also, as a free people, in asserting and maintaining inviolate our civil and religious rights and privileges against all opposers whatever."

A company of Medford men, fifty-nine in number, under the command of Capt. Isaac Hall, took part in the engagements at Concord and Lexington, and one of them, William Polly, was killed. The records of the town show that throughout the Revolution, Medford stood ready to make all sacrifices to bring the war to a successful conclusion, and we find frequent entries touching special taxation to meet the expenses of the war, the raising of the town's quota of men, and care for the families of the absent soldiers.

Besides furnishing its full quota of men to the Continental Army, Medford contributed three officers who rendered distinguished service to the patriot cause. Col. John Brooks (afterwards Governor of Massachusetts) was born in Medford, May, 1752, where he early engaged in the study of medicine under Dr. Simon Tufts, and on acquiring his profession, settled at Reading. He had a natural fondness for military exercises, and held the position of major in the Colonial militia. He commanded a company of minute-men on the 19th of April, and was active in his pursuit of the British troops. He received the commission of major in the Continental Army, and assisted in fortifying the heights of Dorchester. He was promoted to the rank of Lieutenant-Colonel of the Eighth Massachusetts Regiment, the practical command devolving upon him, owing to the sickness of

the Colonel. He distinguished himself by covering the retreat of the army at White Plains, and the value of his service was acknowledged by Washington, whose esteem and confidence he held unto the end. He was a proficient in military tactics, to the study of which he had closely applied himself, and the regiment he commanded was distinguished for the superiority of its discipline. When Baron Steuben was appointed inspector-general of the army, Colonel Brooks was, by the order of Gen. Washington, associated with him in the duty of introducing a uniform system of tactics into the army. His gallant conduct at Saratoga was especially marked. At the head of his regiment, he stormed the entrenchments on the right flank of the enemy, and maintained his position against all attempts to dislodge him. This action compelled Burgoyne to change his position, and contributed in no small degree to his final surrender. At the close of the war he settled in Medford, and once more engaged in the practice of his profession. He was elected Governor of the Commonwealth in 1816, and held the office for seven successive terms. The purity of his character, and the eminent service he had rendered his country and State, as a soldier and civilian, gained for him universal esteem. He died in 1825.

Col. Ebenezer Francis, born in Medford, in 1743, raised and commanded the Eleventh Massachusetts Regiment. He fell mortally wounded while engaged in a skirmish with British troops, at Hubbardton, near Whitehall, N. Y. A contemporary record says of him: "No officer so distinguished for his military accomplishments and regular life as he. His conduct in the field is spoken of in the highest terms of applause."

John Francis, a brother of Col. Ebenezer Francis, was adjutant in his brother's regiment, and distinguished himself by his bravery at Hubbardton. He was wounded at Saratoga, and acquitted himself with honor through his six years' term of service in the Revolutionary army.

Medford has remained true to the patriotic traditions of the Revolution throughout its later history. It furnished its full quota of soldiers to the national armies in the War of 1812. Lieut. John Brooks, a son of Governor Brooks, was killed in the battle on Lake Erie.

In the Civil War, the town of Medford came up to the full level of its duty. It furnished two full companies to the Union army. At the outbreak of the Rebellion the town made a quick response to the call for troops for the defence of the capital. The Lawrence Light Guard, Company E, Fifth Massachusetts Regiment, under the command of Capt. John Hutchins, rendered valuable service as three months' volunteers. In August, 1862, the company enlisted for three years, and as Company C, Thirty-ninth Regiment, Massachusetts Volunteers shared the varied fortunes of the Army of the Potomac. The regiment served with

great credit until the close of the war. In September, 1862, another town company, the Medford Light Infantry, Capt. Charles Currier, organized for that purpose, enlisted for nine months, and as Company F, Fifth Regiment Massachusetts Volunteers, took honorable part with the regiment in the military operations in North Carolina.

During the war, Medford furnished a large number of men to other organizations. According to Mr. Usher, eleven calls for men were made upon the town, and the whole number brought by the town into the field was 769.

As with all the early New England settlements, the narratives of the ecclesiastical and the civil history of Medford are closely interwoven. For many years after its settlement, the town had, except for brief intervals, no settled ministry. Mr. James Noyes, a graduate of Oxford, came to Boston in 1634, and "was immediately called to preach at Mystic, which he did for nearly one year." After his departure, the town appears to have depended upon the occasional ministrations of the clergymen of the neighborhood, and, having contributed to the general fund raised for the purpose, doubtless enjoyed its share of the clerical service rendered to the infant settlements by Rev. George Phillips and Rev. John Wilson. In 1692, Mr. John Hancock, grandfather of the patriot, was engaged as a preacher, but he remained only a few months. It would appear from the town records that, in 1694, a subscription was raised for the support of a minister. His board was fixed at five shillings a week. In 1698, the town hired Mr. Benjamin Woodbridge, of Charlestown, to preach for six months, and the connection continued, in some sort, for a period of ten years. He seems never to have been regularly "settled" over the parish, and the record of his ministry is one of constant bickering and disagreement between pastor and people. Their differences were referred to eminent clergymen, and were brought before ecclesiastical councils, for arbitration and settlement; but Mr. Woodbridge held a most tenacious grasp upon his position, and it was not till 1708 that the connection was dissolved. He died in Medford in 1710, and, despite the long-standing contention, it is pleasant to record that the town made liberal provision for his funeral, which was attended by the President of Harvard College and a good representation of the neighboring dignitaries.

In 1696, the town built its first meeting-house "on the land of Mr. Thomas Willis, near the gate by Marble Brook, on a rock on the north side of the Woburn road." It was a small and unpretending structure, "seven and twenty feet long, four and twenty feet wide, and fifteen feet between joints." A second church building was erected in 1727, near the site of the first, which had become too small for the population.

In 1713, Medford entered upon a more prosperous

period of its church history. Rev. Aaron Porter, a graduate of Harvard College, was settled over the parish, and he remained until his death in 1722. He married a niece of Chief Justice Sewall, and is honorably mentioned in his "Diary."

The successor of Mr. Porter was the Rev. Ebenezer Turell, whose ministry lasted from 1724 to 1778, a period of fifty-four years. Mr. Turell was a fine type of the old colonial clergyman, dignified, yet social and kindly. It is recorded to his credit that he preached a sermon in favor of inoculation, at a time (1730) when there was a strong popular prejudice against the new practice. By his will he freed his slave Worcester, and left fifty pounds for his maintenance, in case he should need it.

After the death of Mr. Turell, in 1778, Rev. David Osgood, who had, four years before, received settlement as his colleague, assumed the sole charge of the pastorate, which he held until his death in 1822—a ministry of forty-eight years. Dr. Osgood was a divine of considerable local celebrity, and was a man of strong character and convictions. He was an ardent Federalist, and did not hesitate to give free expression to his political opinions in the pulpit. Some of his utterances provoked sharp comment from the contemporary partisan press. With his pastorate, the history of the First Parish, as the only church in Medford, comes to a close. The religious fermentation which prevailed in the first quarter of the present century in the churches of New England, extended itself to Medford. After the installation of Rev. Andrew Bigelow, Mr. Osgood's successor, in 1823, a considerable number of the members of the church, holding the old theological views, seceded, and established the Second Congregational (Trinitarian) Church. The First Parish has maintained its connection with the Unitarian body ever since.

The Second Congregational Church, composed, as already mentioned, of those who withdrew from the First Parish, was established in 1824, and erected a church edifice on High Street near the Public Square. Rev. Aaron Warner was the first pastor. As an outgrowth from this society, the Third Congregational Church was formed in 1847, and built a house of worship on Salem Street. The new society took the name of the Mystic Church. In 1874, the Second and Third Congregational Churches were consolidated, and the reunited bodies have continued to worship in the house on Salem Street.

The Universalist Society was organized in 1831, and Rev. Winslow Wright was installed as its first pastor.

The Methodist Episcopal Church of Medford was incorporated in 1828, and built a chapel on Cross Street. Since then the society has built two churches on Salem Street, the second of which it now occupies.

The First Baptist Church was incorporated in 1842, under the pastorate of Rev. George W. Bosworth, and worshipped for thirty-one years in a chapel on

Salem Street. In 1873 the society erected a new church edifice on Oakland Street.

The Grace (Episcopal) Church was organized in 1848, under the rectorship of Rev. David Greene Haskins. Its elegant stone church on High Street, the gift of Mrs. Gorham Brooks, was erected in 1868.

In West Medford, the Congregational Church was organized in 1872, and the Trinity Methodist Society in the same year.

The first Catholic Church edifice in Medford was built in 1885, on Salem Street, on land which is now a part of Malden, and was designed for the use of the Catholics of both towns. In 1876, the Catholics of Medford purchased the church building of the Second Congregational Society, on High Street, which is now the place of worship of a distinctively Medford parish.

True to the teachings of the New England fathers, Medford was from the first a liberal supporter of the cause of popular education. In the earliest records of the town we find that a town-meeting was called, "to see if the town will have a school kept for three months." The question was decided affirmatively, and it was voted that "this school shall be free." In 1719, the town voted that the school continue during four months, and later, in 1720, it was voted to build a school-house; up to that time it is probable that the schools were kept in private houses. The same year two schools were organized in the town. "Mr. Caleb Brooks was engaged to keep the West School for three months, at two pounds per month; Mr. Henry Davison, the East, at the same price." In 1730, the town voted to build a new school-house, and to set up a reading and writing school for six months.

The following extracts from the town records, as given by Mr. Brooks, will best show the progressive measures adopted by the town for the advancement of education:

March 11, 1771: "Voted to build the school-house upon the land behind the meeting-house, on the northwest corner of the land."

1776: "Voted that the master instruct girls two hours after the boys are dismissed."

April 5, 1799: A committee was chosen to inquire "if it be expedient for girls to attend the master's school." The committee wisely recommended the affirmative; whereupon, at the next town-meeting, it was "voted that girls have liberty to attend the master-school during three summer months."

June 20, 1794: "Voted that females attend the master-school separately, from the 1st of May to the 1st of October, four hours each day, and that the boys attend four hours each day,—Thursday and Saturday afternoons being vacations." Same date: "Voted, that no children, whether male or female, be admitted into the public school under the age of seven years, nor then unless they have been previously taught to read the English language by spelling the same; and as this regulation will probably exclude many who have hitherto attended, therefore it is

"Voted, that the selectmen are hereby empowered to pay school-mistresses for instructing those children who are excluded from the public town-school, and whose parents are unable to pay such extra expenses.

"And as the great end of the public school is to furnish the youth with such a measure of knowledge that they may be able to read and write with propriety, and understand so much arithmetic as may fit them for the common transactions of life; therefore, Voted, that the selectmen and school-committee be desired from time to time to make such regulations in the school as may best answer the above purposes."

In 1818, when Medford had 202 families, the expenses of the schools were as follows:

Master for one year, at \$20 per month	\$240
Board for the same, at \$3 per week	156
Master, four months, at \$20 per month	80
Board for the same, at \$3 per week	52
Three female teachers, twenty-five weeks each, at \$4	300
Rent for school-houses for female schools	45

\$873

With the advance of the present century, broader views began to prevail in Massachusetts as to the true scope of our system of popular education, and Medford took an honorable place in the general movement for improved methods in school management, and a more liberal expenditure of money in that behalf. At a town-meeting held in 1835, a special committee was chosen "to inquire into the different and best methods of conducting public-schools, and to report what improvements, what number and kind of schools are necessary in this town to qualify every scholar who desires an education, for the active duties of life." This committee made such recommendations as led to the immediate grading of the schools, and to the establishment of a high school. It is believed that this high school was "the second or third organized in the State for the free co-education of the sexes in the higher branches of learning." The equipment of the school in the early period of its existence, was on a humble scale, although classical study had from the first a recognized place in the curriculum. Since then, the standard of qualification for admission has been gradually raised, and every opportunity afforded to the youth of the town for thorough preparation for college and the technological schools.

It is to the credit of Medford that, for a long term of years, she has held a place in the van of the towns of the Commonwealth as far as regards her expenditure of money for the support of public schools.

During the early part of the present century, Medford was the seat of several private schools, two of which deserve especial notice. Dr. Luther Stearns (H. C. 1791), for many years conducted a classical boarding-school for boys and girls. His school was attended by children from the first families of New England, and enjoyed a deservedly high repute. Dr. Stearns was the father of George L. Stearns, the distinguished philanthropist. Mr. John Angier (H. C. 1821), opened a school of similar character in 1821, and conducted it with great success until 1841, when he retired. His school was frequented by pupils from every part of the country and from the West Indies, and many of them rose to distinction in after life.

In connection with her educational establishment, Medford may claim the honor of being one of the first towns in the State to maintain a free public library. As early as 1825, the "Medford Social Library" was founded by a society whose purpose was "to form a collection of books strictly useful, promotive of piety and good morals, and for the diffusion of valuable in-

formation." The library was maintained by annual assessments on its shareholders. In 1856, the trustees of the Social Library, in conformity with a vote of the stockholders, transferred the collection, numbering 1125 volumes, to the town "as the foundation of a permanent town library." Since that time the town has made liberal annual appropriations for the support and increase of the library, now known as the Medford Public Library. In 1875, Mr. Thatcher Magoun presented to the town for the use of the library the mansion house on High Street, formerly occupied by his father, with land adjoining. He also gave five thousand dollars for fitting and furnishing the building for its uses. The Magoun mansion occupies a beautiful and stately site, and is architecturally well suited to the purposes to which it is devoted. Here the town has found convenient accommodations for its growing collection of books. The reading-room is supplied with the best reviews and periodicals of the day, and contains a valuable reference library, which is always accessible to the public. The library now contains about 12,000 volumes, and the annual circulation of books is over 27,000.

Tufts College occupies a site just within the southern border of Medford, on a beautiful eminence, formerly called Walnut Hill, but now known as College Hill. The college grounds are a portion of a tract of land one hundred acres in extent, the gift of Mr. Charles Tufts, of Somerville, for whom the college was named. The first foundation of Tufts College was the sum of \$100,000, subscribed by Universalists in various parts of the United States. Rev. Hosea Ballou (2d) was elected the first president of the college in 1861, and rendered invaluable service to the infant institution until his death in 1861. During the official term of his successor, Rev. Alonzo A. Miner, D.D., great additions were made to the funds of the college through gifts and endowments of friends. Sylvanus Packard gave generously to the institution in his lifetime, and bequeathed to it a sum amounting to about \$300,000. Dr. William J. Walker was also a munificent benefactor, giving to it upwards of \$200,000. Other liberal friends of the college were Dr. Oliver Dean, who contributed \$90,000 to its funds, and Thomas A. Goddard, its first treasurer, who, in the infancy of the institution, when its income was small, met all deficiencies out of his own pocket.

The Divinity School of the college was established in 1869, and Rev. Thomas J. Sawyer, Packard Professor of Theology, was placed at its head. A large number of students have graduated from the school since its formation, and are occupying some of the most prominent and influential pulpits of their denomination in the United States.

Dr. Miner resigned the presidency of the college in 1875 and Rev. Elmer H. Chapin, a graduate of the college, was elected to fill the vacancy. Under his direc-

tion the affairs of the institution have prospered, and its curriculum has been greatly extended. Through the generosity of friends of the college, several fine buildings have been erected for its use during the last few years. The Goddard Chapel, erected out of funds provided by Mrs. Mary A. Goddard, is a stone structure, and its graceful campanile is a pleasing feature in a distant view of the college buildings. The Barnum Museum of Natural History, founded by Mr. Phineas T. Barnum, occupies the fine building given by him to the college. Its large exhibition hall contains an excellent collection of mammals, birds, fishes and reptiles, the gift of the founder.

With its growing endowments and the reputation deservedly won for the institution by its able and earnest-minded corps of instructors, Tufts College has an assured field of usefulness open before it.

Previous to the present century, the occupations of the people of Medford were chiefly agricultural, and mechanical industries were confined to the supply of local needs. Even up to the present time Medford has been very little engaged in manufactures. A very large proportion of the population finds its occupation in Boston, and Medford is rather a place of residence than of trade.

Owing to the extensive deposits of clay in the town, brick-making has been carried on from the time of its settlement, and the work done in the past has left permanent marks upon the fields in many parts of the town. The business is still prosecuted in South Medford.

A distillery was built in Medford as early as 1735, and it was followed by the erection of others. From its superior quality, perhaps due to the water used in its manufacture, "Medford rum" has acquired more than a local celebrity. The business is still successfully carried on, on the site of the old distillery.

During the first three-quarters of the present century, the great industry of Medford was ship-building, and Medford-built ships enjoyed a high reputation throughout the commercial world. The low banks of the Mystic afforded many favorable locations for ship-yards, and the ships once launched found an easy passage down the deep tide-waters of the river to the wharves of Boston, where they were rigged and fitted out. As early as 1631, Governor Winthrop built a vessel of thirty tons on the banks of the Mystic, and the little craft received the name of the "BLESSING OF THE BAY." This was probably the first vessel built in New England, and perhaps, in the United States. In 1632, Mr. Cradock built a ship of one hundred tons register, and, a year later, one of two hundred tons. Small vessels, of which we have no record, doubtless continued to be built on the Mystic, but it was not until the beginning of the present century that the business assumed considerable proportions.

In 1802, Mr. Thacher Magoun, who has been styled "the pioneer of ship-building in Medford,"

established himself in a ship-yard on Riverside Avenue, a little below Park Street. He at once commenced the construction of ships, many of them of large register for those days, and soon gained a reputation for the excellence of his models and his skill as a shipwright. Others engaged in the business, among them Mr. Calvin Turner, "esteemed one of the most skillful draughtsmen, as well as one of the most faithful builders in New England. In the course of seventy years 567 vessels, averaging 490 tons register, were built in Medford—an aggregate of 272,124 tons. Many of these ships were of a capacity of more than a thousand tons, and one measured two thousand tons. Some of the finest clippers that sailed the ocean were Medford-built ships.

After the opening of the Civil War the business of ship-building rapidly declined in Medford, as it did throughout the United States. The large share of the carrying trade of the world which this country had enjoyed passed into other hands, and iron had superseded wood in the construction of ships. The last ship built in Medford was launched from the ship-yard of Mr. Joshua T. Foster, and the pleasant sound of the shipwright's busy hammer is no longer heard on the Mystic. The fine class of American mechanics, that once formed a substantial part of the population of Medford, has largely disappeared; only a few representatives of the dead industry remain, and they have had to seek other employments for support. But the town still holds in grateful remembrance the names of Magoun, Turner, Sprague, James, Curtis, Fuller, Lapham, Foster, Stetson, Waterman, Ewell, Cudworth and Taylor, the old Medford masters in the noblest of all arts—the building of ships.

The population of Medford has not increased as fast as some of the suburban towns of Boston, but it has had, nevertheless, a steady and wholesome growth. The following table gives the population at successive periods:—

In 1763, Medford had 711 inhabitants; 1776, 967; 1784, 981; 1790, 1029; 1800, 1114; 1810, 1447; 1820, 1471; 1830, 1755; 1840, 2478; 1850, 4749; 1855, 4004; 1860, 4831; 1865, 4839; 1870, 5717; 1875, 6267; 1880, 7573; 1885, 9041; 1890, 11,105.

The valuation of the town in 1889 was \$9,279,715.

To the lover of antiquity and its associations, Medford presents peculiar attractions. Few towns in the United States have preserved so many features connected with the past, and it is a matter of regret that under the hands of what is styled "modern improvement," many of these are destined soon to pass away. The old High Street of the town, lined with ancient and substantial buildings, one of them dating back to 1689, is fragrant with the memory of the early time. The river upon which John Winthrop dwelt winds its way through the lovely valley, and, north and south, are the forest-crowned heights of the Middlesex Fells and the graceful slopes of Winter Hill.

The old "garrison" houses of the town are still

standing. The Cradock House, in the eastern section of the town, erected in 1634, is probably the oldest house in English America. It has lately been carefully restored by pious hands, and will remain as a monument to the fathers of the settlement on Massachusetts Bay. The old Royall mansion, the seat of Col. Isaac Royall, colonial magnate and loyalist, still remains one of the finest examples of the domestic architecture of the early part of the last century.

Such was and is "Old Medford," the home of kindness and hospitality, and a noble type of the ancient New England town.

CHAPTER LVI.

MARLBOROUGH.

Original Grant—Indian Grant—First Meeting of Proprietors—Owners of House Lots in 1660—First Settlers—King Philip's War—French and Indian War.

The territory embraced within the present town of Marlborough originally comprised a portion of the town of Sudbury, which was granted in 1638. In 1656 a number of the leading citizens of Sudbury presented the following petition to the General Court:

"To the Hon. Governor, Dep. Governor, Magistrates, and Deputies of the General Court now assembled in Boston.

"The Humble Petition of several of the inhabitants of Sudbury, whose names are here underwritten, sheweth: That whereas your Petitioners have lived divers years in Sudbury, and God hath been pleased to increase our children, which are now diverse of them grown to man's estate; and we, many of us, grown into years, so that we should be glad to see them settled before the Lord take us away from hence, as also God having given us some considerable quantity of cattle, so that we are so streightened that we cannot so comfortably subsist as could be desired; and some of us having taken some pains to view the country; we have found a place which lyeth westward about eight miles from Sudbury, which we conceive might be comfortable for our subsistence. "It is therefore the humble request of your Petitioners to this Hon'd Court, that you would be pleased to grant unto us eight miles square, or so much land as may containe to eight miles square, for to make a Plantation.

"If it shall please this Hon'd Court to grant our Petition, it is further then the request of your Petitioners to this Hon'd Court, that you will be pleased to appoint Mr. Thomas Danforth, or Lieutent Fisher to lay out the bounds of the Plantation; and wee shall satisfy those whom this Hon'd Court shall please to employ in it. So apprehending this weighty occasion, wee shall no further trouble this Hon'd Court, but shall ever pray for your happiness.

"Edmund Rice,	John Howe,
William Ward,	John Bent, Sen'r,
Thomas King,	John Maynard,
John Woods,	Richard Newton,
Thomas Goodnow,	Peter Bent,
John Ruddocke,	Edward Rice."
Henry Rice,	

The General Court under date of May 14, 1656, replied as follows:

"In answer to the Petition of the aforesaid inhabitants of Sudbury, the Court judgeth it meets to grant them a proportion of land six miles, or otherwise in some convenient form equivalent thereunto, at the discretion of the Committee, in the place desired: provided it hinder no former grant; that there be a town settled with twenty or more families within three years, so as an able ministry may be there maintained.

"And it is ordered that Mr. Edward Jackson, Capt. Eleazer Lusher, Ephraim Child, with Mr. Thomas Danforth or Lieuten^t Fisher, shall be, and hereby are appointed a Committee to lay out the bounds thereof,

and make return to the next Court of Election, or else the grant to bee void."

This grant embraced 29,419 acres.

A portion of this territory, however, had already been granted to the Indians, May 3, 1654, as follows: "Upon the Petition of Mr. Eliot, in behalf of the Indians, liberty is granted to the Indians of Ockocangansett, being eight miles west of Sudbury, to make a town there, provided it do not prejudice any former grant, nor that they shall dispose of it without leave first had and obtained of this Court." This grant contained 6000 acres.

At the first meeting of the proprietors held Sept. 25, 1656,

"It is concluded and ordered, That all y^e doe take up lots in y^e Plantation shall pay to all public charges y^e shall arise upon y^e Plantation, according to their House Lots, and themselves to be residents there within two years, or set Aman in, that y^e Town shall approve of, or else to loose their lots; but if God shall take away any man by death, such A one hath liberty to give his lott to whom he will, this order to the contrary notwithstanding."

The same year William Ward, Thomas King, John Ruddocke and John Howe, "Were chosen to put the Affairs of the said new Plantation in an orderly Way."

In September, 1657, the following names also appear on their list:

William Kerly, John Rediat, John Johnson, Thomas Rice, Solomon Johnson, Samuel Rice, Peter King, Christopher Banister.

"It is ordered that all such as lay claymes to any interest in the new Plantation at Whippennecke are to perfect their house lots by the 25th of March next ensuing, or else loose all their interest in the aforesaid Plantation.

"It is ordered that every one y^e hath A Lott in y^e aforesaid Plantation, shall pay twenty shillings by the 25th of March ensuing, or else to loose all legal interest in y^e aforesaid Plantation."

"At a meeting of y^e inhabitants and proprietors of this Plantation y^e 6th of y^e xi month, 1659,

"It is ordered that A Rate bee made for defraying; and satisfying y^e charge for Laying out this plantation and other publicke charges to be collected of the inhabitants and proprietors.

"It is ordered, That every person y^e claims any interest in the town of Marlborough, shall pay to all publicke charge, both for the minister and for all other town charges that have arisen about the plantation to this day from the beginning thereof, according to their proportion in y^e rate now presented with said proportion due; every person to pay at or before the 10th of November next ensuing, or else loose all legal interest in the aforesaid plantation; that is to say, four pence an acre for each acre of their House Lots to the Minister, and three pence for all the estate that hath been kept or brought to keep, being found in the town or about the town; and nine pence an acre for every acre of their House Lots to town charges, till all the debts that are due from the town to them that have been employed by the town or the plantation thereof.

"Signed:

"Edmund Rice, Thomas King, Solomon Johnson, Richard Newton, William Ward, Thomas Goodnow, William Kerly, Henry Kerly, John Howe, Christopher Banister, John Johnson, John Ruddocke."

"It is ordered that there be a rate made for Mr. William Brinsmead, Minister, to be collected of the inhabitants and proprietors of the town (for six months) at the rate of four pence per acre upon House Lots, and three pence per Pound upon cattle."

The following is a list of owners of house-lots, 1660:

Edmund Rice, William Ward, John Ruddocke, Thomas Goodnow, Joseph Rice, Samuel Rice, Christopher Banister, Thomas King, William Kerly, Solomon Johnson, John Johnson, Richard Newton, John Howe, Sr., John Howe, Jr., Henry Kerly, Richard Barnes, Thomas Rice, Joseph Holmes, Samuel Howe, Andrew Belcher, Obadiah Ward, Edward Rice, Richard Ward, John Woods, Sr., John Maynard, Peter King, Benjamin Rice, a minister, Peter Bent, John Bellows, Abraham Howe, Thomas Goodnow, Jr., John Rutter, John Barrett, John Rediat, a blacksmith, Henry Axtell, John Newton.

The first white settler of Marlborough was John Howe, in 1657 or '58. Other early settlers were Edmund Rice, William Ward, John Woods, Sr., John Maynard, Jonathan Johnson, John Ruddocke, Christopher Banister, John Barrett, Abraham Howe, Edward Rice, Thomas Rice, William Kerly, Richard Ward, Samuel Brigham, Thomas Brigham, John Bent, Richard Barnes, Abraham Williams, Thomas Goodnow.

PIONEERS.—Among the early founders of Marlborough were the following :

Adams, Alcocke, Alexander, Allen, Amsden, Angier, Arnold, Axtell, Badcock, Baker, Banister, Barber, Barker, Barnard, Barues, Barston, Bartlett, Barrett, Bayley, Braman, Bellows, Bent, Bender, Bigelow, Bond, Bowker, Boyd, Breck, Brigham, Brown, Bruce, Bush, Church, Cogswell, Cotting, Cranston, Crosby, Cunningham, Curtis, Darling, Davis, Dawson, Dexter, Eager, Eames, Edwards, Fay, Felton, Forbush, Fosgate, Fosket, Foster, Franklin, Garfield, Gates, Gibbs, Gibbon, Gleason, Goddard, Gold, Golding, Goodale, Goodenow, Gott, Gore, Gould, Green, Hager, Haggitt, Hale, Hall, Hapgood, Harrington, Harthorn, Hayden, Hemenway, Hinds, Holden, Holland, Holyoke, Horn, Hosmer, John Howe, Abraham Howe, Hudson, Hunter, Hunting, Jewell, Johnson, Jones, Joslin, Kerley, Keyes, Kidder, Knap, Knights, Lee, Lennard, Loring, Lyscom, Mann, Manson, Marble, Martin, Mason, Matthews, Maynard, Mixer, Moore, Morris, Morse, Moseman, Munroe, Newton, Oakes, Packard, Parker, Parminster, Perry, Percival, Peters, Phelps, Potter, Pratt, Prescott, Priest, Ray, Rediat, Reed, Rice, Ripley, Robinson, Ruddock, Rugg, Russell, Sampson, Sawin, Sawyer, Seaver, Shattuck, Sherman, Smith, Snow, Souther, Stanly, Stevens, Stewart, Stone, Stow, Stratton, Taylor, Tainter, Temple, Thaping, Thomas, Tomblin, Townsend, Trowbridge, Vockary, Wait, Walcutt, Walker, Walkup, Ward, Warren, Weeks, Wells, Wheeler, Wheelock, Whitcomb, Whitney, Wilder, Wilkins, Williams, Wilson, Winchester, Witherbee, Witt, Wood, Woods, Wyman.

The following were residents of the town in 1770 :

Samuel Brigham, Uriah Brigham, George Brigham, Ithamar Brigham, Paul Brigham, Ephraim Brigham, Joseph Brigham, Benjamin Brigham, Asa Brigham, Solomon Brigham, Caleb Brigham, Peter Bender, Job Carley, Adonijah Church, Jonathan Cleford, Ezekiel Clisby, Jacob Felton, Silas Gates, William Goldard, John Gleason, Joseph Gleason, Elhur Holyoke, Joseph Howe, Joseph Howe, Jr., Samuel Sherman, David Smith, John Smith, Nathaniel Smith, Samuel Smith, Manning Sawin, Jason Sherman, Joseph Townsend, Jr., Jonathan Temple, John Warren, John Weeks, Francis Weeks, Samuel Witt, Samuel Witt, Jr., Daniel Ward, John Woods, Josiah Wilkins, Joseph Wheeler, Alpheus Woods, Joseph Williams, Jacob Walcutt, Thomas Walkup, Benjamin Whitcomb, Josiah Witt, Solomon Bowker, Benjamin Wilder, Jonathan Weeks, Samuel Hunting, Josiah Howe, Witherbee Whitney, John Priest, Jr., Benjamin Sawin, Thomas Berry, Charles Whitcomb, John Baker, John Whitney, Amos Edmonds, Jacob Hearnway, Aaron Eames, John Shattuck, William Speakman, G. William Speakman, Joseph Darling, John Huntford, John Bannister, Solomon Barnard, Daniel Barnes, Daniel Barnes, Jr., Solomon Barnes, John Barnes, Moses Barnes, Aaron Barnes, Henry Barnes, Jonathan Barnes, Jr., John Barues, Jr., Edward Barnes, Mary Beaman, Noah Beaman, Peter Bent, Jonas Bartlett, Wil-

liam Boyd, Abijah Berry, Ivory Bigelow, Jonathan Bigelow, Joel Bigelow, Noah Bigelow, William Bigelow, Thaddeus Howe, Phineas Howe, Ariemas Howe, Elizabeth Howe, Abraham Howe, Asa Howe, Eleazer Howe, Luther Howe, Luke Howe, Elisha Hudson, Simon Howe, Elisha Hedge, Moses Howe, Lucy Howe, Noah Howe, Edward Johnson, Hezekiah Maynard, Ichabod Jones, Zacheus Maynard, Solomon Newton, Ezekiel Newton, John Parker, Josiah Parker, Andrew Rice, Jabez Rice, Jonah Rice, Zerubbabel Rice, Abraham Rice, Jesse Rice, Gershom Rice, Ebenezer Richard, John Richard, Joseph Stratton, Jonathan Stratton, Samuel Stratton, Rediat Stewart, Josiah Stow, Samuel Standhope, Robert Sinclair, Jonas Temple, Jonathan Tainter, Abraham Williams, Larkin Williams, George Williams, William Williams, James Woods, Moses Woods, Peter Wood, Samuel Ward, Silas Wheeler, Caleb Winchester, Reuben Ward, William Slack, Joshua Bayley, Joseph Lamb, Jonathan Robinson, James Bowers, Samuel Curtis, Abraham Amsden, Joseph Arnold, Robert Baker, Winslow Brigham, Jonathan Barnes, Fortunatus Barnes, Frederick Barnes, Thomas Bigelow, Gershom Bigelow, Timothy Bigelow, Jesse Bush, Micah Bush, John Bruce, William Bruce, Samuel Bruce, Amass Cranston, Abner Cranston, Thomas Carr, Daniel Cook, Robert Cane, Timothy Cheney, John Demont, Benjamin Dudley, Lucas Dunn, John Darling, Alexander Boyd, Hezekiah Maynard, Stephen Hale, Samuel Phillips, Levi Fay, Ephraim Barber, Francis Stevens, Samuel Havens, Jack Rice, Silas Carley, Moses Fay, Samuel Ward, Silas Rice, John Dexter, Robert Eames, Robert Eames, Jr., Uriah Eager, Uriah Eager, Jr., Jonathan Eager, John Eager, Aaron Eager, Nathaniel Faulkner, Archelaus Felton, Nathan Goodale, Abel Goulding, Phineas Gates, John Gold, Nathaniel Gibbs, Abigail Hapgood, Mary Hapgood, Peter Howe, Seth Howe, Peter Howe, Jr., Thomas Howe, Jr., Ebenezer Hager, William Hager, Daniel Harrington, James Harrington, Edward Hunter, Daniel Hayden, Jacob Hale, Jacob Harrington, John Maynard, Ebenezer Maynard, Ebenezer Joslin, Nathan Mann, Micah Newton, William Newton, Joshua Newton, Adonijah Newton, Benjamin Rice, John Randall, Jabez Rice, Jr., Nathan Reed, Simon Stow, Samuel Stevens, Silas Jewell, Thomas Goodale, Jonathan Loring, Joseph Lawes, Jonas Morse, William Morse, Jonas Morse, Jr., Stephen Morse, Ephraim Maynard, Ephraim Maynard, Jr., John Priest, Joseph Potter, Ephraim Potter, John Putnam, Abraham Randall, David Rand, Thomas Stow, Samuel Stow, Josiah Stow, John Stow.

The largest tax-payers in Marlborough, 1770, were Ephraim Brigham, Henry Barnes, Joseph Howe, Peter Bent, Hezekiah Maynard and Zerubbabel Rice.

KING PHILIP'S WAR.—Marlborough, being a frontier town, was exposed to the incursions of the Indians, and prior to the breaking out of Philip's war a fort had been erected at this point. A number of soldiers were stationed here, and October 1, 1675, a meeting of the following citizens was held to adopt measures of defense :

Rev. Mr. Brimsmead, Deacon Ward, Thomas King, Solomon Johnson, Abraham Howe, John Howe, Sen., John Woods, Sen., Richard Newton, Abraham Williams, Thomas Rice, John Johnson, Samuel Rice, John Bellows, Nathaniel Johnson, John Woods, Jr., Joseph Newton, Thomas Barnes, Josiah Howe, John Maynard, John Rediat, John Fay, Moses Newton, Richard Barnes, William Kerly and James Taylor.

Garrisons were established at the homes of William Keely, John Johnson, Deacon Ward, Sergeant Wood, Charles Williams, Joseph Rice, Simon Rice and Peter Bent. Sunday, March 26, 1676, was a memorable day for Marlborough. "No more alarm of raging foes," says Mr. Hudson "disturbed the quiet of that Sabbath morning. The people assembled at the house where prayer was wont to be made, and a fervent petition had been offered for their safety and protection. A hymn of praise had been sung. Their spiritual leader,

the Rev. Mr. Brimsmead, commenced his sermon, and was dispensing to them the word of life, when he was interrupted by the appalling cry—"The Indians are upon us." The confusion and dismay which ensued, can be better imagined than described! The assembly instantly broke up; and the people made for the neighboring garrison, where, with a single exception, they all arrived in safety, just in season to elude the savage foe. One of the worshipers (Moses Newton, a son of Richard Newton, one of the thirteen original proprietors of the town), to his honor be it recorded, less moved by fear than by humanity, seeing an aged and infirm female who could not move rapidly from the scene of danger, resolved to rescue her from impending destruction, or perish in the attempt. In his noble effort he succeeded, and brought her safely to the garrison, though in so doing he received a ball in his elbow, from the effects of which he never fully recovered.

"Being secured in the garrison, they were able to defend themselves, but could afford no protection to their property, much of which was destroyed, or carried away. Thirteen of their dwellings, and eleven barns, were laid in ashes; their fences thrown down; their fruit-trees hacked and peeled; their cattle killed or maimed; so that their ravages were visible for many years. But what would be more distressing to our pious ancestors, than any other loss of mere property, was that of their meeting-house, and the house they had erected for their faithful minister—both of which shared in the general conflagration. There is a common tradition, that the Indians set fire to Mr. Brimsmead's house, and that the flames communicated with the meeting-house which stood near by, and that that was the cause of its being burnt. This might have been the case; but the Indians, engaged in a war of extermination, had no more regard for the white man's religion than for the white man's life, which they were taking every measure to destroy. And it is possible, that the fact of this house being located upon the Indian planting field, which gave some offense to the Indians, might have been one cause of its destruction.

"Subsequent to this attack upon Marlborough, the Indians, about three hundred strong, who undoubtedly felt that they were masters of this region of country, retired to the woods not far distant, and encamped for the night. Lieut. Jacobs, of the garrison at Marlborough, conceived the bold design of surprising them in their camp. Accordingly, on the night of the 27th, with a party of his men, and a portion of the citizens of the town, he attacked them when they were wrapped in profound slumber, and killed and wounded about forty, without sustaining any loss himself."

FRENCH AND INDIAN WAR.—During this war Marlborough was in a constant state of alarm, and twenty-six garrisons were organized as follows:

1. *Capt. Howe's Garrison*: Samuel Stevens, James Howe, Jonathan Howe, Samuel Stow, Jonathan Morse.
2. *Mr. Brick's Garrison*.
3. *Capt. Kerly's Garrison*: Nathaniel Joslin, Joseph Maynard, Dea. Woods, Nathaniel Johnson, Thomas Amsden, Simon Gatew, Joseph Johnson.
4. *Capt. Brigham's Garrison*: Peter Plimpton, Benjamin Mixer.
5. *Isaac Amsden's Garrison*: Thomas Newton, Sergeant Maynard, James Woods, Adam Martin, Is. Temple, Deacon Newton, John Amsden.
6. *Is. Howe's Garrison*: Moses Newton, David Fay, John Newton, Widow Johnson, Moses Newton, Jr., James Cady.
7. *Lieut. Williams's Garrison*: Thomas Beaman, Peter Bent, Richard Barnes, Edward Barnes.
8. *Ensign Howe's Garrison*: Ensign Bowker, Joseph Wait, David Church, Jonathan Rice, Peter Rice, Joseph Rice.
9. *Samuel Morrill's Garrison*: Sergeant Barrett, John Barnes, Benjamin Bagley, Joseph Ward, Joshua Rice, Thomas Martin, Samuel Bush.
10. *Thomas Brigham's Garrison*: Jonathan Brigham, Oliver Ward, Increase Ward.
11. *John Howe's Garrison*: Zach. Eager, Abraham Eager, Daniel Johnson, Samuel Wheelock, Obadiah Ward, Thomas Axtell.
12. *Samuel Goodnow's Garrison*: Nathaniel Oakes, Jonathan Forbush, Gershom Fay.
13. *Lieut. Howe's Garrison*: Thomas Ward, Edward Rice.
14. *Nathan Brigham's Garrison*: Joseph Stratton, Henry Bartlett, Alexander Stewart.
15. *Samuel Ward, Sr.'s, Garrison*: William Ward, Wid. Hannah Ward, Jonathan Johnson, Sr., Caleb Rice.
16. *John Matthews' Garrison*: William Johnson, Samuel Ward.
17. *Daniel Rice's Garrison*: Wid. Sarah Taylor, Supply Weeks, Eleazer Taylor.
18. *Samuel Forbush's Garrison*: James Bradish, Thomas Forbush, James Gleason.
19. *Edmund Rice's Garrison*: David Brigham, Isaac Tomblin, David Maynard.
20. *Thomas Rice's Garrison*: John Pratt, Charles Rice.
21. *Thomas Haggood's Garrison*: John Forbush, John Wheeler, Josiah Howe, B.—Carly, Sr., James Carly.
22. *Mill Garrison*: Thomas Barrett, John Banister.
23. *Simon Maynard's Garrison*: Adam Holloway, Benjamin Whitney, Joseph Newton, John Keyes, Abiel Bush.
24. *John Newton, Jr.'s, Garrison*: Eleazer Bellows, James Eager, James Newton, Benjamin Newton, Ephraim Newton, John Woods, Abraham Newton.
25. *Jonathan Newton's Garrison*: Is. Woods, Thomas Witherbee, Is. Amsden, Moses Lenard, Roger Bruce.
26. *Joseph Morse's Garrison*: Thomas Bigelow, Samuel Bigelow, Samuel Morse, John Bigelow, John Sherman, Daniel Harrington.

The committee to assign these garrisons consisted of Thomas Howe, Samuel Brigham, Isaac Amsden, Eleazer Howe, Daniel Howe, John Bowker, Jonathan Johnson, Nathaniel Joslin, Peter Rice, John Maynard and John Barrett.

CHAPTER LVII.

MARLBOROUGH—(Continued).

WAR OF THE REVOLUTION.

The Lexington Alarm The Minute Men—List of Soldiers—Voted, &c.—Henry Barnes the Register.

As early as September 19, 1768, the people of Marlborough in town-meeting assembled, voted as follows relative to the action of Boston in connection with the odious Stamp Act, "that it is their opinion that what the town of Boston has done respecting the present difficulties, is proper, and have accordingly

chosen Mr. Samuel Witt to meet the committee of Boston, at the time and place named and proposed."

March 29, 1770, at a meeting of which John Warren was moderator, it was

"*Resolved*, That we highly approve of the noble and manly-spirited conduct in those Merchants who have agreed (and firmly abide by the same) not to import goods from Great Britain, till the revenue acts are repealed, sacrificing their own private interest to the public good.

"*Resolved*, The thanks of this town to the town of Boston, for the noble-spirited resolutions and measures they have taken to promote the cause of Liberty.

"*Resolved*, That we will, as far as lies in our power, in and by every constitutional way, encourage, strengthen and support those Merchants and others, who have discovered such a patriotic spirit as by the Non-Importation Agreement, appears.

"*Resolved*, That those who have not come into or do not abide by the Non-Importation Agreement, and those that buy goods of the importers, or purchase goods of those traders who have them of the present importers, are enemies to their country and posterity, and that they ought to be treated as such.

"*Resolved*, That we ourselves, or by any from or under us, will not directly or indirectly purchase any goods of John Bernard, James and Patrick McMasters, Wm. Jackson, John Mein, Nathaniel Rogers, Theophilus Lillie, John Taylor, Anne and Elizabeth Cummings, all of Boston; Israel Williams, Esq., and son, of Hatfield, and Henry Barnes, of Marlborough aforesaid, (being importers), until a general importation shall take place, or they come into the Non-Importation Agreement of the Merchants to their satisfaction.

"*Resolved and Voted*, That the names of those who purchase goods of the importers, or of those who buy of importers, shall be made public, as far as we have the knowledge of them."

December 21, 1772, Hezekiah Maynard, Alpheus Woods, Edward Barnes, Jonas Morse and Daniel Harrington were chosen a committee to draft instructions to their Representative, and also to correspond with the Committee of Correspondence of Boston. At a meeting held January 1, 1773, the committee submitted a report and resolutions, which were unanimously adopted. Among the resolutions were the following:

"*Resolved*, As the opinion of this town, that the whole British Empire is under very alarming circumstances, in that the constitution of the nation being in part broken over, the rights of the people invaded, great inroads made upon their liberty in an arbitrary manner, their freedom, property and privileges, civil and religious, being wholly taken from them, notwithstanding all the constitutional remonstrances and petitions that have been made use of.

"*Resolved*, That the British Colonies in America, and this Province in particular, have a right to all the immunities, privileges and liberties granted to them by the royal charter and acts of Parliament.

"*Resolved*, That the people of this Province have ever been a loyal people, and have never forfeited their charter rights by any disloyalty whatever, and that they have good right to hold and enjoy their property and privileges, and to oppose on their just right to alienate them from their just owners, without the consent of themselves or representatives.

"*Resolved*, That the many acts of Parliament imposing in late years duties on this as well as the other Colonies, and the tolerating a Roman priest, and appointing papists to high places of trust in the British dominions, and also establishing the salaries of several of the first men of this Province, and also of the Judges of the Superior Court, and making them independent of the people, the great extension of admiralty jurisdiction, the quartering soldiers upon us in time of peace, the arbitrary demanding and the treacherous giving up of Castle William, our chief fortress, the shedding innocent blood, as in the horrid massacre in Boston, March 5, 1770, all of which is unconstitutional, and carries a bad aspect, &c."

At a meeting held in 1773 it was resolved:

"That although our land is very fruitful, yet being taxed without our consent, we may be brought to a miserable bread, or but one meal of wheat in a week, while in the case with Ireland, a very fertile land; and

as our great Lawgiver, and the law of nature, require self-preservation, we are determined by no means to submit to such arbitrary measures, duties, tythes, taxes, &c., but will unite with our brethren in this and the neighboring Provinces, and oppose them to the last extremity.

"That peace and harmony will never be enjoyed between Great Britain and the Colonies, until the interests of both be inseparably connected; which will be accomplished by nothing short of a repeal of all unconstitutional acts, and the removal of all sinecures, pensioners, pimps, informers and bad governors.

"That we look upon every person who does not oppose the present unconstitutional measures of administration, especially Edward Winslow and others, of the ancient and memorable town of Plymouth, who without giving one reason, have protested against the proceedings of said town, as inimical to the interests of America, and ought to be despised by all the human race."

September 29, 1774, Peter Bent was elected representative, and the town instructed him as follows:

"We hereby instruct you that you adhere strictly to the Charter of this Province, stipulated and agreed to between their Majesties, King William and Queen Mary and this Province, and that you pay no acknowledgment to any unconstitutional and new fangled Counsellors, and that you do not give your consent to any act or thing that may be construed a tacit acknowledgment to any of the late oppressive, wicked and unjust Acts of the British Parliament, for altering the Government of the Province of Massachusetts Bay."

In the mean time the town directed the selectmen "to make an addition to the town's stock of ammunition—powder, bullets and flints." They also instructed their constables not to pay the Province tax over to the Royal Treasurer, but to the Treasurer appointed by the Provincial Congress. In 1775 fifty-five additional guns, with bayonets, were procured; drums were furnished to the companies, the blankets were procured for the minute-men, etc.

This was the condition of the public mind of Marlborough when, on the 19th of April, 1775, the intelligence reached the town that the British had left Boston, and were marching on Concord. Within a few hours four companies from Marlborough, consisting of 190 men, were marching to the scene of action.

LIST OF SOLDIERS.—The following is a list of soldiers who were in the service from this town:

Roll of Captain Howe's company, which marched on the 19th of April, 1775, to Cambridge, and were absent from home sixteen days:

Cyprian Howe, captain; Amasa Cranston, lieutenant; Uriah Eager, ensign; Solomon Bowers, sergeant; Robert Hunter, sergeant; Ebenezer Hager, sergeant; William Hager, Matthias Mosman, Josiah Wilkins, John Baker, Abner Goodale, Jabez Bush, Asa Barnes, Hiram Stow, Fortunatus Wheeler, Aaron Eager, Joel Brigham, William Speakman, Francis James, Peter Howe, Ephraim Maynard, Silas Barnes, David Hunter, Joseph Miller, Simon Maynard, Luke Hager, Amos Wait, Adonijah Newton, Jacob Priest, James Bruce, Joel Barnard, Timothy Bruce, Nathaniel Bruce, Thomas Goodale, James Priest, Ebenezer Eames, William Brown, Alpheus Morse, Jabez Rice, Jonathan Temple, Jeduthan Alexander, Joseph Baker, Nehemiah Howe, Abner Dunton, Thaddeus Shattuck, Frederick Walcutt, Timothy Darling, Abraham Whitney.

Roll of Captain Brigham's company, which marched to Cambridge, April 19, 1775, and were in the service from ten to thirty days:

William Brigham, captain; Silas Gates, first lieutenant; Itamar Brigham, second lieutenant; Henry Brigham, sergeant; Noah Benman, sergeant; Joseph Brigham, sergeant; Ichabod Jones, sergeant; Thomas Rice, corporal; Ephraim Ward, corporal; Josiah Priest, corporal; Lewis Brigham, corporal; Gershom Rice, Jr., Samuel Eames, Ephraim Wilder, Oliver Hale, Simeon Howe, Ezekiel Clisby, William Loring, Rediat

Stewart, Jabez Bent, Jonathan Barnes, Jr., Samuel Howe, Silas Carly, Samuel Ward, Jr., Isaac Morse, James Ball, Frederick Goodnow, John Bagley, Timothy Baker, Ephraim Howe, Abraham Beaman, Robert Horn, Luke Howe, Lovewell Brigham, Reuben Howe, Reuben Wyman, Jonas Newton, Thomas Joslin, Phinehas Howe, Alexander Church, Itamar Goodnow, George Brigham, Moses Williams, Jr., Willard Rice, Samuel Howe, Gershom Brigham, Jabez Rice, Abraham Brigham, Abijah Berry.

Roll of Captain Barnes's company, which marched to Cambridge, April 19, 1775. A portion who went on the 19th returned home after a few days, and were succeeded by others—some of whom were in service forty days:

Daniel Barnes, captain; William Morse, first lieutenant; Paul Brigham, second lieutenant; John Loring, sergeant; Ephraim Baker, sergeant; Antipas Brigham, corporal; Jedediah Tainter, corporal; Obadiah Barre, Levi Fay, William Rice, Peter Bent, Jonathan Brigham, James Bowers, John Baker, Jonas Darling, Robert Eames, Abraham Gould, Eliazur Holyoke, Asa Witt, David Wyman, Moses Barnes, Jonathan Weeks, Ivory Bigelow, Nathan Baker, Daniel Stevens, Isaac Sherman, Benjamin Boyd, Benjamin Howe, Ezekiah Maynard, Elibu Maynard, Stephen Phelps, Daniel Rice, Daniel Robbins, Moses Roberts, Prentice Russell, Oliver Russell, John Rice, John Rice, Jr., Robert Saintclair, Ephraim Stow, John W. Woods, Francis Walkup, Stephen Felton, Thaddeus Howe, Dudley Hardy, John Lamb, Nahum Newton, Jabez Rice, William Williams, Aaron Wheeler, John Harrington, Francis Morse, Heman Stow, Benjamin Stevens.

Marlborough men in Capt. Silas Gates's company, called out on the Lexington alarm, April 19, 1775:

Silas Gates, Capt., Henry Brigham, Francis Morse, Luke Howe, Thomas Williams, Asa Barnes, Benjamin Bartlett, Abraham Beaman, George Brigham, Elisha Barnes, Uriah Brigham, Joel Brewer, Alexander Church, John Dexter, Aaron Eames, Matthias Felton, Abner Goodale, Aaron Howe, Robert Horn, Joel Hager, John Kelly, Joshua Lamb, William Loring, Joseph Maynard, Ashbel Rice, William Goodale, Gershom Rice, Samuel Gates, Quartus Stow, Abraham Howe, Samuel Ward, Moses Williams, Joseph Williams, Jeduthun Wyman, David Hunter.

Eight months' men:

Lt. Col. Edward Barnes, Capt. Paul Brigham, Capt. Daniel Barnes, Capt. Amasa Cranston, Capt. Silas Gates, Lieut. Moses Barnes, Lieut. William Morse, Lieut. Obadiah Bruce, Simon Adams, Jeduthun Alexander, Stephen Allen, William Boyd, James Ball, John Baker, James Bowers, Elibu Maynard, Ezekiah Maynard, William Rice, Joseph Miller, Paul Newton, Daniel Rice, John Rice, John Rice, Jr., David Wyman, Peter Bent, Jonathan Brigham, Abraham Brigham, George Bender, Artemas Brigham, Ephraim Barber, Jonas Darling, Robert Eames, Abraham Gould, Frederick Goodnow, Nehemiah Howe, Eliazur Holyoke, Obadiah Johnson, John Kidder, Ephraim Simonds, Daniel Robbins, Oliver Russell, John Sawin, Francis Walkup, Asa Witt, John W. Woods, Reuben Wyman, John Wright, Moses Robbins.

The following Marlborough men were also in the service:

William Brigham, John Barnes, Elisha Barnes, Uriah Brigham, Joel Babbett, Silas Baker, Richard Bradford, Henry Brigham, Asa Barnes, Benjamin Bartlett, Abraham Beaman, George Brigham, David Hunter, Joel Hager, Edward Knapp, William Loring, Francis Measure, Joseph Newton, Roger Phelps, Ashbel Rice, Joseph Robbins, John Stow, Quartus Stow, Samuel Spofford, David Sale, William Shield, Robert Scott, William Weeks, David Wait, Asa Witt, John Wiggins, Joseph Williams, Joseph Waters,¹ Joel Beaman, Alexander Church, John Dexter, Aaron

¹ He was killed at Bunker Hill, where a portion of the Marlborough men were engaged. They were under the command of Lt. Col. Jonathan Ward and Maj. Edward Barnes, of Marlborough.

² Waters was a Scotch Highlander. In the English service, and was sent over with others to reinforce General Howe at Boston. The transport arrived after the British left Boston, and was captured. Waters came to Marlborough and enlisted into the American service, and served in almost every campaign during the war. He married in Marlborough, and after the peace made it his place of abode. He died at an advanced age, retaining, to the day of his death, the air of a soldier.

Eames, Jonathan Crosby, Zerubbabel Eager, Matthias Felton, Samuel Hudson, William Goodale, Samuel Gates, Luke Howe, Aaron Nurse, Robert Horn, Samuel Kelley, Jonathan Lamb, Francis Morse, Samuel McNair, Pomeroy Grove, Joseph Pulling, Gershom Rice, Abraham Howe, Peter Stevenson, Alexander Watson, Thomas Williams, Fortunatus Wheeler, Samuel Ward, Moses Williams, Jonathan Wyman, Samuel Wyman, Samuel Willard.

The following men were drafted in 1777, for two months: John Sawin, James Bruce, Stephen Baker, James Hunter, Ebenezer Howe, Jacob Priest, Zelotus Whitcomb, Samuel Hunting, John Barnes, Ashbel Rice, Matthias Felton, Reuben Priest, Lovewell Brigham, Jonathan Wyman, Phinehas Rice, Jona. Smith, Eli Goodnow, Theophilus Hardy, Eliazur Holyoke, John Fay, John Gott Brigham, Jazon Harrington, Joseph Williams, Josiah Newton, Jonas Darling, Robert Eames and John Harrington.

In 1778, Lt. Jonathan Weeks, Abner Dunton, David Hunter, Prentice Russell, Samuel Howe, Jr., John W. Woods, Aaron Eager and Aaron Brigham, were in service three months.

Capt. Amasa Cranston, Edward Wilkins, Abner Goodale, James Gleason, Josiah Wilkins, Robert Hunter, Silas Barnes and Daniel Barnes, were at White Plains.

Among the nine months' men were Silas Baker, Josiah Priest, Phinehas Moore, Abner Ward, Reuben Priest, Timothy Rand and Joseph Johnson.

Capt. Moses Barnes was in the service two months, from first of May to first of July, 1779, and had under him, of Marlborough men, Quartus Stow, David Brigham, Phineas Brigham, Aaron Beaman, William Gates and Nathan Rice.

Among the six months' men were:

Elibu Maynard, David Sale, Alexander Watson, John Stow, William Weeks, Joseph Johnson, David Wait, Stephen Baker, David Holloway, Samuel Gates, Aaron Brigham, Joseph Robbins, Asa Witt, David Brigham, Paul Brigham, Aaron Beaman, Abraham Stow, Joshua Bailey, Joseph Waters, Joseph Newton, Roger Phelps, Zerubbabel Eager.

The following were in the service in Rhode Island:

Jacob Brown, William Dawson, Joseph Waters, Thomas Williams, Uriah Eager, Elibu Maynard, Abraham Stow, Alexander Watson, Daniel Brigham, John Gates, Israel Brown, Israel Greenleaf, Putnam Phelps, Jonas Wilkins, Moses Eames, Paul Brigham, David Holloway, Moses Williams, Winslow Stow, Morris Clary, Silas Gates, Jr., William Gates, Aaron Eager, Stephen Eager, Samuel Gates, Aaron Beaman, Joseph Robbins, Jotham Bayley, David Wait, Samuel Brigham, Jonathan Goodnow, Silas Wilson, William Rice, Lovewell Brigham, William Weeks, Tolman Howe, Roger Phelps, Asa Witt, Aaron Brigham, Stephen Brigham, David Greenleaf, Abraham Priest.

At Claverack, in 1780, under Capt. Amasa Cranston, were

Alexander Watson, Ephraim Jewell, Nathan Rice, Samuel Dunton, Aaron Brigham, William Goodale, Silas Baker, Noah Beaman, Jr., John Dunn.

The following is a list of three months' men in 1780.

William Cory, Gardner Howe, Stephen Smith, Solomon Howe, Eber Keyes, Caleb Parker, Daniel Harrington, John Dunn, Joseph Temple, John Jenison, Adam Harrington, Samuel Dunton, Aaron Brigham, Noah Beaman, Silas Stow.

Francis Jones, Nathaniel Brown, Ephraim Wilder, Reuben Wilder, Samuel Gates, William H. Woods, Luke Howe, Moses Williams, Joseph Weeks, Elias Witt, Dana Newton, Isaac Proctor, David Sale, David Wyman, Jedediah Maynard, William Mercer, Elias Morse, John Moore.

nella, Timothy Johnson, Eli Howe, Stephen Hudson, Charles Hudson,¹ Samuel Russ, James Whitney, William Rice, Elisha Austin, Peter Little, Francis Soames, Stephen Phelps, John Baker, Phineas Morse, Joseph Johnson, Jonathan Wiggins.

The following is a list of three years' men :

Joseph Miller, David Harris, Jonah Priest, Reuben Priest, James Mahew, David Hill, John Dunn, Thomas Baker, Alexander Crawford, William Fodick, Abner Smith, John Cain, Jonathan Pollard, Enoch Kidder, Joseph Waters, Jacob Groun, Jonah Newton, Joseph Newton, Samuel Little, Stephen Russell, Zerubbabel Eager, John Dexter, Jonathan Dexter, Nathan Pratt, John Rice, Silas Sawin, William Walker, John Newton, Levi Fletcher, Job Spaulding, Samuel Ditson, Thomas Ditson, Reuben Wyman, Thomas C. Ridgeway, Josiah Bailey, Thomas Greenough, James Edy, John Gilliard, Silas Harthorn, William Messer, Thomas Ridgeway, James Parker, Dean Wyman, Andrew Kettle, Patrick Mahony, Peter Willard, Joseph Dawson, Robert Mansfield, William Rice, John Johnson, Samuel French, Charles Benjean, John Denmark, John Ansel, Jonathan Newton, John B. Torrey, Samuel Fletcher, Benjamin Roberts, Prentice Russell.

William Goodale, Ephraim Newton, Jonathan Crosby, William Bigelow, Joseph Waters, Peter Stevenson, Samuel Spofford, Israel Greenleaf, John Barnes, Benjamin Gould, Richard Wyman, Abel Ray, Aaron Brigham, Job Spaulding, John Rice, Joel Bartlett, Francis Menford, John Gates, Samuel McNair, Silas Baker, Edward Knapp, Robert Scott, William Shield, Samuel Wyman, Samuel Willard, Thomas Joslin, John Newton, Stephen Phelps.

In March, 1776, the town chose a committee of seven of their prominent men "to devise ways and means for the manufacture of saltpetre in private families," as preparatory to the manufacture of gunpowder. At a meeting held May 28, 1776, the town voted, "That if the Honorable Continental Congress shall, for the safety of the United Colonies, declare them independent of the Kingdom of Great Britain, we, the inhabitants of Marlborough, will solemnly engage, with our lives and fortunes, to support them in the measure."

In 1776, the town voted "to give to every soldier that enlists to go to Canada, seven pounds as a bounty, or twelve pounds as a hire, exclusive of the Court's bounty, as the person that shall enlist shall choose."

In March, 1777, the town voted "to give each soldier that shall enlist to serve in the Continental army the term of three years, or during the war, for this town, the sum of forty pounds as soon as they shall pass muster." They also empowered the Treasurer to borrow, in behalf of the town, such a sum as should be necessary to pay the soldiers thus enlisted.

At a meeting December 4, 1777, voted "to leave it with the Selectmen to supply the families of such non-commissioned officers and soldiers as have engaged in the Continental army from this town."

In January, 1778, at a town-meeting, "Heard the Articles of Confederation and Perpetual Union between the United States of America—empowered the Representatives to act and do as they shall judge

most for the advantage of this and the United States, relative to that matter."

At a meeting held March, 1778, "Voted to provide 32 pairs of stockings, 16 pairs of shoes, 16 pairs of breeches, and 32 shirts for the soldiers; and that the Selectmen provide them, and send them as soon as may be upon the town's cost."

At a meeting held May, 1778, to act upon the subject of a new Frame of Government, the record reads as follows: "After hearing the Constitution and Form of Government read, and Debates upon it—seventy-six voters present at the meeting—thirty-four were for approving and forty-two for disapproving of the Form of Government." So the town, as far as their vote was concerned, rejected the proposed Constitution; and in this respect their voice was in harmony with that of the State.

Additional troops having been called for, the town, at a meeting held May, 1778,

"Voted, To give to each soldier that shall enlist before the 15th instant, to serve in the Continental army for the term of nine months, to do a turn for himself, thirty pounds as a bounty, and eight pounds per month wages for the time he shall serve in the army, over and above what the Continent gives.

"Voted, To give each soldier that shall enlist by the 15th instant, to serve in the militia and do duty at Peekskill, to do a turn for himself, twenty pounds as a bounty, and four pounds per month wages, over and above what the Continent and State give."

The meeting was then adjourned to the 15th instant, when it was found that the requisite number of men had not been obtained for the nine months' service; whereupon it was

"Voted, To give to each of the above-named soldiers that shall enlist before next Monday, at five o'clock, P.M., one hundred and sixty pounds to do a turn for the town, or, if either of them choose to do a turn for themselves, then the town shall give them forty pounds as a bounty, and ten pounds per month wages, if they shall enlist before five o'clock next Monday afternoon, to serve in the Continental army nine months.

"Voted, That the officers go to the Town Treasurer for the money to pay the soldiers for their bounty and hire, and that the Town Treasurer borrow the money upon the town's credit."

"In order to understand the expression of 'doing a turn for themselves,' or for the town, it is necessary to know that such was the difficulty in obtaining soldiers that they resorted to drafts, and in some towns a system of conscription was resorted to, as the only means of sustaining the army. The citizens were divided into classes, according to the valuation, and amount of taxes paid by the individuals. Each class was required to furnish a man, and provide for his wages and support. Each member contributed according to his property, and all delinquents were returned to the Assessors, and the sum due was included in his next tax. When an individual did a turn of duty for himself, he was excused from payment and exempt from draft till all others had been called out. In Marlborough, however, they had recourse only to drafts, where the same rotation existed." (Hudson.)

Numerous calls were made for troops, and it was found almost impossible to obtain them. Not, however, for the want of patriotism on the part of the men, so much as the want of ability in the Government to

¹ Charles Hudson was killed by our own men. He was out in a scouting party near the enemy, when fears were entertained for their safety, and another party was sent out for their protection. Night came on, and the last party, hearing the approach of troops, and supposing them to be the enemy, secreted themselves, and on their near approach fired upon them, killing Charles Hudson and another of the first named party, before they discovered their mistake.

subsist and pay them. The town made a great effort to obtain her quota of men, by offering bounties in addition to the government pay; but the depreciation of the currency rendered the large bounties offered of but small value. Consequently, it was found necessary to graduate the bounty upon something more stable than a constantly depreciating paper currency. The following action of the town will show the expedients to which the public were driven. At a meeting held June 21, 1779, the record reads thus:

"Heard the Resolves of the Great and General Court of the 8th and 9th instant, for raising a reinforcement to the army.

"*Voted*, To give each man that shall enlist, or his legal representative, if he should die in the service, forty shillings per month, to be paid in produce of this country, in beef at twenty shillings per hundred, and Indian corn at three shillings per bushel, or as much money as shall purchase said produce, including their wages due from the Continent and State. The above to be paid at the expiration of their service—they producing a certificate from the commanding officer that they have been regularly discharged. And if the men do not turn out for the above encouragement in two days, then the officers draft according to the orders of the General Court; and if any man is drafted and will go, he shall be entitled to the forty shillings per month, as set forth above. Each man engaged for the above encouragement is considered as doing his turn.

"*Voted*, That sixty pounds be advanced by the Town Treasurer to each man, before he marches, who engages in the Continental service for nine months, which is to be deducted at the final settlement.

"*Voted*, That the Treasurer be empowered to borrow the money for three months on the credit of the town."

"At a meeting held February 12, 1781, *Voted*, To give as a bounty to each man that shall engage in the Continental army, during the war, twenty steers, three years old, or, in lieu of each steer, fourteen hard dollars, and to be paid to the men that shall engage, one-third part at the time of their passing muster, and the other two-thirds, one-half in two years from the time they shall engage, and the other half in two years from the time they shall so engage.

"Also *Voted*, To give as a bounty to each man that shall engage in the Continental army for three years, twenty steers three years old, and to be paid to each man as follows: Four steers at the time of his passing muster, and sixteen steers at the expiration of three years, unless sooner discharged; and in that case to be paid in proportion. The above steers to be estimated at fifteen dollars each."

The people of Marlborough, with, perhaps, one exception, were loyal to the colonial cause. Henry Barnes, however, was a royalist, and remained true to the King. He was a favorite of the Governor, who appointed him one of His Majesty's Justices of the Peace for the county of Middlesex in 1766. He is denominated an "importer" in the Marlborough Resolutions. He kept a store in Marlborough and appears to have been a man of wealth and enterprise.

In 1758 he preferred a petition to Governor Shirley, in which he sets forth, "That he has lately been at considerable expense and trouble in erecting in Marlborough a commodious house, works and utensils for the distilling and manufacturing of cider spirits, and the same has so far answered his expectations, as that besides what has been consumed in the Province, he has distilled the same spirit and sent to Boston for exportation between two and three thousand gallons, and the same is esteemed by proper judges to be as good and wholesome as any spirit now used;" and prays that he may be licensed to retail it in small quantities. Whereupon the Court of Ses-

sions and the selectmen of the town were empowered to grant such license.

Henry Barnes resided in the east village, and was a man of considerable property, and one of the largest tax-payers in the town. He was the owner of several slaves, one of whom, "Daphne," he left in Marlborough, and she was supported out of his estate. He left Marlborough early in 1775, and repaired to Boston to take shelter under protection of the King's troops. An act was passed in 1778, in which Mr. Barnes was mentioned, forbidding all persons who had left the State and gone over to the enemy, returning to their former homes; and providing, that in case of their return, they should be arrested and sent out of the dominion of the United States; and in case they should, after such transportation, return without the leave of the General Court, "they shall suffer the pains of death without benefit of clergy." His property was confiscated and he finally returned to London, where he died in 1808, aged 84.

CHAPTER LVIII.

MARLBOROUGH—(Continued).

ECCLÉSIASTICAL HISTORY.

Union Congregational Church—The Second Parish, Unitarian—Methodist Episcopal—First Baptist—Church of the Holy Trinity—Universalist—Immaculate Conception, Roman Catholic—St. Mary's, French Catholic—French Evangelical Church, Protestant Congregational.

UNION CONGREGATIONAL CHURCH¹—The history of this church can be appropriately divided into the three following periods: First, the period during which the church was connected with Town Parish.

Second, the period during which the church was connected with First Parish.

Third, the period during which the church has been connected with Union Society.

First Period, from 1666 to 1808.—The gospel of Jesus Christ was preached in Marlboro', about as soon as the first settlers began to cultivate the virgin soil.

As early as 1660 the voters took action for paying Rev. William Brimsmead, who was then their minister. Rev. Richard Mather, of Dorchester, preached an ordination sermon in Marlboro', April 7, 1659, and as Mr. Brimsmead was born in Dorchester, and was preaching in Marlboro', before 1660, we conclude that he was ordained in Marlboro', April 7, 1659. [See history of Dorchester.]

The evangelistic services of the young minister from Dorchester prepared the way for a church, which was organized October 6, 1666, when Rev. William Brimsmead was installed over the church, and as the minister of the town with a salary of about £40. In those days the church was composed of those who made a

¹ By Rev. A. F. Newton.

public profession of repentance and faith in the Lord Jesus Christ, but the minister was an officer of the town in its parochial capacity.

The town-meetings were held in the meeting-house, and the minister's salary was annually provided for by vote in town-meeting.

The first meeting-house stood on what is now the High School Common; the dead were buried near the meeting-house, according to the English custom. Mr. Stillman B. Pratt, of *The American*, says: "It is probable, however, that the earlier burials were all made in the older graveyards at Wayland, Watertown or Charlestown."

The oldest burial-stone in Marlboro' is that of Capt. Edward Hutchinson in Spring Hill Cemetery, bearing date August 12, 1675. He was killed by treacherous Indians in the King Philip War, and the meeting-house was burned by the Indians March 26, 1676.

Early the next year, another meeting-house was built by the Town Parish. In 1688 a larger house took its place and this one stood for about 120 years.

After worshipping in meeting-houses on the Common for 145 years, a new meeting-house was needed, and in 1805 the town voted in town-meeting—81 to 10—to build their new meeting-house on Spring Hill, where Union Church now stands.

The land was purchased and prepared by private funds, and a meeting-house built under the supervision of a committee chosen by the town for that purpose. The change of location created much opposition among the citizens of the west part of the town, and this resulted in the erection of a meeting-house on Pleasant Street, at the expense of private individuals. Both houses were opened for public services on April 27, 1806.

Second period, from 1808 to 1835.—At about this time occurs an important transition in the history of this church, which is inseparably connected with the history of the parish and town.

The church property, including land and meeting-houses, was held by the town parish. Arising out of the differences about the location of the new meeting-house, came a separation of Church and State in Marlborough, and thereby a division of the town property.

Foreseeing the separation of municipal and parochial interests of the towns of our Commonwealth, the General Court passed a law regulating parishes and precincts, and the officers thereof, June 28, 1786. [See the laws of the Commonwealth of Massachusetts from November 28, 1708, to February 28, 1807, Vol. I., p. 325.]

This law provided for the existence of more than one parish in a town, and also gave to the officers of the parish powers and privileges pertaining to the parish similar to the powers and privileges of selectmen pertaining to the town. Under this law of 1786, the fathers of the church in Marlborough acted.

The act of incorporation of the Second Parish in

Marlborough (now known as the Unitarian Church), was passed by the General Court, February 23, 1808.

In the law of 1786, in section 5, occurs the following language:

"Section 5. And be it further enacted by the authority aforesaid, that in all such towns or districts where one or more parishes or precincts shall be regularly set off from such towns or districts, the remaining part of such town or district is hereby deemed, declared and constituted an entire, perfect and distinct parish or precinct, and shall be considered as the principal or first parish or precinct."

After the Second Parish had become incorporated, February 23, 1808, the First Parish separate from the town called their first parish meeting March 10, 1808. Soon after this the church voted to be known as "The Church in the First Parish." With them remained the archives of the church from its earliest history.

This separation of Church and State occurred during the ministry of Rev. Asa Packard, whose resignation was duly accepted by the church and town in 1806, after which the town no longer provided for the support of the ministry, or paid the expenses of the meeting-house. Mr. Packard during his pastorate of twenty-one years baptized 1003 persons. November 2, 1808, Rev. S. F. Bucklin was ordained pastor of the church in the First Parish, and the parochial expenses were provided by the First Parish and not by the town.

Rev. Asa Packard was installed over the Second Parish in 1808. The meeting-house and lands on Spring Hill were now owned by the First Parish.

The law determining this ownership is clearly stated in the decision of the Supreme Court in the October term of 1851. [8 Cushing, 168. First Parish in Sudbury vs. Samuel Jones and others.]

According to the general rule of this Commonwealth, meeting-houses and grounds went with the parish. The church continued to worship under the ministry of Rev. S. F. Bucklin until his dismission, June 20, 1832. In March, 1833, the First Evangelical Congregational Society was formed by persons who left the First Parish. A large number of the church members worshipped with the First Evangelical Congregational Society under the ministry of Rev. Charles Forbush, whose pastorate continued seven months.

Third Period, from 1835 to 1890.—In 1835 arrangements were made for uniting the First Parish and the First Evangelical Congregational Society, and the church members worshipping with them. To secure this result a petition was sent to the General Court, asking that the First Parish and the first Evangelical Congregational Society be incorporated into one parish or society, by the name of Union Society, with all the property, rights and privileges belonging to said parish and society.

The Legislature granted the petition, and Union Society was incorporated March 6, 1835.

Soon after this act of incorporation, the church voted to be known as the "Union Congregational Church in Marlboro'" thereby agreeing in name with the society with which they worshipped.

In 1836, the house built in 1806 was taken down, and a smaller one built by Union Society.

This house was burned November 10, 1852.

In 1853, the house now occupied by the church was built and dedicated, August 31, on which day Rev. Levi A. Field was ordained pastor.

This meeting-house was repaired in 1868, at an expense of about \$12,000, again repaired in 1886, at an expense of about \$3000.

In 1887, the question of ownership of the Common in front of Union Congregational meeting-house, was brought by an article in the warrant into town-meeting in March.

At that time, Theodore Temple, Deacon John E. Curtis and John Henry Maynard were chosen a committee to investigate the facts and report what claim if any the town had in the Common aforesaid. One hundred dollars were appropriated for this purpose.

In July following, at a special town-meeting, a majority report, signed by Messrs. Temple and Maynard, claiming that the town owned the Common, and a minority report signed by Deacon John E. Curtis, claiming that Union Society owned the Common, were rendered. Neither report was adopted. On motion of Hon. S. N. Aldrich (moderator), a committee was chosen to submit the facts to the Professors of Real Property in Harvard University, and in Boston University, and obtain their opinion respecting the same.

The committee chosen were Theodore Temple, John Henry Maynard and John Chipman. Two hundred dollars were appropriated for this purpose. Messrs. Maynard and Chipman submitted the evidence to the gentlemen according to the instructions of the town.

A special town-meeting was held October 4, 1887, at seven o'clock P.M., to hear the opinion of the professors, which was "that as between the town and the Union Society in Marlborough the title to the Common in front of the Union Church is now vested in said society, and not in the town." Signed Edmund H. Bennett, John C. Grey, Boston, September 21, 1887. At that town-meeting it was voted to indefinitely postpone the subject.

The following November, a special town-meeting was called at 5 P.M., and the ownership of the Common aforesaid, considered.

John Reagan moved that the selectmen, together with Theodore Temple and John Henry Maynard, be a committee with full power to take possession of Union Common, employ counsel, etc., and that \$1000 be appropriated from the liquor license money for the expenses incurred. The motion was carried.

A writ of entry was served upon the officers of the

Union Society, November 29, 1887, claiming the common in front of Union Church.

The town employed as counsel, James W. McDonnell, of Marlboro', and Frank Goulding, of Worcester.

Union Society employed as counsel, Judge E. F. Johnson, of Marlboro', and Judge J. G. Abbot, of Boston.

The lawyers for the town rendered a long opinion on the case, in which they said, "As there is no evidence that between 1805 and 1808, the town specially, by vote or significant act, dedicated and devoted any part of this lot to any other use, it would follow, upon the separation into town and parish, the title vested in the parish."

In the October term of the Superior Court, held in Cambridge, the case was non-suited and the judge decided the case in favor of Union Society.

The "Brimsmead Covenant" was adopted October 15, 1679, and was used till 1837, when Rev. S. F. Bucklin prepared a revised church covenant and by-laws, and also submitted articles of faith, all of which were adopted.

The "Half-way Covenant" was in use from 1701 to 1836. By the conditions of the "Half-way Covenant," persons who were not church members could have their children baptized. In May 31, 1818, a Sabbath-school was established and continues to the present. As early as 1810 this church contributed to benevolent and missionary societies. Several missionaries have gone to foreign lands from this church. Lucy Goodale, wife of Rev. Asa. Thurston, went to the Sandwich Islands in 1820. Grace Howe, wife of Rev. James Roberts, went to Japan in 1878. Mr. Arthur Brigham went to Japan as professor of agriculture, in the college at Sapore in 1888.

In May, 1818, the church voted to choose a committee of three to examine candidates for admission to the church. This action led to greater care in the admission of church members.

In Jan., 1827, it was voted that those coming from other churches should appear before the church committee. In 1833 deaconesses were elected and made members of the church committee. In 1884 a long standing debt of about \$6,000 was paid. The present membership of the church is about 380. There have been 32 deacons of this church. Below is a list of pastors from 1666 to the present time:

Rev. William Brimsmead, installed Oct. 3, 1666, dismissed July 3, 1701; Rev. Robert Brock, installed Oct. 25, 1701, dismissed Jan. 6, 1731; Rev. Benj. Kent, installed Oct. 27, 1733, dismissed Feb. 1, 1755; Rev. Aaron Smith, installed June 11, 1740, dismissed April 25, 1778; Rev. Asa Packard, installed March 23, 1785, dismissed April 10, 1806; Rev. S. F. Bucklin, installed Nov. 2, 1808, dismissed June 20, 1832; Rev. Chas. Forbush, installed Aug. 21, 1833, dismissed Feb. 26, 1834; Rev. John N. Goodhue, installed May 4, 1835, dismissed Sept. 13, 1839; Rev. Geo. E. Day, installed Dec. 2, 1840, dismissed Dec. 23, 1847; Rev. David L. Ogden, installed April 26, 1848, dismissed July 23, 1860; Rev. George Denham, supply, installed July, 1850, dismissed April 1, 1863; Rev. Levi A. Field, installed Aug. 31, 1863, dismissed Oct. 22, 1899;

¹ Died in office.

² Pastor of "First Evangelical Congregational Church and Society."

Rev. Geo. N. Anthony, installed Nov. 8, 1860, dismissed Jan. 27, 1869;
 Rev. Charles R. Treat, installed Mar. 30, 1870, dismissed June 1, 1873;
 Rev. John Willard, installed Dec. 30, 1873, dismissed June 30, 1879;
 Rev. S. E. Eastman, supply, installed Sept. 1, 1880, dismissed Oct. 1, 1881;
 Rev. Albert F. Newton, installed Sept. 6, 1882.

THE SECOND PARISH¹ (UNITARIAN).—On the 7th of June, 1804, according to the records of the Unitarian Parish of Marlborough, "Sundry inhabitants of the westerly part of Marlborough met at the house of Capt. George Williams, and chose William Boyd, Moderator, and Benjamin Rice, Jr., Clerk." At this meeting, after "taking into consideration the difficulties which existed in the Town as to building a meeting-house," and for other reasons, which at this day are not fully known, they chose a committee of ten "to notify the Inhabitants of the West part of the Town, to attend at the adjournment of this meeting, that they might express their minds relative to the becoming a separate Society."

The adjourned meeting took place June 11, 1804, and it was "Voted unanimously that they would endeavor to be separated from the Easterly part of the Town of Marlborough, either as a poll parish, a precinct, or a separate Town." A committee of eleven was chosen whose duty it was "to take all the matters of our meeting into consideration; and also to select a spot or spots to build a Meeting-House on."

This committee met June 15, and voted to recommend "to the Inhabitants to build a Meeting-House on the land of Josiah Fay and Capt. William Gates, west of Wheeler's Lane, near what is now Broad Street."

On the 12th of July, they met again, and agreed to petition the Selectmen of the Town to insert an article in the next Town Warrant, "To see if the Town will give their consent that those Inhabitants residing in the Westerly part of Marlborough, may be incorporated,—and a separate Town made of the Territory; and to do and act in the premises as to them may seem proper."

At a meeting of the Inhabitants of the Town, July 16, it was voted not to grant the aforesaid petition.

Aug. 26, 1804, the Committee of Eleven met, and appointed three of their number, a sub-committee "to prepare a petition to the General Court, and such other papers as they may think necessary for the Inhabitants of the West End of the Town of Marlborough, who wish for a separation, to subscribe to at their next meeting."

The petition to the General Court was drawn up and signed by George Williams and seventy-five other citizens of the West part of the Town. Messrs. Silas Gates, Benjamin Rice, Jr., and Luke Drury, were chosen as "Three agents to present the petition to the General Court, and each was authorized to appear in the name of the whole."

The petitioners immediately proceeded to organize themselves as a society, to be known as "The Peti-

tioners for a Division of the Town of Marlborough." Taking it as certain that their petition would be granted, they proceeded to choose officers, to raise money for various purposes, and to make preparations for building a meeting-house on land purchased for the purpose.

Before the meeting-house was erected, however, the committee of both branches of the General Court "heard the parties," and, after due consideration, January 23, 1805, reported that "the petitioners have leave to withdraw their petition." The General Court accepted the report, and the effort to make a new town was at an end.

The petitioners were, of course, much disappointed, and after paying all expenses incurred, voted to distribute the remaining funds among the contributors according to the amount each had paid, either by taxation or voluntary contribution.

Things now took a different turn. The "Petitioners" met March 28, 1805, and decided to make an effort to secure land for a new road between the houses of Samuel Gibbon and Jonah Rice, and also for a "Meeting-House Spot." A committee was appointed to carry out this project, and at an adjourned meeting, April 2, 1805, it was deemed advisable to go ahead and purchase all necessary land, and erect a meeting-house on the land of Benjamin Rice and Windsor Ward. A subscription paper was circulated at this meeting, and pledges amounting to five thousand two hundred and twenty-one dollars were secured.

At the next meeting, April 5, notice was given to the "Town's Building Committee and the selectmen of Marlborough that the inhabitants of the westerly part" of the town "have determined to build a meeting-house on lands of Benjamin Rice and Windsor Ward," and that the said building committee had better "lessen the dimension of their house, or proceed in any other way that they in their wisdom shall think fit and proper."

The reason given in the notice for the step about to be taken was that "it will be most for the peace and happiness" of the parties concerned.

From this time on to April 4, 1806, various meetings were held concerning the proposed meeting-house, and it was then voted, (April 4,) to "take measures to form ourselves into a Religious Society as soon as possible." At the same meeting, a committee of fifteen chosen for the purpose reported that, "We, the subscribers, wishing to form ourselves into a regular Religious Society, have for many years past been satisfied with the services of the Rev. Asa Packard as a minister of the Gospel, and are still wishing him to be our minister, feeling ourselves able and willing to make him a reasonable compensation for his services in the ministry with us."

A committee was appointed "to wait upon the Rev. Asa Packard and request him to supply the pulpit in the new Meeting-House."

¹ By J. V. Jackman.

May 12, 1806, a petition was presented to the selectmen asking that they would call a town-meeting "to see whether the town will consent that the subscribers, together with such others as may join them, shall be incorporated into a Religious Society, by such name as the Legislature of the Commonwealth may direct."

A petition to the General Court was also drawn up, setting forth that the subscribers "had at great expense erected a convenient building for purposes of Public Worship; that they had employed a Public Teacher, who constantly preaches in said building; that they believed that the cause of religion and good morals would be advanced by their incorporation into a religious society," and that therefore "your petitioners pray that they may be incorporated as aforesaid, with such privileges and immunities as appertain and belong to Parishes:—and as in duty bound will ever pray."

This petition was signed by George Williams and one hundred and ten others.

There were now two branches of the church in Marlborough, and it seems that they were harmonious in all their proceedings, for when a town-meeting was called for the purpose of effecting a union of the two, by paying all expenses incurred by the new society, each branch voted that "we do not, either of us, mean to oppose or interrupt the other branch of this church, in the enjoyment of the special ordinances of the Gospel, or the settlement of a Gospel Minister," and that they would oppose any such measure as that proposed, on the ground that it would "neither contribute to their honor, their peace, nor their happiness, nor be consistent with either."

Various efforts were made by the town to bring the two sections together, but to no purpose. The "Petitioners" considered that they were entitled to existence as a separate society, because they had been recognized as such by "The unanimous voice of a very respectable ecclesiastical council, mutually chosen by the two branches of the Church of Christ in Marlborough," and because they had "a teacher of their own choice, and a meeting-house," which they had "occupied more than one year."

The town threw every obstacle in the way, but finally the "petitioners" were successful, for February 20, 1808, the "Act of Incorporation" passed the House of Representatives, and February 22d, the Senate, and "The Second Parish of Marlborough," commonly known as the Unitarian Parish, had a legal existence with "all the privileges and immunities accorded to other parishes."

The first parish meeting under the "Act of Incorporation" was held March 8, 1808. At this meeting, all necessary parish officers were chosen and measures were taken to dedicate their meeting-house and sell the pews therein.

The Rev. Asa Packard formally accepted the invitation to become the pastor of the new society, and

the relation was sustained until he resigned the pastorate in 1819.

During his pastorate, the society received from Mr. Ephraim Brigham the gift of a lot of land now known as the "Brigham Cemetery,"—the donor giving as a reason for the gift, his "being moved thereunto by respect for the remains of my honored and beloved parents which were deposited there because infected with small pox."

In 1819, the Rev. Mr. Packard was succeeded by the Rev. Seth Alden, who remained pastor of the society till 1834, when the Rev. William Morse became his successor.

In 1837, the ladies of the parish met and organized a society for benevolent purposes, and mutual improvement. For many years, they met in private houses, and accomplished much good for the parish. Finally, they gave up this plan, and held their meetings in the vestry of the church, until, in 1880, they were installed in sumptuous quarters contained in an addition to the church built for the purpose by the wealthy, public-spirited men and women of the parish. The society is to-day known as "The Ladies' General Charitable Society," and is a powerful factor in the management of parish affairs.

The Rev. Mr. Morse was succeeded in 1844 by the Rev. Horatio Alger. Under his administration, the parish received a gift of five hundred dollars (\$500), from Mrs. Elizabeth Phelps, the same to be devoted to the establishment of a library. The collection of books thus formed was increased by a gift of 200 volumes from Henry Rice, Esq., of Boston. Many additions have been made since that time, until, at the present day, it contains more than 3000 well-selected volumes, illustrating nearly every department of English literature.

In 1855, the society took a decided stand against the "Institution of Slavery," and declared that they would "decline all such connection with other churches calling themselves Christian, as shall implicate us in any degree or in any way in the guilt of upholding and perpetuating slavery."

The Rev. Mr. Alger resigned his pastorate in 1859, and was succeeded in 1861 by the Rev. W. C. Tenney, whose services as pastor ended in 1864.

In 1865, the Rev. Eugene De Normandie assumed charge of the parish, and served as pastor till 1869. During this time the church was thoroughly "remodelled and rebuilt."

The Rev. Calvin Stebbins followed Mr. De Normandie in 1869. A new parsonage was built for his use by voluntary contributions from several members of the parish.

In 1872, the parish voted to admit women over eighteen years of age as members, with all the privileges enjoyed by men.

The services of the Rev. Mr. Stebbins were discontinued in 1872. From that year to the present time the parish has been under the charge of Rev. J. H.

Wiggin, 1872-1875; Rev. R. A. Griffin, 1877-1888; and Rev. Edward F. Hayward, the present pastor, who began his term of service in 1889.

Such, in brief, is the history of the Unitarian Parish of Marlboro'. It is to-day a highly prosperous society, holding in its possession a "Ministerial Fund" amounting to six thousand six hundred dollars (\$6600), given by many of the earlier members of the parish; a fund for the maintenance of the Brigham cemetery, known as the Gibbon Fund; a fine church and organ, and a spacious common. All these, together with the parsonage before mentioned, show the generosity of the noble men and women, who have been enrolled in its membership.

Connected with the society is a flourishing Sunday-school, consisting of nearly two hundred members, under charge of S. H. Howe, Esq., who has been for many years its efficient superintendent.

The expenses of the parish, with the single exception of a poll-tax, assessed on voting members, are all met by voluntary contributions. Up to 1875, parish expenses were met by taxation, but at that time all pew-holders donated their pews to the society, and from that date the seats in the church have all been "free."

During the eighty-two years of its legal existence the society has never seen a time when its men and women were not ready and willing, each and all, to maintain the honor and dignity of "The Second Parish of Marlborough."

METHODIST EPISCOPAL CHURCH.¹—The history of the Methodist Episcopal Church of Marlborough is unique. The seed of Methodism in this vicinity was sown by Rev. George Pickering in 1798. Under his preaching one Phineas Sawyer was converted, and he at once established meetings in his house and factory, in the village of Feltonville, in the north part of Marlborough (now Hudson).

The first Methodist Society in Marlborough was organized under the name of "The First Methodist Society in Marlborough," March 18, 1821, with Daniel Stratton, president, Lewis Jewell, vice-president, and Solomon Weeks, clerk. For a time the society held its meetings in barns and groves. From 1821 to 1832 preachers from the Needham Circuit supplied, and in 1832 the Marlborough Circuit was formed. In 1827 a church edifice was built in a secluded spot now known as "Gospel Hill," about equi-distant from Marlborough Centre, Feltonville and Stow, and this location was selected to accommodate the three villages. The building was dedicated March 5, 1828, by the now famous Rev. E. K. Avery.

Amid great persecution the society prospered and became noted. In 1851 a violent contention arose over the question of removing the place of worship to either Marlborough Centre, Feltonville or Rockbottom, the latter being a village in Stow. The contest

waxed hot, and after several tentative decisions the final vote by agreement was taken December 27, 1852, and resulted in deciding, by a bare majority, in remaining on "Gospel Hill," and in "repairing the present building." "From the heat of the debates," or from other cause, the building took fire during that night and was reduced to ashes. Thus the struggle ended, and the several factions were freed, and separated in peace.

Steps were at once taken to erect a church edifice in Marlborough Centre, and the present edifice was dedicated with a sermon by Rev. Joseph Cummings, D.D., October 19, 1853. Favored with some of the most popular preachers in the "connection" the society has prospered.

In 1887, under the pastorate of Rev. P. C. Sloper, the church edifice was remodeled. The church and parsonage are valued at \$16,000.

The present officary of the church is as follows:

Pastor, Rev. Ernest P. Herrick; Sunday-school superintendent, John Boggs; organist, Harry Gibson; chorister, James H. Warner.

Trustees, E. Stowe, C. B. Greenwood, W. W. Holyoke, J. W. Baird, G. W. Holyoke, John Boggs, Luther L. Tarbell.

President, C. B. Greenwood; clerk, Luther L. Tarbell; treasurer, E. Stowe.

Stewards, W. W. Holyoke, H. E. Rice, Thomas Robb, C. L. Perry, E. B. Clark, Hiram Greenwood, G. W. Holyoke, Mrs. W. S. Frost, Mrs. C. B. Greenwood, H. O. Pendleton.

Treasurer, W. W. Holyoke.

THE FIRST BAPTIST CHURCH was organized April 14, 1868, with the following constituent members:

Mr. and Mrs. C. M. Angier, Mr. and Mrs. H. Belknap, Mr. and Mrs. W. D. Walker, Mr. and Mrs. H. C. Gates, Miss Lizzie A. Crocker, Mrs. M. A. Dammun, Miss Nancy A. Leger, Miss E. M. Gates, Frank H. Lowell, Robert A. Marshall, Edward P. Richardson, Marshall G. Richards, Miss Lucy Trask, Mrs. William Allen and Mrs. A. F. Brigham.

This meeting was held at the house of Mr. W. D. Walker. Previous to this time, however, baptism services had been held in the town by Father Fritz, the Baptist State Missionary. The first prayer-meeting was held at the house of Mr. W. D. Walker, in July, 1866. July 15, 1867, an informal or temporary organization was effected, with W. D. Walker a committee on pulpit supply and man-of-all-work; M. G. Richards, solicitor of funds; F. H. Lowell, treasurer; E. P. Richardson, clerk; and C. C. Curtis was authorized to secure the use of Sons of Temperance Hall as the temporary place of worship.

The first public services were held July 21, 1867, and a sermon preached by Rev. D. F. Lamson, of Northborough, Mass.

May 16, 1868, a call to the first pastorate of the church was voted to M. R. Deming, who was then acting as pulpit supply, and at a meeting held June 6th it was reported that the call was accepted. A

¹ By L. L. Tarbell.

council for ordination met in the Universalist Church, Marlboro', June 18th, and, after examination, Mr. Deming was regularly ordained and installed as pastor. He remained until June 2, 1871. The first deacons of the church were E. P. Richardson and Charles Angier.

The pastors since Mr. Deming have been as follows: Rev. J. T. Burhoe, J. H. Barrows, L. W. Frick and the present efficient pastor, Rev. Charles Ransom Powers.

Definite action relative to securing a house of worship was taken in 1869. It was then decided to purchase the present site of Fulton Hall, for which the sum of \$1701 was paid. The old town hall, then standing where the present one stands, was sold at auction on March 9, 1869, and was struck off to pastor Deming for \$1050. It was removed to its present position, raised a story and fitted up with two stores on the first floor, and the upper part was finished and furnished nearly as it is now.

November 5, 1885, it was voted either to repair the old and outgrown Fulton Hall or build anew. Land was subsequently purchased on the corner of Witherbee and Mechanic Streets, and the present fine church edifice erected. It was formally dedicated December 4, 1889.

THE CHURCH OF THE HOLY TRINITY.—The rectors of St. Mark's Church, Southborough, were called upon from time to time to perform religious offices for English Church families residing in Marlborough. Occasional services were held. While the Rev. F. L. Bush and the Rev. Pelham Williams, S. T. D. were residing temporarily in Southborough, these services were quite regular. At one time an upper room in the building known as Marlborough Block was the gathering-place of the little band of worshippers. Later, when the Rev. Waldo Burnett became rector at Southborough, a store was rented under the old Fulton Hall, nearly opposite the Old Colony Depot, and church services were held there every Sunday evening, excepting in mid-summer. This "Mission Room" was often uncomfortably crowded. Mr. and Mrs. J. M. Sears, of Southborough, offered to build a church, if the people would purchase a suitable lot.

Strenuous efforts were made, and the ground at the corner of Main Street and Cotton Avenue was secured.

On November 17, 1887, the present beautiful church was opened and consecrated by the Right Rev. B. H. Paddock, D.D., the Bishop of Massachusetts. The Rev. Mr. Burnett then resigned the charge of the parish, and February 1, 1888, the Rev. Geo. S. Pine became the first resident rector. The parish had been organized March 25, 1887, and was admitted into union with the Diocesan Convention, May 22, 1889. The present wardens are William M. Hamilton, and John T. Stewart. The church, on a prominent corner

of the Main Street, built in the early English style, from a design by Emerson, the well-known Boston architect, is an ornament to the town. Its interior is simple in coloring, but artistic in form. It has a rood screen of wrought-iron, a fine organ and beautiful chancel appointments. The music, a prominent feature of the services, is rendered by a well trained choir of men and boys under the direction of Mr. B. B. Gillette. Since the opening of the church there has been a steady growth in the parish. The average attendance at the services and in the Sunday-school has more than doubled, the number of communicants has increased seventy-five per cent, and the parish is expanding itself more and more in the field of good works.

UNIVERSALIST CHURCH.²—Unfortunately the early records of the First Universalist Church, of Marlboro', Mass., have been lost, so that much which would be of great interest to the present generation has passed into the sea of oblivion. A few scattered papers and documents, some of which are dated back over sixty years, give no glimpses of the beginning of the church history.

A society for worship was formed about the year 1825, and a church building was erected soon after. Probably no settled pastor was called for the first few years. The pulpit was supplied from Sunday to Sunday with preaching from a large number of ministers, among which were many of the most prominent clergymen of that early day. In the year 1829, Rev. Thomas J. Greenwood received a call to become pastor of the church, at a salary of \$500.

The call was accepted, and for fifteen years Mr. Greenwood ministered to the society, loved by his people, and respected by all. The pastorate was very successful, for the society grew constantly in numbers and wealth.

Following this pastorate is a period of several years, which, unfortunately is almost a blank from the loss of the Church Record book. About all that is known is that there was a decline in interest and activity, which was followed by a period of dormancy.

In the year 1862 or '63, Rev. Sylvanus Cobb, D.D., was called to the pastorate, although he never became a resident of Marlboro'. The scattered elements of the parish were brought together by him, and re-organized, and a new period of prosperity began. Rev. W. A. Start, now the secretary of the Massachusetts State Convention of Universalists, was Dr. Cobb's successor. His pastorate began March 19, 1865, and continued three years. During this period, the present church building was erected, the parish greatly strengthened, the congregation increased, and the Sunday-school built up to a membership of over three hundred. The Rev. S. T. Aldrich, followed Mr. Start, in a pastorate which was unfortunate, through the pastor's deflection from the faith, and attempt to

¹ By Rev. George S. Pine.

² By Rev. F. S. Rice.

form an Independent Society. This movement was not a success, and in 1870, Rev. J. H. Weeks became the pastor. He continued two years, being succeeded by Rev. Ada C. Bowles, as non-resident pastor. These pastorates were uneventful, as was also that of Rev. Lorenza Haynes, which followed. Adverse conditions made the life of the society something of a struggle. Burdened with debt, and somewhat disheartened by its vicissitudes, for a time it was doubtful what would be the outcome. Patience and perseverance, however, conquered, and in 1880, we find the church under the guidance of a former pastor, Rev. W. A. Start, State Missionary, renewed with hope and courage. The debt is lightened by the generosity of friends, and particularly by the munificent gift of Miss Harriet Fay, a member of the church, since deceased. In 1881, Rev. James Taylor became the pastor, holding that position for two years. Rev. W. F. Dusseault followed him in a pastorate of five years, which was abundantly blessed. The church is at present (1890) in charge of Rev. F. S. Rice, and is united and prosperous.

THE ROMAN CATHOLIC CHURCH OF THE IMMACULATE CONCEPTION stands on Prospect Street. It is a handsome brick structure, an ornament to the town and creditable alike to the spirit of faith and generosity which placed it there. It is the largest church in Marlborough, its audience room seating some fourteen hundred. Its choir, under the direction of John Dalton (Prof. F. W. Riley, organist) is justly celebrated for the excellent rendition of its church music. The pastor is Rev. P. A. McKenna. He came here as curate in 1870, and after some years' service as pastor in the adjoining town of Hudson, was transferred back to Marlborough. His curate is Rev. John T. O'Brien, ordained June, 1889.

The Catholics of Marlborough were organized as a separate parish in January, 1864, when Rev. John A. Conlin was appointed resident pastor. Rev. Ed. Farrelly, pastor of Milford, celebrated the Sacrifice of the Mass, for the first time, in Marlborough, Saint Patrick's Day, 1851. Marlborough was then a mission, and remained so under Father Farrelly's and Father John Walsh's administration until 1864.

The corner-stone of the first Catholic Church in Marlborough was laid August 1, 1854. Rev. Nicholas J. O'Brien preached the dedication sermon.

The contrast between the present numerous congregation and the one of that day is a fitting accompaniment to the many other contrasts suggested by the celebration in Baltimore, November 10, 1889, of the Centenary of the appointment of Bishop Carroll, and also by the opening of the first Catholic University at Washington, November 13th.

ST. MARY'S CHURCH (*French Catholic*).—Pastor Rev. C. Caisse.

FRENCH EVANGELICAL CHURCH.—The First French Evangelical Church (Protestant) has a brief history at this date; it has a history to make in the future.

In 1888 there was no Protestant French missionary located in Marlboro', and the Massachusetts Home Missionary Society sent Mr. A. P. Blouin here to sell Bibles and Christian literature and converse with the French people about the Gospel and the New Testament. He came in August, 1888, and remained until March, 1889. Immediately following him came Mr. W. H. Parent, a student from Hartford Theological Seminary, a converted Roman Catholic lawyer. He preached in Forest Hall from March to September. On his return to the seminary, Rev. Edward Pelletier took his place and continues to preach the Gospel in the French language. The audiences grew so large that a church building soon became a necessity.

In the autumn of 1889 a fine lot of land on Lincoln Street, costing \$1000, was purchased by Mr. Samuel Boyd, and given to trustees, on which was to be built a French Church.

Money for the church building was solicited by Rev. A. F. Newton, from the Middlesex South, Middlesex Union, and Worcester South Conferences. The churches and Sunday-schools contributed generously, and the money was raised. In the summer of 1890 the foundation of rubble work was built, costing \$530.

In October the erection of a beautiful Gothic Church, contracted for \$3000, was commenced. The building is 32x49 feet, with an addition of a porch, 11 feet 9 inches by 27 feet 8 inches. Above this porch is a tower and steeple 72 feet high, crowned with a star, 18 inches in diameter. There is ample room for a parsonage in the rear of the church. The seating capacity is about 250. There are about 3000 French people within a mile of the church. Electric cars pass the church door.

The trustees of the society are Samuel Boyd, Deacon J. E. Curtis, Deacon L. W. Baker, Theodore Meanor, D. A. Walker, F. L. Clafin and Rev. Joshua Coit, secretary of the Massachusetts Home Missionary Society. Rev. Edward Pelletier is the pastor.

CHAPTER LIX.

MARLBOROUGH—(Continued).

Educational—The Press—First National Bank—People's National Bank—Public Library—Water Works—Fire Department—Steam Railway.

EDUCATIONAL.—As early as 1696 the town employed a master "to read English once a day at least, also to write and cast accounts." In 1698 it was voted to build a school-house, and Jonathan Johnson was employed as teacher. In 1770, a contract was made for a second school-house, and in 1701, the town was fined for not keeping a school-master. In December of that year the town voted, "That Thomas Rice and Isaac Amsden doo go forth

with all speed convenient, in the town's name and behalf, to doo what they can to provide a school-master, qualified according to law, and to treat him with terms for the half year or a twelvemonth, as they shall think fit." In 1702, £7 were paid to John Holman, of Milton, "for teaching our children and youth in reading, writing, and casting accounts; and also in Latin, as occasion is, and in doing the duty of school-master, four months."

In 1715, it was voted to build a new school-house, 24 feet by 18 feet. In 1718, £47 were appropriated for schools. At that day, and for years after, the schools were kept in different parts of the township, and frequently in private houses.

In 1745, it was "Voted, That the school shall be kept at the several parts of the town as heretofore." And Samuel Witt, Colonel Williams, Thomas Hapgood, Thomas Brigham, and Jotham Brigham, were chosen a committee "to order the schools as above."

In September, 1745, it was "Voted, That all those families that live more than a mile and a half from either of the two school-houses, where the school has been kept the past year, shall draw their proportion of money out of the school rate."

Samuel Brigham received £57 10s. old tenor, in full for keeping school two quarters in 1747.

March 13, 1748, "On the petition of Samuel Jones and others, at the north-westerly part of the town, it was put to vote, agreeably to said petition, whether the petitioners should have their proportional part of the school according to their pay, and it passed in the affirmative."

"Voted and chose a committee of seven men, to apportion the school in six societies or squadrons, and the scholars to meet at the same school-houses, where the school has been lately kept, and to be settled according to the pay of each squadron, taking the north-westerly corner for one squadron.

"Agreeably to the vote of the town, the committee, namely, Dea. Andrew Rice, Major John Bruce, John Warren, Daniel Harrington, John Banister, John Weeks, and Abraham Howe, have made the following division; that is, the squadron west of the meeting-house, the scholars are to meet at the school-house near Noah Church's, or the old tavern place, thirteen weeks, four days, and three-fourths of a day, yearly. And the scholars are to meet in the squadron, at the west end of the town, at the school-house near Moses Howe's, six weeks, three days, and two-thirds of one day, yearly. And the north-west squadron, the scholars are to meet at such a place as the squadron shall think proper, two weeks and four days, yearly; and the squadron easterly of the meeting-house, the scholars are to come to the school-house near Joseph Johnson's, sixteen weeks, one day, and one-third of a day, yearly; and the squadron northerly of the meeting-house, at the school-house near John Hapgood's, seven weeks and two-thirds of a day, yearly; and the squadron at the east end of the town, at the school-house near Joseph Baker's, five weeks, four days, and two-thirds of a day, yearly.

"The one-third, two-thirds, and three-fourths mentioned above, are added to the north-west squadron, to make that up three weeks."

In 1762, it was voted, "That the town will build or repair the school-houses in the several squadranths in the town, Where they Now are." Six new school-houses were soon after erected.

The exigencies of the town were such that but little attention was given to the schools during the Revolution.

In 1790 there were seven school districts or squadrons as they were then called.

The act of 1834 establishing a school fund, and that of 1837 creating the Board of Education, inforced new life into the schools and from that time to the present the citizens of Marlborough have kept abreast with the rapid strides in educational interests throughout the Commonwealth. The yearly appropriation for schools was increased from \$900 in 1834, to \$35,000 in 1889.

There are now free schools in the town with 51 teachers and an average daily attendance of 1684. Whole number of pupils enrolled 2049.

Gifts.—The first benefaction to the town for educational purposes was that of Captain Ephraim Brigham of £111. 1771. The interest of this fund was used to establish the Brigham School. The fund was finally merged in the general school fund.

In 1826 an academy was established, and in the following year a building was erected for its accommodation. It was an individual enterprise.

In 1827 Silas Gates and his son Abraham gave \$2000 towards its maintenance, and the name was changed to Gates Academy. After a few years of prosperity it declined, and in 1833 had nearly expired. In that year Mr. O. W. Albee took charge. He infused new life into the enterprise and his success in bringing the academy up to a high standard was almost phenomenal.

Mr. Albee was a man peculiarly fitted for the position which he filled. Besides being a proficient teacher he was a liberal-minded and public-spirited citizen. He remained in charge of the academy until it was merged in the high school in 1849. The bequests of the Messrs. Gates were finally transferred to the town, and the interest appropriated to the support of the high school.

Generous appropriations have been made for the schools, and they are in a promising condition.

The following list shows the present attendance and names of teachers:

Bigelow.—1st grade, Miss Anna Witherbee, 63 pupils; 2d, Miss Hattie Brigham, 47; 3d, Miss Mary E. Donovan, 61; 4th, Miss Emma R. Baker, 47; 5th, Miss Mary E. Hartnett, 61; 6th, Miss Jennie Walcott, 48; 7th, Miss Mary Kaler, 35; 8th, Miss Angie Dudley, 32; 9th, Mr. J. V. Jackson and Miss Alice Davis, 64. Total, 428 pupils.

Hildreth.—1st, Miss Harriet Alexander, 45 pupils; 2d, Miss Mary A. Colleary, 50; 3d, Misses Mary Curtis and Josephine Morse, 60; 4th, Miss Kate Shaughnessy, 62; 5th, Miss Anna Hyde, 54; 6th, Miss Maggie McCarthy, 54; 7th, Miss Anna Wall, 48; 8th, Miss Minnie Worden, 47; 9th, Misses Ellen A. O'Connell and Melina Westcott, 63. Total, 466 pupils.

Washington.—1st, Misses Addie Alexander and Lillian Holden, 58 pupils; 2d, Misses Anna Wilder and Florence Morse, 55; 3d, Misses Mary O'Callahan and Agnes McCarthy, 70; 4th, Misses Mary Fitzgerald and Mary Moriarty, 63; 5th, Miss Mary McDonald, 46; 6th, Miss Winnie O'Donnell, 46; 7th, Miss J. B. Colbert, 46; 8th, Miss Bessie D. Freeman, 33. Total, 415 pupils.

Pleasant Street.—1st, grade, Miss Anna W. Packard, 40 pupils; 1st, Miss Mary A. Murphy, 45; 2d, Miss N. F. Whelan, 42; 2d, Miss M. E. Fay, 41; 3d, Miss Mary Cavanaugh, 45; 4th, Miss Lillian Pratt, 48; 4th, Miss Nellie Quirk, 61; 5th, Miss O. W. Gleason, 51; 6th and 7th, Miss F. A. Gleason, —; 8th, Misses E. A. Cook and Mary Collins, 18. Total, 562 pupils.

High School.—1st year or grade, 64 pupils; 2d year or grade, 54; 3d year or grade, 24; 4th or senior year, 27. Total, 169 pupils. Teachers, G. H. Rockwood, Misses Florence Lock, Mary H. Morse, Lucy Pierce, M. L. Whitteer.

Farm School, mixed, Miss Emily Morse, 20 pupils.

Rice School, mixed, Miss Bertha Stevens, 22 pupils.

Robin Hill School, mixed, Miss M. L. Frost, 24 pupils.

South Street School, 1st and 2d grades, Miss Mary Fitzpatrick, 25 pupils. Total, 91 pupils.

The present School Committee is as follows: S. H. Howe, chairman; J. W. McDonald, secretary; William L. Morse, treasurer; Daniel W. Cosgrove, Charles Favreau, Ellen A. O'Connell, clerk. Superintendent, H. R. Roth.

THE PRESS.—The first weekly newspaper established in Marlboro, was the "*Mirror*," in October, 1859, by Stillman B. Pratt, who learned the printer's art in the office of the *Middleboro' Gazette*, having purchased his little plant, wholly on credit, and commencing his business life here with a capital of only thirteen cents. This first office was in Union Block, opposite the O. C. R. R., on Main Street, with only one press—for hand use.

Mr. Pratt was a native of Orleans, Mass., born November 24, 1836, the son of Rev. Sillman Pratt, and came of a reformatory and protesting family.

John Pratt, his first American ancestor, was boycotted out of England, by religious persecution, and settled in Dorchester, Mass., in 1632. Other ancestors took part in all the Indian and early wars of Massachusetts, including King Philip's.

One ancestor was an officer in the French and Indian war. Both his grandfather and great-grandfather were soldiers of the Revolution.

His father was early identified with the anti-slavery and temperance reformations, and naturally enough the *Marlboro' Mirror*, from the start, advocated these causes, then so unpopular.

In May 1861, a syndicate having previously capitalised and established the *Marlboro' Journal*, the *Mirror* was purchased by these gentlemen, and merged with that paper.

Soon after this, Mr. Pratt became proprietor of the *Middleboro' Gazette*, and later on established at Boston, the *American Workman*, the official organ of Labor Reform, and in 1869, he was run by that party as their candidate for Secretary of State. Later on when alien influence took possession of the leading labor organization of America, the *Workman* was sold to other parties.

During the ten years, from 1861 to 1871, local journalism in Marlboro' had a varied history. George Mills Joy, editor of the *Journal*, early enlisted in the Union army, and shortly after the paper was discontinued, and for a time Marlboro' had no paper printed within its borders.

At the close of the war, Wm. W. Wood re-established the *Marlboro' Mirror*, and in May 1871, after just ten years' absence, Mr. Pratt returned to Marlboro' and purchased the same, and soon greatly extended the business, consolidating the *Mirror-Journal* into a

"hyphenated" paper; started the weekly *Marlboro' Advertiser* and established a large group of local papers throughout this whole section of the State, under the firm-name of Pratt Brothers. He has owned more local papers in Massachusetts than any other man.

In the fall of 1887, Pratt Brothers issued the *Daily Mirror*, the first paper of its kind in these parts. This daily was discontinued in 1889. A complete file is in the State Library.

In 1888, Stillman B. Pratt established here a Religious Reformation paper, the *Weekly American*, as a protest against the parochial school and other alien aggressions, and in advocacy of "Free Public Schools, Free Speech, Press and Worship, and Free Shops." This paper soon achieved an international reputation, and in 1889, its editorial office was removed to Boston, where it has ever since been published. Mr. Pratt's editorial experience has been enriched by three tours in Europe in 1861, 1885 and 1889.

In 1889, the local business was sold to S. B. Pratt's son, Wm. W. Pratt, who is still in charge of the job and newspaper interests under the old firm name of Pratt Brothers.

The Enterprise.—About two years ago the publishers of *The Enterprise* in Hudson, Messrs. Wood Brothers, conceived and carried to a successful issue, the idea of starting a similar paper under the name of *The Marlboro' Enterprise*, in this town. The first number appeared September 8, 1888, and was received at once with the most marked favor. In less than a year it had demonstrated itself to be a success, and since that time has grown steadily in scope and influence until already it takes a front place in the list of Marlboro' papers. On September 3, 1889, the first number of *The Daily Enterprise* was issued, and in a short time its business had increased to such an extent that it became necessary to put in a new plant in Marlboro'. This was done, and for the first year the business was carried on in the Hazelton block. About the middle of November, 1890, the business outgrew these quarters, and a new building was erected on the corner of Hill and Devens Streets, with an office on the Main Street. To this place the paper has been removed, and it is expected will be able to do even better work in the enlarged accommodations.

The Daily, is as yet a young paper, but it is alive all over, and gives every evidence of having a strong hold upon the people here.

While always aiming to give the news in the fullest and most complete manner, it has carefully refrained from espousing the cause of any particular party, sect or creed. It is run in the interests of good government, pure morals, and honest citizenship, and is the determined opponent of error, wrong and corruption wherever found.

To these principles it attributes its success, and that the public appreciate the efforts of the publisher to issue a good clean family newspaper, is evidenced by the increasing popularity of *The Enterprise*.

The Marlborough Star was established January 1, 1887 as a bi-weekly, through the desire of the Catholic Lyceum, and at the suggestion of Fr. McKenna, to have the Catholics who form a great part of Marlboro's people, to be represented by a weekly devoted to Irish American and Catholic interests, and especially the advocacy of temperance. It was a six column paper of twenty-four inches in length and numbered four pages. Its editorial work was done by the members of the Lyceum, prominent among whom were John T. Winner and John F. Plunkett.

The paper continued under this management for that year and then passed into the control of a stock-company composed of many of the Lyceum people, whose interest in the paper had not ceased. It was made a seven column paper, a little longer than the old one, and started off under the management of W. D. Doyle. Mr. James L. Sullivan of Worcester assumed its management August 9, 1890.

The Marlborough Times is edited and published by Charles F. Morse.

BANKS.—*The First National Bank of Marlboro'.*—This was the one hundred and fifty-eighth bank organized under the National Bank Act. When that act became a law, February 25, 1863, Mark Fay, who had long had business dealings with Lancaster Bank, of Lancaster, Mass., travelling to and fro, on the days of the weekly meetings of the directors, gathered around him some of Marlboro's most enterprising citizens, and together they organized the First National Bank of Marlboro,' with a capital of \$50,000 and authority to commence business October 1, 1863.

The first directors were Mark Fay, Samuel Boyd, Sidney G. Fay, William Woods (2d), William Gibbon, Joseph Boyd, John M. Whiton, Erastus S. Woods and George E. Woods. From the start fortune smiled upon the bank, and on January 28, 1864, the original capital was increased to \$100,000, and on November 7th, in the same year, to \$150,000, at which figure it remained until May 5, 1865, when it was once more increased to \$200,000.

Mark Fay was unanimously chosen as its first president, which office he held until his death, in 1876, when William Gibbon was chosen as his successor.

In 1878 Sidney G. Fay became president, filling that position until his death in 1882.

Edmund C. Whitney, formerly of the Lancaster Bank, was elected as its first cashier, remaining in that position until 1882, when he resigned to become cashier of one of the Boston banks.

F. L. Clafin succeeded him as cashier, having previously been in the Newton National Bank.

When the charter of the bank expired, in 1882, it was wound up, its stockholders receiving, on August 30th, the sum of \$150 for every share of stock they held, and immediately organized another bank with the same name to commence business September 1, 1882, it being the twenty-seven hundred and seventieth bank organized under the National Bank Act.

The capital was fixed at \$300,000, at which figure it stood until 1887, when it was reduced to \$150,000. The original directors of this bank were Samuel Boyd, Wm. Morse, Sidney G. Fay, Wm. H. Fay, Charles L. Fay, Edward F. Johnson, Esq., and T. A. Coolidge.

Sidney G. Fay was chosen the first president, but as sickness had overtaken him he was never able to qualify, and the duties and responsibilities rested upon the vice-president, Samuel Boyd, who, in January, 1883, was made president, Sidney G. Fay having been removed by death. In January, 1885, William H. Fay succeeded to the presidency, and occupies that position at the present time.

F. L. Clafin is the only cashier the bank has had.

This institution, situated away from the business centre of the town, but in the very heart of its population, has, by its fair and honorable efforts to serve the community, won for itself an enviable reputation, and a degree of success that justifies the wisdom of its promoters in their efforts to retain and carry on in their midst an institution with such an honorable past to serve the public in this rapidly-growing town in the future.

The Peoples' National Bank.—After a few years of stagnation in the manufacturing business of the town caused in part by "labor troubles," the year 1878 proved to be the beginning of a long season of prosperity and growth, not only in the manufacture of boots and shoes, but in the large and steady gain in population. For years afterwards the first thing that would attract the eye of strangers when coming into town, would be the large number of buildings in all parts of the town in process of construction.

There was at this time one National Bank, also a Savings Bank in the town; but the growing business interests demanded more banking facilities. About the first of September, 1878, a conference of a few public-spirited gentlemen was held, and it was decided to see what could be done towards getting subscription to the capital stock of the proposed new bank. Mr. D. W. Hitchcock, a retired Boston merchant, who made Marlborough his place of residence; in 1872, but who was well and favorably known in the town, accepted the important duty of soliciting subscriptions. In a very short time the whole amount of \$100,000 was subscribed, and on Sept. 26, 1878, a meeting of the subscribers was held in Central Hall, Corey Block, to choose a committee to complete the organization, and to decide such other matters as might be deemed best. Mr. S. N. Aldrich presided, and John L. Stone, was secretary. It was decided to have for a name "The Peoples' National Bank," and the following were chosen a committee to take all necessary measures to start the bank, viz., Elbridge Howe, S. J. Shaw, D. W. Hitchcock, Samuel Boyd, S. H. Howe, Joseph Boyd, John O'Connell, George N. Cate, S. N. Aldrich, W. M. Warren, L. S. Brigham, Stephen A. Howe, (2d,) Abel Howe and T. A. Coolidge, of Marlborough, and J. S. Bradley, of Hudson. These same gentlemen were afterward elected as the first Board of

Directors, who organized with Elbridge Howe, as president, S. J. Shaw, as vice-president, and Stephen A. Howe (2d) secretary. With this Board of Directors, the success of the bank was assured from the start.

Immediate steps were taken to obtain a charter from the authorities at Washington, and the organization was completed October 31st, and the bank authorized to commence business December 9. After several attempts to select a cashier, on the 4th day of December, John L. Stone, of Marlborough was elected to that position, and on the evening of the same day his bond was accepted. Although not an experienced banker, the selection may be said to have been a fortunate one, as he was well-known throughout this and the adjoining towns, and his mercantile experience had learned him not only how to secure customers, but also how to keep them.

The rooms that were selected in the Town Hall Building for the banking-rooms, not being ready for occupancy as soon as expected the receiving of deposits was somewhat delayed; the first deposit being received from the well-known Insurance Agent Mr. Samuel B. Maynard, on January 13, 1879.

From that day a steady increase has been made until at the present time the number of depositors is considerably over two hundred, and the amount to the credit of depositors nearly if not quite \$250,000.00.

In November 1882 the bank was moved into the new building owned by Mr. Hiram Temple, and known as Temple Block, thereby securing pleasanter and better rooms for its increasing business. The bank has recently purchased a location on Main Street, and will build a substantial brick building, having all the modern improvements for the transaction of the banking business. On the death of Mr. Elbridge Howe, who died in California April 5, 1886, while travelling for the benefit of his health, Mr. D. W. Hitchcock succeeded to the presidency of the bank.

It has been the policy of the managers of this institution to engage in all the legitimate branches of banking, not only making it profitable for the stockholders, but an accommodation to the different classes of customers. With this idea in view, they sell foreign exchange, buy and sell government bonds, and have first-class bonds for sale for investments, and they never offer anything for sale that they do not own. Nothing of this kind is sold on commission. In January 1888 the bank was designated a United States Depositary. The following is the condition of the bank at the last annual meeting:

RESOURCES.	
Loans and discounts	\$286,669 64
Overdrafts	28 85
United States Bonds 4 per cent. par value	25,000 00
Stocks and securities	2,336 00
Due from banks	63,752 07
Due from United States Treasury	10 00
Cash on hand	26,118 50
Expenses and taxes paid	132 30
Premium on United States Bonds	2,000 00
Redemption Fund	1,125 00

\$407,106.38

LIABILITIES.	
Capital Stock	\$100,000 00
Surplus	20,000 00
Undivided Profits	12,136 40
National Bank-notes Outstanding	22,500 00
Dividends unpaid	995 50
Deposits	251,474 48
	\$407,106.38

The last dividend was a three per cent. semi-annual dividend declared and payable January 1, 1890. The present Board of Directors consists of: D. W. Hitchcock, S. H. Howe, John O'Connell, S. N. Aldrich, W. M. Warren, L. S. Brigham, A. C. Weeks, Abel Howe, B. F. Greeley, L. P. Howe, C. B. Greenwood, John L. Stone and Walter P. Frye.

Such is a brief history of the Peoples' National Bank of Marlborough, which wise men prophesied would be a failure.

Marlborough Savings' Bank.—On the 10th day of May, 1860, Mark Fay, Samuel Boyd, Thomas Corey, William Morse (2d) and Levi Bigelow met at the office of Boyd & Corey, to accept the charter of this institution, which had been granted by the General Court, and approved by Governor N. P. Banks, under date of April 3, 1860. This was thirty-three days before the celebration of the two hundredth anniversary of the settlement of Marlborough occurred. The population of the town was 5900, and yet no bank or institution for savings had been organized by its citizens. Mark Fay, the first named in this charter, had for a time previous transacted business for his towns people in the Savings and State Banks located at Lancaster, both in the way of savings for people of moderate means, also in procuring loans upon real estate for those who wished them, and discounts for the traders and manufacturers, and knowing the benefits the town might derive from an institution of this kind, had been instrumental in securing this charter for Marlborough. At the first election of officers, May 21, 1860, Samuel Boyd was chosen president; Jabez S. Witherbee, vice-president; John M. Farwell, clerk; Mark Fay, treasurer, with Thomas Corey, William Morse (2d), Samuel A. Chipman, Benjamin F. Underhill, Levi Bigelow, Francis Brigham, A. C. Felton, Asa Lewis, William P. Brigham, Peter P. Howe, C. S. Hastings.

The bank was opened for business June 22, 1860, at the office of Boyd & Corey, one day of each week. The deposits the first six months amounted to \$2312, when a dividend of 2½ per cent. was declared. William Morse (2d) was chosen president, May 19, 1862, and remained in this office three years, when Mark Fay was elected president and Edmund C. Whitney was chosen treasurer. Sidney G. Fay succeeded his father as president, May 16, 1870, remaining in office two years, when Elbridge Howe was elected president. He remained in office ten years and was a great help to the bank, as was Edmund C. Whitney, who held the office of treasurer thirteen years. Edward

By Edward R. Alley.

R. Alley, the present treasurer, was elected October, 1878. S. Herbert Howe was chosen president May 15, 1882, remaining to this date. The deposits now amount to \$1,421,576.42.

Marlborough County Operative Bank.—President, Charles F. Robinson.

PUBLIC LIBRARY.—The first public library was established in 1792, and the present library in 1870. A gift of several hundred volumes was made by the Mechanics' Institute. The town also voted \$1300 for its establishment. The citizens have manifested a lively interest in the library, and liberal appropriations have been made for its support. It contains 10,000 volumes.

The present trustees are as follows: E. L. Bigelow, Miss H. E. Bigelow, W. D. Doyle, Rev. F. S. Rice, J. E. Savage, J. V. Jackman, William H. Loughlin, George Mastel, Francis C. Curtis and Mrs. H. E. Bigelow. The librarian is Sarah E. Cutting, assistants, Lottie G. Moore and Mary S. Chamberlain.

WATER-WORKS.—The water-works were constructed in 1882, and completed at the close of 1883, at a cost of \$165,174.48. The water supply is Lake Williams. The capacity of lake and water-shed is 175,000,000 gallons annually. Capacity of reservoir, 5,000,000 galls.

Present Board of Water Commissioners.—James T. Murphy, term expires 1890; R. D. S. Mortimer, term expires 1891; John A. Connell, term expires 1892.

Officers.—James T. Murphy, president of the board; R. D. S. Mortimer, clerk of the board; James T. Murphy, treasurer of sinking fund; George A. Stacy, superintendent of the works; William McNally, water registrar.

THE FIRE DEPARTMENT, consists of one hook-and-ladder company and four hose companies. The chief of the department is Mr. George H. Bigelow.

THE MARLBORO' STREET RAILWAY was chartered by the General Court in chapter 166 of the acts for the year 1888. The company was authorized to use either animal or electric power in operating its cars. It early became evident that the use of horses was impracticable on account of heavy grades. The President, Samuel Boyd and the treasurer, Samuel C. Darling, visited Richmond, Virginia, Scranton, Pennsylvania, and other places to examine the working of the electric roads, which has recently been established at those points, and the result was the equipment of the Marlborough road for operation by electricity. The road was completed and commenced operations on the 19th day of June, 1889. The first Board of Directors consisted of Samuel Boyd, president; Samuel C. Darling, treasurer; Stillman B. Pratt, Edward R. Alley, Timothy A. Coolidge, Jas. T. Murphy, Alba C. Weeks.

Since the opening the business of the road has steadily increased, giving a fair rate of profit, and fulfilling the anticipation of the projectors.

The total length of road operated at the start, 2,514 miles, an extension of one half mile has just been completed.

The plant and rolling stock consists of two Arming-ton & Sims' sixty horse-power engines, two No. 16, Edison Dynamos, three box-cars, three open-cars; the Sprague system is used.

CHAPTER LX.

MARLBOROUGH—(Continued).

MANUFACTURING INTERESTS.

BY EDWARD R. ALLEY.

MARLBOROUGH has long occupied a front rank among the leading shoe manufacturing towns of New England. From small beginnings in 1835, the business increased to an annual product of \$1,200,000 in 1860. Since that its increase has also been rapid and at the present time the value of the annual product amounts to the sum of \$6,855,000.

The making of shoes began here in 1835, when Joseph Boyd, then a young man, having learned to make custom shoes of Col. Ephraim Howe, began manufacturing shoes in a small way in the addition to his father's house, located at the junction of Maple and Bridge Streets, now occupied by Josiah Bennett. He continued here about a year, when Samuel Boyd, his younger brother, having served an apprenticeship and learned the tanner's trade of Col. Davis in Northboro', joined Joseph and together they continued manufacturing. In 1837 they bought the Hall Shop, as it was called, which stood on the site of the Marlboro' Block, Main Street. In 1839 Joseph went to St. Louis, remaining there until 1845 when he returned and again joined Samuel in 1846. In 1848 they built the brick part of the Morse Shop on Maple Street, and it was used as a bottoming shop, the shoes being cut in the shop in the rear of what is now the Dart House; he continued until 1851 when he went to Southboro' and remained there manufacturing until 1858, then returned and joined S. Boyd & Corey, remaining a year or more when he formed a partnership with Eugene Brigham, making up the firm of J. Boyd & Brigham; they commenced in the west end of Corey Block; here they made shoes for the United States Army and were very successful, remaining there until 1864 when they built their new shop on Main Street, at the corner of Newton Street.

Eugene Brigham retired in 1872, when the new firm of J. Boyd & Co. was formed, consisting of J. Boyd, Wm. Woodward and W. A. Alley. W. A. Alley retired in 1858, and they continued to manufacture until 1879.

April 1, 1836, Samuel Boyd having learned the tanner's trade, at Northboro', returned to his home and joined Joseph, his older brother, who had begun to make shoes one year before in an addition to their father's house at the junction of Maple and Bridge Streets; they continued together and bought the Hall Shop, which stood on the site of the Marlboro' Block, in 1837. Joseph retired in 1839 and went to St. Louis.

Samuel took his brother John M. as partner in 1841, and needing more room than the Hall Shop would give them, they built the Commons Shop in 1843, located nearly south of the Orthodox Church, now made into a house and owned by John E. Curtis; in 1846 Joseph, having returned from St. Louis, took John's place in the firm; in 1848 they built the brick part of the Morse Shop now located on Maple St.

In 1849, Samuel Boyd took Thomas Corey as his partner and built the corner shop on Maple Street. Joseph remained until 1851, when he retired. In 1855, Boyd & Corey built the brick shop, now the Central House; here the business continued under the firm names of Boyd Corey, S. Boyd, R. Boyd & Witherbee, R. Boyd & Co., until 1870 when R. M. Pomeroy & Co., entered the firm, making the house of Boyd, Corey, Pomeroy & Co., and the mammoth factory at the corner of Howe Street was built; the business was largely increased the Pomeroy's retiring in 1871, Thomas Corey and Daniel Ahl remaining until 1872 when Ahl retired.

Mr. Corey died in 1874 and Samuel Boyd continued until November 1, 1883, when he organized the Boyd & Corey Boot and Shoe Manufacturing Company, and continued to date, making fifty-five years continuous manufacturing.

L. & L. Bigelow & Co., started shoe business in 1836 in a small shop standing on Pleasant Street on land where now is located the house of William Morse, Esq.; they manufactured here for four years and sold their machinery in 1840 to William Dadmun and retired from the shoe business. The building used by them is now used for a dwelling and stands at the junction of Beach Street and Clover Hill Road.

1838.—In 1838 or '39, John Winslow Stevens, manufactured shoes nearly opposite the Unitarian Church on Pleasant Street. In 1849 he manufactured in what was the Alley House on Lincoln Street. Later in the Algernon Brigham House, on Pleasant Street. Still later in a shop in the rear of his own house, on Pleasant Street, situated next southerly the Unitarian parsonage. He retired in 1858.

1840.—William Dadmun, at the closing up of the shoe business of L. & L. Bigelow & Co. in 1840. William Dadmun bought the machinery and begun to manufacture shoes on Pleasant Street, opposite the Unitarian Church; the second shop was in old McDonough House, on Lincoln Street. He continued alone until 1861, when he formed a copartnership with Ezra Cutting, styled Dadmun & Cutting, which was successful, so that in 1863 they built the large shoe factory corner of Lincoln and Chestnut Streets. In 1873 Mr. Cutting retired, and Mr. Dadmun took his son, William E., into the firm, making William Dadmun & Co., and continued the business up to 1875, making thirty-five years active manufacturing.

1842.—Samuel Chipman, manufacturer on East Main Street with his brother John, and so continued to 1845. In 1862 he was a member of the firm of Whit-

ney, Fulton & Chipman, in Middlesex Square, and continued until 1864 or '65, when the property was purchased by Rice & Hutchins.

1846.—Freeman Morse started the manufacturing of shoes on the "Farms," and so continued until 1856, when he took his brother George H. as partner, and formed the firm of F. W. & G. H. Morse. They bought the old Boyd brick shop on Maple Street, and have continued to manufacture boots and shoes to this date.

1849.—In 1849 one Chapin Daniels made shoes in a small shop, standing where the No. 1 Engine House is now located.

1849.—Sidney G. Fay began business in June, 1849, and continued with varying success. He sold, in January, 1866, to Chase, Merritt & Co., who continued until 1869 in factory on Lincoln Street. In 1869 the firm became Chase, Merritt & Blanchard, which continued until 1877, when it was changed to Chase, Merritt & Co., and continues to date, the company consisting of H. S. Chase, George W. Merritt, W. E. Richardson, and H. G. Chase.

1851.—In 1851 Charles G. Whitney began the manufacture of shoes in the C. L. Bliss barn, on East Main Street, and continued until November 1, 1855, when he took Charles Palmer in partnership, under the firm-name of C. G. Whitney & Palmer. This firm continued one year, and in 1856 moved to a shop on Elm Place, and continued until 1858, when the firm was dissolved. In 1859 Mr. Whitney associated with him Mr. C. M. Howe, and they manufactured in what is the William Barnes house on Middlesex Square. In 1861 Howe retired and Palmer again became Whitney's partner, and continued until 1862, when the firm of Whitney, Felton & Chipman was formed, and they built a large factory on Middlesex Square, and continued until 1864 and '65, when Rice and Hutchins purchased their business.

1836.—John Chipman began to manufacture shoes in the shop used by Emery Cutting for custom work. The shop is now occupied by Mr. Hemenway on East Main Street. He continued with some changes until 1842, when his brother Samuel joined him; they remained together until about 1845.

1845.—In 1845 Josiah Howe began to manufacture shoes in part of John Holyoke's house on Pleasant Street; he afterwards removed his shop to Mechanic Street near Lorren Arnold's house; here his health failed; he went to Cuba, where he died.

1848.—Sidney Howe continued the business left by Josiah, on Mechanic Street; removed to corner Pleasant and Elm Streets; continued about one year.

1842.—Charles Dana Bigelow learned his trade of Thomas Holden, of Berlin; in 1842 he commenced work bottoming shoes, taking out work from Grafton and Westboro'; in 1844 he had four small shops occupied this way, and so continued until 1845. In 1847 he built a new shop, which at that time was the largest shop in town. He was the first to employ

Canadian French on shoes, in Marlborough. 1852 his shop was burned and he removed to New York.

1841.—John M. Boyd began to manufacture shoes in company with his brother Samuel, in 1841. They built the Commons shop in 1843; they remained together until 1846; then John started alone, he owning the Hall shop and the Commons shop; he continued and in 1849 began to make boy's and youth's shoes. All the shoes up to this day manufactured in Marlborough, had been child's shoes.

1842 he invented the shoe-die, having them made at Leland and Thurston's, Kitville, Grafton, and the die gave Marlborough great advantages over adjoining towns. 1853 he built the Marlborough Block and manufactured in it until 1857, the business in three years amounting to \$500,000.

1851.—Thomas Jason Howe manufactured shoes in 1851 in the George Davis house, 1 East Main Street, and continued until 1857.

1853.—In 1853 Charles M. Howe was manufacturing shoes in the Geo. Brigham shop, on Main Street, on the present site of the Windsor House. He afterwards manufactured with C. G. Whitney in the Wm. Barnes house, and later in the Exchange Building.

Henry O. Russell commenced on the old homestead, on Elm Street in 1853, built a shop on Franklin Street 1855, formed copartnership with Thomas Haggood. This partnership continued until 1858, when he formed copartnership with Abel Howe, under name of Russell & Howe, and continued one year. In 1859 he bought the Forest Hall Block, and continued alone to manufacture there until 1875. In 1876 he formed a partnership with William A. Alley, which was successful and continued until 1888, when Alley retired and Russell formed the firm of H. O. Russell & Co., and is manufacturing at this date.

1854.—John O'Connell started the manufacture of child's shoes in a shop on the easterly side of Howe Street, and continued to increase his business until 1869 when he built his new shop on the same street, on the line of the Old Colony Railroad; here he had success, and in 1873 took in his son, John A., and, in 1880 Daniel, making the firm of John O'Connell & Sons. They are doing a very successful business to-day.

1855.—S. Herbert Howe commenced making shoes in the cooper shop on Pleasant Street. Here he manufactured, with his brother Lewis A. Howe. He subsequently purchased his brother's interest and removed to the corner of Pleasant and Elm Streets, the site of his present home factory. This shop he has enlarged six times. March 12th, 1878, he purchased the Diamond "F" shop of James Tucker, and here began the manufacture of a finer grade of goods. This shop he has enlarged three times. June 4, 1889, he bought the Diamond "O" factory of C. L. & L. T. Frye. He has united all of these factories under the corporate name of the S. H. Howe Shoe Company, of which S. Herbert Howe is presi-

dent, and Louis P. Howe, vice-president, and the capacity is seven thousand pairs of shoes per day.

Lewis A. Howe began to manufacture shoes with his brother, S. Herbert Howe, in 1855, and continued a few years. In 1861 Mr. Howe associated with him in business Algernon S. Brigham, under the firm-name of Brigham & Howe, and this firm continued in the factory corner of Pleasant and Chestnut Streets, until 1865, when they removed to the factory on Lincoln Street, now occupied by Frank Garvin. Here they remained until 1870, when the firm dissolved, and Mr. Howe returned to Warren, Maine.

1858.—Timothy A. Cooledge removed here from Natick in 1857, where he had worked with Henry Wilson making shoes. He began in a small shop on Pleasant Street on the site of his present large factory. The first four years he made men's brogans and some boots. He gradually raised the standard of his goods until about 1876, when his factory was totally destroyed by fire. In 1877 he rebuilt this factory on an improved plan, and has to-day one of the best-equipped shops in the city. During all this time Mr. Cooledge has sold his entire production through the house of Fogg, Houghton & Cooledge. It may be remarked here that Mr. Cooledge's father was a manufacturer of shoes in a small way in Natick.

1858.—Frank A. Howe began to manufacture shoes in the John Allen House on Elm Street. Afterward he moved up the street farther to the Proctor Place. His business demanding more room, he built a large factory at the corner of Pleasant and Franklin Streets in 1862. He continued here until 1875. Afterwards James Tucker & Co. manufactured in this shop several years. This factory was afterward bought by S. H. Howe, and enlarged and known as the Diamond "F" Shop.

1863.—In 1863 Davis & Longley built the most easterly of the two Billings' shops. In 1864 Clapp & Billings began to manufacture in this shop. They made a specialty of boys and youths' laced and buckle Congress shoes. In 1869 they bought the shops next to the Windsor Hotel, and continued in both shops until 1879, when Mr. J. B. Billings purchased his partner's interest, and has continued alone up to the present time.

1863.—John A. Fry began business in the Winslow Stevens shop in February, 1863, where he continued until January, 1864, when he removed to the Elm Street shop. In 1865 he purchased of Allen Howe the new shop at corner of Pleasant and Chestnut Streets, which he has enlarged four times. He commenced the manufacture of boots in 1883, and continues to date.

1867.—In 1867 Rice & Hutchins began manufacture of boots and shoes in Middlesex Square in the old shop of Felton & Chipman. Their factory was burned in 1878, and was rebuilt with all modern improvements. They have continued to the present time. This firm built a large factory on Cotting Ave-

nue in 1889. This is one of the leading firms in the city, the amount produced amounting to \$1,000,000. The superintendent and manager of these factories is Mr. John E. Curtis.

1875.—James Tucker & Co. bought the Frank A. Howe shop, and manufactured for several years.

In 1858 John E. Curtis began the manufacture of shoes on High Street, continuing here until 1861, when he removed to the Marlboro' Block, and in 1868 bought the old Boyd & Corey shop, at the corner of Maple and Main Streets. This he enlarged and manufactured boots and shoes that had a wide reputation. In 1872 Vaughn & Sanborn bought the business and continued a short time; afterward Mr. Curtis became the superintendent of the Rice & Hutchins factories.

Hiram Temple removed to Marlborough and began the manufacture of shoes before 1845.

Abel Howe began, in 1858, the manufacture of shoes on Main Street, near Grant Street, with H. O. Russell. He later removed to High St., near the Union Church, and built a very large and convenient factory.

Hugh R. Bean manufactured shoes on Longley St.

In 1871 Levi W. Baker manufactured boots and shoes on High Street, and continued until 1877.

The Commonwealth Shoe Company built a model shoe factory on Maple Street in 1888-89, and began to manufacture fine boots and shoes, Mr. M. Quirk, the superintendent, having been previously connected with the Boyd & Corey Boot and Shoe Manufacturing Company.

Charles L. and Lewis T. Frye manufactured shoes in the Parsons shop, and later bought the William Dadmun shop, corner of Howland and Lincoln Streets, closing in 1889, Jeremiah Desmond taking the Parsons shop when the Fries removed.

In 1852 Stephen and William Eager manufactured shoes at their shop on Hosmer Street.

In 1842 Elijah M. Dickinson made shoes on East Main Street.

The manufacture of *shoe dies* was begun by S. K. Taylor in the basement of the Brick shop in 1858 or '59, and was afterwards removed to the Davy shop, on Florence Street. He was succeeded by Taylor & Blanchard, Samuel F. Draper, Hobbs & Mellen, and T. Joseph Beaudry, who continues to this time.

James L. Belser and Henry Exley started a machine-shop in the basement of the J. B. Billings factory in 1866, continuing but a short time, when they removed to the Brick shop. Taking Mr. Hall as partner, the firm became Hall, Belser & Exley. In 1867 Henry Parsons succeeded Hall, making the firm of Belser, Exley & Parsons, and they removed to Forest Hall. Belser retired in 1869, and the firm built their Lincoln Street shop in '72. Exley retired in '78, leaving Mr. Parsons the proprietor of the business. He has continued with good success the manufacture of steam-engines, elevators and sole-cutters.

Hall, Sandiford & Watson started a machine-shop on Lincoln Street in 1868, and continued about seven years manufacturing sole-cutters and small machinery

used in shoe factories, Bevan & Alden running the business from 1875 to 1878, afterwards as Bevan & Davey to 1880, and Davey & Exley until 1884; then they separated, Davey taking the upper part of Henry Parsons' shop, while Henry Exley continued at the old shop until 1887.

Julian P. Wood began the manufacture of punch-machines in 1879, and later other shoe machinery. Taking Herbert Willard as a partner in 1887, the business increased very fast. They hold several valuable patents.

CHAPTER LXI.

MARLBOROUGH—(Continued).

MASONIC.

BY E. F. GREELEY.

United Brethren Lodge, A. F. and A. M.—The history of Free Masonry in Marlborough from the date of its first introduction as an organized body until the present time, covers a period of nearly seventy years, and is marked by a most gratifying advance in membership and efficiency.

Though a lengthy intermission separates the early body from the present organization, the original records now on file as well as oral traditions of a few of the early brethren, have been handed down unimpaired, and serve as a connecting link between these two branches of the same family.

The desire of our grandfathers to organize a Masonic Lodge in this vicinity, culminated in the early part of the year 1824, when application was made to the Grand Lodge of Massachusetts for a charter, but owing to opposition from the Fredonia Lodge, A. F. and A. M. of Northborough, an adverse report was made and the desired charter withheld; later a second application was made, which was granted, bearing date of September 8, 1824. The first meeting under the charter was held September 23, 1824, in a building owned by Bro. Sullivan Thayer, located near the present Exchange Building, and adjoining the brick dwelling, corner of Exchange and Main Streets, Wor. Bro. Abraham Gates was chosen Master; Rev. Seth Alden, Sen. Warden; Richard Farwell, Jun. Warden; John Maynard, Treas.; Freeman Stow, Sect'y; John G. Barnard, Sen. Deacon; John Lyscom, Jr., Jun. Deacon; Isaac T. Stevens, Sen. Steward, and Caleb Witherbee, Marshal. The records of Masonic work show the lodge to have been both popular and prosperous, as numerous accessions to its membership were made, embracing many of the leading men of this and the surrounding towns. The names of no less than five clergymen appear on the rolls during the years 1824, 1825, and 1826.

On the 28th of April, 1825, the lodge apartments were dedicated according to ancient Masonic ceremonies, the brethren marching to the Unitarian

Church, where they were addressed by Rev. Seth Alden, a brother Mason. In the afternoon they assembled at the Spring Hill Church, where the lodge was instituted, and the tenets of Masonry and cardinal virtues of the order were solemnly emphasized to the brethren. A banquet was spread in a large tent adjoining the present Union Church common to which the friends of the brethren were invited. The officers were installed on the evening of the same date, and an oration delivered in the meeting-house by Bro. Samuel Clark.

September 1, 1825, Brother Jacob Frieze was chosen master, holding the office until the following spring, when he resigned, and March 26, 1826, Brother Richard Farwell was elected to fill the vacancy.

With increasing prosperity it was deemed advisable to arrange for more commodious quarters for Lodge purposes, and at the annual town-meeting in 1825, an article was inserted in the *Warrant*, asking permission to build a school-house, with a Masonic hall in the upper story. This article was passed over, and no further action taken until two years later, when a similar request was made, and the necessary grant obtained. Jan. 11, 1827, a committee was chosen to consider the subject of building a Masonic hall, and in concert with the Citizen's Association, arrangements were perfected by which a building was to be erected, the first floor of which was to be used as an academy, and the upper room for a Masonic hall. Quite a complete idea may be gained of the purposes for which this building was intended, by referring to a copy of the records taken July 4, 1860, from the foundation stone of Gates Academy, formerly situated on "Old Meeting House Common," now known as High School Common. This record was deposited by the members of the Old United Brethren Lodge, Aug. 30, 1827, of which the following is an exact copy:

"On the 30th day of August, 1827, was laid the foundation stone, on which is to be erected a building to be devoted to the promotion of Literature, Science, Moral Virtue and the Ancient Order of Masonry. By the liberality of a number of individuals of the Town of Marlborough, in which there are now three churches, the ministers of which are Revs. Sylvester Bucklin, Seth Alden and Joseph E. Merrill, ten School Districts and two thousand inhabitants."

In connection with this statement there was also deposited a copy of the Articles of Agreement, specifying that the building about to be erected was to be used as follows: "The lower story of the building shall be used for teaching children and youths, and the second story shall be finished in such manner as to accommodate the Free Masons."

On the above date the District Deputy Grand Master was present with his suite, opening a Master Mason's Lodge in Masonic Hall, and repaired to the site of the new building, where the impressive ceremonies attending the laying of the corner-stone were solemnized. During the fall and winter months of

1827-28, the Academy Building, as it has since been known, was completed, and the new Masonic apartments in the upper story were appropriately dedicated April 24, 1828, Wor. Brother Richard Farwell being the presiding Master. These rooms were comfortably, though not elaborately, furnished, and meetings were continued in them during the remainder of the existence of Old United Brethren Lodge, which probably terminated its active work about 1831 or 1832, though the name of United Brethren Lodge was borne on the Grand Lodge records as late as 1834.

On the 21st of January, 1830, a committee was chosen to take into consideration the "general state of the lodge," and as this was about the time the anti-masonic craze began, embracing the Morgan excitement, and more especially the political agitations of those days, many refrained from active membership. With such an outspoken opposition, though founded entirely on prejudice, the society became unpopular, and it is probable that our brethren deemed it wise to discontinue lodge work until a more auspicious season.

Of the disposition of the furniture, jewels and paraphernalia of the order, no account is given, but the records of Old United Brethren Lodge, from September 8, 1824, to October 27, 1830, inclusive, were found among the books and papers of the late brother Nicholas B. Proctor, after his decease in 1867. The leaves were without binding, probably detached from the secretary's book of records. Having had them newly bound, they were returned, together with brother Proctor's Masonic diploma, to the possession and care of the lodge, by his loyal sons, Joseph, Col. Alfred N., and Albert E. Proctor, December 12, 1888.

The re-organization of United Brethren Lodge was not effected until the fall of 1859. On December 1st of this year, a meeting of the brethren was held under Dispensation at the office of Messrs. Boyd & Corey, corner of Main and Maple Streets. Several representatives of the old lodge of thirty years previous were present, together with resident members of "Middlesex" of Framingham and other lodges. Preliminary arrangements were made for permanently organizing a Master Mason's Lodge, securing suitable apartments and furniture, and the election of officers. After several preparatory meetings of the brethren, a hall was secured over the Boyd & Corey office, and Alexander C. Felton, Esq., was selected to preside over the lodge as its first Master.

December 14, 1859, the brethren met in these apartments for the first time, where they continued to hold meetings and work under Dispensation, until a charter was granted September 12, 1860, with the following as charter members:—Sylvester Bucklin, Samuel Chipman, Thomas Corey, Martin Dadmun, Jr., J. M. Farwell, Alexander C. Felton, Jonah Howe, Asa Lewis, Wm. H. Marston, Burleigh Morse, Samuel J. M. Weston, Charles F. Morse and Jabez S. Witherbee. Of these brethren, three, Brothers Samuel Chip-

man, Jonah Howe and Jabez S. Witherbee were members of the old lodge, and formed a connecting link between the old and new organization.

Numerous accessions to the lodge were made during the year, adding many sturdy and influential citizens to its membership, and quite outgrowing their limited quarters. During the fall of 1860, arrangements were made and a lease obtained of a suit of rooms at No. 136 Main Street, since known as Corey's Block. These apartments were first occupied October 16, 1860, when a special communication was held for the purpose of receiving the officers of the Grand Lodge of Massachusetts. Most Wor. Winslow Lewis, Grand Master, who, together with his suite, was present for the purpose of installing the officers of the Lodge and dedicating the new apartments. Wor. Bro. Alexander C. Felton was installed Master, Bros. Burleigh Morse, Sen. Warden, J. S. Witherbee, Jun. Warden, Sylvester Bucklin treasurer, and J. M. Farwell secretary. From this time rapid strides were made in additional membership and Masonic interest; the fathers of the lodge of to-day were then taking their degrees, and their zeal and constancy is a sufficient assurance of a thorough initiation.

At the date of the reorganization of United Brethren Lodge, Feltonville (now known as Hudson), was a part of Marlborough, and many of its best citizens became members of the fraternity and affiliated with the lodge here. This membership covered a period of about five years. In the latter part of 1864 the brethren from Hudson, tiring of their long journey to attend lodge meetings, and having sufficient strength to warrant independence, applied for and obtained a charter for themselves. This signalized the advent of Doric Lodge, A. F. and A. M., of Hudson, which has since maintained a healthy growth, and been ever active in promoting the tenets of Masonry. An intimate fraternal feeling has always existed between United Brethren and Doric Lodges, and frequent interchange of visits by the brethren serves to strengthen the ties that bind them as one band of friends and brothers.

The years of the Civil War found many brothers espousing the Union cause, and taking active service for the maintenance of the Government. The zeal and loyalty of such as were spared to return have never abated.

Thirteen Masters have presided over the lodge since its organization in 1859, of whom all are living at the date of this writing (1890) excepting Worshipful Brother, George H. Adams, who presided with great acceptance during the years 1869 to 1872, inclusive, and who deceased after a brief illness and was buried from the Unitarian Church with Masonic honors.

The following are the names of the Past Masters in the order of their election, and their years of service.

Worshipful Brothers, Alexander C. Felton, 1860-61; Burleigh Morse, 1862-63-64; '67; Samuel J. Shaw, 1865; W. E. C. Worcester, 1866; George N. Cate, 1868; '75; George H. Adams, 1869-70-71-72; William S. Frost, 1873-74; Lewis I. Hapgood, 1876; George H. Whitney, 1877-

78-79-80; Benjamin F. Greeley, 1881-82-83, '86; Frederick J. Jewett, 1884-85; Edwin A. Evans, 1887-88-89; J. Frank Child, 1890, and is at present presiding master.

To these brothers much of the interest in lodge membership and proficiency in works may be attributed. Worshipful Brother Burleigh Morse, whose name appears near the head of this list, is a veteran in Masonry; his attendance has been long and faithful, and his familiar face may be seen at lodge meetings as regularly to-day, after thirty years of service, as that of the youngest member.

To Worshipful Brother George N. Cate, may be traced a marked advance in accuracy of lodge work and attention to detail, the brother imparting to the membership of his own dignity, which combined with firmness of character, and a thorough knowledge of the mysteries of freemasonry, raised the lodge to a higher plane, with a corresponding increase of interest by the brethren. This discipline has continued to exercise a most salutary effect, and is worthy of emulation.

At a meeting of the lodge held October 4, 1882, especially convened for considering the commutation of the Grand Lodge Tax, Most Worshipful Samuel C. Lawrence, Grand Master, was present, and urged the importance of cancelling the remaining debt from Masonic Temple. The meeting was very fully attended, and it was decided to commute the tax by one payment in full. Similar action became almost unanimous throughout the lodges of the State, and the administration of Worshipful Brother Lawrence, saw the Grand Lodge indebtedness entirely extinguished.

The quarters secured by the brethren in October, 1860, were from time to time replenished with new furniture, and uninterruptedly occupied by them until the morning of December 7, 1883, when a disastrous fire occurred, destroying both apartments and furniture; unavailing efforts were made to save the charter; the books and records, however, were secured, and, though somewhat stained by water and smoke, were found to be entirely legible. The lodge sustained a loss of about \$1600, on which there was an insurance of \$1000. The brethren at once secured the use of Pythian Hall as a place of meeting, until such time as permanent apartments could be provided.

Arrangements were early made, and an agreement signed, by which the lodge was to be granted a ten years' lease of the entire upper floor of a contemplated new brick block, since known as "Hazleton's Block" No. 203 Main Street. Though long delayed, the building was finally completed, and the upper-story suitably divided, with a main hall and ante-rooms, especially adapted for lodge purposes.

To a committee of the lodge was intrusted the frescoing and furnishing of these rooms, which were completed and occupied for the first time at a special communication, August 5, 1885. At a public-meeting of the lodge, October 14, 1885, Most Wor. Abra-

ham H. Howland, Jr., Grand Master of the Grand Lodge of Massachusetts, and his suite were present, and according to ancient customs and usages, proceeded to dedicate the new apartments to Free Masonry, to Virtue and Universal Benevolence.

These impressive ceremonies were supplemented by remarks at length by the Grand Master and members of his suite, charging the brethren to a continuance of those Masonic principles and virtues, which have ever been, and should ever be, the beacon lights of symbolic and practical Masonry. About two hundred members, visitors and ladies were present, and were welcomed to the banquet-room at the close of the formal exercises. Regular communications are held during the entire year, on the evening of Wednesday on, or before the Full of the Moon, though the lodge may, at its option, adjourn over the months of July and August. Special communications are convened from time to time, on such days and dates as the Master may designate.

The social character found in Masonry is pre-eminent democratic, laying aside for the time those artificial distinctions of rank and wealth, which, though they may be requisite in the world, yet among Masons are unknown. Its members meet on one common level of brotherhood and equality, where virtue and emulation in good works are preferments, and the grand aim is to see "who best can work and best agree."

A series of public gatherings have been held at Masonic Hall during the winter months for several years past, to which the ladies are especially welcome. Readings, music and social games add not a little to the good feeling which characterizes these entertainments. So far they have been successful, and have seemingly become inseparable as a social phase of the Masonic family.

In addition to that universal charity which permeates every Masonic body, there is connected with United Brethren Lodge, a Mutual Benefit Association, confined strictly to the affiliated members of this lodge, by which each brother, paying into a general fund the sum of one dollar, becomes a member. No further assessment is made until a brother dies, when one dollar more is collected and held as a reserve fund. This money is entirely distinct and separate from the funds of the lodge treasury, and payable immediately upon the decease of a brother, to his surviving representative, having as a primary object, the supplying of ready money to the widow or orphans in the hour of their bereavement, when incidental expenses and funeral charges are imperative. The benefits of this arrangement have been most gratifying to the members of the fraternity upon several occasions during the few years it has been in operation, and has received the cordial support of a large percentage of the membership. To a true brother the pleasure of giving in the hour of need is ample reward, and in harmony with Masonic obligations.

United Brethren Lodge has for many years been

especially zealous in its care for sick and needy brethren. A Relief Committee is annually appointed by the Master, to visit the sick and extend pecuniary aid when and where needed. A nurse or watcher is supplied when occasion requires, and the expenses paid from the Lodge treasury.

These duties have been most faithfully discharged. It is claimed of our Institution, and is literally true, that a Mason, destitute and worthy, "May find in every clime a brother, and in every land a home."

Masonry teaches, however, that charity to the needy should not partake of that exclusiveness, which accords relief to members "of the household only," or be alone confined to the granting of pecuniary aid, for, Masonically speaking, charity also embraces a state of mind, which renders a brother full of love and good-will towards others, to overlook misfortunes and deal gently with the erring.

An Adoptive Rite in Masonry, known as "the Order of the Eastern Star," has recently been instituted under the guardianship of United Brethren Lodge, and is now working under dispensation. This branch is composed largely of ladies, drawing its membership from the wives, widows, mothers, sisters and daughters of the Masonic fraternity. Affiliated Master-Masons are also eligible as members, and fill a few of the subordinate offices. Much interest has already been manifested, and the work of organization and initiation has advanced rapidly. From the numerous applications for admission, there can be no doubt of its popularity and success.

United Brethren Lodge is especially zealous in transmitting the symbolism of Masonry from the older to the younger members of the Order, every initiate being orally instructed in the lectures and work of Ancient Craft Masonry, as handed down by the fathers, without addition or innovation. The attentive ear receives the sound from the instructive tongue, guarding with vigilance the unwritten legends of this mysterious order, whose venerable years have numbered in its membership the most illustrious men of their day, whose quiet and unostentatious deeds of kindness have lightened the burden of the unfortunate in every land, and whose charity is especially invoked towards a brother, his widow and orphans. Long may it continue in every good word and work, bearing its deeds of love and charity, wherever the hand of distress may prefer its suit, or the burdened heart pour out its sorrows.

Houghton Royal Arch Chapter.—This organization dates its beginning from the 14th of May, 1867, when a number of Companions from Framingham R. A. Chapter, residents of Marlborough, met in Masonic Hall for the purpose of consulting in regard to the formation of a chapter in this town.

Brother Burleigh Morse presided at this meeting, with John F. Cotting as secretary. It was the unanimous sentiment of the Companions present that such action should be taken, and it was voted to petition

the Grand Chapter of Massachusetts for permission to open and hold a Chapter of the Royal Arch Masons in Marlborough.

The Grand Chapter promptly considered the petition, and June 11, 1867, the necessary dispensation was granted by Ex. Comp., Richard Briggs, Grand High Priest of the Grand Chapter.

The name of Houghton R. A. Chapter was adopted, complimentary to Brother George Houghton, of Hudson, whose generous contributions aided largely in supplying the necessary paraphernalia for lodge purposes. The following Companions composed the first Council, and filled the various subordinate offices:

Most Ex. Barleigh Morse, High Priest; P. E. Millay, Ex. King; W. E. C. Worcester, Ex. Scribe; Martin Dadmun, Treasurer; John F. Cutting, Secretary; Rev. W. A. Start, Chaplain; M. P. Rogers, Capt. of Host; C. F. Morse, P. S.; E. A. Bradley, R. A. Capt.; George N. Cate, Master of 3d Veil; C. D. Hunter, Master of 2d Veil; George E. Sherman, Master of 1st Veil; E. F. Longley and L. Dadmun, Stewards.

Work under dispensation was continued until the following year, when application was made for a charter, which was granted, and the Chapter duly instituted September 25, 1868.

Accessions to membership from year to year have been made from United Brethren Lodge, of Marlborough, Doric, of Hudson, Siloam, of Westboro', St. Bernard, of Southboro', and various other lodges.

The following companions have presided over the chapter since its organization:—Most Ex. Burleigh Morse from 1867 to 1872 inclusive, also during the year 1878. N. S. Chamberlain for the years 1873 and 1874. J. A. Clisbee 1875 to 1877 inclusive. T. A. Coolidge 1879 to 1884 inclusive. George H. Whitney 1885 and 1886. Lyman Morse 1887 to 1889. Edward P. Miles 1890, and at present presiding, all of whom are now active members, excepting Most Ex. N. S. Chamberlain deceased.

The Corey Block fire of December 7, 1883, was the occasion of serious loss to the Chapter, fire and water destroying its Charter, Regalia, Furniture, &c., on which there was no insurance. The books and records were fortunately saved uninjured. The council at once secured temporary quarters in Pythian Hall, and took immediate steps to replace their loss, the brethren and their lady friends lending willing hands in assistance.

On the completion of Hazelton Block in August, 1885, the chapter removed to Masonic Hall, where they are now permanently located, with an active membership of upwards of one hundred and sixty companions.

Regular convocations are held monthly on the evening of Friday on or after the full of the moon, usually adjourning over the months of July and August. The annual convocation for election of officers occurs at the regular meeting in September. Great harmony prevails in the chapter, inspiring the officers and brethren in good works, and a unity of feeling which is not limited to lodge meetings.

An institution drawing together men of all shades

of opinion, and cementing them by such strong ties of affection, can only be productive of good, making better men and better citizens.

CHAPTER LXII.

MARLBOROUGH—(Continued).

CIVIL HISTORY.

Incorporation—First Selectmen—Selectmen from 1661 to 1890—Town Clerks from 1660 to 1890—Treasurers—Representatives—State Senators—County Commissioners—Delegates to Provincial Congress—Delegates to Constitutional Conventions—Assistant Treasurer of United States—Population—Valuation.

MARLBOROUGH was incorporated June 12, 1660, the order of the General Court was "that the name of the said plantation (Whipsufferage) shall be called Marlborow." The name was doubtless derived from Marlborough, England. It was formerly written Marlberg or Marlbridge.

Marlborough when incorporated, in addition to its present territory, included all that tract lying within the limits of the present towns of Westborough and Northborough, set off in 1717 (Northborough was set off from Westborough in 1766), Southborough set off 1727, and Hudson in 1866.

Marlborough was incorporated as a city May 23, 1890, and accepted by the town July 14, 1890.

The first selectmen chosen were Edmund Rice, William Ward, John Ruddocke, John Howe, Thomas King, Solomon Johnson and Thomas Goodman.

SELECTMEN.—The following is a list of the selectmen from the incorporation of the town to the present time, except the period from 1665 to 1739, of which there are no records extant:

Edmund Rice, 1661-64.	Samuel Stevens, 1741.
William Ward, 1661-65, '71.	Joseph Morse, 1741, '46.
John Ruddocke, 1661-65, '71.	Uriah Eager, 1741, '52, '53, '55,
John Howe, Sen., 1661-64.	'56, '58, '60, '62, '68, '69.
Thomas King, 1661-64.	Joseph Talner, 1741.
Solomon Johnson, 1661-65, '71.	James Woods, 1741-49, '55-57.
Thomas Goodnow, Sen., 1661-63,	Abraham Williams, 1741-43, '46-
'65.	'49, '52, '54.
John Woods, 1664, '65.	Samuel Witt, 1740, '42, '44, '45,
William Kerly, Sen., 1665, '71.	'47, '48, '50, '53, '54.
Thomas Howe, 1701.	Samuel Brigham, 1741, '42, '44,
Joseph Newton, 1701.	'46, '48, '49, '54.
Nathaniel Joslin, 1701.	Jedediah Brigham, 1741, '43, '47,
James Woods, 1701.	'52.
John Maynard, 1707, '10.	Andrew Rice, 1743, '50, '58, '63.
Samuel Brigham, 1707, '10.	Jonathan Barnes, 1743, '57, '59
Abraham Eager, 1707.	'62.
Johnna Rice, 1707, '10.	Jabez Ward, 1743.
John Bowker, 1707, '10.	Abraham Beaman, 1744.
Zerubbabel Eager, 1739.	John Warren, 1744, '46-50, '52-
Edward Barnes, 1739.	'61, '63-65, '67.
Robert Barnard, 1739, '45, '47.	Jonas Morse, 1744, '49, '52, '55.
Joseph Baker, 1739, '41.	Abraham Howe, 1745, '63, '57, '61.
Samuel Brigham, 1740, '43.	John Haggood, 1745, '49, '53, '55,
Daniel Stewart, 1740, '41, '63.	'57, '59, '60.
Joseph Howe, 1740, '41, '44, '46,	John Sherman, 1745.
'54.	Thomas Howe, 1745, '46, '61, '63,
Daniel Barnes, 1740, '41, '62, '60,	'71.
'61.	Samuel Jones, 1747, '48.

Ephraim Brigham, 1749, '50, '54, '56-59, '61, '62, '65, '67, '69.
Joseph Brigham, 1749, '62, '64.
Hezekiah Maynard, 1750, '65, '71, '73.

Peter Bent, 1750, '56, '69, '66, '67, '70-72, '74, '77.

Thomas Bigelow, 1750, '62, '65.
Jabez Rice, 1752, '55.

John Weeks, 1753, '64, '66, '58-60, '62-65, '70, '73.

Samuel Brigham, 1755.

Jesse Rice, 1756, '57, '66, '68, '70.
Abraham Rice, 1758, '60, '61, '63, '64, '66, '69, '70, '73.

Joseph Haggood, 1758, '63, '64, '66, '67.

John Banister, 1759.

Daniel Ward, 1760, '61.

Daniel Harrington, 1762, '66, '68, '69, '71, '72.

Joel Brigham, 1763, '72.

Gershon Bigelow, 1763, '64.

John Barnes, 1764.

Uriah Brigham, 1765, '68, '69.

Gershon Rice, 1765-70, '72, '74, '75.

Ebenezer Dexter, 1766, '68.

Nathan Goodale, 1767, '69.

On polls, { Male	7,654.90
Female	24.00
Rate of taxation per thousand	\$16.20

CHAPTER LXIII.

MARLBOROUGH. — (Continued)

Odd Fellowship—Celebration of Two Hundredth Anniversary of Incorporation of Town—War of the Rebellion—Societies, etc.

ODD FELLOWSHIP.¹—Marlborough Lodge, No. 85, Independent Order of Odd Fellows, was instituted November 28, 1845, in the building now numbered 242 Lincoln Street. Among the names of those who instituted the lodge may be mentioned, Lewis T. Frye, Edward A. Gay, John Chipman, David Brown, Thomas Corey, Lambert Bigelow (2d), Joseph Boyd, William Morse (2d), Samuel A. Chipman, Leander Bigelow, Chas. Dana Bigelow and Sullivan D. Baker.

The first officers were: Noble-Grand, Edward A. Gay; Vice-Grand, Samuel A. Chipman; Secretary, Leander Bigelow.

Among those who soon after were admitted to membership were, William Barnes (2d), Chas. L. Fay, Lewis Felton, Elbridge Howe, David L. Brown, Thomas E. Hapgood, Burleigh Morse, David Barnes, Lorrman H. Russell and Frederick Jewett. Most of these will be recognized as being among the most prominent men in Marlborough, during the past forty years.

The Lodge continued to hold its meetings in the building where they organized, until October, 1846, when they occupied a hall over Lambert Bigelow's store, corner of Lincoln and Pleasant Streets. They afterwards occupied a hall at the corner of Lincoln and Mechanic Streets.

About 1856, the Lodge began to decline from various causes, chiefly, the payment of too large sick benefits in proportion to their income, and the financial depression from which the town was then suffering. No increase was made in their membership for some time, and they finally surrendered their charter to the Grand Lodge, on July 23, 1858.

¹ By John S. Fay.

About the year 1873, some interest being manifested in the order, a petition signed by Burleigh Morse, Lyman W. Howe, Tileston Brigham and Frederick Jewett, former members of the old lodge, and four other resident Odd Fellows, was presented to the Grand Lodge, who restored the charter, and the Lodge was re-instituted November 6, 1873. William Barnes and Sullivan D. Baker, former members of the old lodge, united with them at this time, making a total of ten members. Interest in the order soon spread. The Lodge has prospered, until, at the present time, it numbers 174 members. From the date of its re-institution, November 6, 1873, the Lodge occupied jointly with the Masonic Lodge, the Masonic Hall situated on Main Street. This hall was destroyed by fire, December 7, 1883. They then held their meetings in the Pythian Hall, until the completion of their present quarters, in Corey Block, which were dedicated with appropriate ceremonies October 1, 1888.

Here they occupy an elegant suite of rooms, fitted specially for them, and furnished throughout in first-class shape, at an expense of about three thousand dollars. The present officers, (October, 1890) are: Noble-Grand, Arthur J. Clifford; Vice-Grand, Charles T. Berry; Recording-Secy., Percy F. Munsey; Treasurer, Charles H. Marston; Permanent Secy., Alexander Berry.

On May 15, 1889, on a petition of members of Marlboro' Lodge, No. 85, and lodges in neighboring towns, *King Saul Encampment*, No. 69, was instituted in Odd Fellows' Hall. The present membership is eighty-nine. The present officers are: Chief Patriarch, Dr. C. S. Jackson; Senior Warden, Herbert W. Brigham; Scribe, Alexander Berry; Financial Scribe, P. F. Munsey; Treasurer, Charles F. Holyoke.

March 11, 1890, *Star of Hope Degree Lodge*, No. 86, *Daughters of Rebekah*, was instituted in Marlboro'. They now number one hundred and twenty-five members. The present officers are: Noble Grand, Mrs. Herbert W. Brigham; Vice-Grand, Mrs. J. F. Turner; Recording Secretary, Mrs. Austin B. Howe; Treasurer, Mrs. Joseph E. Warren; Financial Secretary, Mrs. John S. Fay.

In March, 1888, there was also instituted in connection with Marlboro' Lodge, No. 85, *The Odd Fellows Relief Association of Marlboro', Mass.* The membership is confined to members of Marlboro' Lodge, No. 85, and its object is to relieve sick and disabled brothers by paying a weekly sick benefit of five dollars per week; this being in addition to any benefits obtained from the lodge, the association being maintained by assessments from its members. The present board of officers is as follows: President, Oliver E. Howe; Vice-President, Herbert W. Brigham; Secretary and Treasurer, Charles H. Marston. Directors,—The president and vice-president, and secretary-treasurer, and P. G. George A. Pratt, P. G. Horace Hastings, P. G. E. Irving Sawyer and Fred. L. Felton.

CELEBRATION OF TWO HUNDREDTH ANNIVERSARY OF INCORPORATION OF TOWN.—The town celebrated its two hundredth anniversary of incorporation June 13, 1869. The officers of the day were as follows:

President, Francis B. Fay.

Vice-Presidents, Henry Rice, Jabez Rice, Stephen R. Phelps, Dwight Witt, Isaac Hayden, Lambert Bigelow, Solomon Weeks, William L. Howe, Stephen Pope, John Goodale, Ezekiel Bruce, Alden Brigham. Chaplain, Rev. Horatio Alger.

Treasurer, Samuel B. Maynard.

Chief Marshal, William H. Wood.

Assistant Marshals, Sylvester Bucklin, Henry O. Russell, Winslow M. Warren, John Chipman, Edward A. Gay, Francis Brigham.

Toastmaster, Hollis Loring.

The services were held on Ockocangansett Hill, and opened by an invocation by Rev. Joseph Allan, D. D. of Northborough; a poem written by Wm. C. Bryant was then read, followed by prayer by Rev. Horatio Alger. Hon. Francis B. Fay at the close of a few remarks introduced Hon. Charles Hudson, who delivered an historical address. Following the address of Mr. Hudson an original ode by Horatio Alger, Jr., was sung. After these exercises dinner was served, plates having been laid for 1600 persons. A blessing was invoked by Rev. William Morse, of Tyngsborough. At the close of the dinner an original ode by William F. Allen was sung.

The toastmaster of the day was Hollis Loring, and the toasts were as follows:

1. *This Centennial Gathering of the Borough Families*—An occasion consecrated to grateful recollections, to cherished anticipations, and to social, fraternal and Christian greetings.

2. *A cordial welcome home to our eldest Daughter, Westborough*,—who, one hundred and forty-three years ago, received our western border for her habitation; whose precepts and examples have been a noble Reform School, even to the present generation.

Hon. Edward Meilen responded.

3. *Our Fair Daughter, Southborough*,—Although she resides at the South, yet we are glad to know that she agrees in sentiment with her Mother; that she goes for "free soil, free speech and free men."

Response by Rev. William J. Breed.

4. *Northborough, our only Grandchild*—Worthy, as such, to be rewarded with especial favor by her venerable Grandmother.

Response by George C. Davis.

5. *The Early Clergy of Northborough and the Northborough Association*.

Response by Rev. Joseph Allen, D.D., of Northborough.

6. *The Legislature of Massachusetts*—Ever mindful of our material interests, yet never forgetful of our personal rights and liberties.

7. *The Ancient Order of Free and Accepted Masons*.

This sentiment was responded to by Francis C. Whiston, who exhibited an apron worn by Lafayette at the laying of the corner-stone of Bunker Hill monument, June 17, 1825.

8. *The Founders of Northborough True to the Old Saxon Motto*,—"Personal Liberty the antecedent, National Glory the consequent."

Response by O. W. Albee.

9. *Our Pilgrim Fathers*,—"They built institutions for men, not men for institutions."

Responded to by Rev. Peter Parker, D.D.

10. *The Orator of the Day*.—Marlborough may well be proud of such sons.

Response by Charles Hudson.

11. *The Present Clergy of Marlborough*.—Though their ranks are now sadly thinned, yet a remnant is left that will never be found wanting to the cause of sound learning, of unshackled freedom, of vital piety and practical righteousness.

Responded to by L. E. Wakefield.

12. *The Memory of the Recent Dead*.—*Goodale, Field and Bucklin*
 "We sympathize with those who weep,
 Whom stern afflictions bend,
 Despairing o'er the lowly sleep
 Of kindred or of friend;
 But they, who Jordan's swelling breast
 No more are called to stem,
 Who in the eternal haven rest—
 We mourn no more for them."

Dirge by the band.

13. *The Spiritual Guides of Other Days*.—We gladly welcome them from their distant fields of labor, to our Festival of Commemoration.

Response by Rev. George E. Day, D.D.

14. *The First Settlers of New England*.—It fell to their lot to establish Civilization and Christianity in a savage land. They laid the foundation of our prosperity; let them be gratefully remembered by their children.

William Brigham responded.

14. *The Memory of Hon. John Davis*.—The only Governor of the State and United States Senator, the Borough towns ever produced.

Response by A. McF. Davis, Esq., of Worcester.

The following sentiment was proposed by Colonel Dexter Fay, of Southborough, and read by Dexter Newton, Esq.:

"*Marlborough, a Wonderful Mother*.—With children more than a hundred years old, and a Grandchild fourscore-years-and-ten, sitting on the maternal lap, and not yet weaned."

Sentiment, by Edward Wilkins:

"*Our Fathers and Mothers of 1660*.—Could they see and know what we do to-day, they would be filled with admiration, like that of the Queen of Sheba, when she beheld the splendor of Solomon."

Among other sentiments read, were the following:

"*The Venerable Men who are with us to-day*.—With age, the common excitements and warm blood of youth pass away; but the heart of the wise man, the older it grows the warmer it feels."

"*The Sons and Daughters of Temperance*.—In the practice of their principles, may the Daughters be as pure as the crystal fount, and the Sons as constant as the Waters of Niagara."

"*Our Firemen: the Minute Men of Modern Times*.—Like the Minute Men of old, they subdue their enemy by the use of their arms; but, like them too, they often find one fire which conquers them—the fire of a lady's eye."

Among the letters of regret from gentlemen not being able to be present at the celebration, were those from Hon. Henry Wilson, Hon. Josiah Quincy, Jr., R. W. Emerson, F. B. Sanborn, Frederick A. Packard, Hon. Charles Francis Adams, Hon. Charles R. Train, Hon. John G. Palfrey, John Laughlin Sibley, Hon. E. R. Hoar, Hon. Levi Lincoln, and Hon. Emory Washburn.

WAR OF THE REBELLION.¹—The part Marlborough took in the War of the Rebellion was fully abreast of her sister towns throughout the State. The Board of Selectmen were thoroughly imbued with the

spirit of loyalty that everywhere prevailed, and by calling town-meetings from time to time, as occasion seemed to demand, the will of the citizens found expression in raising money to defray the expenses of enlisting men for service in the army, under the several calls from President Lincoln. War meetings followed each other, and the fires of patriotic ardor burned brightly to the end.

In April, 1861, the town voted to raise and appropriate \$10,000 for war purposes. This was followed by other sums, until the town had expended, in all, \$51,584.11, of which \$45,368.45 was repaid by the State. Men enlisted and joined the first regiments that left the State. Company G, of the Ninth Infantry, was mainly recruited from this town, and was mustered in June 11, 1861. Companies I and F, of the Thirteenth Infantry, also recruited here, were the next to leave, being mustered in July 16, 1861. Other enlistments followed, and the town was represented in almost every regiment that left the State. Company I, Fifth Infantry—nine months—was mostly from this town, as also Companies I and E, of the same regiment, for one hundred days. Other regiments that contained a nucleus of Marlborough men, were: Company I, of the Thirty-sixth Infantry, had 23 men; Company K, Fifty-seventh Infantry, had 25. The Ninth and Sixteenth Light Batteries contained many Marlborough men, as also the Second and Fourth Cavalry. In all, Marlborough had 869 men engaged—574 for three years, 91 for one year, 108 for nine months, and 96 for one hundred days.

John A. Rawlins Post 43, Grand Army of the Republic, was organized and chartered, January 15, 1868. Its first commander was Charles F. Morse, and its present (1890) commander, Francis C. Curtis. The first public observance of Memorial Day was in 1869, in connection with the dedication of the Soldiers' Monument. The ceremony of decorating the graves of deceased soldiers took place in the A. M., and the ceremonies attending the dedication of the monument, which had been erected by vote of the town, in the P. M., by a public parade of the civil and military organizations of the town. The exercises took place on the High School Common. The formal delivery of the monument to the town was by William S. Frost, chairman of the Building Committee. Received on the part of the town by Hon. S. N. Aldrich, chairman of the Board of Selectmen, followed by an oration by Hon. Henry Wilson. Since 1871—with the exception of one year—the town has appropriated a sum of money to be expended under the direction of Post 43, for the observance of Memorial Day. After the first few years, the sum has been fixed at \$150.00. The Post is made up of good men, to the number of one hundred and sixty, is well officered and stands well in the community.

A Ladies' Relief Society, in connection with the Post, was organized December 6, 1870. It stands among the first, if not the first, society of the kind

¹ By J. W. Barnes.

Wm. Lloyd Garrison

ever organized in this department. It has been the strong right arm of the Post, and its work is so blended with the Post that the history of the one is the history of the other. It has been independent of State Corps, and its members, made up of the wives, mothers, sisters, and daughters of the soldiers, have demonstrated by their twenty years of successful existence, that judicious management and harmonious home rule is more essential to success than an expensive membership in a State Corps.

SOCIETIES.—Marlborough has a large number of societies and organizations. Among these may be mentioned Knights of Labor; Knights of Honor; Knights of Pythias; Marlborough Grange; Cold Water Temple of Juvenile Templars; Spring Hill Lodge, I. O. G. T.; St. John's Total Abstinence Society; Young Men's Catholic Total Abstinence Society; Catholic Lyceum Association; Clan-na-gael Association; Emmett Association; Grattan Association; Houp-la Club; Lincoln Club; Royal Society of Good Fellows, No. 84; St. Jean Baptist Society; Union Club; Union Dramatique; Marlborough Lodge, No. 84; I. O. O. F.; Star of Hope Degree Lodge, No. 86; Daughters of Rebekah, Independent Order of Odd Fellows; John A. Rawlins Post G. A. R.; F. C. Curtis, Camp, No. 94; Hudson Relief Society, connected with Post 43; Co. F, Sixth Regiment, M. V. M.; American Legion of Honor; Ancient Order of Hibernians; Ockocangansett Tribe, No. 25, Improved Order of Red Men; Court Marlboro' 7703, Independent Order of Foresters; Daughters of Liberty; Ladies' Branch, O. U. A. M.; Taconic Lodge, No. 13, Order of the United Friends; Board of Trade, E. R. Alley, president; Marlborough Gas Light Company, S. H. Howe, president; the Marlborough Electric Company, Lorren Arnold, president.

BIOGRAPHICAL.

SAMUEL BOYD.¹

The history of a New England town is often largely made by some one man, who, born and always living within its limits, impresses himself upon its social and industrial life, so that the life of the town is truly the life of that man.

When Samuel Boyd, at the end of his seven years' apprenticeship in the tanning establishment of Colonel Joseph Davis, at Northboro', was urged by a son of his master to remain in the place where he had learned his trade,—a town which then had its two cotton factories and its two tan-yards,—and when warned that the farming town of Marlboro' was no place for him, his ambitious reply was, that other men in other towns had stayed at home and helped

build up their native place and that that was what he proposed to do.

When he came home from Northboro', there was not a single manufacturer in what is now the town of Marlboro', and with the exception of himself and brothers, there was but one young man between the age of fourteen and twenty-five years, who was not either at work upon a farm or absent from the town, for the purpose of carrying on business or learning a trade elsewhere.

For more than half a century Samuel Boyd has stayed at home and done his life-work, and built up his native place, so that everybody who had known of him and of his connection with the business and development of the town, freely conceded the justice of the compliment, when, in a leading article of one of the Boston dailies, he was characterized as the "Father of the town."

He was one of a family of eleven children of John Boyd and Sophia Phelps. His paternal grandfather served in the Revolutionary War. Born June 3, 1815, under the noble elms that now overlook the estate of Mr. O. P. Walker, in the southern part of the town, he was reared and educated in the strict principles and stern experiences of a hardy New England home. After serving an apprenticeship at the tanner's trade, he directed his attention to the manufacture of boots and shoes. The business was conducted on a small scale in the L part of what is now known as the Josiah Bennett house, and here was originated the idea of subdivision of labor in the manufacture of boots and shoes. A little room, 20x30, sufficed for the purposes of the business there, and the employment of four men, or a "team," as it was called, to do the work, was the first step toward that multiplied detail which now characterizes the business. Successive changes and increase in the volume of the business brought Mr. Boyd and his partners to the erection of "the Big Shop" (so-called), in 1871, a mammoth factory, covering an area of more than one and one-half acres, and believed to be the largest boot and shoe manufactory under a continuous roof in the United States.

The development of the business is simply wonderful. In 1845 the total value of the product for the entire town of Marlborough was \$92,932; the usual product of Mr. Boyd's factory alone is \$1,500,000. Mr. Boyd's relations with his workmen have always been considerate and just. He has never forgotten the days when he labored with his own hands.

In 1888 he conceived the idea of cutting up an estate of sixty acres at Chestnut Hill into house lots for his and other workmen, and of building an electric street railway, that in addition to other advantages, should make it possible for them to take their meals at home. At his own cost, he embarked in these enterprises and the result has not only been a blessing to the workmen and in fact the whole town, but has resulted in profit to himself. Long before this,

¹ By Samuel C. Darling.

Mr. Boyd had identified himself prominently with the steam railroad interests of Marlborough. The construction of the Agricultural Branch Railroad was delayed for some years from lack of sufficient capital. Framingham, Southborough and Northborough had each pledged \$50,000 to the enterprise. The president of the Boston & Worcester Railroad felt the importance of having Marlborough upon the line of the Agricultural Branch, and his company offered to guarantee six per cent. upon the sum of \$60,000 stock, if that sum could be raised for that purpose, but not a cent at the time of this offer had been raised in Marlborough. It was then that Mr. Boyd, foreseeing the value of connecting the road with Marlborough, seconded the president's efforts by guaranteeing himself to raise \$15,000 in Marlborough, which he did, subscribing himself largely to the fund. The result was the construction of the road to the centre of Marlborough, and had Mr. Boyd's subsequent efforts for a trunk line for Marlborough been fully crowned with success, the tracks which had thus been constructed to the centre of the town, would have been continued onward from that point to Northborough and Clinton, and the town would have been spared the inconveniences of the present branch to the Y.

Mr. Boyd has never sought or cared for public honors. In 1864 he was prevailed upon to allow his name to be used as a candidate for the General Court and was elected and served. Once, without nomination for the office or consultation with him, he was elected selectman, but he has always felt that he could serve his town better in his business as a manufacturer, than in political position. In more instances than one he has heshown a noble public spirit.

Fifteen years ago, he offered the town a tract of forty acres for a public park. Ten years afterward he procured, in the face of much opposition, what is now conceded to be the handsomest and, in fact, the only pleasure thoroughfare leading out of town, the re-location and strengthening by the County Commissioners, of Maple Street. Forty years ago the estate of Caleb Witherbee, south of Main Street, had only a laborer's lodge upon it. To-day, through Mr. Boyd's foresight and energy, it is the fairest and most convenient residential portion of the city, crowned upon what was then its treeless and wind-swept heights with the stately mansion of the successful manufacturer.

While eschewing political preferment, Mr. Boyd has of course been compelled to hold office in various institutions and enterprises, which he has either originated or promoted, and which have converted the pastoral quiet of the village of 1836 into the manufacturing stir of the Highland City of 1890. He was director in the Marlborough Branch Railroad, now part of the Fitchburg Railroad System; Director in the Agricultural Branch Railroad; Director and at one time president of the First Nation-

al Bank of Marlborough; Director of the People's National Bank of Marlborough; President of the Marlborough Savings Bank; Director in the Hopkinton Bank of Hopkinton, Massachusetts; and is now president of the Boyd & Corey Boot and Shoe Manufacturing Company, the Chestnut Hill Real Estate Association and the Marlborough Electric Street Railway Company, of the property of which three last named companies, he is substantially the owner.

His latest gift is that of a sightly lot of land for the French Evangelical Mission in Marlborough, upon which a church is now in progress of erection.

At the time of this sketch, his vigor and enterprise in every direction, which makes for the welfare of his native town of Marlborough is unabated and stimulating.

SIMON HERBERT HOWE.

The characters of good men belong to mankind and there is no duty more pleasant or useful than that which seeks the recognition of their virtues and stimulates others to follow them. An example of philanthropic zeal steadily pursuing its benevolent designs amidst the prevailing selfishness of business competition, will ever be of great benefit to the community, and benedictions follow the steps of him who proves himself to be a lover of his kind. With respectable rank among such characters is found the subject of this sketch. The son of Samuel and Charlotte (Howe) Howe, of Marlborough, he was born December 21, 1835. His father was a cooper and carried on that business in Marlborough until 1842, when he retired. Herbert spent his childhood and youth at his home enjoying the sports and performing the duties usual to boys in manufacturing villages in New England and in due time entered upon school day experiences. He first attended the common school and at the proper time entered the High School, from which he graduated, and at the age of twenty, with but little more than his willing hands and active brain as the foundations of a business, he, in connection with his elder brother, Lewis, commenced in a small way the manufacture of shoes in the old cooper shop. During the odd hours of his school days Herbert had learned many of the important parts of shoe manufacture. He made shoes for John W. Stevens, and from the proceeds he paid his own board during his school days.

By close attention to their business these young men soon became known as factors of some consequence in this industry, which has contributed so much to the wealth and importance of their native town. As their business increased there came the need of more room, which was supplied by the addition of a story to the old cooper shop. Shortly after Herbert bought out the interest of his brother Lewis, thus assuming sole proprietorship of a business which continued to increase in its volume, and for lack of

W. H. R. 1860

Wm. A. Morris

room Mr. Howe bought a shop on the corner of Pleasant and Elm Streets and moved the old cooper's shop up beside it and here went on winning the reputation of an honest manufacturer and doing a fair amount of business.

He remained here until 1861, when he formed a co-partnership with Allen D. Howe, which continued with but indifferent success up to 1865 when they dissolved partnership, and from this date 1865, practically commenced the business career of Mr. Herbert Howe, which has been decidedly remarkable and replete with many interesting incidents. Always prompt and exact in meeting his financial obligations a single incident will serve to give a cue to his whole life. In 1857, the time of "the great snow-storm," when all public conveyance was blocked for several days, he had a note falling due in a Boston bank, and two of the three days of grace had passed, when he started to walk through the drifts to Cordaville, a station on the Boston and Worcester Railroad, six miles distant, which feat he accomplished, and found that the road had just been opened through to Boston, where he arrived just a trifle late, but through the courtesy of the cashier, who admired the spirit which could overcome such obstacles, he obtained the paper which for the first and only time in all his financial career came so near to being dishonored.

He soon found need of more room and built on additions from time to time until the present "Home" shop standing on the spot where he commenced business, is an ornament to the town, and with his other two shops, the "Diamond F" and the "Diamond O," they form a monument to his successful management. These three shops have been put into a stock company, with Mr. Howe as the principal stockholder and president of the corporation, and his son Louis P. Howe, as vice-president. The style of the corporation is the "S. H. Howe Shoe Co."

In these factories are made annually 2,151,474 pairs of shoes. In the financial affairs of the town Mr. Howe has taken great interest, and has been connected with several moneyed institutions.

In 1875 he was elected a trustee of the Marlborough Savings Bank, and in 1882 its president, which office he now holds. He was one of the original incorporators of the People's National Bank in 1879, and has been on its board of directors uninterruptedly since that date. Mr. Howe has acted with the Republican party ever since its organization, has represented Marlborough in the General Court, and in town affairs has been for many years chairman of the school-committee, a member of the board of selectmen, and some of the time its chairman.

Mr. Howe has been a constant attendant of the Unitarian Church, also for some time the superintendent of its Sunday-school and a liberal contributor to the support of public worship, not only to his own denomination but to every other in the town.

In private life Mr. Howe is known as a benevolent

and kind-hearted man, whose many charities have been bestowed without ostentation or public announcement. Jan. 1, 1857, Mr. Howe married Harriet A., daughter of William P., and Lavinia (Baker) Brigham, and from this union there have been four children, Louis Porter, born May 29, 1858; Alice Baker, born Dec. 19, 1859; Charlotte Adelaide born May 9, 1861; Annie Brigham, born June 15, 1871. Of these children Alice B., died Oct. 1860, and Annie B., died Sept. 1887. Louis P. married India Howe Arnold, Jan. 1, 1887; Charlotte A., was married to Oscar Herbert Stevens, May 6, 1885.

EDWARD F. BARNES, M.D.

Edward Forbes Barnes, M.D., was born in Marlborough, March 21, 1809, and was the oldest son of Edward and Lucy (Brigham) Barnes. Until he was of age he worked on the farm, but after obtaining his majority he commenced his preparation for college and entered Harvard in 1834 and graduated in 1838 in the class with Rufus Ellis, Judge Chas. Devens, James Russell Lowell, and J. F. W. Ware, attaining a high rank as a scholar. After graduation he devoted some time to teaching school. Having decided to devote himself to the medical profession he pursued his medical studies in the Harvard Medical School and completed them in Paris, receiving his degree of M.D. in 1844. In 1846 he commenced practice in Marlborough. During the thirty years that followed he was constantly busy in his profession, securing the confidence of his patients. He was an able and faithful physician, and proved himself a skilful and successful practitioner. For several years he served as a member of the School Committee, preparing some of the annual reports of that body. Dr. Barnes was a lover of good order and of all good institutions. Although he nearly reached his three-score and ten years, he retained to the last his faculties in an unusual degree. Dr. Barnes was an acute observer of passing events, and exercised a conscientious fidelity in the discharge of his duty.

He was connected with the Massachusetts Medical Society all through his professional life and was a contributor to medical journals. Biography and history were favorite studies and his memory concerning what he had read was remarkable. In local historical matters he was well posted, and it is a source of regret that what he had treasured up from his reading is not more available in printed shape. He was by common consent made president of the local Historical and Genealogical Society when it was organized. There was about him a peculiar attractiveness, a subtle fascination. He never obtruded his own opinions upon any one, but was a model of self-forgetfulness, self-depreciation and self-oblivion.

There was about him an air of repose, meekness and charity. Though really a very gifted man, he was content, like his Master, to be of no reputation.

He was, in the best sense of the phrase, a good man. In his nature righteousness and charity were blended. Dr Barnes was married to Maria E., daughter of Ashbel and Lydia (Russell) Brigham, August 26, 1821, and by this union they had one child, Lizzie F., who was born October 7, 1848, and died July 12, 1869. Also an adopted daughter, Josephine A., born January 18, 1870. Dr. Barnes died November 2, 1878, and his widow is still living at the old home. She is a superior woman, respected and beloved by all with whom she associates.

JOHN ADDISON FRYE.

John A. Frye was born in Marlboro', Mass., Nov. 27, 1839. His father was Lewis T., and his mother was Levina S. Lewis T. was a stove manufacturer, and a man of considerable prominence in the town, having represented it in the Legislature. The childhood of John A. was passed through without unusual incident, and in due time he commenced his school days in the grammar-school, and finished his education in due course in the high-school, under the efficient training of Hon. O. W. Albee, who, as principal of the Marlboro' high-school, gained a very wide and justly enviable notoriety as a competent educator. From his careful and thorough training have gone out many of the boys of Marlboro' and vicinity to careers of influence and business success.

After leaving school he entered the shoe-factory of Messrs. Hapgood & Russell, where he remained about one year, when he made a change to the factory of S. Herbert Howe, spending about one year; he then worked in the factory of S. G. Fay, remaining four years, by which time he was a thorough master of this business in all its departments. He left the Fay shop to form a co-partnership with John W. Stevens, on Pleasant Street, taking the management of the factory, and bringing it up to a high state of production, while Mr. Stevens managed the financial part of the business.

In 1863 he bought out Mr. Stevens and single-handed carried on the enterprise most successfully. He remained in the old shop about one year when the business had so grown that the young manufacturer found it necessary to procure larger quarters, which he found in a shop situated on Elm Street, Marlborough, to which he removed and where he remained until 1865, when he again found he had outgrown his accommodations and as the opportunity offered he traded shops with L. A. Howe, at the corner of Pleasant and Chestnut Streets, where Mr. Frye has since remained and where, by a steady growth in the volume and quantity of his manufacture, he has been obliged to make additions at four different times, each addition being made with reference to the gradual improvement in the quality of the work turned out as well as the quantity of it. In this factory, as it now stands, may be found all the latest and best of the many labor-saving machines which from

time to time the ingenuity of the skilled mechanic has provided. This factory ranks third only in the list of large manufactories in town in the total of annual output. Up to 1883 Mr. Frye had confined himself to the manufacture of shoes of all kinds, but at this date, for the first time, commenced on boots chiefly for children and youth. Like most of the country manufacturers Mr. Frye had disposed of his goods through the medium of a commission house in Boston, but in 1876 he changed this time-honored plan and undertook to market his product himself, placing it directly in the jobber's hands. This plan worked so well and so materially to his benefit that he has continued it to the present time. When by active competition the manufacturers have been forced into very narrow margins for profits, the saving of commissions to middle men has been a very important item. The goods from the manufactory of Mr. Frye are first-class and are known to the trade far and wide. He has managed his business with such sagacity and untiring industry for all these years that a large material return has come to him, and with unquestioned financial resources he is able to gratify a taste for farming in a genteel way for the pleasure there is in it for him, and in doing this he has reclaimed over 100 acres in the vicinity of his native town, making that which was worthless to yield a revenue and changing rocky wastes to green pastures. Mr. Frye has been interested in the breeding of fancy stock and has had a very superior herd of Jerseys, among which were some justly celebrated animals.

In 1886, becoming convinced of the superiority of the Holstein breed, he sold his Jerseys and imported at great expense some of this breed, and now his herd of Holsteins numbers 135 head of high grade cattle. Mr. Frye has with representatives of this herd won several prizes in 1890, having taken the premiums at the New England Fair, at Worcester, the Rhode Island State Fair, at Providence, also at Brattleborough, Vt., and Danbury, Conn. September 26, 1861, Mr. Frye married Elvira F., daughter of Otis and Levina (Rice) Russell, and they have had five children, two of whom died in infancy. The living are Walter P., Carrie L., and Della M. Mr. Frye is a liberal supporter of the Unitarian Church—while Mr. Frye has avoided political activity, declining town offices, he is a decided Republican, having cast his first vote for the martyred Lincoln. Mr. Frye was the first one in town to introduce electricity into his factory for lighting purposes, owning his own plant. He is now enjoying the fruits of his successful activity in his handsome house, with fine grounds situated on Pleasant Street, and has the respect and esteem of all good citizens.

DAVID WHITE HITCHCOCK.¹

New Englanders are justly proud of their ancestry, and while Massachusetts has a long list of honored

¹ By John L. Stone.

John A. Lyle

Dr. W. H. Hatcher

names, she must not forget her sister States have a first claim upon a large number. If the young men of other States have flocked to Massachusetts, it was because larger opportunities were possible, and especially so to those who were inclined to mercantile pursuits.

So it has been in the town of Marlborough, as many of her most respected and prosperous citizens have come from without her borders.

Among this class none perhaps would claim the attention of the historian more quickly than David White Hitchcock, son of Lemuel and Sally White Hitchcock, who was born June 19th, 1831, at Woodstock, Vt. His father was a merchant, both at Weathersfield, Vt., and Claremont, N. H., noted for his integrity and uprightness in business, and much beloved by all who knew him for his kindly and genial disposition. He died at the house of his eldest son, John, in Newton, Mass., Nov. 9, 1866, aged eighty-seven years. His mother was of the White family, of Watertown, Mass. She died in Woodstock, Vt. in 1835.

David White Hitchcock was the seventh of nine children, and the only living representative of the family at this date, and received his education at the common schools of Claremont, N. H. Owing to a reverse of fortune and the death of the mother, the family was broken up and scattered, the subject of this sketch beginning life on a farm in Claremont, at the age of nine years.

At the age of fifteen he entered the store of Henry Patten, a Claremont merchant. After spending nearly three years in Claremont, he went to Montpelier, Vermont, as clerk in the employ of Harvey King, then a prominent merchant of that place. At the age of nineteen he went to Boston whither his two elder brothers had preceded him (one being of the firm of M. S. Lincoln & Co., and the other of the firm of Nash, Callender & Co.), and entered the employ of Otis Norcross & Co., wholesale dealers in crockery and glass ware. Beginning as the humblest employee of this firm, he soon made it apparent to the head of the firm, a sharp, clear-headed man, that he had in this young man one who would prove a valuable acquisition to his business, and at the end of five years from entering their employ, he was admitted a partner of the firm. Here was given him an opportunity to rise by his unfailing attention to business, his honesty, his energy as a salesman, his shrewdness and prudence as a business man to success and prosperity. He remained as a partner of this firm eleven years. At the expiration of this co-partnership in 1866 he withdrew and formed a co-partnership with his brother John under the firm name of John & David W. Hitchcock, for the purpose of doing a wholesale boot and shoe business at 66 Pearl Street, Boston.

The foundation of his future secure, he rapidly increased in wealth and prosperity, carrying always with him his earlier reputation for shrewdness, honesty and ability, commanding the respect of all who knew him.

The great fire in Boston in November, 1822, found the firm on the eve of retirement from business altogether. After the fire it was dissolved and was succeeded in the business by Leonard, Redpath & Lamb, the two former being salesmen and the latter book-keeper of the old firm, J. and D. W. Hitchcock remaining as special partners. He was instrumental, as was also his brother John, in building up the firm of Wallace, Killiam & Bray, manufacturers of boots and shoes, at Beverly, Mass., the two brothers being the special partners of the firm for eighteen years.

Mr. Hitchcock has always taken a warm interest in starting other young men whose lives began in a small way as his own, and assisting them with advice and money, most of them becoming as successful as he has been. In 1873, after retiring from all active business, although still interested in special co-partnerships, and the care of several large estates, he purchased a farm in the easterly part of the beautiful village of Marlborough, Mass., and settled down with his family to enjoy the balance of his days in abundance of leisure, and with a reasonable endowment of this world's wealth, to purchase luxury and comfort, that is, home life without cares; but even here his sagacity in managing business affairs and his reputation for wise counsel, were soon discovered by the people with whom he was daily associated.

He was elected by his town's people to fill the office of Selectman and served five years, three of them being Chairman of the Board. He also was one of the Board of construction of the water works in Marlborough; after its completion was for one year Water Commissioner.

It was by his exertions that the People's National Bank was established in Marlborough of which Mr. Elbridge Howe, an old and much esteemed resident, was the first president, Mr. Hitchcock succeeding him at his decease and still continuing in office. He is also one of the Trustees of the Marlborough Savings Bank.

He is a Director in the National Tube Works Company (a Massachusetts company having its works in McKeesport, Pa.), the largest wrought iron pipe, tube and rolling-mill in the world, giving employment to 5,500 men, having its offices in Boston, New York, Chicago, St. Louis, and Pittsburgh, Pa. He is Secretary and Treasurer of the National Transportation Company, and Vice-President of the Monongahela Furnace Company of McKeesport, Pa., both being offshoots from the National Tube Works Company. He is also President of the National Warehouse Company of Chicago, and Chairman of the American Water Works and Guarantee Company (Limited), of Pittsburgh, Pa., which lays and operates water works in cities and towns in the United States.

Coming to Marlborough for retirement and leisure, these several important offices have been urged upon him until he is again a thoroughly busy man. Liberal in all ways, he requires the strictest accounting

in all monetary matters, and will not countenance fraud or deception. Decided and tenacious in his ideas, he respects one who freely and honestly speaks his mind, even if it should not coincide with his. Although coming to Marlborough an entire stranger, no one has a livelier or deeper interest in the growth and prosperity of the town.

Mr. Hitchcock married Anna Maria, the eldest daughter of William Hervey and Ann Maria (Howard) Conant, of Boston, and by her had two children, Lemuel and Alice Howard Hitchcock.

WINSLOW MORSE WARREN.

Winslow M. Warren, son of Samuel and Rebecca (Morse) Warren, was born in Marlborough August 20, 1828. He was born on "the old Warren Place," where his father, grandfather and great-grandfather had lived and toiled before him. They were farmers and men of sterling worth in the community, and each in his generation acquitted himself well, passing down to the succeeding generation a good name for honesty and probity of character. His childhood and youth were much after the fashion of the average New England boy,—assisting in the lighter farm duties, attending school and growing to vigorous manhood.

He commenced his education in the Warren District School, on leaving which he entered the Academy, and here closed the educational portion of his life. After a short period of business connected with the farm, he, in 1850, formed a partnership in the meat and provision business with George E. Woods, which continued until 1864, when he entered the firm of Dart & Co., in the express business between Boston and Marlborough, in which business he has continued up to the date of this issue, and of which he has become the proprietor. He has also, for the past twenty-five years, done an insurance business, and has settled many estates. He has been a trustee in the Marlborough Savings Bank, and also a member of the Committee on Investments. He was one of the original subscribers to the stock of the People's National Bank and on the first Board of Direction.

Mr. Warren is a trustee of the Union Society, to which was granted the land now and for many years known as "the Common." Mr. Warren is a Republican, a contributor to the support of the Union Congregational Church, a member of the "United Brethren Lodge of Ancient Free and Accepted Masons," and was for several years treasurer of the town of Marlborough.

July 2, 1879, Mr. Warren married Sarah, daughter of William and Martha (Phelps) Wilson. Mr. Warren is a well-known citizen of Marlborough, long identified with the business interests of his native town, and is the representative of two well-known families of Marlborough, who were highly esteemed in the early days of the town—the Morses and the Warrens.

The example of Mr. Warren in his daily walk and conversation, is worthy of imitation by those who shall, in succeeding generations, peruse this history of Middlesex County.

WILLIAM GIBBON.

William Gibbon, son of Samuel Gibbon and Abigail Cogswell, was born in Marlborough July 25, 1807. His father came to Marlborough from Dedham, Mass., in 1784, and bought the farm where William was born, and which has been in the family since 1784. William had but little opportunity for schooling, attending the school kept by Aaron Brigham twelve weeks a year for several years. He worked on the farm, and, by careful management and natural-born economy, made his way up in the world. In 1863 Mr. Gibbon, in connection with Mr. Mark Fay (one of the foremost men of Marlborough) organized the First National Bank, and was on its Board of Directors of the bank for twenty years. During this time he was president, and also vice-president of this bank, and vice-president and trustee of the Marlborough Savings Bank.

Mr. Gibbon has acted with the Republican party ever since its organization. February 12, 1835, Mr. Gibbon married Eunice Wilson, of Peterborough, N. H., and they had five children: Abbie A., born August 1, 1837; Elizabeth J., born July 7, 1839; Charlotte E., born September 1, 1844; Mary E., born October 20, 1848; John, born April 24, 1851. Of these children, Elizabeth J. and Charlotte E. are deceased.

Mr. Gibbon has lived a long and useful life in this community, and was respected and beloved by a large circle of friends. He died November 11th, 1890.

TIMOTHY A. COOLIDGE.¹

Timothy Augustus Coolidge, son of William and Ann (Leighton) Coolidge, was born in Natick, Middlesex County, June 25, 1827.

The district school bestowed upon him an elementary education, and beyond this he has depended entirely upon his perceptive faculties, studying from the world about him.

His father was a shoemaker in a small way, and as he was one of seven children, he was obliged very early in life to provide for his own support. Until he was twenty years old, he worked in the shop with his father, with the exception of three months, when, as a lad of thirteen years, he "pegged" for Henry Wilson—afterwards United States Senator and Vice-president. Ever since his twentieth year, Mr. Coolidge has been a growing shoe manufacturer, at first doing most of the work himself, now giving employment to hundreds of people.

¹ From "One in One Thousand."

Winslow M. Warren

71 Mr. Gehl on

P. A. L. ...

Wm. H. Davenport

John S. Bay

Nahum Witherbee

From 1848 to '58 he manufactured shoes in Concord, and from 1858 to the present time, has conducted a manufactory in Marlborough.

On the 17th day of October, 1848, he was married, in Concord, to Sarah B., daughter of Abel and Rebecca (Lewis) Davis, their only child being Melissa A. Coolidge. In September, 1854, he married his second wife, Maria H., daughter of Thomas Davis.

In financial affairs he has gained a substantial reputation as self-reliant, cautious, firm and just. Politically he has followed the lead of his early employer, Henry Wilson. Socially he has been found enthusiastic in every department, and holds high Masonic orders (32°). He has also been actively identified with several philanthropic societies; is an active temperance man, and a valuable member of the Farmers' and Mechanics' Club and the Board of Trade. He is a trustee of the Marlborough Savings Bank and was a director in, and is also vice-president of the First National Bank of Marlborough. He is a justice of the peace, and has been a member of the Board of Selectmen, eight years; chairman four years, and in 1880 and '81 was elected to represent the 32d Middlesex District in the Legislature.

WILLIAM N. DAVENPORT.

William Nathaniel Davenport, son of William J. and Louisa (Howard) Davenport, was born in Boylston, Mass., Nov. 3, 1856. He attended the district school until he was eleven years of age; but about this time he was thrown upon his own resources for his support, and went to work in the Boylston Cotton-Mills, and remained there until he was thirteen years of age, when he went from there to Hudson, Mass., securing work in the shoe-factory of W. F. Trowbridge, where he remained one year. He came to Marlborough January 1, 1872, and went to work in the shoe-factory of Clapp & Billings, remaining nine years. At this time he decided to commence the study of the law, and read law for one year in the office of James T. Joslin, of Hudson, and then entered the Law School at Ann Arbor, Michigan, and was admitted to the bar of that State the same year. He then came back to Massachusetts and entered the law office of E. F. Johnson, Marlborough, remaining one year, and was admitted to the bar of Middlesex County, June 30, 1883. The first public office he held was clerk of the Police Court of Marlborough, which he resigned in June, 1884. This same year he was nominated on the Republican ticket for Representative to the General Court of Massachusetts, and was elected by a handsome plurality; and he was nominated and elected for the second term by a larger majority, although the district was very largely Democratic. Young Davenport had represented his constituency so well in the House that he was elected to the State Senate in 1888-89, where he discharged his duties in a satisfactory and intelligent manner. Mr.

Davenport is a member of the Congregational Church, and a member of several of the secret benevolent societies, being a member of the United Brethren Lodge of A. F. and A. M., the Order of Red Men, and has served for two years as Grand Commander of the A. L. of H., and one year as Grand Leader of the Home Circle. Mr. Davenport married Lizzie M., daughter of Lyman P. and Eliza L. (Moore) Kendall, of Boylston, Mass.

JOHN S. FAY.¹

John S. Fay, son of S. Chandler and Nancy (Warren) Fay, was born in Berlin, Worcester County, January 15, 1840. He obtained his education in the public schools of Marlborough and at the Commercial College in Worcester. When twenty-one years old, at the outbreak of the Civil War, he enlisted as a private in Company F, Thirteenth Massachusetts Infantry. He was with his regiment in all its marches and engagements till April 30, 1863, when in action near Fredericksburg, Va., he received a wound from a shell which necessitated the amputation of his right arm and right leg. While in the field hospital he was taken prisoner and confined in Libby Prison for one month. He did not succeed in reaching his home until October—the most mutilated and crippled of all who survived of the eight hundred and thirty-one who enlisted for the war from Marlborough.

In 1865 Mr. Fay was appointed postmaster of Marlborough by President Johnson, and by successive appointments has held the position ever since. He has been an active Grand Army man and has held many offices in Post 43, which he aided to organize. He is also a prominent Odd Fellow and a member of the Grand Lodge of Massachusetts. He is also prominently identified with the Unitarian Society of Marlborough. Mr. Fay has always been interested in the welfare of his adopted city, and has won the respect and esteem of his fellow-citizens. November 20, 1869, Mr. Fay married Lizzie, daughter of James M. and Elizabeth (Pratt) Ingalls, of Marlborough. Their only child is Frederic H. Fay.

NAHUM WITHERBEE.²

Nahum Witherbee, son of Caleb Witherbee, was born at Marlborough, Massachusetts, April 11, 1811. At an early age he learned the tailor's trade at Marlborough, and after working at different places he commenced business in Andover, Massachusetts, with a Mr. Abbott as partner. Finding a change desirable, he went to Lynn and remained there for some years. Having an offer from Emerson Leland, of Boston, they formed a partnership in which he continued till 1860, when he removed to Marlborough and started the clothing business there.

¹ From "One in One Thousand." ² By Edward F. Johnson.

He was soon elected a member of the House of Representatives, in which he served two terms, and also held the office of Town Treasurer and Tax Collector, and was one of the committee appointed to build a new town-hall. He was one of the trustees of the savings-bank and one of the investing committee.

In 1871 he was appointed a Trial Justice for Middlesex County at Marlborough, and by his careful study and his good judgment, he was regarded one of the most accurate in the County. He held that office till his death. He also did a great deal of conveyancing and probate business and acted as administrator, executor, trustee and guardian. His services were much sought and he had the full confidence of both the people of his town and of the courts.

He was often selected as referee and acted in similar positions and in a number of cases was appointed as Auditor by the Superior Court, a position usually filled by practicing lawyers.

He was a prominent member of the Methodist Episcopal Church and one of the officers of that body. He was a Master-Mason and Chaplain of the Lodge for twenty years. No man in Marlborough has been missed more, as he was affable, and at the same time guided by his view of the right. While he was conservative, he was a man of broad views and unselfish and a steadfast friend. Many people are indebted to his assistance freely given, and his name is always spoken of with respect, and particularly by the many who were the recipients of his kindness.

April 30, 1835, he married Miss Mary Smith, of Chelmsford, who survives him. He died February 21, 1882. He left one son.

MOSES HOWE.

The first American ancestor of this name was John, who first settled in Watertown, and went from there to Sudbury. He was one of the petitioners, in 1657, for the grant which constituted Marlborough, and was the son of John, who came from Warwickshire, England, who was a descendant of John Howe, himself the son of Hodinuhll, and connected with the family of Sir Charles Howe, of Lancaster.

The first-mentioned John was admitted a freeman in 1640. He came to Marlborough about 1657, and built a cabin a little to the east of the "Indian Planting Field," where his descendants lived for many generations. This proximity to the "Indian Plantation" brought him in contact with the natives, but by his kindness he gained the confidence and goodwill of his savage neighbors, who not only respected his rights, but in many cases made him the umpire in cases of difficulties among themselves. John opened the first public house in Marlborough prior to 1670. He died here in 1687.

Moses, the subject of this sketch, was in direct descent, by several generations, from John. His

father, Ephraim Howe, married Hannah Maynard, of Framingham, November, 1782. Moses was born October 6, 1783, and married Lucy Temple March 16, 1807. Their children were: Eveline, Ephraim, Lucy, Betsy and Eli H. Moses was a farmer, and owned a large farm on the north side of Lake Williams, now occupied by John W. Brigham. He was a man of retiring nature, never desiring any public office, but was a man of sterling integrity. He was born, lived and died in the same house. He died October 4, 1863.

EPHRAIM HOWE.

The line of ancestry has been given in the preceding sketch of his father, Moses. Ephraim was born in Marlborough, June 10, 1810, and received his education at the district school. When a young lad he went to work for Ira Temple, on a farm in the eastern part of the town, and remained there until twenty-two years of age, when he went to Boston and entered the employ of Rufus Felton, a native of Marlborough. Here he remained until the spring of 1841, when he went to New York City, and entered into mercantile pursuits, in which he has been successful. He retains his interest in his old home, making frequent visits to it and noting the growth and prosperity of the thriving town, now grown to a city.

An evidence of the fact that a love of early home associations has not been lost amidst his active business life and long residence in the metropolis, is this record of the family and the engravings accompany it placed in this history through his instrumentality. He also has made a large contribution for the purpose of keeping in good order the resting-places of his immediate ancestors, a tender tribute to their memory and his affection.

STEPHEN MORSE.¹

Stephen Morse was born at Marlborough, Mass., January 16, 1797. At the age of fourteen he went to Sudbury to learn a trade. At the age of twenty-one he went to Boston in the employ of Mr. Gaffield, then the leading boot and shoe dealer of Boston. There he became acquainted with the substantial men of those days and through their influence gained a position in the Suffolk Bank, where he remained till 1835. A part of the time while in its employ, he traveled over the New England States collecting specie for the bills of the State banks taken by the Suffolk bank and, during this time, was under a heavy responsibility, as the amount of money in his care was very large and the means of transportation were then by teams and coaches not by steam as now.

When he resigned he was presented with a handsome sum of money by the directors and received from them a vote of thanks for both his fidelity and ability while in their employ.

¹ By Edward F. Johnson.

Ephraim, Hurd

Stephen Morse

Levi Bigler.

J. C. Bigelow

He removed to Marlborough in 1835, and was soon employed by the town as its agent in a lawsuit which was very important and which involved the taking of a large number of depositions and which, after a long contest, resulted in favor of the town. He was also employed in many other town cases and held many offices in the town where his good judgment and industry were of great advantage.

He, after he returned to Marlborough, settled a great many estates and, although not a lawyer, gave much advice that would have been to the credit of a member of the bar. He was a prominent member of the Union Society and was always public-spirited and willing.

His honesty was never questioned and while he was decided in his opinions, he was always open to conviction if he was shown the right.

He owned, at the time of his death, a beautiful farm in East Marlborough which has been in the Morse family for 200 years, and where he had lived many years and which his family now occupy.

He married Elizabeth Thompson, of Sudbury, July 5, 1824. She died October 30th, 1862; he married Martha A. Moore, also of Sudbury, who survives him. He left three children, Stephen Morse, Jr., Emily T. Morse and Mary H. Morse.

LEVI BIGELOW.

Levi Bigelow, son of Gershom and Mary (Howe) Bigelow, was born in Marlborough October 28, 1790. He married July 23, 1809, Nancy Ames, daughter of Deacon Moses and Lydia (Brigham) Ames, born in Marlborough March 1, 1792. At the age of nineteen he commenced teaching school in the town of Holden, Mass., and he followed that occupation winters for about thirty years, the greater portion of the time in his own district. The remaining months of the year he devoted to farming. He was for some years, in company with his brother Lambert, interested in a country store in the west part of Marlborough, but withdrew from the firm after a few years. In addition to his farming he did much in surveying, making out deeds, settling estates, was a justice of the peace for thirty years, and he was always active in the cause of education and for several years was one of the School Committee. He represented the town in the General Court in 1831, '32, '34, '39, and was one of the assessors for seventeen years. In all of these positions he was known for his sterling integrity, firmness of mind and steadfast opposition to any thing that savored of compromise or a vacillating disposition. As a teacher he was very successful, a thorough disciplinarian and always had the welfare of his pupils at heart, many of whom, who became prominent business men, have said that they owed much of their success in life to the wise counsel that they received at his hands during their school-days. Firmness, perseverance and honesty were ever prominent traits in his

character. His wife died suddenly January 22, 1850, and he died April 3, 1859.

The children were Lydia, Leander, Mary Cordelia, Electa, Levi, Jr., Lambert, Edwin M., Horace Holly, Julian, William, Ann Theresa, Arthur J. and Ada Genevieve.

HORACE H. BIGELOW.

Horace H. Bigelow was born in Marlborough June 2, 1827, and was the son of Levi and Nancy (Ames) Bigelow. Like most New England boys, his education was received in the public schools, which he attended until the age of fifteen, when he began the business of shoemaking. The spirit of the boy was not much different from that displayed in the man, and early in his business career his natural mechanical and inventive endowments began to develop, and finally won for him a high place among his business associates.

Naturally his inventive genius developed in the direction of the boot and shoe manufacture, and he became the inventor of the heel-pressing and nailing machines, from the sale of which he has won a large fortune. Shoe manufacturing was the early dream of the young inventor, and he soon found his way into active work in this important industry. His business energies were not confined to Massachusetts alone, but were felt with beneficial results wherever improved machinery was used in the various departments of this business.

Mr. Bigelow achieved considerable notoriety through his plan of organizing prison labor for the manufacture of boots and shoes under contracts.

In 1870 he withdrew from active, personal care of manufacturing interests, and engaged in other equally absorbing cares with the energy that had hitherto characterized his actions. Securing control of the Worcester and Shrewsbury Railroad and a large portion of the real estate on Lake Quinsigamond, he began at once the development of both, and has already accomplished much in the improvement of the grounds at the Lake, thus making it one of the very attractive sections of our State.

As President of the railroad he provided steel rails, new and better engines and cars, built a pretty station at the lake, with car-houses, and other improvements, for the accomplishment of which he has expended thousand of dollars, resulting in positive good to the city of Worcester. At the lake he has built up the charming village of "Lake View," and by a system of easy payments has made it possible for any young man to own a house there. While busy with these important enterprises, he has also been instrumental in establishing other industries. The Bullard Rifle Company, of Springfield, Mass., is indebted to him for its establishment. The Electric Power Company was promoted by him. The list might be extended greatly in the simple enumeration of the various interests that claim his care and attention. As a busi-

ness man, he has the record of achieving whatever he has undertaken, and of never giving up until his purpose is accomplished. Mr. Bigelow will ever be credited with being helpful to his fellow-men.

The right of free speech is a sacred one to him, and to maintain it in the person of one who was unjustly oppressed, he did not hesitate to spend thousands of dollars. Generous to a vanquished opponent, revenge never enters into his battles against wrong.

Joining with Hon. Edward L. Davis, of Worcester, they have given to the City of Worcester one hundred and ten acres of land for a Lake Park. He consummated the largest real-estate purchase ever made within the city of Worcester proper.

The tract of land (formerly used for railroad purposes) lying between Mechanic and Foster Streets, covering 115,000 square feet, he bought, and is holding for the purpose of erecting thereon the finest building devoted to business purposes in New England. With the purchase of this land there came into his hands the large building known as the skating-rink, in which band concerts and various other attractions were offered from time to time; he was thus able to furnish pleasant amusements to thousands. His only purpose in allowing the rink to be run was to give the people amusement at a low cost.

Mr. Bigelow is a man of liberal and generous views, a friend of all worthy enterprises, a defender of the poor, and a clear-headed man of affairs. He married, first, Jan. 22, 1852, Lucy Ann, daughter of Thomas and Patty Howe. She died September 25, 1857. He married, second, June 1, 1859, Adelaide E. Buck, of Portland, Conn. His children are Adelaide Frances, born December 24, 1860, married George A. Stevens, of Worcester, June 23, 1886; Irving E., born November 11, 1862, married Lillian A. Drennan, November 17, 1887; Frank H. born February 8, 1875.

GEORGE N. CATE.

George Neal Cate, son of Moses and Abigail (Brewster) Cate, was born December 11, 1824, at Wolfborough, N. H. His father died when George was but four years of age. The facilities offered for an early education were very slight, but at the age of eighteen Mr. Cate had fitted himself to teach and secured a position in Rochester, N. H., which he held for two years. At the close of the term in 1843, he went to Boston, seeking a fortune, and secured employment at Ashland, (then Unionville), to learn the trade of a builder. For five years after completing his service he remained in Ashland, carrying on the lumber business and house carpentering. At this period his health was so seriously affected that for three years he was obliged to abandon all labors, but in 1856 had so far recovered as to begin in Marlborough upon a limited scale the lumber and contracting business in which he is still engaged. Mr. Cate about this time began the building and sale of dwellings on easy

terms, making it possible for the man with small means to thereby secure a home for himself and family.

Mr. Cate was a delegate to the first Free Soil convention in Worcester in 1848, has been a director in the People's National Bank of Marlborough and is now a director in the First National Bank and trustee of the Marlboro' Savings Bank. He has been a member of the United Brethren Lodge of F. & A. M. for thirty years.

Mr. Cate was instrumental in the advancement and building up of the lodge as much or more than any other one person, contributing his time and means to that end, which was gratifying to the members of the lodge. He is a charter member of the Houghton R. A. Chapter of Marlborough, and other societies.

August 25, 1857, Mr. Cate married Charlotte A., daughter of Mark and Sophia (Brigham) Fay, of Marlborough, who died in 1860, and their only child, a son, died the following year. In August, 1869, Mr. Cate married Adelle E. Glidden, of Lowell.

MARK FAY.

Mark Fay, son of Josiah and Hepsabeth (Collins) Fay, was born in Southborough, Worcester County, Massachusetts, January 29, 1798, and came to Marlborough about 1800. His opportunities for an education were limited to the common schools of that time. He learned the trade of a cabinet-maker and worked at his trade near what is known now as Williams Pond. He kept a country store such as was to be found in country towns in that period. In 1850 it was through his influence that the Marlborough Branch of the Fitchburg Railroad was built, and he contributed very largely of his time and means to carry on and complete this enterprise.

In 1860 the Marlborough Savings Bank was established through his efforts and he was its first treasurer.

In 1863 he secured the charter for the First National Bank of Marlborough, and was its first president and held that office until his death, which occurred June 29, 1876. Mr. Fay married Sophia Brigham in 1817, and they had three sons and four daughters.

HON. SAMUEL N. ALDRICH.¹

Hon. Samuel Nelson Aldrich, son of Sylvanus Bucklin and Lucy Jane (Stoddard) Aldrich, was born in Upton, Worcester County, February 3, 1838. His education was acquired at the Worcester, Massachusetts, and Stonington, Connecticut, Academies, and at Brown University, Providence, Rhode Island. Subsequently he taught school in Upton, Holliston and Worcester, Massachusetts. He commenced the study of law in the office of Hon. Isaac Davis and E. B. Stoddard, at Worcester, and finished at the Harvard

¹ From "One in One Thousand."

George M. Cate

Law School. In 1863 Mr. Aldrich was admitted to the bar and commenced practice at Marlborough. Since 1874 he has kept an office in Boston, though retaining his residence at Marlborough, living in Boston during the winter. In the public affairs of Marlborough Mr. Aldrich has been prominent, was for nine years a member of the School Committee, also for four years on the Board of Selectmen, officiating as chairman of both. He has been a director of the People's National Bank at Marlborough, president of the Marlborough Board of Trade, president of the Framingham & Lowell Railroad, (now a portion of the Old Colony system), and president of the Central Massachusetts Railroad.

In 1879 Mr. Aldrich was elected to the State Senate, where he served as chairman of the committee on bills in the third reading, and on the committee on constitutional amendments. In 1880 he was again a member of the State Senate. In 1883 he was a member of the House and served on the judiciary committee.

In 1880 he was the Democratic candidate for Congress from the Seventh Massachusetts District.

In March, 1887, Mr. Aldrich was appointed by President Cleveland the assistant treasurer of the United States at Boston, which position he resigned in November, 1890, to accept the presidency of State National Bank.

Besides this, he is a member of the Suffolk Bar, is in the practice of his profession, and is still president of the Central Massachusetts Railroad.

Mr. Aldrich married in 1865, at Upton, Mary J., daughter of J. T. and Eliza A. (Colburn) Macfarland. They have a son, Harry M. Aldrich.

HON. OBADIAH W. ALBEE.

Hon. Obadiah W. Albee was the son of Moses Albee, and was born in Milford, Massachusetts, March 24, 1808. His father was a farmer of limited means; he had an excellent reputation and was an honest man. Obadiah W. attended the district school and made good progress, and at eighteen years of age entered Milford Academy, and there fitted for college. He entered Brown University in 1828 and graduated in 1832. In college he was a member of the United Brothers Society, and in 1846 was chosen a member of the Phi Beta Kappa Society. He worked his way through college, having only twenty-five dollars to start with. His graduation theme was the "Prospects of Liberty in Europe." He came to Marlborough in the spring of 1833. In politics he acted with the Whigs (thinking them the most anti-slavery) till the Mexican War convinced him of their pro-slavery proclivities. He then acted partially with the old Liberty party, but used his best efforts, both by pen and speech, to form the Free Soil party which should unite the old Liberty men and the conscientious Whigs. In the session of 1849 he represented the town of Marlborough in the Legislature. Early in 1850 he sailed for California, going by the

way of Cape Horn, returning by the Isthmus in October, 1850. On arriving home he was returned to the House of Representatives, where he served through the memorable session in which Charles Sumner was first elected to the United States Senate. Mr. Albee was elected to the Massachusetts Senate for 1855 and 1857 as a Republican. In 1849 he was a member of the committee on elections. In 1855 he was the chairman of the committee on federal relations and public lands, also one of the library committee. His most extended legislative efforts, in speech-making, were the following: In 1849, on the anti-slavery resolutions; in which debate Mr. Upham, the presiding officer of the Senate, bore a distinguished part. In 1851, on the proposition for a liquor law; and in 1855, on the Loring address and personal liberty bill. Mr. Albee married Miss Margaret Chipman, and they had six children. He died in July, 1866.

DAVID GOODALL.

David Goodall was born April 1, 1791, married Millicent, daughter of Thaddeus and Lucy Warren. He was engaged in early life as a school teacher. He was a man of decided talents, entergetic in character and prominent in both church and town affairs. He held the office of Deacon and filled from time to time the principal offices in the town. He was a representative to the General Court and a justice of the peace. He died Oct. 17, 1858.

CHAPTER LXIV.

WILMINGTON.

BY WILLIAM L. DAVES.

Soon after the settlement of Charlestown the people feeling the need of more agricultural land applied to the General Court for the same and received a grant of territory four miles square which was called Charlestown village. On the 17th of September, 1642, it was ordered by the court that "Charlestown village be called Woodburne."

In September 1639 the inhabitants of Lynn petitioned the General Court "for a place for an inland plantation at the head of their bounds." In compliance with the petition a tract of land four miles square was granted with the condition "that the petitioners shall within two years make some good proceeding in planting so as it may be a village fit to contain a convenient number of inhabitants which may in due time have a church there." This tract of land was called "Linn village," and on the 29th of May, 1644, it was ordered by the court "that Linn village at the request of the inhabitants thereof shall be called Redding."

The territory of the town of Wilmington is nearly all within the limits of the old Charlestown village, only a narrow strip being a part of the old Lynn village. In 1724, the people living in that part of the town of Woburn which was called Goshen, asked the town either to remove the meeting-house to a spot more convenient to them or to allow them to be set off as a new town. Their request having been refused they applied to the General Court in 1729 for the establishment of a separate precinct and their application was rejected. In 1730 another application was made to be incorporated as a distinct town, and a committee of the General Court was appointed to meet the agents of the town, and consider the matter. The result was that on the 25th of September 1730, the General Court passed the following act incorporating parts of the territories of Woburn and Reading into a town with the name of Wilmington.

"An act for erecting the north-easterly part part of Woburn and westerly part of Reading into a township by the name of Wilmington.

"Whereas the inhabitants of the north-easterly part of the town of Woburn, and the westerly part of the town of Reading, in the county of Middlesex are so situated as to be very remote from the place of the public worship of God, in either of the said towns, many of them living near seven miles' distance therefrom, who also labour under other great difficulties and inconveniences on several accounts and have thereupon addressed this Court that they may be set off and erected into a separate and distinct township,—

"Be it therefore enacted by His Excellency the Governour, Council and Representatives in General Court assembled, and by the authority of the same.

"Sect. 1. That all the lands lying and being within the north-easterly part of Woburn, and westerly part of Reading aforesaid be and hereby are, set off and constituted a separate and distinct township by the name of Wilmington, according to the metes and bounds following, viz.: beginning at the South-easterly part of the Land of Nod, so called, so to extend to Andover line; thence to Bilerica line, and so upon said line, including Abraham Jaques' his farm, and so to run from thence on Bilerica line one hundred rods further; and from thence to extend to the Stone bridge, called the Cold Spring Bridge, near the tree called the Figure of Four Tree; thence on a line to the South-easterly corner of John Townsend's land, lately and now in the possession of Timothy Townsend, about sixty-four rods easterly from Woburn line, including said Townsend's land; thence on a straight line to the south-east part of the land of Joel Jenkins; and from thence to extend to the first-mentioned bounds.

"And be it further enacted,

"Sect. 2. That the inhabitants of the said town of Wilmington shall be liable nevertheless, and subject to pay their just proportion of their past dues to all province, county and town rates, for this present year, in the towns to which they respectively belonged, and shall be accordingly assessed in such town in the same manner as they would have been if this act had not been made.

"Sect. 3. And the inhabitants of the said town of Wilmington are hereby required, within the space of three years from the publication of this act, to procure and settle a learned orthodox minister of good conversation, and make provision for his comfortable and honourable support; and also with all convenient speed erect and finish a suitable and convenient house for the publick worship of God in said town.

"Sect. 4. And the said town of Wilmington is hereby accordingly endowed and vested with all powers, privileges, immunities and advantages, which other towns in this province by law have and enjoy." (Passed and published at Cambridge Sept. 25, 1730)

The territory included within the limits of the new town was small and its population was scattered. The lands were good for agricultural purposes and the people occupying them were almost exclusively farmers. Like other scattered settlements, that in the out-lying districts of Woburn had suffered from

Indian depredations, but at the time of the formation of the new town, comparative peace prevailed, only to be disturbed by the French and Indian Wars, which, a few years later, again threatened it.

In obedience to the requirements of the act of incorporation, a meeting-house was erected in Wilmington in 1732, and a church with seventeen male members was organized October 24, 1733. Wilmington was one of the few towns incorporated at an early period, in which a separate precinct did not anticipate a new municipal organization. It would, however, have been no exception to the general rule had its repeated requests to the town of Woburn and to the General Court been listened to and granted. It was an out-lying village of its mother-town, as its mother-town had been an out-lying village of Charlestown, and the General Court believed that any substantial arguments in favor of a new precinct were quite as strong in favor of the incorporation of a new town.

On the day of the formation of the church Rev. James Varney was ordained as its pastor. Mr. Varney was a native of Boston, where he was born August 8, 1706, and graduated at Harvard in 1725 in the class with Rev. Mather Byles and Rev. Benjamin Bradstreet. In the Harvard catalogue of the period when names were inserted in the order of their social family rank, the name of Mr. Varney is the thirty-third in a class of forty-five. Mr. Varney was dismissed April 5, 1739, on account of ill health and was succeeded by Rev. Isaac Morrill, who was ordained May 29, 1741. Mr. Morrill graduated at Harvard in 1737 in the class with Peter Oliver, Rev. Peter Thacher, Rev. Andrew Eliot and Ebenezer Gay. In the social order Peter Oliver stood at the head of the class, with John Eliot second and Mr. Morrill the twenty-fourth in a list of thirty-four. Mr. Morrill continued in the pastorate until his death, which occurred August 17, 1793, at the age of seventy-six. During his pastorate he served as chaplain in the French Wars, in which also were a number of his parishioners as soldiers, of whom Capt. Ebenezer Jones and fourteen others are known to have been killed.

Mr. Morrill was succeeded by Rev. Freegrace Reynolds, who was ordained October 29, 1795, and remained until June 9, 1830. He afterwards preached in Leverett in Franklin County, Massachusetts, and other places, and finally returned to Wilmington, where he resided until his death, December 6, 1855, at the age of eighty-eight years. During his pastorate in 1813 a new meeting-house was erected, to take the place of the old one built in 1732.

Rev. Francis Norwood, who followed Mr. Reynolds, was installed May 18, 1831, and continued in the pastorate until October 25, 1842.

Rev. Barnabas M. Fay succeeded Mr. Norwood and was installed April 23, 1845. He remained until July 30, 1850, and was followed by Rev. Joseph E. Swallow on the 26th of March, 1851. Mr. Swallow

was dismissed January 1, 1856, and was succeeded by Rev. Samuel H. Tolman, who was ordained August 14, 1856, and was dismissed June 7, 1870. During the pastorate of Mr. Tolman, in February, 1864, the meeting-house of the society was burned and the present house of worship was erected.

Rev. Benjamin A. Robie was installed April 13, 1871, and dismissed April 9, 1874. Rev. S. S. Mathews succeeded Mr. Robie October 23, 1874, and after his dismissal, which occurred October 29, 1875, Rev. Daniel P. Noyes was installed October 11, 1877. Mr. Noyes was succeeded by Rev. Elijah Harmon, the present pastor.

In 1832, a Methodist Society was organized, and a church erected near the centre of the town. The Rev. William Thurston is its present pastor.

A Catholic Church was built at the Centre in 1887, and is occupied by a society under the care of the Andover pastorate.

In 1840, a Free Will Baptist Society was organized, and in 1841, a meeting-house was erected. The society was, for a few years, under the care of Elder John M. Durgin, but was finally dissolved, and its meeting-house sold to the town for town purposes, to which it is still devoted.

The early occupation of farming has always been continued up to the present time; according to the census of 1885, its products annually were as follows:

Animal products consisting of calf skins, hides, honey, manure, pelts and wool, \$4520.

Clothing including shirts and shoes, \$513.

Dairy products including butter, cream and milk, \$14,114.

Food products including canned fruit, catsup, dried fruit, ice, pickles and vinegar, \$828.

Tomato plants, \$17.

Liquors and beverages including cider and wine, \$954.

Poultry products including eggs, feathers, manure and poultry, \$4820.

Wood products including ashes, fence rails, fuel, hop poles, lumber and posts, \$6846.

Axe handles, \$7.

Hops, seeds and soft soap, \$78.

Cereals including buckwheat, corn and rye, \$1509.

Fruits including apples, barberries, blackberries, blueberries, butternuts, cherries, chestnuts, citron, crab-apples, cranberries, currants, gooseberries, grapes, huckleberries, mangoes, melons, pears, plums, quinces, raspberries, shellbarks, strawberries and thimbleberries, \$8337.

Hay, straw, fodder, stock beets and turnips, \$6,411.

Meats and game including beef, pork, mutton and veal, \$4160.

Vegetables including asparagus, beans, beets, cabbages, carrots, cauliflower, celery, green corn, cucumbers, dandelions, lettuce, onions, oyster-plant, parsnips, peas, peppers, potatoes, pumpkins, radishes, rhubarb, squashes, tomatoes, turnips, etc., \$7653.

The property of the town exclusive of money, stocks and bonds was according to the census as follows:

	Value.
Hay land, 1061 $\frac{1}{4}$ acres	\$25,181
Crop land, 402 acres	7755
Orchard land, 62 $\frac{1}{2}$ acres	29,238
Pasture land, 1347 acres	25,968
Unimproved land, 1730 $\frac{1}{2}$ acres	100
Unimprovable land, 14 acres	1955
Mines, etc., 52 $\frac{3}{4}$ acres	122,837
Woodland, 4901 $\frac{1}{4}$ acres	141,000
Dwellings, 151	13,084
Barren, 12 $\frac{1}{2}$	

Other buildings, 274	22,492
Machines and implements	20,447
Domestic animals	36,867
Fruit trees and vines	1,000

Making an aggregate of products of \$29,000, and of property of \$628,046.

Among the products, the chief items were milk, \$16,540; eggs, \$3528; fuel, \$3853; apples, \$1630; cranberries, \$5537; English hay, \$9060; fresh hay, \$3594; pork, \$1904; beef, \$1439; and potatoes \$3939. The cultivation of cranberries has increased since the above census was taken, and the probable product of that article at the present time is about three thousand barrels, valued in the Boston market at twenty-four thousand dollars. The town has opportunities for a still further increase of this product, which cannot fail to aid its growth in population and wealth. The demand for cranberries is yet in its infancy, and wherever they can be grown, there is no fear that the supply will exceed it. There is no industry which circulates money with a more far-reaching hand than the cranberry industry, or one which promises better results in towns where it can be conducted. In the first place, at the very time when woodland has sunk in value to its lowest point, the swamps and shallow ponds scattered through it, before valueless, are converted into properties worth a thousand dollars an acre, and then in the annual management of these properties, there are to be paid for in cash, care, and superintendence, barrels, and their cooperage; carting, picking and packing, all distributing money to men, women and children in every needy family, and actually furnishing means of better living, which could in no other way be secured.

It is not many years since considerable attention was paid to raising apples, but with the exception, perhaps, of Mr. Henry Sheldon, one of the prominent men of Wilmington, none of the farmers of the town have either planted new orchards of any importance, or even done much to revive the old ones. It is well known that the Baldwin apple originated in Wilmington, the first tree of that variety having grown on the farm of James Butters, which became known to Loammi Baldwin, of Woburn, who cut scions from it, and gave it both its reputation and name.

Besides the farming interests, there is little to give occupation to the people of the town. At the present time the shoe business is not carried on, though it is expected that an establishment will be soon located there. The tannery of Perry, Converse & Co., at North Wilmington, the Merrimack Chemical Works and the ice business are the only industries worthy of mention. The time cannot be far distant, however, when activity and prosperity will prevail. The location of the town is about sixteen miles from Boston, and between that city and Lowell, about the same distance from Salem, and not far from Lawrence, and with the Boston and Lowell, the Boston and Maine, the Salem and Lowell, and the Lawrence Branch Railroads traversing its territory,

it certainly seems favorably situated for business and growth. But whether or not it shall ever have any large increase of local industries, it is apparent that the overflow of population from Boston must, in time, reach and flow into it. Its population which in 1880 had only increased to 933 from 879 in 1875, has increased to 1250 in 1890, as is shown by the census of this year.

The schools of Wilmington reflect credit on a town with so small a population and valuation. With a population of 1250, and a valuation of \$761,762, and 186 children between the ages of five and fifteen, one high-school, one grammar and six schools of a lower grade are maintained at a cost in 1889, of \$3,225.94. That a town so far from the point in population where the law requires the establishment of a High School, should have voluntarily burdened itself with the needed taxation for its maintenance, shows the high character of the people and their appreciation of the benefits to be derived from a more thorough education than the common schools can furnish. The course of study in the High School embraces Geometry, Rhetoric, Civil Government, Latin, French, Composition, Drawing, Algebra, Physics, Physiology, United States History, English History and Music. The School Committee for 1889 were, Charles W. Swain, Frank Carter and Richard L. Folkins.

The expenditures of the town for the last year in its various departments were as follows: for cemetery, \$312; town officers, including police and fire wardens, \$975.50; miscellaneous, \$469.80; poor, \$1447.72; highways, \$2291.84; public buildings, \$336.31; schools and supplies, \$3572.69; library, \$144.78; piano, \$200; common, \$40; public well, \$104.69; town debt, \$1941.56; State tax \$429.77; county tax, \$496.16; State aid \$192, making a total of \$12,954.82.

The item of a public well in the above list indicates that the town has no system of water-works. Its inhabitants are supplied with water from wells. It would be interesting if some comparison could be made of the death-rates in those towns supplied with water from wells with those in towns supplied from ponds or streams, and an analysis of the prevailing diseases in the two classes of towns. The writer has no data at hand for such a comparison, except so far as his own town (Plymouth) is concerned, which has water-works, and where, in 1889, the number of deaths was one and a half per cent. of the population against one and eight-tenths in Wilmington. So far as the causes of death are concerned, it is to be remarked that while in the lists of deaths throughout the State, about fourteen per cent. are caused by consumption, in Wilmington, in 1889, only one in twenty-two died of that disease. There may be a suggestion here worth following up, in order to discover, if possible, the remarkable exemption from a disease which commits such terrible ravages in the population of the Northern States of our nation.

In the War of the Rebellion the town of Wilmington performed its full share in rescuing our Union from dissolution. It is stated that the quota of the town was ninety and that the number was filled. The writer finds on the books of the adjutant-general the names of fifty-six credited to the town, but to these are to be added those who entered the naval service and the share belonging to the town of that large number of negroes and others who were credited to the State and divided among the towns. The following is a list of those whose names appear in the report of the adjutant-general with their rank and with the company and regiment to which they were attached and the term for which they enlisted:

Enlisted for nine months in Company D, 50th Regiment of Massachusetts Volunteers. Levi Swain, sgt.; Edward D. Pierson, sgt.; James P. Morton, corp.; Privates, George Bancroft, Henry L. Bancroft, Jr., Edwin Blanchard, Daniel W. Case, Henry W. Eames, Wm. Fottis, Gayton Gowing, Otis Harnden, John L. Howard, George Milligan, Daniel N. Pearson, George O. Pearson, Ambrose Upton.

Fourteenth Light Artillery, for three years; Privates, Charles A. Nichols, Sydney White.

Fifteenth Light Artillery, for three years: Simeon Jaquith, sgt.

First Battalion of Heavy Artillery, Company E, three years: Privates, Charles M. Buck, Horace Eames, Gilman Gowing, George E. Orcutt, George W. Sidelinker.

Third Cavalry, Company K, three years: Privates, Frank F. Abbott, B. F. Upton.

Fourth Cavalry, Company E, three years: Private, Marcus M. Bancroft.

Fourth Cavalry, Company F, three years: Corp., Henry F. Thompson.

Fifth Battalion, Frontier Cavalry, Company D, three years: Andrew B. Munroe, saddler.

Second Regiment of Massachusetts Volunteers, Company I, three years: Theodore S. Butters, corp.; John H. Whitehouse, mus.; Privates, George M. Bailey, Thomas A. Bancroft, James O. Carter, Thomas B. Flagg.

Thirteenth Regiment of Massachusetts Volunteers, Company G, three years: Private, Marcus M. Bancroft.

Sixteenth Regiment of Massachusetts Volunteers, Company F, three years: George N. Chase, mus.

Twenty-second Regiment of Massachusetts Volunteers, Company F, three years: Private, James Hale.

Twenty-sixth Regiment of Massachusetts Volunteers, Company D, three years: Privates, Peter Alexander, Alanson Bond, John Wilson.

Twenty-ninth Regiment of Massachusetts Volunteers, Company D, three years: Private, Albert V. Lancaster.

Thirty-third Regiment of Massachusetts Volunteers, Company D, three years: Privates, Albert Brown, George F. Eames, Frederick Lewis, David G. Pierce, James H. Swain.

Fifty-eighth Regiment of Massachusetts Volunteers, Company K, three years: Private, John Andrews.

Fifty-ninth Regiment of Massachusetts Volunteers, Company B, three years: Privates, Robert G. Alludio, Peter Crook.

Fifty-ninth Regiment, Company C, three years: Private, Michael Bracken.

Fifty-ninth Regiment, Company D, three years: Private, Ambrose Upton.

Veteran Reserve Corps: Private, Wm. H. McKinney.

Regular Army: Private, John R. Nichols, Jr.

Among the eminent men born in Wilmington may be mentioned Timothy Walker, and his brother Sears Cook Walker. Timothy Walker was born December 1, 1802, and graduated at Harvard, in 1826. After leaving college he taught three years in the Round Hill School at Northampton, and in 1829 entered the Dane Law School at Cambridge, where he remained one year. In 1830, he continued his studies in Cin-

cinnati, and was admitted to the bar in 1831. In 1833, in connection with Judge John C. Wright, he established a law-school in Cincinnati, which in 1835 was united with the college there. He continued a professor in the college until 1844. He was at one time Judge of the Hamilton County Court of Common Pleas, and Editor of the Western Law Journal. He was author of "Introduction to American Law," a "Treatise on Geometry," and other works. He died in Cincinnati, January 15, 1856.

Sears Cook Walker, was born March 28, 1805, and graduated at Harvard, in 1825. After graduating, he taught school in Boston and Philadelphia, to which latter place he removed in 1827. In 1834, he prepared parallax tables for use in computing phases of an occultation, and in 1837, drew up a plan for the organization of an observatory in connection with the Philadelphia High School. From 1840 to 1852, he published observations and investigations made by himself, and in 1841, published a memoir of the periodical meteors of August and November. In 1845, he was placed in the Washington observatory where he made valuable observations and discoveries. While Alexander Dallas Bache, had charge of the coast survey, Mr. Walker in connection with him carried out the method of telegraphic longitude determinations, and introduced the chronographic method of recording observations. He died in Cincinnati, January 30, 1853.

Among the citizens of Wilmington during the present and last generation who have been prominent in town affairs may be mentioned William Henry Carter, W. J. S. Marsh, Otis Carter, Edward A. Carter and Henry Sheldon among the living, and Dr. Henry Hiller, Samuel Nichols, Cyrus L. Carter, Henry Ames and Joseph Ames among the dead.

Twelve or fifteen years ago a Public Library was established in the town which has well served to supplement the public schools and to enable the graduates of those schools to keep alive their thirst for knowledge, and constantly add to its store. According to the report for 1889, the number of books in the library at the end of the year was 1590, and the number taken out during the year, 2027. The payments by the treasurer on account of the library during the year were: for new books, \$99.91; covering and repairing books, \$4.45; salary of librarian, \$25; and sundry items, 10.93.

The Board of Selectmen for the year 1890 consists of Edward A. Carter, chairman; Howard Eames and James Kelley; Henry Blanchard, Jr., is treasurer, and Edward M. Nichols, town clerk.

The officers of the town for the last year were:

J. Howard Eames, Henry Buck, Nathan B. Eames, selectmen, overseers and assessors.

Edward M. Nichols, town clerk.

Henry Blanchard, treasurer.

Edward M. Nichols, collector.

Wm. H. Carter, Warren Eames, Fred A. Eames, auditors.

Daniel C. Norcross, constable.

Charles J. Sargent, Henry L. Carter, George N. Buck, special police.

J. Howard Eames, Henry Buck, Nathan B. Eames, fence viewers.

Edward N. Eames, Warren Eames, John Bailey, George W. Seidel, inkers, Charles E. Carter, field drivers.

Henry B. Nichols, Edward A. Carter, James E. Kelley, Henry Sheldon, Howard M. Horton, measurers of wood and bark.

Herbert N. Buck, Edward M. Nichols, Josiah O. Jaqueth, public weighers.

James A. Baxter, pound keeper.

James E. Kelley, measurer of leather.

Edward M. Nichols, Henry Hiller, Henry Sheldon, cemetery committee.

Charles H. Hudson, Charles M. Gowing, Otis C. Buck, Common Committee.

Richard L. Folkins, Charles W. Swain, Frank Carter, school committee.

Arthur O. Buck, Librarian.

Jonathan Carter, Dr. D. T. Russell, Charles W. Swain, Henry Ames, Otis Gowing, Edgar N. Eames, trustees of Public Library.

Edward M. Nichols, sealer of weights and measures.

Arthur N. Fetzette, superintendent of almshouse.

Edward M. Nichols, undertaker.

Levi Swain, George E. Carter, Daniel C. Norcross, George T. Eames, Charles F. Harris, fire and forest wardens.

Ariel P. Pearson, Dia. No. 1, Wm. H. Carter, Dia. No. 2, Otis Gowing, Dia. No. 3, J. Henry Buck, Dia. No. 4, Henry Buck, Dia. No. 5, John Bailey, Dia. No. 6, Charles Hopkins, Dia. No. 7, Walter D. Carter, Dia. No. 8, Arthur N. Fetzette, Dia. No. 9, Wm. H. Boutwell, Dia. No. 10, Edward Meads, Dia. No. 11, George Milligan, Dia. No. 12, Sylvester Carter, Dia. No. 13, surveyors of highways.

Charles J. Sargent, Thomas McGuan, inspectors of ballots.

Othnel Eames, Dennis McGuire, deputy inspectors.

The town publishes once in ten years a list in detail of the real and personal estates taxed, with the assessed valuation. The following is a recapitulation of the valuation for 1890:

Value of real estate liable to taxation	\$460,000.00
Value of personal estate liable to taxation	5,000.00
Value of real and personal estate exempt from taxation	21,000.00
Total valuation	\$444,000.00
Number of acres assessed	1,000
Number of acres exempt	100
Total number of acres	1,100
Total number of polls assessed	47
Dwelling-houses	180
Barns	180
Saw-mills	1
Stores	1
Blacksmith-shops	1
Ice-houses	17
Slaughter-houses	1
Wind-mills	1
Churches	3
School-houses	6
Other buildings	203
Horses	12
Oxen	12
Cattle	25
Sheep	1
Swine	44
State tax	000.00
County tax	1.00
Town tax	000.00
RATE OF TAXATION \$14 per \$1000.	

APPENDIX.

VOLUME I.—CAMBRIDGE.

HARVARD BRIDGE.

BY JOHN LIVERMORE.

The history and description of bridges connecting Cambridge and Boston over the Charles River is not complete without some notice of the Harvard Bridge just finished, although not yet opened for public travel, owing to an unfortunate disagreement between the two cities as to the manner of crossing the track of the Grand Junction Railroad, over which the bridge must cross, either at grade, or by an overhead bridge, and as the question is still undecided, and is a subject of much bitter feeling, no opinion will be given on the general merits of the question, but only the hope that the controversy will be settled soon to the satisfaction of all the parties concerned.

In order to a right understanding of the causes and necessities that led to the building of this structure at the present time, and the reasons for its location where it is, we must go back for more than fifty years and see how step by step the present result has been reached.

In the year 1828 the Legislature of Massachusetts considered the subject of purchasing all the bridges over Charles River for the purpose of freeing them before their charters would legally expire, which led to a prolonged controversy in which the relations between the public and the rights of corporations received essential modifications; but no action was taken on the subject until 1836, when a charter was granted to the "*Hancock Free Bridge Corporation*" to enable them to build a bridge over Charles River at some point between Cragies and West Boston Bridge or to purchase one or both bridges for the purpose of making them free, but owing to the pecuniary distress which prevailed in 1836 and 1837, the money could not be raised to conclude the purchase. The scheme failed for the time, but in 1846 they received a second charter enabling them to not only purchase the two bridges, but to maintain them as toll bridges until a fund of \$150,000 should be raised to keep them in repair and then they were to be free forever, and so the question of a *new bridge* was postponed for the time.

For more than twenty-five years the necessity of a new road from Cambridgeport to Boston had been agitated and discussed, but from various causes not-

ing was done until the year 1887, when the Legislature passed a compulsory act apportioning the cost equally between the two cities. From the first Boston was reluctant to proceed with the work and did not enter into the enterprise with either zeal or spirit, but apparently with regret that they were legally bound to do their part. The work, however, was commenced and the mayors of the two cities and Leander Greely (a practical artisan) were appointed commissioners to superintend the building thereof, which they have done.

The new avenue could be opened for travel as soon as the question is definitely settled about the crossing of the track of the Boston and Albany Railroad.

The question of the locality of the bridge was settled without much difficulty and amicably at last. When the question was before the public, when it was first agitated, no one would have thought of locating it so far south; but since that time the business and population of Boston has been rapidly tending towards the "South End," and that part of Cambridgeport now known as Ward Four has been developed, and is fast becoming the most populous portion of the city, and there were not found wanting citizens who advanced a still more southerly location.

As has been stated the bridge, was built by special act of the Legislature, which was a compulsory act, and apportioned the cost equally between the two cities of Boston and Cambridge, and \$500,000 was set apart for its construction. The bridge is 2157 feet in length, 70 feet wide, and 14 feet above mean high water; the draw is 135 feet long and 60 feet wide, and is located in the centre of the structure. It is to be operated by an electric motor. There are ten spans to the bridge, on each side of the draw alternating regularly between 105 and 75 feet in width. The piers support girders 105 feet long, between every two of which hangs a 75-foot girder loosely linked to the other one at each end, so as to provide for the natural expansion. There are also two spans 90 feet in length on either side adjoining the draw, and an extra span at the Cambridge end. The iron girders were constructed by the Boston Bridge Works, the different sections being brought from the works on Sixth Street, Cambridgeport, upon huge drays drawn by six yokes of oxen to the water-side, and there put together and towed to the bridge by lighters.

The contract of the Boston Bridge Company was \$161,900, while the masonry piers built by Shields & Carroll, of Toronto, Canada, were contracted for at \$122,820, the masonry abutments by W. H. Ward \$15,900, the draw foundations and pier by Boynton Brothers \$26,875, the spruce lumber by Wm. G. Barker, the wooden flooring by W. H. Keys & Company, the spruce posts by Miller & Shaw, the roadway sheathing by Alexander McInnis and the iron railing by the Manley Manufacturing Company, of Dalton, Ga.

When this new avenue is once opened to the public and the several approaches to it improved, and put in order, it will without doubt be the finest and most attractive avenue from the city to the suburban towns in the vicinity, the direct route to the University, Mount Auburn, the Washington or Longfellow Mansion, Elmwood, the home of Lowell, and other residences of distinguished persons, and it is also the great highway to Lexington and Concord—places of great historic interest, so much visited by strangers from all parts of the world.

VOL. I. CAMBRIDGE.

William E. Russell was elected Governor of Massachusetts November 4, 1890.

VOL. II. LINCOLN.

William Francis Wheeler died October 10, 1890, aged seventy-eight years, seven months.

VOL. III. WALTHAM.

Sherman Hoar was elected member of Congress November 4, 1890.

ERRATA.

Page 29, vol. II, first column, first line, "Harriet De War" should read "Mary De War."

Page 181, vol. III, second column, twenty third line from bottom, "John Wayer" should read "John Wasté."

Page 198, vol. III, second column, twenty third line from top, "omnious" should read "ominous."
